

PRESS RELEASE

OFFICE OF THE COMPTROLLER AND AUDITOR GENERAL OF INDIA

New Delhi

10th November, 2025

MoU signed between CAG Office and Digital India Bhashini Division (DIBD)

A Memorandum of Understanding (MoU) was signed here today between the Office of the Comptroller and Auditor General of India and the Digital India Bhashini Division (DIBD), Digital India Corporation, Ministry of Electronics and Information Technology, Government of India, for implementing, administering, and managing a multimodal (text, numbers, voice, images, and videos), multilingual translation AI platform, BHASHINI for ease of communication.

The Bhashini AI platform allows translation of text, numbers, voice, images, and videos in a secure cloud environment. It will be deployed across more than 200 C&AG offices. Bhashini will also introduce AI services to detect AI usage in report generation and identify plagiarism in offices. It will develop a workflow system for translating reports, surveys, and evidence at various stages of the IAAD's report preparation process, and for vetting translated, transcribed, transliterated, and trans-modal communications produced by the Bhashini app for different offices of the C&AG.

It is important to emphasise that a multilingual, multimodal AI-enabled communication application on the Bhashini platform will make communication easier and be highly useful for engaging with Parliamentary Committees, government employees for entitlement functions, grievance redressal, stakeholders, and vernacular media whenever necessary.

The MoU was signed by Shri Bhawani Shankar DG (Rajbhasha), on behalf of CAG and Shri Amitabh Nag, CEO of Digital India Bhashini Division (DIBD).

Signing of MoU between Shri Bhawani Shankar DG (Rajbhasha), C&AG office and Shri Amitabh Nag, CEO DIBD.
