# Audit Documentation

## Background

This Practice Note provides supplementary guidance on ISA 230 – Audit Documentation. It is read together with the ISA. ISA 230 is effective for audits of financial statements for periods beginning on or after December 15, 2009. The Practice Note is effective the same date as the ISA.

## Introduction to the ISA

ISA 230 deals with the auditor's responsibility to prepare audit documentation for an audit of financial statements. The Appendix in the ISA lists other ISAs that contain specific documentation requirements and guidance. The specific documentation requirements of other ISAs do not limit the application of this ISA. Law or regulation may establish additional documentation requirements.

## Content of the Practice Note

- P1. The Practice Note provides additional guidance for public sector auditors related to:
- (a) Documentation of the Audit Procedures Performed and Audit Evidence Obtained.
  - (b) Assembly of the Final Audit File.
  - (c) Confidentiality and Transparency Issues.
  - (d) Specific Considerations regarding Documentation for Public Sector Auditors with a Judicial Role.

## Applicability of the ISA in Public Sector Auditing

- P2. ISA 230 is applicable to auditors of public sector entities in their role as auditors of financial statements.

---

<sup>1</sup> All Practice Notes are considered together with ISSAI 1000 "General Introduction to the INTOSAI Financial Audit Guidelines."

## Additional Guidance on Public Sector Issues

### Documentation of the Audit Procedures Performed and Audit Evidence Obtained

- P3. Paragraph 8(c) of the ISA requires the auditor to prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand significant matters arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions. Paragraph A8 of the ISA explains that judging the significance of a matter requires an objective analysis of the facts and circumstances, and provides examples of significant matters. Public sector auditors may be required to report on a broad range of significant matters which may not be part of their report on the financial statement audit, or matters that may not result in material misstatement of the financial information or related disclosures. Examples of such matters include lack of compliance with legislation or approved mandate, violations of contract provisions or grant agreements, unauthorized or inappropriate expenditures, execution of the budget, certification of the annual deficit/surplus, assessments of program funding and costs, and information on performance indicators.

### Assembly of the Final Audit File

- P4. Paragraph 14 of the ISA requires the auditor to assemble the audit documentation in an audit file and complete the administrative process of assembling the final audit file on a timely basis after the date of the auditor's report. Paragraph A21 of the ISA explains that not more than 60 days after the date of the auditor's report is ordinarily an appropriate time limit within which to complete the assembly of the final audit file. In the public sector, the finalization process leading up to the date of the auditor's report may be lengthy. This may be as a result of formal consultation procedures with the entity or others. However, this does not preclude assembly of the final audit file on a timely basis.
- P5. Paragraph A23 of the ISA makes reference to the International Standard on Quality Control (ISQC) 1<sup>2</sup>, which requires audit organizations to establish policies and procedures for the retention of engagement documentation. As paragraph A61 of ISQC 1 indicates, the retention period is ordinarily not shorter than five years from the date of the auditor's report. In the public sector, there may be public sector requirements to retain audit documentation for shorter or longer periods. These requirements may be due to the historical significance of certain types of documents which, for example, may require indefinite retention in the country's national archives. There may also be additional requirements related to national security classifications, including how documentation is stored. Public sector auditors familiarize themselves with applicable legislation in regard to retention of documentation.

---

2 ISQC 1, "Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements."

## Confidentiality and Transparency Issues

- P6. While ISA 230 does not address the issues of confidentiality, safe custody, integrity, accessibility and retrievability of documentation at the engagement level, they are dealt with in ISQC 1 in the context of an audit organization's responsibilities. Paragraph A56 of ISQC 1 requires that relevant ethical requirements establish an obligation for the personnel of the audit organization to observe at all times the confidentiality of information contained in engagement documentation, unless specific authority has been given by the entity to disclose such information, or there is a legal or professional duty to do so.
- P7. A fundamental difference between the private and public sector is that there may be specific legislative requirements in the public sector related to confidentiality on the one hand, and access by third parties on the other hand. There is an ongoing need in the public sector to balance confidentiality with the need for transparency and accountability.
- P8. The balance between confidentiality and transparency requires professional judgment to ensure that documentation of a confidential nature is clearly identified and treated as such, while at the same time granting access as appropriate. It is therefore important to be familiar with the Supreme Audit Institution's policies and procedures addressing confidentiality. Such procedures might include types of audit documentation to be considered confidential, types of audit documentation to be made available to the public, clearly defined lines of responsibility for authorizing disclosure of audit documentation and routines for making such information available if required.
- P9. Furthermore, public sector auditors may have additional statutory responsibilities related to confidentiality. These responsibilities may be based on the mandate of the particular Supreme Audit Institution, or legislation related to official secrets or privacy. Such legislation, for example, could relate to audits of defense, health, social service or tax agencies. Public sector auditors familiarize themselves with the particular local requirements related to confidentiality to which they are bound.
- P10. Public sector auditors also familiarize themselves with any legislation that grants public access to audit correspondence, for example where electronic or other post journals are open to public scrutiny. This type of correspondence may include letters to and from the audited entity, or other parties, related to the gathering of audit evidence, as well as considerations and judgments related to audit issues.
- P11. It is not unusual in the public sector to have to respond to requests from outside parties to obtain access to audit documentation. This can be especially sensitive when the outside party attempts to obtain information indirectly from the audit organization that it is unable to obtain directly from the audited entity.
- P12. As a matter of principle, when the audited entity has a statutory obligation to gather and retain certain information, requests from outside parties for such information are normally referred to the audited entity.

- P13. In situations where public sector auditors consider granting access to audit documentation, they normally consult with relevant parties (such as the audited entity to whom the request relates) prior to the information being disclosed. In such cases the public sector auditor ensures that those with access adhere to at least the same level of confidentiality as the public sector auditor.
- P14. In some environments, public sector audit work is contracted out by the Supreme Audit Institution to other auditors. The acceptance of such appointments normally requires the auditor performing the work to acknowledge that audit documentation may be subject to inspection by the Supreme Audit Institution that appointed the auditor. The audit documentation may also be subject to inspection by review agencies that have statutory rights of access to information relevant to the auditor's duties.

### Specific Considerations regarding Documentation for Public Sector Auditors with a Judicial Role

- P15. In some public sector environments, such as in a Court of Accounts environment, public sector auditors may be subject to laws and regulations requiring the auditors to understand and follow precise documentation procedures related to rules of evidence. Public sector auditors familiarize themselves with policies and procedures describing additional requirements relating to audit documentation and that are designed to ensure compliance with applicable rules of evidence. The following matters may affect documentation and are considered by the auditor:
- Legislation imposing additional requirements on audit documentation;
  - The scope of such requirements (i.e. are they to be imposed on every document from the audit assignment or on specific documents relating to certain audit issues);
  - Additional processing, formalities or requirements to which audit documents are subject;
  - The purpose of each additional requirement as regards due process of law in following the steps of the audit; and
  - Any further impairment that may be placed upon audit documentation due to specific ways it has been collected and/or produced.
- P16. For public sector auditors with a judicial role, such as a Court of Accounts, documentation forms part of the basis of the official ruling. In such an environment, due process of law may establish specific and strict requirements to be adhered to in regard to confidentiality of documentation in connection with the proceedings of a case. Additionally, as decisions may result in a legally binding public credit, there may be additional documentation retention requirements to which public sector auditors adhere.
- P17. Public sector auditors operating in such environments addressed in paragraph P15 above familiarize themselves with relevant laws and regulations in this respect.

*International Standard on Auditing*

# Audit Documentation

**International Federation  
of Accountants**

International Auditing and Assurance Standards Board  
International Federation of Accountants  
545 Fifth Avenue, 14<sup>th</sup> Floor  
New York, New York 10017 USA

This International Standard on Auditing (ISA) 230, “Audit Documentation” was prepared by the International Auditing and Assurance Standards Board (IAASB), an independent standard-setting body within the International Federation of Accountants (IFAC). The objective of the IAASB is to serve the public interest by setting high quality auditing and assurance standards and by facilitating the convergence of international and national standards, thereby enhancing the quality and uniformity of practice throughout the world and strengthening public confidence in the global auditing and assurance profession.

This publication may be downloaded free of charge from the IFAC website: <http://www.ifac.org>. The approved text is published in the English language.

The mission of IFAC is to serve the public interest, strengthen the worldwide accountancy profession and contribute to the development of strong international economies by establishing and promoting adherence to high quality professional standards, furthering the international convergence of such standards and speaking out on public interest issues where the profession’s expertise is most relevant.

Appendix: Specific Audit Documentation Requirements in Other ISAs	

International Standard on Auditing (ISA) 230, “Audit Documentation” should be read in conjunction with ISA 200, “Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing.”

## Introduction

### Scope of this ISA

1. This International Standard on Auditing (ISA) deals with the auditor's responsibility to prepare audit documentation for an audit of financial statements. The Appendix lists other ISAs that contain specific documentation requirements and guidance. The specific documentation requirements of other ISAs do not limit the application of this ISA. Law or regulation may establish additional documentation requirements.

### Nature and Purposes of Audit Documentation

2. Audit documentation that meets the requirements of this ISA and the specific documentation requirements of other relevant ISAs provides:
  - (a) Evidence of the auditor's basis for a conclusion about the achievement of the overall objectives of the auditor;<sup>1</sup> and
  - (b) Evidence that the audit was planned and performed in accordance with ISAs and applicable legal and regulatory requirements.
3. Audit documentation serves a number of additional purposes, including the following:
  - Assisting the engagement team to plan and perform the audit.
  - Assisting members of the engagement team responsible for supervision to direct and supervise the audit work, and to discharge their review responsibilities in accordance with ISA 220.<sup>2</sup>
  - Enabling the engagement team to be accountable for its work.
  - Retaining a record of matters of continuing significance to future audits.
  - Enabling the conduct of quality control reviews and inspections in accordance with ISQC 1<sup>3</sup> or national requirements that are at least as demanding.<sup>4</sup>
  - Enabling the conduct of external inspections in accordance with applicable legal, regulatory or other requirements.

---

<sup>1</sup> ISA 200, "Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing," paragraph 11.

<sup>2</sup> ISA 220, "Quality Control for an Audit of Financial Statements," paragraphs 15-17.

<sup>3</sup> ISQC 1, "Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements," paragraphs 32-33, 35-38, and 48.

<sup>4</sup> ISA 220, paragraph 2.

## **Effective Date**

4. This ISA is effective for audits of financial statements for periods beginning on or after December 15, 2009.

## **Objective**

5. The objective of the auditor is to prepare documentation that provides:
  - (a) A sufficient and appropriate record of the basis for the auditor's report; and
  - (b) Evidence that the audit was planned and performed in accordance with ISAs and applicable legal and regulatory requirements.

## **Definitions**

6. For purposes of the ISAs, the following terms have the meanings attributed below:
  - (a) Audit documentation – The record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached (terms such as “working papers” or “workpapers” are also sometimes used).
  - (b) Audit file – One or more folders or other storage media, in physical or electronic form, containing the records that comprise the audit documentation for a specific engagement.
  - (c) Experienced auditor – An individual (whether internal or external to the firm) who has practical audit experience, and a reasonable understanding of:
    - (i) Audit processes;
    - (ii) ISAs and applicable legal and regulatory requirements;
    - (iii) The business environment in which the entity operates; and
    - (iv) Auditing and financial reporting issues relevant to the entity's industry.

## **Requirements**

### **Timely Preparation of Audit Documentation**

7. The auditor shall prepare audit documentation on a timely basis. (Ref: Para. A1)

## **Documentation of the Audit Procedures Performed and Audit Evidence Obtained**

### *Form, Content and Extent of Audit Documentation*

8. The auditor shall prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand: (Ref: Para. A2-A5, A16-A17)
  - (a) The nature, timing and extent of the audit procedures performed to comply with the ISAs and applicable legal and regulatory requirements; (Ref: Para. A6-A7)
  - (b) The results of the audit procedures performed, and the audit evidence obtained; and
  - (c) Significant matters arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions. (Ref: Para. A8-A11)
9. In documenting the nature, timing and extent of audit procedures performed, the auditor shall record:
  - (a) The identifying characteristics of the specific items or matters tested; (Ref: Para. A12)
  - (b) Who performed the audit work and the date such work was completed; and
  - (c) Who reviewed the audit work performed and the date and extent of such review. (Ref: Para. A13)
10. The auditor shall document discussions of significant matters with management, those charged with governance, and others, including the nature of the significant matters discussed and when and with whom the discussions took place. (Ref: Para. A14)
11. If the auditor identified information that is inconsistent with the auditor's final conclusion regarding a significant matter, the auditor shall document how the auditor addressed the inconsistency. (Ref: Para. A15)

### *Departure from a Relevant Requirement*

12. If, in exceptional circumstances, the auditor judges it necessary to depart from a relevant requirement in an ISA, the auditor shall document how the alternative audit procedures performed achieve the aim of that requirement, and the reasons for the departure. (Ref: Para. A18-A19)

*Matters Arising after the Date of the Auditor's Report*

13. If, in exceptional circumstances, the auditor performs new or additional audit procedures or draws new conclusions after the date of the auditor's report, the auditor shall document: (Ref: Para. A20)
  - (a) The circumstances encountered;
  - (b) The new or additional audit procedures performed, audit evidence obtained, and conclusions reached, and their effect on the auditor's report; and
  - (c) When and by whom the resulting changes to audit documentation were made and reviewed.

**Assembly of the Final Audit File**

14. The auditor shall assemble the audit documentation in an audit file and complete the administrative process of assembling the final audit file on a timely basis after the date of the auditor's report. (Ref: Para. A21-A22)
15. After the assembly of the final audit file has been completed, the auditor shall not delete or discard audit documentation of any nature before the end of its retention period. (Ref: Para. A23)
16. In circumstances other than those envisaged in paragraph 13 where the auditor finds it necessary to modify existing audit documentation or add new audit documentation after the assembly of the final audit file has been completed, the auditor shall, regardless of the nature of the modifications or additions, document: (Ref: Para. A24)
  - (a) The specific reasons for making them; and
  - (b) When and by whom they were made and reviewed.

\*\*\*

**Application and Other Explanatory Material**

**Timely Preparation of Audit Documentation** (Ref: Para. 7)

- A1. Preparing sufficient and appropriate audit documentation on a timely basis helps to enhance the quality of the audit and facilitates the effective review and evaluation of the audit evidence obtained and conclusions reached before the auditor's report is finalized. Documentation prepared after the audit work has been performed is likely to be less accurate than documentation prepared at the time such work is performed.

## **Documentation of the Audit Procedures Performed and Audit Evidence Obtained**

### *Form, Content and Extent of Audit Documentation (Ref: Para. 8)*

- A2. The form, content and extent of audit documentation depend on factors such as:
- The size and complexity of the entity.
  - The nature of the audit procedures to be performed.
  - The identified risks of material misstatement.
  - The significance of the audit evidence obtained.
  - The nature and extent of exceptions identified.
  - The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or audit evidence obtained.
  - The audit methodology and tools used.
- A3. Audit documentation may be recorded on paper or on electronic or other media. Examples of audit documentation include:
- Audit programs.
  - Analyses.
  - Issues memoranda.
  - Summaries of significant matters.
  - Letters of confirmation and representation.
  - Checklists.
  - Correspondence (including e-mail) concerning significant matters.
- The auditor may include abstracts or copies of the entity's records (for example, significant and specific contracts and agreements) as part of audit documentation. Audit documentation, however, is not a substitute for the entity's accounting records.
- A4. The auditor need not include in audit documentation superseded drafts of working papers and financial statements, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.
- A5. Oral explanations by the auditor, on their own, do not represent adequate support for the work the auditor performed or conclusions the auditor

reached, but may be used to explain or clarify information contained in the audit documentation.

#### Documentation of Compliance with ISAs (Ref: Para. 8(a))

- A6. In principle, compliance with the requirements of this ISA will result in the audit documentation being sufficient and appropriate in the circumstances. Other ISAs contain specific documentation requirements that are intended to clarify the application of this ISA in the particular circumstances of those other ISAs. The specific documentation requirements of other ISAs do not limit the application of this ISA. Furthermore, the absence of a documentation requirement in any particular ISA is not intended to suggest that there is no documentation that will be prepared as a result of complying with that ISA.
- A7. Audit documentation provides evidence that the audit complies with the ISAs. However, it is neither necessary nor practicable for the auditor to document every matter considered, or professional judgment made, in an audit. Further, it is unnecessary for the auditor to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included within the audit file. For example:
- The existence of an adequately documented audit plan demonstrates that the auditor has planned the audit.
  - The existence of a signed engagement letter in the audit file demonstrates that the auditor has agreed the terms of the audit engagement with management or, where appropriate, those charged with governance.
  - An auditor's report containing an appropriately qualified opinion on the financial statements demonstrates that the auditor has complied with the requirement to express a qualified opinion under the circumstances specified in the ISAs.
  - In relation to requirements that apply generally throughout the audit, there may be a number of ways in which compliance with them may be demonstrated within the audit file:
    - For example, there may be no single way in which the auditor's professional skepticism is documented. But the audit documentation may nevertheless provide evidence of the auditor's exercise of professional skepticism in accordance with the ISAs. Such evidence may include specific procedures performed to corroborate management's responses to the auditor's inquiries.

- Similarly, that the engagement partner has taken responsibility for the direction, supervision and performance of the audit in compliance with the ISAs may be evidenced in a number of ways within the audit documentation. This may include documentation of the engagement partner's timely involvement in aspects of the audit, such as participation in the team discussions required by ISA 315.<sup>5</sup>

#### Documentation of Significant Matters and Related Significant Professional Judgments (Ref: Para. 8(c))

- A8. Judging the significance of a matter requires an objective analysis of the facts and circumstances. Examples of significant matters include:
- Matters that give rise to significant risks (as defined in ISA 315).<sup>6</sup>
  - Results of audit procedures indicating (a) that the financial statements could be materially misstated, or (b) a need to revise the auditor's previous assessment of the risks of material misstatement and the auditor's responses to those risks.
  - Circumstances that cause the auditor significant difficulty in applying necessary audit procedures.
  - Findings that could result in a modification to the audit opinion or the inclusion of an Emphasis of Matter paragraph in the auditor's report.
- A9. An important factor in determining the form, content and extent of audit documentation of significant matters is the extent of professional judgment exercised in performing the work and evaluating the results. Documentation of the professional judgments made, where significant, serves to explain the auditor's conclusions and to reinforce the quality of the judgment. Such matters are of particular interest to those responsible for reviewing audit documentation, including those carrying out subsequent audits when reviewing matters of continuing significance (for example, when performing a retrospective review of accounting estimates).
- A10. Some examples of circumstances in which, in accordance with paragraph 8, it is appropriate to prepare audit documentation relating to the use of professional judgment include, where the matters and judgments are significant:

---

<sup>5</sup> ISA 315, "Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment," paragraph 10.

<sup>6</sup> ISA 315, paragraph 4(e).

- The rationale for the auditor's conclusion when a requirement provides that the auditor "shall consider" certain information or factors, and that consideration is significant in the context of the particular engagement.
- The basis for the auditor's conclusion on the reasonableness of areas of subjective judgments (for example, the reasonableness of significant accounting estimates).
- The basis for the auditor's conclusions about the authenticity of a document when further investigation (such as making appropriate use of an expert or of confirmation procedures) is undertaken in response to conditions identified during the audit that caused the auditor to believe that the document may not be authentic.

A11. The auditor may consider it helpful to prepare and retain as part of the audit documentation a summary (sometimes known as a completion memorandum) that describes the significant matters identified during the audit and how they were addressed, or that includes cross-references to other relevant supporting audit documentation that provides such information. Such a summary may facilitate effective and efficient reviews and inspections of the audit documentation, particularly for large and complex audits. Further, the preparation of such a summary may assist the auditor's consideration of the significant matters. It may also help the auditor to consider whether, in light of the audit procedures performed and conclusions reached, there is any individual relevant ISA objective that the auditor cannot achieve that would prevent the auditor from achieving the overall objectives of the auditor.

*Identification of Specific Items or Matters Tested, and of the Preparer and Reviewer*  
(Ref: Para. 9)

A12. Recording the identifying characteristics serves a number of purposes. For example, it enables the engagement team to be accountable for its work and facilitates the investigation of exceptions or inconsistencies. Identifying characteristics will vary with the nature of the audit procedure and the item or matter tested. For example:

- For a detailed test of entity-generated purchase orders, the auditor may identify the documents selected for testing by their dates and unique purchase order numbers.
- For a procedure requiring selection or review of all items over a specific amount from a given population, the auditor may record the scope of the procedure and identify the population (for example, all journal entries over a specified amount from the journal register).

- For a procedure requiring systematic sampling from a population of documents, the auditor may identify the documents selected by recording their source, the starting point and the sampling interval (for example, a systematic sample of shipping reports selected from the shipping log for the period from April 1 to September 30, starting with report number 12345 and selecting every 125th report).
- For a procedure requiring inquiries of specific entity personnel, the auditor may record the dates of the inquiries and the names and job designations of the entity personnel.
- For an observation procedure, the auditor may record the process or matter being observed, the relevant individuals, their respective responsibilities, and where and when the observation was carried out.

A13. ISA 220 requires the auditor to review the audit work performed through review of the audit documentation.<sup>7</sup> The requirement to document who reviewed the audit work performed does not imply a need for each specific working paper to include evidence of review. The requirement, however, means documenting what audit work was reviewed, who reviewed such work, and when it was reviewed.

#### Documentation of Discussions of Significant Matters with Management, Those Charged with Governance, and Others (Ref: Para. 10)

A14. The documentation is not limited to records prepared by the auditor but may include other appropriate records such as minutes of meetings prepared by the entity's personnel and agreed by the auditor. Others with whom the auditor may discuss significant matters may include other personnel within the entity, and external parties, such as persons providing professional advice to the entity.

#### Documentation of How Inconsistencies have been Addressed (Ref: Para. 11)

A15. The requirement to document how the auditor addressed inconsistencies in information does not imply that the auditor needs to retain documentation that is incorrect or superseded.

#### Considerations Specific to Smaller Entities (Ref. Para. 8)

A16. The audit documentation for the audit of a smaller entity is generally less extensive than that for the audit of a larger entity. Further, in the case of an audit where the engagement partner performs all the audit work, the documentation will not include matters that might have to be documented

---

<sup>7</sup> ISA 220, paragraph 17.

solely to inform or instruct members of an engagement team, or to provide evidence of review by other members of the team (for example, there will be no matters to document relating to team discussions or supervision). Nevertheless, the engagement partner complies with the overriding requirement in paragraph 8 to prepare audit documentation that can be understood by an experienced auditor, as the audit documentation may be subject to review by external parties for regulatory or other purposes.

- A17. When preparing audit documentation, the auditor of a smaller entity may also find it helpful and efficient to record various aspects of the audit together in a single document, with cross-references to supporting working papers as appropriate. Examples of matters that may be documented together in the audit of a smaller entity include the understanding of the entity and its internal control, the overall audit strategy and audit plan, materiality determined in accordance with ISA 320,<sup>8</sup> assessed risks, significant matters noted during the audit, and conclusions reached.

*Departure from a Relevant Requirement (Ref: Para. 12)*

- A18. The requirements of the ISAs are designed to enable the auditor to achieve the objectives specified in the ISAs, and thereby the overall objectives of the auditor. Accordingly, other than in exceptional circumstances, the ISAs call for compliance with each requirement that is relevant in the circumstances of the audit.
- A19. The documentation requirement applies only to requirements that are relevant in the circumstances. A requirement is not relevant<sup>9</sup> only in the cases where:
- (a) The entire ISA is not relevant (for example, if an entity does not have an internal audit function, nothing in ISA 610<sup>10</sup> is relevant); or
  - (b) The requirement is conditional and the condition does not exist (for example, the requirement to modify the auditor's opinion where there is an inability to obtain sufficient appropriate audit evidence, and there is no such inability).

*Matters Arising after the Date of the Auditor's Report (Ref: Para. 13)*

- A20. Examples of exceptional circumstances include facts which become known to the auditor after the date of the auditor's report but which existed at that date and which, if known at that date, might have caused the financial

statements to be amended or the auditor to modify the opinion in the auditor's report.<sup>11</sup> The resulting changes to the audit documentation are reviewed in accordance with the review responsibilities set out in ISA 220,<sup>12</sup> with the engagement partner taking final responsibility for the changes.

**Assembly of the Final Audit File (Ref: Para. 14-16)**

- A21. ISQC 1 (or national requirements that are at least as demanding) requires firms to establish policies and procedures for the timely completion of the assembly of audit files.<sup>13</sup> An appropriate time limit within which to complete the assembly of the final audit file is ordinarily not more than 60 days after the date of the auditor's report.<sup>14</sup>
- A22. The completion of the assembly of the final audit file after the date of the auditor's report is an administrative process that does not involve the performance of new audit procedures or the drawing of new conclusions. Changes may, however, be made to the audit documentation during the final assembly process if they are administrative in nature. Examples of such changes include:
- Deleting or discarding superseded documentation.
  - Sorting, collating and cross-referencing working papers.
  - Signing off on completion checklists relating to the file assembly process.
  - Documenting audit evidence that the auditor has obtained, discussed and agreed with the relevant members of the engagement team before the date of the auditor's report.
- A23. ISQC 1 (or national requirements that are at least as demanding) requires firms to establish policies and procedures for the retention of engagement documentation.<sup>15</sup> The retention period for audit engagements ordinarily is no shorter than five years from the date of the auditor's report, or, if later, the date of the group auditor's report.<sup>16</sup>
- A24. An example of a circumstance in which the auditor may find it necessary to modify existing audit documentation or add new audit documentation after
