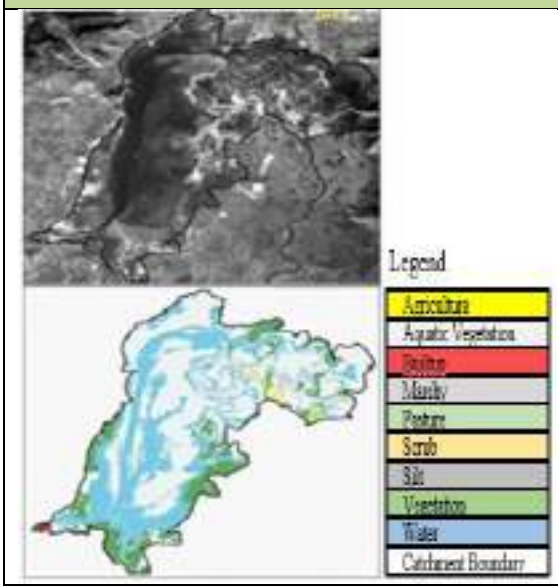
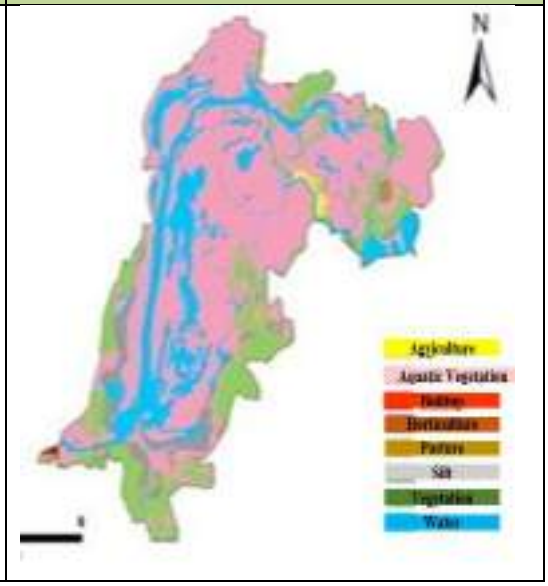
There was Spatio-temporal change in land use and water cover of Wular Lake during 2014-20 as detailed in **Maps 5.1 and 5.2, Table 5.1 and Charts 5.2 and 5.3**.

Maps 5.1 and 5.2: Spatio-temporal change in land use and water cover of Wular Lake during 2014-20

Map 5.1: (2014)	Map 5.2: (2020)
	




(Source: EE&RSD data)

Table: 5.1: Change in land use/ cover in Wular Lake

(Area in hectares)			Increase/ Decrease & its Percentage (2014 to 2020)			
Land-Use/ classification-Use Changes	**2014**	**2020**	**Increase**	**Decrease**	**Percentage Increase**	**Percentage Decrease**
Open water	4,440.00	2,785.70		1,654.30		37
Aquatic vegetation	6,134.00	7,216.60	1,082.60		18

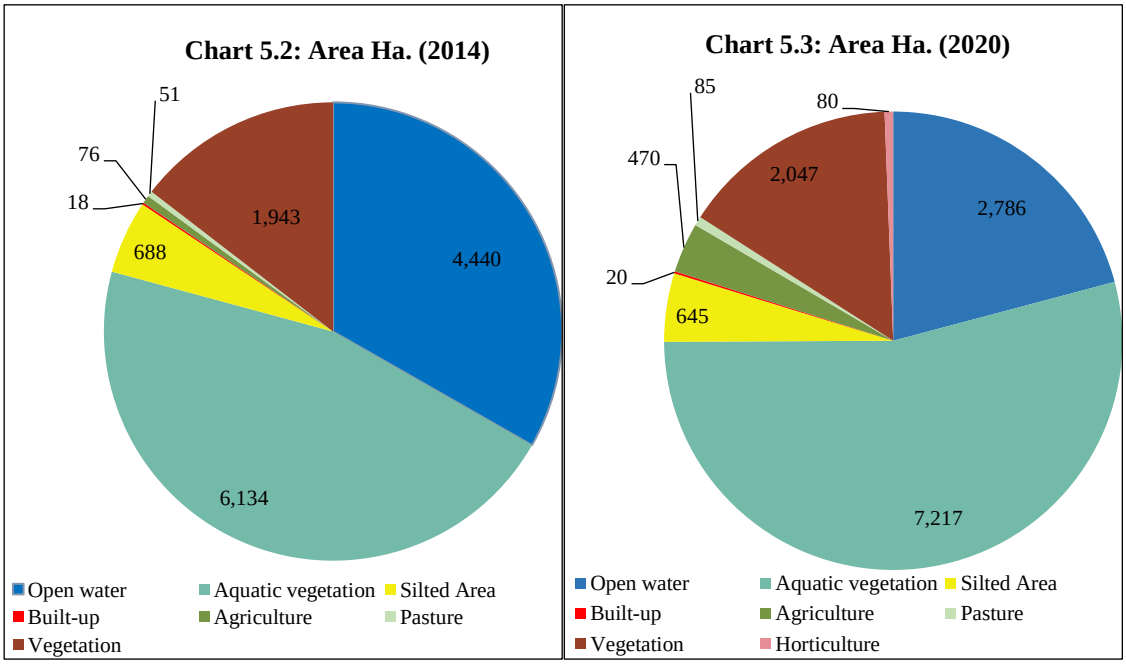
(Source: data of EE&RSD)

Charts 5.2 and 5.3: Change in land use/ cover in Wular Lake



It may be seen from **Table 5.1** that during (2014-2020), there was an overall land use change of 1,697.40 hectares in the Lake. It included decrease of 1,654.30 hectares under open water area (37 *per cent*) and an alarming increase in other land use changes such as 1,082.60 hectares under aquatic vegetation (18 *per cent*), 394.48 hectares under agriculture (519 *per cent*), 103.72 hectares under vegetation (five *per cent*), 80.48 hectares under horticulture (100 *per cent)*, 34.33 hectares under pasture (67 *per cent)* and 1.79 hectares under built-up (10 *per cent)* during the period. Neither were any concrete measures taken by the WUCMA to regulate land use of the Lake nor had it analysed reasons for these land use changes.

Audit analysis revealed that land use changes in Lake were due to delay in the implementation of CMAP and non-formulation of CCMP and DPR for Conservation and Management of the Lake resulting in partial implementation of Lake management activities as detailed in **Paragraph 5.5.**

No sewage treatment system was in place to prevent entry of pollutants into the Lake, measures were not taken to prevent silt from entering into the Lake from its catchment area and there was absence of de-weeding due to which there was increase in aquatic vegetation. Inadequacies in the survey and demarcations coupled with absence of monitoring and surveillance had resulted in increase in other land use changes such as built-up, pastures, agriculture, vegetation and horticulture adversely affecting water quality and biodiversity of the Lake. As a result, there was loss of open water area of the Lake.

However, improvement was witnessed in land use under silted area which had decreased by 43.10 hectares (six *per cent*). This could be attributed to dredging of the

Lake done by WUCMA as discussed under **Sub Paragraph 2 "Dredging of Lake" of Paragraph 5.6.6.**

WUCMA stated (October 2022) that change in land use inferences drawn could not be agreed to on scientific basis, as aquatic vegetation and water expanse were supplementary, since vegetation growth was possible in areas having water. As such there was nothing alarming about the increase of area under aquatic vegetation. It was further stated that field study showed that none of the areas of the Lake was under horticulture, but it was assured that necessary ground truthing would be done and corrective action taken. It was also stated that no built-up area was increasing anywhere in the Lake as changes depicted in built-up were in an area of 21.2 sq. km, which was already in Government records.

The reply is not acceptable as the audit observation is based on the information provided by EE&RSD and WUCMA. The data provided itself showed that area under built-up and horticulture had respectively increased by 1.79 hectares and 80.48 hectares during 2014-20.

5.4.2 Analysis of Google Earth Pro images to ascertain Spatio-temporal changes in Lake and its catchments

Clear images of Wular Lake and its catchment area available on Google Earth Pro for the period 2006-2022 indicated:

- Increase in built-up in Bandipora catchment area of the Lake. These catchment area are without sewage treatment and the Lake receives water inflow from the *nallahs* of these catchment area and
- Substantial increase in built-up of two colonies viz. Sher Colony and Kanyari, within the Lake over a period of time.

The Google Earth Pro images of the Lake, its catchment and encroached areas within the catchment are shown in the **Satellite images 5.1 to 5.13**:

Satellite Image 5.1: Wular Lake and its catchment and encroached area within the Lake in 2022

1. **Red marked boundary "A (Sher Colony) and B (Kanyari)" indicates encroached area within Wular Lake. Zoomed images of these areas are given below.**
2. **Yellow marked boundary "C (Bandipora)" indicates areas of Wular Lake catchment. Zoomed images of these areas are given below.**

Satellite Image 5.13: C-Bandipora-2022

5.4.3 Decrease in the water area and water holding capacity of the Lake

Audit noticed that WUCMA had made a comparison of toposheets of 1911 with satellite images of 2007 which revealed a reduction of 45 *per cent* in water area of the Lake as the water area had reduced from 157.75 sq. km to 86.71 sq. km. The Lake area had reduced by 24 *per cent* from 176.88 sq. km in 2007 to 133.70 sq. km in 2020. The water holding capacity of the Lake had declined by one-fifth over the last three decades.

In reply, WUCMA stated (October 2022) that on the contrary the water holding capacity of the Lake had increased due to restoration of 4.35 sq.km. of critically silted area of the Lake. This was subsequently harboring economically important hydrophytes like water chestnuts and fishing was also being done in those areas. It was further stated that Wetland Atlas had made comparison with respect to 1967 toposheet and satellite image of 2014 and shown area of 133.25 sq.km. It was also stated that Atlas of wetlands (2006-07 to 2018-19) clearly indicated no significant change in water bodies of Kashmir.

The reply is not acceptable, since the audit observation regarding reduction in Lake area is based on records of WUCMA and EE&RSD.

5.5 Planning

Forest Department of GoJ&K had failed to provide a Detailed Comprehensive Plan for rejuvenation and restoration of Wular Lake. Due to non-hiring of consultancy services for preparation of Comprehensive Conservation and Management Plan (CCMP) and DPR for the Lake, agencies could not be approached for funding for Conservation and Management of the Lake.

Wular Lake Management Action Plan (MAP) and tentative two year action plans were formulated by WUCMA but these Plans were implemented either partially or on ad-hoc basis. Conservation and management of the Lake also suffered due to inadequate funding as discussed in the following paragraphs:

5.5.1 Comprehensive Management Action Plan

J&K Wildlife Protection Department got the Comprehensive Management Action Plan (CMAP), for Conservation and Management of Wular Lake, prepared (June 2007) by the Wetlands International, South Asia, New Delhi for submission to MoEF&CC, GoI. The cost of the CMAP for the Lake was ₹ 386.39 crore with targeted period of completion as five years. The CMAP envisaged seven activities viz. survey and demarcation, catchment conservation, water management, conservation of bio-diversity, eco-tourism development, sustainable resources development and livelihood improvement and institutional development. Against CMAP cost of ₹ 386.39 crore, only ₹ 120 crore was approved under 13th Finance Commission (FC) and only

₹ 60 crore was released between 2011-12 and 2014-2015. The programme was implemented up to 2019-20.

5.5.2 Missed funding opportunities for Conservation and Management of Wular Lake

The Forest Department had opportunities for availing assistance for Conservation and Management of the Wular Lake. However, due to inaction of the Forest Department these opportunities could not be availed as discussed below.

- **Failure to provide comprehensive plan for conservation of Lake to GoI**

The Forest Department of GoJ&K requested (October 2019) MoEF&CC, GoI to sanction fund of ₹ 1,500 crore for Conservation and Management of the Lake. The MoEF&CC conveyed (December 2019) that the Lake is covered under one of the transformative ideas for 100 days Action Plan for rejuvenation and restoration of 100 Wetlands across the country and asked (December 2019) for a Detailed Plan. As of March 2022, Forest Department GoJ&K had failed to provide a Detailed Comprehensive Plan of the Lake to GoI, which affected the Conservation and Management programme for rejuvenation and restoration of Wular Lake.

WUCMA stated (October 2022) that the entire budget of MoEF&CC for wetlands under NPCA[1] during 2020-21 was ₹ 70 crore, and financing ₹ 1,500 crore plan for Wular Lake was not possible. It was further stated that an Integrated Plan (IP) for ₹ 149.43 crore was prepared by WUCMA and approved by the UT Wetland Authority, which is under consideration of MoEF&CC.

The reply should be seen in light of fact that GoI had asked for a Detailed Action Plan (DAP) in December 2019. However, WUCMA failed to prepare the DAP as sought by the MoEF&CC, and an amount of only ₹ 70 crore was released by GoI during 2020-21. The fact also remains that Integrated Plan (IP) of Wular Lake was not approved as of December 2022.

- **Funding of Conservation and Management of Lake**

Chief Secretary (CS), GoJ&K held (October 2019) a review meeting on the working of WUCMA. As per decision taken in the meeting, a Detailed Project Report (DPR) was to be prepared for seeking funding from other agencies. WUCMA was to seek assistance from agencies/ consultants dealing with such projects. For preparation of DPR by domain experts, WUCMA sought (December 2019) assistance from the CEO, Economic Reconstruction Agency. Although the latter assured assistance in preparation of DPR, there was no progress in this regard. After over one year, WUCMA floated (December 2020) tenders for hiring consultancy for conducting surveys and studies,

[1] National Plan for Conservation of Aquatic ecosystems

formulation of Comprehensive Conservation and Management Plan (CCMP) and preparation of DPR for the Lake, including its associated wetland and catchment area. The Tender Evaluation Committee of WUCMA proposed (February 2021) to the Forest Department that the allotment of work be awarded in favour of the Rank-1 bidder. As of March 2022, approval of the Forest Department was awaited for allotment of consultancy services to the firm for preparation of CCMP and DPR. In the absence of CCMP and DPR, other agencies could not be approached for funding for Conservation and Management of Wular Lake.

WUCMA stated (October 2022) that although tenders were floated for consultancy and preparation of DPR, its allotment could not be finalised. It was further stated that for having a long term sustainable and scientific plan for the Lake, a study should be conducted by an Institute of national repute. National Institute of Hydrology which was selected for the purpose had submitted a proposal for carrying out such a study.

The reply is not convincing as directions of Chief Secretary (November 2019) for preparation of DPR were not complied with by the Forest Department. The reply should also be seen in light of the fact that no such long term sustainable and scientific plan for the Lake could be finalised as of October 2022.

- **Non-formulation of working plans**

Under 13th Finance Commission, a grant of ₹ 120 crore was approved for Conservation and Management of Wular Lake. However, due to non-formulation of working plans[2] for all Forest Territorial Divisions, grant of only ₹ 60 crore was released by GoI as release of subsequent grant was linked to the progress of formulation and finalisation of working plans. Non-release of remaining ₹ 60 crore resulted in shortfall in achievement of targets of planned activities as discussed in the report.

WUCMA stated (October 2022) that working plans were prepared for management of forest areas only as per the National Working Plan Code-2014.

The fact remained that non-formulation of working plans for all Forest Territorial Division resulted in non release of remaining grant of ₹ 60 crore which in turn led to shortfall in achievement of targeted activities for management of Wular Lake.

5.5.3 Fund management

5.5.3.1 Delay in release of funds

Due to delay in release/ revalidation of funds there was underutilisation of funds for Conservation and Management of the Lake

[2] These are an essential plan documents to be prepared for 10 to 15 years for the scientific management of natural Forest areas for each Forest Territorial Division.

Under 13th FC, Government of India released (2011-12 and 2014-15) ₹ 60 crore in two installments of ₹ 30 crore for implementation of CMAP. First instalment was released by the Forest Department to WUCMA in parts and after a delay of up to four months. WUCMA had to get the unspent balances revalidated for utilisation in the ensuing Financial Years. There was also delay by the Forest Department in revalidation of unspent funds ranging up to 360 days. Unspent balances of Financial Years 2016-17 and 2017-18 were revalidated in the last week of the subsequent Financial Years resulting in non-utilisation of funds by the WUCMA. Against unspent balance of ₹ 14.17 crore during 2017-18, ₹ 0.11 crore only was revalidated in the first month of the last quarter of the Financial Year.

Further, funds were also released by the Forest Department at the fag end of the Financial Years to WUCMA under CAPEX from the State Budget. Out of releases of ₹ 95.85 crore during 2020-21, ₹ 25 crore (26 *per cent*) were released on 03 February 2021 and ₹ 45.85 crore (48 *per cent*) was released on 28 March 2021.

Due to delay in release/ re-validation of funds there was underutilisation of funds because of limited working season in the valley.

5.5.3.2 Underutilisation of funds

Against ₹ 120 crore approved for Conservation and Management of Wular Lake only ₹ 60 crore (50 *per cent*) was released between 2011 and 2015 under 13th Finance Commission (FC). Against availability of ₹ 60 crore, underutilisation of funds ranged between ₹ 1.77 crore and ₹ 28.35 crore during 2011-20. The percentage underutilisation ranged between 17 *per cent* and 99 *per cent* during the said period. No further funds were released during 2016-20 under 13th FC due to non-formulation of working plans by WUCMA as discussed under **3rd bullet** of **Paragraph 5.5.2**.

Apart from this, GoJ&K approved ₹ 196.15 crore under CAPEX for 2020-22, of which only ₹ 149.87 crore were released, resulting in release of less fund of ₹ 46.28 crore (24 *per cent*) during the period. The details are given in the ***Appendix-5.1.***

5.6 Programme implementation

Dropping of three vital activities of bio-diversity conservation, eco-tourism development and sustainable resource development and livelihood improvement due to restricted funding under 13th FC had adversely affected Conservation and Management Programme of Wular Lake.

Under 13th FC, three vital activities of bio-diversity conservation, eco-tourism development and sustainable resource development and livelihood improvement were dropped due to restricted funding. This adversely affected Conservation and Management Programme of Wular Lake. An amount of ₹ 4.02 crore planned for mapping, ground truthing, boundary demarcation and bathymetric studies were not

spent resulting in non-clearing of encroached area of 0.36 sq. km of Lake area for paddy cultivation and increase in built-up area in catchment from 16.80 hectares (2011) to 19.79 hectares (2020). Only 517 hectares out of 1,603 hectares of the eroded pasture land was covered for treatment and only 517 hectares out of 1,251 hectares were covered for promotion of agro-forestry, sustainable horticulture practices and improvement of homesteads.

Against estimated 21.84 lakh willow trees to be removed, only 1.46 lakh were removed between 2007 and 2022. Out of 27 sq. kms of severely silted area, only 4.5 sq. kms area was dredged and dredged out material was dumped in the auxiliary basins of the Lake. Due to non-installation of STPs, untreated sewage from nine villages was being discharged into the Lake. Programme implementation in respect of Wular Lake has been discussed in the following Paragraphs.

5.6.1 Dropping of programme activities and cost reduction in programme activities of CMAP under 13th Finance Commission

CMAP envisaged execution of seven activities for Conservation and Management of Wular Lake. However, three activities were dropped while cost of four activities was reduced under 13th FC. Details of activity wise cost of programme activities, activities dropped, reduction in cost of activities and expenditure incurred is detailed in **Table 5.2**, **Charts 5.4 and 5.5.**

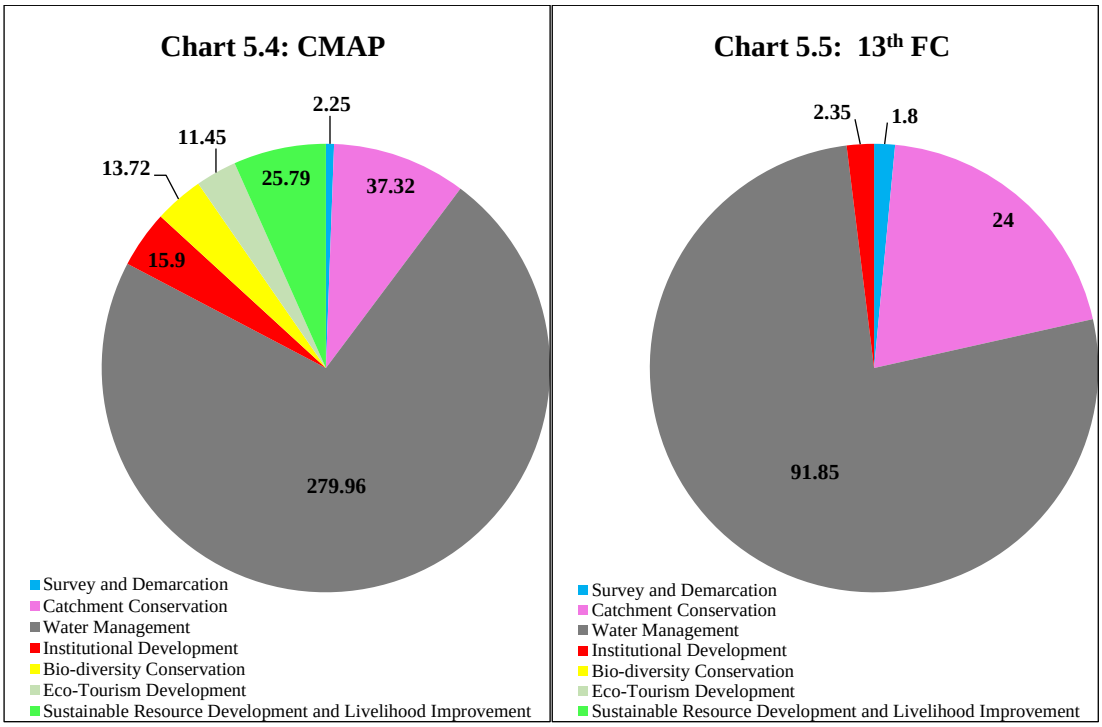
Table: 5.2: Dropping of activities of CMAP under 13thFC

(₹ in crore)

Sl. No	Activity	Cost approved under CMAP	Cost approved under 13th FC	Cost reduced/ dropped (*per cent* reduction)	Expenditure
1	Survey and Demarcation	2.25	1.80	0.45 (20)	2.22
2	Catchment Conservation	37.32	24.00	13.32 (36)	13.80
3	Water Management	279.96	91.85	188.11 (67)	42.58
4	Institutional Development	15.90	2.35	13.55 (85)	1.14
Total-A		**335.43**	**120.00**	**215.43**	**59.74**
1	Bio-diversity Conservation	13.72	0	13.72 (100)	0
2	Eco-Tourism Development	11.45	0	11.45(100)	0
3	Sustainable Resource Development and Livelihood Improvement	25.79	0	25.79 (100)	0
Total-B		**50.96**	**0**	**50.96**	**0**
Grand Total (A+B)		**386.39**	**120.00**	**266.39**	**59.74**

(Source: data provided by WUCMA)

Charts 5.4 and 5.5: Dropping of activities of CMAP under 13th FC



The dropping of these three vital activities had adversely affected Conservation and Management Programme of Wular Lake as detailed in **Table 5.3.**

Table:5.3: Probable effects due to dropping of activities

Sl. No	Programme activities dropped	Activities that could not be undertaken	Probable effects of not conducting such activities
1	Bio-diversity Conservation	• Baseline studies of distribution of endemic fish and their conservation needs. • Long term data collection to understand annual variation of native and migrant water birds and their linkage with habitat of water birds and climate. • Strengthening of protected bird areas and establishment of new bird sanctuaries. • Demarcation of new wildlife sanctuaries and strengthening of existing protected areas. • Construction of rescue/ rehabilitation centres for wildlife. • Maintaining connectivity of existing bird sanctuaries with other Lakes.	• Non-enhancement of diversity of endemic fish and wetland bird population. • Non-improvement in habitat of wildlife and water birds.
2	Eco-Tourism Development	• Comprehensive eco-tourism plan. • Development of key sites for birds and creating facilities for their observance such as watch towers and boat cruises.	Non-development of eco-tourism in and around the Lake resulting in denial of economic benefits to the local communities.

Sl. No	Programme activities dropped	Activities that could not be undertaken	Probable effects of not conducting such activities
3	Sustainable Resource Development and livelihood improvement	• Construction and operationalisation of three fish seed farms and five community owned hatcheries. • Extensive fish stocking measures. • Measures for ensuring non-fishing during May to June and generation of mass awareness against using harmful and illegal fishing methods. • Setting up of fish farm cooperatives. • Ensuring vegetation cutting in the Lake in a sustainable manner without any negative effect on biodiversity. • Creating alternate source of income through apiculture, mushroom cultivation, sericulture etc.	• Non-enhancement of fish yield through development of capture and culture fisheries. • Non-economic utilisation of aquatic vegetation; and • Non-improvement in livelihood of locals.

(Source: records of WUCMA)

WUCMA stated (October 2022) that the activities dropped under 13th FC were incorporated in Wular Action Plan under capital heads and most of the activities were being conducted. It was further stated that for eco-tourism development, sustainable resource management and livelihood improvement interpretation signages have been placed at various locations around the Lake and bird signages with Quick Response (QR) codes have been installed to help the visitors to know about the diversity of Lake harbors. It was also stated that to facilitate bird watching one watch tower and five floating bird hides have been constructed in the Lake and work on non-motorable walkway has been awarded which will help to boost tourism. Regarding biodiversity conservation, it was stated that Asian Water Bird Census was being conducted every year as part of monitoring of wetlands on Central Asian Flyway.

The fact remains that WUCMA had not carried out any detailed research to have a complete picture of biodiversity such as a scientific inventory of flora and fauna existing in and around the Lake. In absence of which, the placement of interpretation and bird signages could not be said to be based on detailed and correct information of existing flora and fauna. Further, in absence of long-term scientific study of the Lake, advantages of construction of non-motorable walkway around the Lake was also questionable, as the area was a buffer zone which minimise entry of silt into the Lake.

Also, merely conducting census of water birds is not sufficient, since it is only a preliminary stage for preparation of Detailed Action Plan for conservation of biodiversity.

5.6.2 Action Plan for implementation of Lake Management activities

For implementation of Comprehensive Conservation and Management Plan (CCMP) (2018-2023) of Wular Lake, WUCMA proposed (November 2020) an estimate of

₹ 2,000 crore to GoI. However, two-year action plan of ₹ 196.15 crore was approved under CAPEX budget for Conservation and Management of Wular Lake during 2020-22. The approved action plan included ₹ 3.67 crore for Bio-diversity Conservation and Eco-Tourism Development (two of the three activities dropped under 13th FC). No provision was made for Sustainable Resource Development and Livelihood Improvement. The funds approved under two-year plan (2020-22) were tentative and far less than the estimate of WUCMA. Thus, the total available funds of ₹ 256.15 crore[3] allocated for Conservation and Management of Wular Lake and physical achievement there against was miniscule.

Details of proposed estimates for CCMP of the Lake, approved cost thereof under tentative action plan and expenditure incurred are detailed in ***Appendix-5.2.***

WUCMA admitted (October 2022) that Wular Action Plan was a short-term plan drawn from overall Comprehensive Management Action Plan for Wular Lake with specific vision and objectives. It further stated that ₹ 2,000 crore funding was a long-term funding needed for gradual eco-restoration based on adaptive management principle and major activity of dredging of 3.35 sq. km of Wular Lake was achieved within the stipulated time.

The reply may be seen in light of the fact that against the approved amount of ₹ 196.15 crore for two-year action plan, only ₹ 149.87 crore was released, which was not commensurate with the planned activities. Similarly dredging of 3.35 sq. km over a period of 15 years amounted to only 12 *per cent* of 27 sq. km of silted area of the Lake, thereby depicting inadequate implementation.

5.6.3 Programme implementation approved under 13th FC and CAPEX Action Plan

Due to reduction in cost of four components by ₹ 215.43 crore[4] under 13th FC, physical targets of Conservation and Management of Wular Lake were reduced. Against approved cost of ₹ 120 crore, only ₹ 60 crore was released (2011-15) for execution of work of these four components and expenditure of ₹ 47.16 crore (79 *per cent*) was incurred as of March 2016. During 2016-20, expenditure of ₹ 11.82 crore was incurred only on dredging woks. Thus, there was tardy implementation and inadequate funding under 13th FC.

Although two years action plan for ₹ 196.15 crore was approved (2020-21) under CAPEX budget by GoJ&K, only ₹ 149.87 crore was released. Thus, there was short-release of fund of ₹ 46.28 crore (24 *per cent*) during the period.

[3] ₹ 60 crore under 13th FC and ₹ 196.15 crore under CAPEX.
[4] From ₹ 335.43 crore to ₹ 120 crore

Thus, management plan for the Lake was implemented in an adhoc/ partial manner. Besides, inadequate funding and pending approval of Forest Department for allotment of consultancy services to a firm for preparation of CCMP and DPR for Conservation and Management of Wular Lake had resulted in substantial shortfalls in the implementation of management activities of the Lake and other inadequacies as discussed in the succeeding Paragraphs.

5.6.4 Survey and Demarcation

Under 13th FC, ₹ 2.22 crore[5] was spent (2011-17) on digital mapping of Wular Lake and on construction of 1,159 geo-tagged demarcation pillars which delineated 83.6 km (98 *per cent*) of the Lake.

Under CAPEX Action Plan (2020-22), ₹ 4.02 crore was planned to be spent on mapping and ground truthing, boundary demarcation and maintenance of boundary pillars, bathymetric studies etc. No expenditure was incurred on these works. As such, 0.36 sq. km of Lake area under encroachment for paddy cultivation[6] could not be cleared and built-up area had also increased from 16.80 hectares (2011) to 19.79 hectares (2020).

WUCMA stated (October 2022) that Wular Lake was fully demarcated and encroachment was meagre, mostly in the form of plantations. It was further stated that out of 0.36 sq km of encroachment approximately only 0.19 sq km had remained to be cleared, which would be done in cooperation with Departments of Revenue and Forest.

The reply should be seen in view of the fact that while the Department had cleared 0.17 sq. km. of encroached area, built-up area had also increased in the catchment area of Lake.

5.6.5 Catchment Conservation

Degradation of catchments of Lake causes high levels of erosion which gives rise to siltation in a Lake. Wular Lake having an area of 1,14,401 hectares has six direct catchments[7]. The area of Lake includes forest area of 44,510 hectares, of which 13,353 hectares (30 *per cent*) is bare and denuded. To mitigate degradation of catchment area of the Lake, catchment works including afforestation of degraded forests, construction of check dams and water harvesting structures, landslide controls, management of high-altitude pastures and providing alternate source of energy to people of catchment area were planned (2011-12) for execution under CMAP.

5 Includes ₹ 0.42 crore diverted from other activities of the programme
6 As per survey conducted (April 2018) by WUCMA
7 Erin, Madhumati, Ningli, Wular-I, Gunder and Wular-II

- **Afforestation**

Under 13th FC, against target for afforestation of 2,620 hectares of land at a cost of ₹ 7.27 crore, only ₹ 5.11 crore[8] was spent for afforestation of 1,725 hectares (shortfall: 34 *per cent*) on fencing of land and on plantation and maintenance of 12 lakh saplings. No further plantation was done in degraded forest areas between April 2016 and March 2020 and no physical verification was conducted to ascertain survival/ mortality of plantation carried out.

Under CAPEX Action Plan (2020-21), against target for afforestation of 1,870 hectares of land at a cost of ₹ 8.53 crore, 2.42 crore was spent (28 *per cent*) to cover 235 hectares (shortfall: 87 *per cent*) by plantation of 2.28 lakh saplings.

Shortfall in achievement of targets resulted in insufficient afforestation in degraded forests resulting in increase of siltation in the Lake by 201.54 hectares between 2016 and 2020[9] and consequently contributing to hastening ageing of the Lake.

WUCMA stated (October 2022) that 30 *per cent* area in the catchment was bare and not necessarily denuded, as most of the bare mountains were dominated by shrub growth,which is a unique ecosystem in itself. It was further stated that allied Departments had carried out afforestation and rehabilitation in large areas thus supplementing efforts of WUCMA, which did not have to take up these activities in additional areas depicted in action plans. It was further stated that 80 *per cent* of the water enters the Lake through Jhelum river and as such, attributing siltation to lack of afforestation works in catchment area was not right.

The reply that WUCMA need not carry out afforestation plans contradicts the provision of afforestation activities under the CAPEX action plan. Further, it is pertinent to note that even the planned targets under the action plan could not be achieved, which was indicative of failure of implementation of the catchment conservation activity. The reply was also indicative of injudicious planning of WUCMA for not constructing silt settling basins at the water inflow/ entry points of the Lake. This was also suggested in the draft Environmental Impact Assessment (EIA) report prepared (2014) by the Centre of Research for Development (CORD), Kashmir University on behalf of WUCMA.

- **Control of soil erosion and landslides in degraded areas**

M/s Wetland International-South Asia assessed (June 2007) erosion intensity in six direct catchment area spread over 1,14,401 hectares around the Lake. It concluded that 71,162 hectares (62 *per cent*) of catchment area were of moderate and high erosion category. No details were available with WUCMA regarding geo-location and category

[8] It includes ₹ 3.33 crore spent as on ending March 2015 and ₹ 1.78 crore during 2015-20

[9] Source: data of EE&RSD.

(low/moderate/ high) of eroded areas so that erosion control works could be planned and executed.

Under 13th FC, six erosion control works[10] were to be executed at a cost of ₹ 10.07 crore. Only ₹ 5.95 crore[11] was spent on these works. There was shortfall in execution of works ranging between 28 and 100 *per cent.* The shortfall included non-construction of water harvesting structures. No erosion control works were executed during 2016-20 except incurring (2018-19) a meager expenditure of ₹ 0.01 crore. Besides, no survey was carried out by WUCMA to ascertain damages, if any, to project executed works.

Under the CAPEX plan of 2020-22, the works included under 13th FC were to be executed (except vegetation spurs/ plantation) at a cost of ₹ 2.49 crore. It was noticed that out of four targeted project works {Dry Random Rubble Masonry Works (DRSM), landslide erosion, gunny bags and water harvesting structures}, only two works of crate wire dams and stream bank protection were carried out at a cost of ₹ 1.41 crore.

- **Management of High-Altitude pastures**

The pastures in catchment area of Lakes are under constant pressure from nomadic population who graze their cattle and sheep in these areas. Area of 8,600 hectares in the catchment area of Wular Lake were identified (2019) as eroded pasture land by WUCMA.

Under 13th FC, 1,603 hectares of eroded pastures was planned for treatment at a cost of ₹ 3.76 crore. The treatment works included fodder and forage production, engineering works in *nallahs*, development of silvi-pasture, fodder management and veterinary support. Treatment works were carried out only in 517 hectares (32 *per cent*) at a cost of ₹ 1.13 crore. Sowing of fodder seeds was not carried out for development of fodder and forage in an area of 259 hectares during 2011-18. In 2018-19, ₹ 0.06 crore was spent on procurement of 11.27 quintals of fodder seed which was distributed to 585 persons. The criteria adopted for distribution of seed to selected persons was not on record. Production from seed sown by the beneficiaries and subsequent impact on the programme was not monitored and evaluated. Veterinary care and assistance for feed and breed improvement was not provided in respect of domestic animals of catchment area during the project implementation period.

Under the CAPEX action plan (2020-22), four works (development of silvi-pasture, maintenance on, farm fodder production and veterinary support) to be carried out in 623 hectares at a cost of ₹ 1.79 crore were not carried out.

[10] DRSM, crate wire dams, Stream Bank Protection, Land slide erosion, Gunny bags and water harvesting structures

[11] It includes ₹ 5.84 crore spent as on ending March 2015 and ₹ 0.11 crore during 2015-20

Thus, only 517 hectares (32 *per cent* of 1,603 hectares) of the eroded pasture land was covered for treatment.

- **Management of Horticulture and Dry Land Agriculture**

An area of 4,600 hectares land in catchment area of the Lake was under dry land agriculture. Ploughing of land across the contours creates channels, *nallahs* and *gullies* due to which there is soil erosion, contributing high sediment inflow into the Lake.

Under 13th FC, three works viz. promotion of agro-forestry, promotion of sustainable horticulture practices and improvement in management of homesteads were planned for execution on 1,251 hectares of land (27 *per cent* of 4,600 hectares of land under dryland agriculture) at a cost of ₹ 1.38 crore. As of March 2015, these works had been executed on only 517 hectares of land, with an expenditure of ₹ 0.70 crore (₹ 0.66 crore: as of March 2015, and ₹ 0.04 crore: during 2018-19).

Shortfall in execution of works during the period ranged between 62 and 68 *per cent***.** Out of plantation of 1.29 lakh saplings carried out during 2011-19, 6,500 saplings were distributed to 247 people during 2018-19. Criteria adopted for distribution of saplings was not on record. Execution of work under improved management of homesteads for coverage of 300 hectares was not carried out between the years 2015 and 2019. Physical verification was also not carried out to ascertain survival/ mortality of planted saplings to evaluate impact of plantation on the programme under 13th FC.

Under CAPEX action plan (2020-22), works of promotion of agro-forestry and sustainable horticulture practices by distributing plants and improvement management of homesteads were envisaged to be carried out to cover 233 hectares at a cost of ₹ 0.48 crore. However, these works were not carried out due to non-release of funds.

Thus, only 517 hectares (41 *per cent* of 1,251 hectares) were covered for execution of horticulture/ agriculture works.

- **Alternate source of energy**

To prevent degradation of forests by reducing dependence of villagers on forests for firewood, alternate source of energy was to be provided to the villagers living in forest areas of catchment of Lake as per CMAP.

Under 13th FC, development of village wood lots in 367 hectares and distribution of solar lights and heaters among the villagers were planned at a cost of ₹ 1.51 crore.

An amount of ₹ 0.91 crore (₹ 0.74 crore: as of March 2015, and ₹ 0.17 crore: 2018-19) was spent on development of village wood lots in 114 hectares (31 *per cent*) and 746 solar lanterns were distributed to the villagers.

The expenditure included ₹ 0.17 crore irregularly spent (March 2019) on purchase of 262 home solar lighting systems for distribution among beneficiaries of Antyodaya Anna Yojna/ Below Poverty Line. The expenditure did not form part of Lake conservation activities. No village wood lots were developed using 13th FC funding during 2016-20. No survey was conducted by WUCMA to ascertain total area to be covered for development of village wood lots and number of villagers to whom solar lights and heaters were to be issued.

Under CAPEX action plan (2020-22), the development of village wood lots over 40 hectares and promotion of smokeless hearths were planned at a cost of ₹ 1.15 crore. However, no specific targets were fixed for these activities. Despite the allocation, no such work was executed under CAPEX due to non-release of funds.

5.6.6 Water Management

CMAP envisaged enhancement of water holding capacity of the Lake by removal of plantation from the Lake, carrying out dredging in the Lake, ensuring improvement in water quality of the Lake through sewerage management, allocation of water for human and ecological purposes and purchase of equipment.

- **Enhancement of water holding capacity of the Lake**

CMAP had estimated (June 2007) that 21.84 lakh willow trees were existing around the Lake. It was suggested that these trees need to be uprooted by manual or mechanical means to enhance the water holding capacity of the Lake. WUCMA had not carried out fresh estimation of trees to ascertain whether there was increase in the number of willow trees around the Lake as over 15 years had passed since June 2007.

Under 13th FC, removal of willow plantation of 0.29 lakh trees was carried out till March 2016 at a cost of ₹ 0.16 crore. Stems and roots of trees were not removed leaving high chance of recurrence in growth of willow plantation. No removal of trees was carried out during 2016-20. While under CAPEX action plan (2020-22), 1.17 lakh willow trees were removed along with stems and roots at a cost of ₹ 0.04 crore.

Thus, against estimated 21.84 lakh willow trees, only 1.46 lakh tree (seven *per cent*) were removed (2007-22) over a period of 15 years at a cost of ₹ 0.20 crore.

WUCMA had not carried out survey to ascertain whether willow trees had regrown due to non-removal of stems and roots in respect of 0.29 lakh trees removed under 13th FC. No evaluation was done to ascertain whether removal of willow trees had enhanced water holding capacity of the Lake.

WUCMA stated (October 2022) that water holding capacity of the Lake can only be enhanced if removal of willows is followed by dredging of the silted areas. It was further stated that willow removal was being done in a phased manner to synchronise

with dredging operations, to prevent any shock to the wetland ecosystem and not to create glut in the market. It was also stated that in the last two years, 1.20 lakh willows were removed including grubbing generating a revenue of ₹ 24.34 crore.

The reply is not convincing as achievement of only seven *per cent* of the target of removal of 21.84 lakh willow trees set by WUCMA itself was indicative of failure in implementation of Lake water management activity.

- **Dredging of Lake**

As per CMAP, 27 sq. km. of Lake area was categorised as severely silted. To increase water capacity and open water area of the Lake, the Conservation and Management plans of the Lake under 13th FC and CAPEX funding provided for dredging of silted areas of the Lake.

Although ₹ 185.05 crore[12] was spent (2011-22) on dredging of Lake, only 4.5 sq. km. (17 *per cent*) of 27 sq. km. of severely silted area has been dredged as of March 2022. Dykes for dumping of dredged out material were not identified and dredged out material was dumped in the auxiliary basins of the Lake which remained seasonally submerged.

Native species of plants were not planted along the dumping sites to act as a filter for nutrients that might leach into the Lake. No studies were undertaken on impact of dredging on Lake ecology including invasion of species both in dredged part and in the hinterland of the Lake where the sediment was deposited.

WUCMA stated (October 2022) that all the dykes had been fully identified and pre/ post dredging survey of all dykes had been conducted. It was further stated that post dredging study was conducted through National Institute of Hydrology and that no dyke remained submerged in any season as most of the dyke areas were cultivated by people. It was also stated that dredged part did not have any weed and it had economically important plant and fish species envisioned in CMAP.

The reply should be seen in view of the fact that observation of Audit is based on the records of Agriculture Production Department and Irrigation and Flood Control Department, which had complained to WUCMA regarding the dumping of dredged-out material in the auxiliary basins of Lake.

- **Rejuvenating wetlands around Lake**

To rejuvenate wetlands associated with Wular Lake and provide bio-filters against nutrients, silt and other material coming into the Lake from its catchment area, ₹ 0.40 crore was approved without specifying physical targets under 13th FC. As of March 2020, no work was done in this regard. Under CAPEX, against ₹ 3.95 crore sanctioned

[12] ₹ 40.73 crore (2011-16 and 2018-20) under 13th FC and ₹ 144.32 crore (2020-22) under CAPEX

for desilting work of 1.58 lakh cum, de-silting of 0.48 lakh cum (30 *per cent*) was done at a cost of ₹ 1.18 crore. No evaluation was done to ascertain the number of associated wetlands rejuvenated.

Although there was increase in the water area of the Lake from 2,265 hectares (2011) to 2,786 hectares (2020) due to removal of trees, dredging and rejuvenation of wetlands around the Lake, the area of 2,786 hectares constituted only 36 *per cent* of the Lake area of 7,768 hectares recorded in 1969.

Audit noted that as against nil use of land for horticulture in 2011, there was land use of 80.48 hectares for horticulture in 2020. Area of siltation in the Lake had increased from 629 hectares in 2011 to 645 hectares in 2020 and pasture land also had increased from 55 hectares in 2011 to 85 hectares in 2020.

During the exit conference (September 2022), it was admitted that 27 sq. kms of Lake area was silted. It was further stated that forest Lakes would be taken care of by addressing the problems such as desilting, de-weeding, encroachments under mission "Amrit Sarovar".

WUCMA stated (October 2022) that feeder channel Naz (connecting Malgam *Rakh*) stood completely restored and adjoining Hygam wetland and Malgam *Rakh* were managed by WPD and Forest Department in a coordinated manner. It was also stated that variable of water expanse and aquatic vegetation could not be treated separately as aquatic vegetation could exist only in area having water.

The reply is not acceptable as it did not address the specific observation regarding rejuvenation of wetlands around the Lake.

- **Purchase of Equipment**

For dredging of the Lake, equipment such as cut section dredger, slurry piping, motorised carriage trucks, hydraulic excavators and weed harvesters were to be purchased by WUCMA under CMAP.

Although purchase of dredging equipment was sanctioned under 13th FC at a cost of ₹ 20.85 crore, the equipment had not been purchased. Instead, an expenditure of ₹ five lakh had been incurred (2015-16) under 13th FC on purchase of photocopiers, computers etc.

Under CAPEX Action Plan (2020-22), although ₹ three crore was sanctioned for purchase of equipment, no equipment was purchased.

WUCMA stated (October 2022) that it was not in favour of purchasing heavy machinery like dredgers as experience of having such equipment had not been encouraging with other Lake management authorities. It was further stated that over

time the technology becomes obsolete and such equipment become a burden on the Departments. Further allotment of work through tendering process ensured efficiency by access to modern technology.

The reply should also be seen in the light of fact that procurement of machinery was laid down in the CMAP (June 2007) approved by GoI.

5.6.7 Water Quality Improvement

For improvement of water quality, CMAP envisaged sewerage management in towns located in the periphery of the Lake by construction of three STPs, setting up of community based solid waste management system for markets and villages, segregation of recyclable and non-recyclable wastes and control of diffused pollution through wetland technology.

- **Construction of Sewage Treatment Plants**

To treat 8.94 MLD of waste water (containing 21.6 tonnes of inorganic nitrate and 15.6 tonnes of phosphorous) generated in Bandipore urban area and nine villages[13] in eastern and western sides of the Lake, three Sewage Treatment Plants (STPs) were to be constructed at three locations[14]. The STPs were to constructed at a cost of ₹ 13.92 crore under CMAP till 2021. As the cost of these STPs were neither included under 13th FC nor CAPEX plan (2020-22), these STPs could not be constructed.

Thus, untreated sewage from these nine residential areas continued to be discharged into the Lake causing pollution of inorganic nitrate and phosphorous in the Lake, which accelerates growth of aquatic vegetation and algae thereby affecting the ecosystem of the Lake.

WUCMA stated (October 2022) that water quality assessment was conducted on monthly basis and all parameters fall within the prescribed limits. It was further stated that construction of STPs would be undertaken in future subject to detailed assessment. It added that as villages around Wular Lake were spread all over, installation of STP or an alternative sewerage treatment methodology needed a scientific study before investing in them.

The reply is not justified as deterioration of water quality of the Lake, as pointed out in this report, had also been highlighted in the research conducted by the academicians[15]. Further, the discharge of sewage directly into the Lake from catchment area without any treatment and data of tests on physio-chemical properties of Lake by J&K Pollution

[13] Five villages on eastern side (Kulhama, Nadihal, Rampur, Gundpore and Shok baba) and four villages on western side (Watlab, Zuriman, Kenursa and Kanibathi)

[14] Watlab, Nadihal and Bandipore

[15] Research report by Zubair Ahmad Naik and Rahul Dabra published in International Research Journal of Modernization in Engineering Technology and Science

Control Board disproves the contention of WUCMA that all water quality parameters fall within the prescribed limits. Furthermore, approved CMAP (June 2007) by the GoI had already envisaged construction of three STPs around the Lake.

- **Community based Solid Waste Management systems for markets and villages**

CMAP (2011-2015) envisaged that for treatment of 29 tonnes[16] of solid waste generated by 25 markets and 25 villages in the vicinity of Wular Lake, a community based Solid Waste Management system was to be set up by construction of waste collection centers at common locations and waste was to be carried from households to these collection centres at a cost of ₹ 1.43 crore. An expenditure of ₹ one crore was booked as of March 2015 on establishment of solid waste management system. This expenditure included ₹ 0.83 crore advanced (2013-15) for purchase of garbage lifting vehicles and fabricated dustbins to Municipal Committee (MC) Bandipore which spent ₹ 0.39 crore on purchase of five vehicles and compact dustbins. The vehicles and dustbins did not have means to separate the recyclable and non-recyclable wastes. MC Bandipore did not have a proper dumping site for disposal of garbage which was being dumped on the fringes of Wular Lake at Nussu Zallwan causing pollution in the Lake. ₹ 0.44 crore was lying unspent with MC Bandipore. WUCMA had not devised a plan in collaboration with MC Bandipore to identify spots in the villages for location of collection centers. Consequently, waste collection centres could not be constructed.

Although an amount of ₹ 0.82 crore had been sanctioned under CAPEX plan (2020-22), however no expenditure was incurred in respect of disposal of solid waste.

WUCMA stated (October 2022) that although no scientific municipal waste management plant had been established, an amount of ₹ six crore had been sanctioned for developing a scientific plant for which work was underway. It was further stated that 10 bio-toilets had been constructed under CAPEX and toilet construction for each household had been achieved under Swachh Bharat Mission scheme of GoI.

- **Construction of Low-Cost Sanitation Units, Drains and Sedimentation Tanks**

For managing domestic sewage of 44 villages situated on the periphery of the Lake towards the north and east, 18,600 Low-Cost Sanitation Units (LCSUs) with twin leaching pits and flush latrines were to be constructed. Only six (less than one *per cent*) LCSUs were constructed at a cost of ₹ 0.19 crore under 13th FC as of March 2015[17].

Although construction of 120 LCSUs were planned (2020-22) at a cost of ₹ 1.21 crore under CAPEX action plan, no work was executed in this regard as of

16 Projection as per year 2007

17 ₹ 0.10 crore: paid as of March 2015 and liability of ₹ 0.09 crore cleared: 2015-20

October 2022. Thus, untreated human waste of these villages continued to be discharged into the Lake.

Further, for treatment of 1.03 MLD of domestic sewage of 10 villages (rural areas of Sonawari Tehsil) living in immediate southern proximity of the Lake, control of diffused pollution through wetland technology was to be done by constructing drains and sedimentation tanks for these villages. An expenditure of ₹ 0.34 crore was incurred (March 2016) on construction of two drains and sedimentation tanks and on 30 latrines which were not part of the plan. No technical report indicating area or type of pollution that was to be treated**,** was made available to audit. No further work was executed for construction of remaining eight drains and sedimentation tanks for other villages.

WUCMA stated (October 2022) that 10 bio-toilets had been constructed under CAPEX and toilet construction for each household had been achieved under Swachh Bharat Mission scheme of GoI.

- **Environmental Flows Team (EFT)**

Environmental Flows Team (EFT), with representation from all stakeholder Departments, was to be constituted for assessment of flow regimes of water sources of the Lake. The purpose was to estimate the requirement of water for functions and processes of the Lake while optimising allocation for other development purposes including agriculture, hydropower and domestic water supply.

Audit noted that no EFT had been constituted as of October 2022 and hence the mandated task of assessment of flow regimes of water sources of the Lake could not be carried out. Further, an amount of ₹ 0.26 crore earmarked under 13th FC was spent on the activities not forming part of the component, whereas no targets (physical/ financial) were fixed under CAPEX.

WUCMA stated (October 2022) that regular meetings were held with stakeholders, however formation of committees would be actively considered as pointed out by Audit.

5.7 Institutional Development, Capacity Building, Awareness Generation and Monitoring/ Evaluation

No training programmes were undertaken by WUCMA for capacity building and integrated Lake management and no expenditure was incurred for creation of infrastructure. No eco-rallies, conferences, nature camps, environment days and film shows were held by WUCMA for creating awareness. A laboratory for monitoring ecological, hydrological and socio-economic features of the Lake ecosystem was not established and evaluation of impact of Lake conservation programme by an independent agency was not put in place.

In respect of matters relating to administration and operations of WUCMA including capacity building, monitoring of Lake management activities and awareness generation, audit noticed as follows:

5.7.1 Administrative, operational and maintenance expenses

For administrative, operational and maintenance expenses of WUCMA, out of sanctioned ₹ 0.56 crore, only ₹ 0.28 crore was allocated under 13th FC. As of March 2016, ₹ 0.33 crore was spent for these purposes. The extra expenditure of ₹ 0.05 lakh was met from other heads of account. Under CAPEX, ₹ 2.52 crore was earmarked for construction of building for WUCMA. As of March 2022, construction of building was in progress and expenditure of ₹ 1.12 crore had been incurred thereon.

5.7.2 Capacity building and awareness generation

For capacity building, professional training in Integrated Lake Management was to be imparted to staff and infrastructure (including communication equipment and networking of offices) was to be created for Lake management. No training programmes had been undertaken by WUCMA. Instead, ₹ 29 lakh earmarked for these activities was spent as of March 2015 on activities such as Environment Flow Assessment, Implementation and Monitoring and Evaluation not forming part of the component. No expenditure was incurred during 2016-20.

Out of sanctioned amount of ₹ 21 lakh, only ₹ 11 lakh was allocated for awareness generation programmes which included developing resource material, organising nature camps for schools, holding eco-rallies, environment days and film shows. No eco-rallies, conferences, nature camps, environment days and film shows had been held by WUCMA. Instead, ₹ nine lakh was spent[18] as of March 2020 on unrelated activities such as purchase of furniture, fixtures and wages. No expenditure was incurred during 2016-20 under 13th FC. There was no demand raised for the activity during 2020-22 under CAPEX.

5.7.3 Monitoring and evaluation of impact of Lake conservation programme

The initial cost of implementation of CMAP was ₹ 386.29 crore which was reduced (2011-12) to ₹ 120 crore by a High Level Monitoring Committee (HLMC) headed by the Chief Secretary, GoJ&K. CMAP envisaged result based framework for monitoring and evaluation of impact of Lake conservation programme by an independent agency at a cost of ₹ one crore. As this component was dropped by HLMC, monitoring and evaluation of the programme by an independent agency was not in place. CMAP also envisaged establishment of a laboratory for monitoring ecological, hydrological and socio-economic features of the Lake ecosystem. Against ₹ 120 crore, only ₹ 60 crore was released under 13th FC. Due to reduction in programme cost, the component for

[18] It includes ₹ eight lakh spent as on March 2015 and ₹ one lakh during 2015-20

establishment of laboratory along with allied infrastructure was dropped by HLMC for implementation. As a result, the monitoring laboratory could not be established. Instead, ₹ 0.33 crore was diverted as of March 2016 towards unapproved components. No expenditure was incurred during 2016-20. Thus, monitoring of ecological, hydrological and socio-economic features of the Lake ecosystem could not be carried out.

5.7.4 Environmental Impact Assessment of CMAP

The work of Environmental Impact Assessment (EIA) was entrusted (July 2012) to the Centre of Research for Development (CORD), Kashmir University at a cost of ₹ 0.20 crore. The work was to be completed in six months and an advance payment of ₹ 0.10 crore was made in 2012-13 to CORD. CORD submitted (April 2014) the draft EIA report for evaluation to WUCMA before its finalisation. Despite lapse of over nine years from receipt of draft report, the EIA could not be finalised resulting in unfruitful expenditure of ₹ 0.10 crore. The draft EIA had suggested: -

- Setting up of adequate network of observation stations for monitoring in time and space the environmental, hydrological, metrological, hydro-biological and atmospheric processes in the Lake and its catchment area;
- Setting up of equipped laboratories and testing sites;
- A research study through a reputed research institute;
- Creation of vegetated buffers, carrying out crop rotations, construction of artificial wetlands, rejuvenation of springs and wetlands, water quality improvement measures etc.;
- To build settling basin on all the major inlets of Wular Lake on the pattern of Dal Lake; and
- To carry out analysis of sediment cores of the Lake and conduct bathymetric surveys to determine the appropriate depth and location at which dredging has to be carried out.

Thus, due to non-finalisation of the EIA report, the suggested measures had not been acted upon as of October 2022.

5.7.5 Internal control

WUCMA had not prepared assets register/ records as were required to be prepared under financial norms. Annual accounts including balance sheet which were required to be prepared under Section 21 of Jammu and Kashmir Development Act, 1970 were also not prepared. Thus, true and fair financial/ accounting picture of WUCMA was not ascertainable.

WUCMA stated (October 2022) that necessary action would be taken as pointed out by Audit.

5.8 Impact Assessment

WUCMA had not carried out any research to evaluate water quality of the Lake and to determine fish and water bird population in the Lake and it had not taken into consideration corrective measures regarding mitigation of deterioration in the health of the Lake suggested by research carried out by scholars of universities. Water area of the Lake had reduced (45 *per cent*) from 157.75 sq.km in 1911 to 86.71 sq.km in 2007, water holding capacity of the Lake had declined by one fifth during the last three decades and there was decrease of 1,654.30 hectares (37 *per cent of* 4,440 hectares) under open water area of the Lake.

Impact evaluation of a scheme/ programme helps to assess the success or failure of a scheme/ programme and helps in fixing accountability of stakeholders. Besides, it provides evidence to make informed decisions for redesigning the current programme or for planning future interventions. Impact assessment of Conservation and Management Programme of Wular Lake had not been carried out to find out whether implementation of the programme was a success or failure. Audit observed that the health of the Lake was deteriorating as discussed below:

5.8.1 Research activities

WUCMA had not carried out any research to evaluate water quality of the Lake and to determine fish and water bird population in the Lake. Disappearance of native species and invasion of noxious species, if any, due to heavy inflow of silt and sewage into the Lake from its catchment area had also not been assessed. However, research carried out by scholars of universities/ colleges[19] indicated that health of the Lake had deteriorated due to factors detailed below:

- Much of the area of the Lake has been brought under vegetation, agriculture, human settlement, Government Departments, tourist hotels etc.
- There was run-off of fertilisers, pesticides and herbicides from apple orchards and paddy fields in the encroached areas of the Lake. There was also direct discharge of untreated sewage coming from villages adjacent to the Lake.

No effort was made by WUCMA to consider corrective measures suggested in these research papers for ensuring effectiveness in the implementation of management plans of the Lake.

[19] During July-September 2017 by Zahoor ul Hasan, M. Imran Malik and T.A. Kanth of University of Kashmir and Government Degree College, Anantnag respectively.
During November 2016 by Rumysa K, Sharique A. Ali, Bilal A, Tariq Z and Farooq M from GDC Sopore, Safia Science College, Bhopal, Sher-i-Kashmir University of Agricultural Sciences and Technology, Kashmir, Bhoj (Open University), Bhopal, S.P. College, Srinagar respectively.
September 2020 by Zubair Ahmad Naik and Rahul Dabra from Department of Environmental Science Rudrabhishek Enterprises Ltd. India.

The Lake was shrinking at an alarming rate, and had become a reservoir of pollution. Indigenous fishes such as *Schizothorax richardsoni*i and *Bangana diplostoma* had disappeared. The themes of research papers of authors with their conclusions and suggestions are detailed in ***Appendix-5.3*.**

WUCMA stated (October 2022) that it had been conducting water quality assessment of the Lake on a monthly basis in respect of 17 parameters for the last three years in collaboration with Jammu and Kashmir Pollution Control Committee, and all results indicated that water quality of the Lake was within prescribed parameters. It was further stated that the Fisheries Department annually restocked the Lake with necessary fish seed, and during the current year five lakh fish seed were restocked in the Lake but local species such as *Schizothorax* could not be restocked as no scientific breakthrough had been achieved to produce them in seed farms. WUCMA however, accepted that more was needed to be done in this regard.

5.9 Conclusion

Due to non-constitution of monitoring bodies, the Conservation and Management Programme of Wular Lake had suffered as policy matters of Wular Conservation and Management Authority (WUCMA) could not be decided. Failure to provide Detailed Plan resulted in deprival of financial assistance from GoI for rejuvenation and restoration of Wular Lake. Insufficient afforestation in degraded forests resulted in increase in siltation in the Lake and consequently hastening the ageing of the Lake. Dropping of three vital activities of biodiversity conservation, eco-tourism development and sustainable resource development and livelihood improvement had adversely affected Conservation and Management programme. The planned activities for survey and demarcation, catchment conservation, enhancement of water holding capacity and water quality improvement were inadequately carried out. Training programmes, awareness generation and research activities for ensuring capacity building, public awareness and monitoring of impact of Lake conservation activities were not carried out.

5.10 Recommendations

- ***Encroachments in the Lake and impact of inflow of nutrients into the Lake need to be monitored regularly and mitigation measures may be taken expeditiously.***
- ***Changes in the area under water in Wular Lake need to be attended to and monitored periodically.***
- ***The Government may review the Conservation and Management Programmes undertaken in respect of Wular Lake to make them more effective and result-oriented.***

Chapter-VI

Conservation and Management of Hokersar, Mansar, Surinsar and Manasbal Lakes

Chapter-VI

Conservation and Management of Hokersar, Mansar, Surinsar and Manasbal Lakes

6.1 Conservation and Management of Hokersar Lake

6.1.1 Introduction

Hokersar Lake falls in the districts of Srinagar and Budgam. The Lake is fed by Doodhganga stream in the east and by Sukhnag *Nallah* in the west. The springs in and around the Lake and rainfall are other sources from which the Lake gets its water. The Lake has an outlet from where water discharges into river Jhelum. The Lake was notified[1] in July 1945 and was declared as Conservation Reserve under the Jammu and Kashmir Wildlife (Protection) Act, 1978. Given its value in maintaining livelihoods and ecological balance, the Lake was identified (1987) by the National Wetland Committee as one of the 16 important Lakes in the country. The Lake is being looked after by the Wildlife Warden, Wetland Division (WD), Kashmir.

Hokersar Lake

6.1.2 Organisational setup

The organisational set up of the Wildlife Warden, Wetland Division, Kashmir is shown in **Chart 6.1**:

[1] Vide Cabinet Order No: 710/ C of 1945 (G.G) dated 17.07.1945

Chart 6.1: Organisational setup of Wildlife Warden, Wetland Division, Kashmir

6.1.3 Land use changes within Lake and its catchment

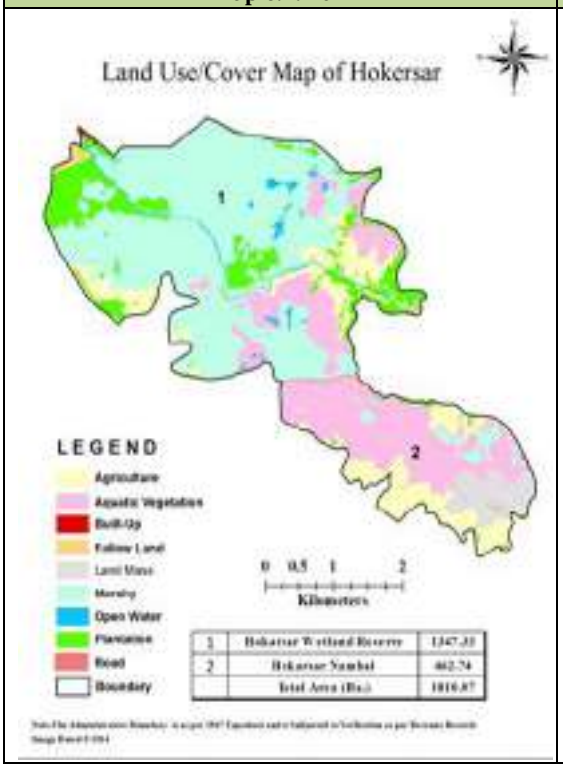
Audit observed that due to non-identification of point source/ non-point source of pollution entering the Lake, non-taking of measures to prevent silt from entering the Lake, lack of dredging and construction of flood spill channel through the Lake area, there was decrease of seven *per cent* in open water area of the Lake and increase in other land uses such as 11.92 hectares under scrub (1,157 *per cent*), 2.14 hectares under siltation (104 *per cent*), 11.92 hectares under river (103 *per cent*), 1.72 hectares under built-up (102 *per cent*), 38.77 hectares under aquatic vegetation (42 *per cent*).

In absence of Comprehensive Conservation and Management Programme for Hokersar Lake, there was change in land use of the Lake with consequent deterioration in its health. Thus, the pristine glory of Hokersar Lake, being the queen of wetlands, was at the risk of extinction.

- **Analysis of remote sensing data of EE&RSD to ascertain Land use changes in Lake**

According to data of EE&RSD, there were spatio-temporal changes in land use of the Lake during 2014-20 as shown in **Maps 6.1, 6.2**, **Table 6.1 and Charts 6.2 and 6.3**.

Maps 6.1 and 6.2: Change in land use of Lake during 2014-2020

Map 6.1: 2014	Map 6.2: 2020
	


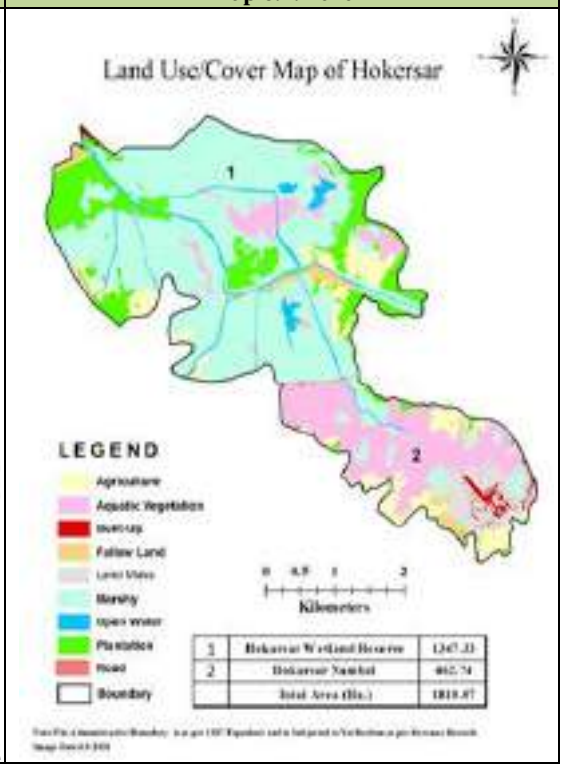


Table 6.1: Change in open water and other land use

Area in Hectares				Increase / Decrease and its Percentage (2014 to 2020)			
Sl. No.	**Land use/ Classification**	**2014**	**2020**	**Decrease**	**Increase**	**Percentage Decrease**	**Percentage Increase**
1	Open Water	1,017.98	950.35	67.63		7	
2	Aquatic Vegetation	92.99	131.76		38.77		42

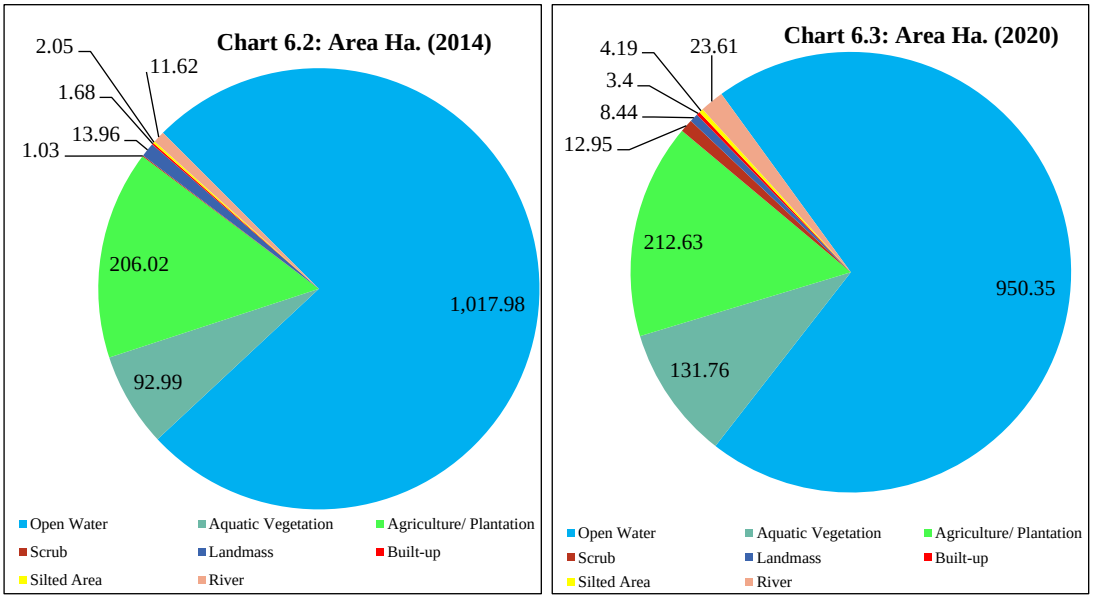
(Source: data of EE&RSD)

Chart 6.2 and 6.3: Change in land use of Lake during 2014-2020



It may be seen from **Table 6.1** that during 2014-20, there was decrease of seven *per cent* in open water[2] of Hokersar Lake, whereas there was increase in other land uses such as 11.92 hectares under scrub (1,157 *per cent*), 2.14 hectares under siltation (104 *per cent*), 11.99 hectares under river (103 *per cent*), 1.72 hectares under built-up (102 *per cent*), 38.77 hectares under aquatic vegetation (42 *per cent*) etc. due to anthropogenic pressure on the Lake.

Audit analysis revealed that some of the contributing factors of land use changes were:

- WD-Kashmir had not identified point source/ non-point source of pollution entering the Lake and sewage treatment system was not in place for treatment of sewage entering the Lake from its catchment area. Nutrients entering into the Lake through sewer had given rise to prolific growth of weed in the Lake and adequate de-weeding mechanism was not in place.
- No measures were taken to prevent silt from entering into the Lake and there was lack of dredging of land masses in the Lake. This led to exploitation of these areas for other land uses such as agriculture, vegetation, crop land etc.
- The increase in the area under river was due to construction of flood spill channel through the Lake area, which was done without following laid down parameters as discussed in **Paragraph 6.1.4.1**.

As a result, there was a decrease in the open water area of the Lake.

The Forest, Ecology & Environment Department replied (October 2022) that the policy to maintain ecological character of wetlands was under consideration of the

[2] An area of Lake unobstructed by aquatic vegetation, boulders etc. adequate for navigation or swimming

Department. It was further stated that the local villagers who had raised plantations inside the wetland had started to cut and remove the plants to relieve Hokersar from unwanted vegetation. It was also stated that settlements and built-up area which had remained intact were being retrieved.

- **Analysis of Google Earth Pro images to ascertain Spatio-temporal changes in Lakes and its catchment**

Clear images of Hokersar Lake and its catchment area of Haji Bagh, Soibug and HMT (Zainakot) available on Google Earth Pro were taken for the period 2005-2022. These images indicate substantial increase in the built-up in these catchment area of Lake. The catchment area are without sewage treatments and the Lake receives water inflow from tributaries flowing through these catchment area. The Google Earth Pro images of the Lake indicating land use changes within the Lake and its catchment are shown in **Satellite Images 6.1 to 6.13**:

Satellite Image 6.1: Hokersar and its catchment in 2022

Yellow marked boundary "A- (Haji Bagh), B-(Soibugh) & C-(HMT)" indicates catchment areas of Hokersar. Zoomed images of these catchment areas are given in Satellite Images 6.2 to 6.13.

Satellite Image 6.12: C-HMT-2014

Satellite Image 6.13: C-HMT-2022

6.1.4 Planning

Instead of a comprehensive plan for Conservation and Management of the Lake, only annual plans were formulated, financed and implemented by the Wildlife Department. These plans did not address the root causes of degradation of the Lake, such as change in hydrological regimes, pollution or loss of biodiversity in the Lake. Water budget of the Lake could not be regulated in absence of hydraulic gate at water entry and exit point of the Lake. Siltation in the Lake could not be mitigated and water quality of the Lake could not be maintained due to lack of silt retention basin, catchment treatment works and STPs.

Instead of a comprehensive plan for Conservation and Management of the Lake, only annual plans were formulated and implemented by the Wildlife Protection Department. The management plans for the Lake were formulated, financed and implemented on annual basis. These plans did not address the root causes of degradation of the Lake, such as change in hydrological regimes, pollution or loss of biodiversity in the Lake.

As per MoEF&CC guidelines (2009) survey and demarcation for taking protection measures to avoid encroachments, water management, biodiversity conservation, sustainable resource development, weed control, pollution control and environmental education were to be carried out for Conservation and Management of the Lake. Inventories had to be prepared for catchment area of the Lake.

Audit observed that WD-Kashmir had not prepared any comprehensive project/ plan to address root causes of degradation of the Lake such as change in hydrological regimes, pollution, loss of biodiversity and encroachments. Instead, WD-Kashmir prepared only Annual Plan of Operations (APOs) which were based on aggregate estimations and cost analysis for a definite period of time. As APOs broadly covered Wildlife Management activities, physical/ financial achievements of meagre activities carried out for Lake management were not monitored and their impact was not evaluated by WPD.

6.1.4.1 Creation of flood spill channel

To safeguard Srinagar city and adjoining districts of Kashmir Province during floods, the Flood Spill Channel (FSC) at Padshahi Bagh was created (1904) for bypassing excess flood water from river Jhelum. The FSC which passes through Hokersar Lake was designed to carry a discharge of 17,000 cusecs of water, but due to siltation and accumulation of unwanted materials, its carrying capacity had reduced to 6,000 cusecs at take-off point.

To address the problem, Phase-I of the Comprehensive Flood Management Programme (CFMP) was prepared (September 2016) by the Irrigation and Flood Control Department (I&FCD), Kashmir at a cost of ₹ 399.29 crore. The CFMP included ₹ 55.27 crore for Lake management works such as drainage works, construction of

escape channels[3], dredging for side slope protection, providing hydraulic gates at water entry and exit points, catchment treatment works of Doodh Ganga and Sukhnag *nallah* and construction of STPs. For these works, use of 15 hectares of land of Hokersar Lake was sanctioned (September 2016) by the Wildlife Protection Department to I&FCD against a compensation of ₹ 5.24 crore on account of Net Present Value (NPV)[4] and fulfillment of the following conditions:

- Five *per cent* of the project cost was to be earmarked by the I&FCD for management of Lake;
- Eco-friendly engineering practice was to be followed during execution of works;
- Water level of at least 3-4 feet was to be maintained in the Lake throughout the year;
- A proper gradient was to be provided to facilitate free flow of water from streams/ channels entering the Lake from all sides;
- Water quality monitoring was to be carried out at frequent intervals to avoid pollution in the Lake;
- Excavated material was to be disposed of outside the Lake;
- Regulator/ lock gate was to be constructed to ensure adequate and regular water supply to the Lake;
- Gabion/ Gabion mattresses[5] were to be laid on side slopes and on the existing embankments of the channel for ensuring continuous flow of water and for easy discharge of the silt coming with floods;
- Sufficient number of sluice gates were to be constructed in the existing bunds of channel to avoid damage to flora and fauna of the Lake; and
- Wildlife Institute of India (WII) was to advise adequate mitigation measures to be taken in respect of the Lake during implementation of the CFMP.

Audit noticed that I&FCD had spent ₹ 46.29 crore (between May 2018 and March 2022) on construction of channel, dredging and side slope protection. No major works such as construction of hydraulic gates at water entry and exit points of the Lake, silt retention basin and STPs and mitigation measures were taken up for execution as of March 2022.

[3] Cunnet passing through Hokersar Lake.

[4] A mandatory one-time payment that a user has to make for diverting forestland for non-forest use under the Forest (Conservation) Act, 1980.

[5] These are a type of wired basket filled with various rocks or soil that helps prevent erosion, retain absence of hydraulic gate at water entry and exit point of the Lake slope, or provide a landscape element.

Thus, water budget of the Lake could not be regulated. Siltation in the Lake could not be mitigated due to lack of silt retention basin and catchment treatment works. Also, the water quality of the Lake could not be maintained for want of these works and construction of STPs. Photographic evidence of inadequacies in the execution of works noticed during joint inspection carried out by Audit with the officials of WLW-K is given below.

Flood spill channel is on the left side and on the right side is entry point of the Lake which is without regulatory gate, silt settling basin and effluent treatment plant.	**Exit point of the Hokersar Lake without regulatory gate causing water to flow away from the Lake turning it into land mass and being used as play field.**
Dredged out material dumped in the open water area of the Lake	**Equipment used for dredging by the contractor (I&FCD) at the entry point of the Lake was not removed from the Lake**

6.1.5 Underutilisation of funds for management of Lake

Out of ₹ 15.44 crore received (2017-22) by the WD-Kashmir under Central/ UT Schemes, ₹ 3.12 crore (20 *per cent*) was for management plans of Hokersar Lake. Audit noticed that only ₹ 1.61 crore was spent on the Lake, whereas ₹ 1.51 crore (48 *per cent*) had remained unutilised. Due to underutilisation of funds, management plans of the Lake were implemented inadequately.

6.1.6 Programme Implementation

An amount of ₹ 0.88 crore earmarked for survey and demarcation, ground truthing, remote sensing, mapping and delineation of the Lake was not spent by WD-Kashmir on intended purposes leaving the Lake exposed to encroachments. ₹ 0.28 crore was spent on de-weeding during months which were not specified months for de-weeding, while ₹ 0.14 crore was spent on dredging without any bathymetric survey. Point and non-point sources from which pollutants were entering the Lake had not been identified. WD-Kashmir had no comprehensive public awareness plan and no environmental education/ awareness programmes were held.

For Conservation and Management of a Lake, the activities to be carried out include survey and demarcation of the Lake, identification/ treatment of its catchment area, identification and protection of water sources, water budgeting, improving water quality of Lakes by flushing, biodiversity conservation, assessment of life of the Lake, sewage treatment in catchment area, prohibition in diversion of the Lake area. Lake management also included de-weeding and dredging of the Lake and generating public awareness. The deficiencies noticed in implementation of the Conservation and Management activities of the Lakes are discussed below:

6.1.6.1 Survey and Demarcation

To safeguard the Lake from threats of encroachment, survey and demarcation of the Lake was to be done based on revenue records, ground truthing and remote sensing followed by mapping and delineation of the Lake.

Audit observed that WD-Kashmir received ₹ 0.88 crore (₹ 0.79 crore: 2017-18 and ₹ 0.09 crore: 2020-21) for survey and demarcation, against which ₹ 0.04 crore was spent (2017-18) on items[6] not part of the component, while ₹ 0.84 crore (95 *per cent*) was surrendered. Thus, no survey of Lake was conducted leaving it exposed to encroachments as discussed in **Paragraph 6.1.8**.

The Forest, Ecology & Environment Department replied (October 2022) that survey and digital delineation of Hokersar wetland had been completed jointly with Revenue Department. Moreover, the process of fixing 100 specially designed cement concrete boundary demarcation pillars would be completed during the first two years of implementation of Management Action Plan. It was further stated that due to proprietary rights claimed by some locals over some portions of wetlands, it was difficult to draw a distinction between ownerships and encroachments in these wetlands. It was added that to ascertain the actual status of the land, the District Administration had ordered serious measures for undertaking joint demarcation of these

[6] Hiring of legal experts, purchase of equipment etc.

wetlands. The fact, however, remained that survey and demarcation of the Lake was not carried out.

6.1.6.2 De-weeding, De-silting and Dredging of Lake

- **De-weeding**

As per National Wetland Conservation Programme, Guidelines for Conservation and Management of Wetlands in India (2009), de-weeding is to be carried out for removing unwanted plants from the Lake. The exercise was to be carried out before flowering, fruiting and formation of propagules in plants. Weeds were to be removed at a controlled rate of 40 to 50 *per cent* (maximum up to 75 *per cent*) of submerged vegetation. Some selected areas were to be left undisturbed for fish spawning and feeding of waterfowls.

Out of ₹ one crore allocated (2017-22) for de-weeding/ de-silting of the Lake, an expenditure of ₹ 0.85 crore was incurred.

Audit noticed that expenditure of ₹ 0.85 crore included ₹ 0.71 crore incurred (2017-22) on de-weeding, out of which ₹ 0.28 crore was spent during months which were not specified months for de-weeding. WD-Kashmir did not have year/ basin/ area-wise vegetation map of the Lake alongwith data of weed cover. Data regarding areas from which weeds were removed and areas left undisturbed for spawning of fish and feeding of waterfowls was also not maintained. Impact assessment of de-weeding such as decrease/ increase in visibility and decrease/ increase in dissolved oxygen, nitrogen and phosphorus in Lake water was also not carried out.

During the exit conference (September 2022), it was stated that de-weeding works had been included in recently prepared five-year Integrated Management Plan.

- **Dredging**

Dredging is carried out to improve water flow in the Lake by removing nutrient rich sediments, shoals and solid land mass. Dredging of Lake has to be based on a bathymetric survey of the Lake, indicating location of blocked channels, area of the Lake to be dredged out, the depth up to which it has to be done, sites where the dredged out material has to be disposed of and cost involved.

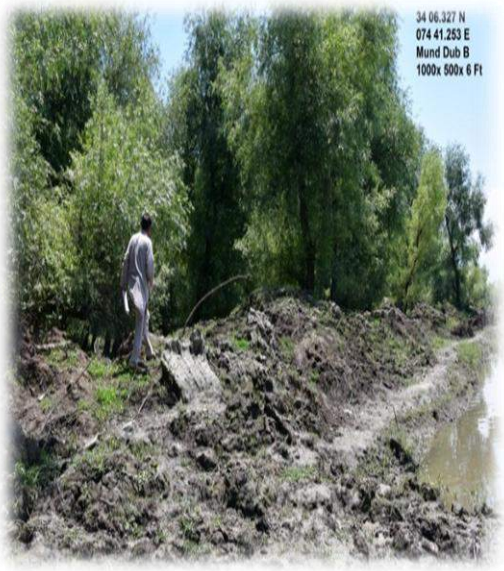
WD-Kashmir had spent (2017-22) an amount of ₹ 0.14 crore on dredging without any bathymetric survey. No record was maintained to show locations at which dredging was carried out and places where dredged out material was dumped. No study was conducted to assess the impact of dredging on the Lake.

During the exit conference (September 2022), it was stated that dredging works had been initiated for which two master dredgers had been deployed. It was further stated

that a process was underway to utilise the dredged-out material for production of bricks, for use in roads, paths, and other infrastructure within the Lake.

The Forest, Ecology & Environment Department further replied (October 2022) that the WPD had engaged consultant for conducting bathymetric study and on the basis of the data generated by the Engineering consultant surveyor, e-auction notice had been finalised for processing.

During joint inspection by the audit party with the members of the audited entity, accumulation of silt and dumping of dredged out silt by contractors at the fringes of the Lake were noticed. Photographic evidence is given below.

Silted areas where no de-siltation was done resulting in reduction of water area of the Lake	**De-silted/dredged out material dumped at the fringe of the Lake**
	


6.1.6.3 Discharge of untreated effluents into the Lake

Discharge of domestic waste from urban habitations near the Lake, percolation of nutrients due to surface run-off from agricultural activities in the catchment area and discharge of waste water from a hospital located near the Lake had the potential to cause eutrophication of the Lake.

WD-Kashmir had not identified point and non-point sources from which pollutants were entering the Lake.

During joint inspection by the audit party with the members of the audited entity, sewage and wastes entering the Lake from its catchment area were noticed. Photographic evidence is presented in the following photographs:

Garbage dumped at the embankment of flood spill channel at Jhelum Valley College-cum-hospital, due to which pollutants enter the Hokersar Lake

Water from drains finding its way into one of the water channels of the Lake at Dar *Mohalla*

Waste floating in water which finally enters into the Lake

Waste dumped at the fringe of / inside the Lake

6.1.7 Public Awareness

As per National Wetland Conservation Programme, Guidelines for Conservation and Management of Wetlands in India (2009), Environmental education and public awareness programmes were to be held by holding seminars/ workshops and way-side exhibits such as display boards and hoardings. Services of media were to be used and Self-Help Groups (SHGs) were also to be constituted for public awareness.

Audit noticed that WD-Kashmir had no comprehensive public awareness plan. Although ₹ 0.26 crore was allocated (2017-22) for public awareness, only ₹ 0.12 crore was spent thereon leaving ₹ 0.14 crore (56 *per cent*) unutilised. No records indicating annual targets/ achievements and monitoring reports were maintained. The expenditure of ₹ 0.12 crore was incurred on installation of hoardings and providing refreshment to participants. No environmental education/ awareness programmes were held.

6.1.8 Encroachment of Lake

Due to lack of survey and demarcation, land area of the Lake measuring 2,528.10 *kanals* had been encroached upon for erection of structures, plantation, development of vegetative gardens and cultivation of paddy.

There was no formal takeover of area of land when the Lake came (year 1978) under the control of WD-Kashmir from the Department of Fisheries. The WD-Kashmir did not have details of area (whether Government or proprietary) belonging to the Lake and its fringes. Due to lack of survey and demarcation, land of the Lake measuring 2,528.10 *kanals* had been encroached upon for erection of structures, plantation, development of vegetative gardens and cultivation of paddy. Although the WD-Kashmir had served notices to encroachers, no eviction could be ensured.

During the exit conference (September 2022), it was stated that demarcation of Lake would be followed by identification of encroachments and erection of pillars.

During joint inspection by the audit party with the members of the audited entity, various types of encroachments were noticed. Photographic evidence is given below.

Road illegaly constructed through the Lake at Kadalla *Mohalla* Zainakot 	**Dumping of garbage near bridge constructed within Lake for road connectivity to Kadalla *Mohalla* Zainakot**
Conversion of Lake area into play ground 	**Encroachment of Lake by conversion of Lake area into vegetation fields**
Encroachment of Lake by conversion of Lake area into plantation 	**Siltation of Lake area giving rise to illegal plantation/ encroachments**

6.1.9 Results of research carried out by scholars of universities and health of Lake

No measures were taken by WD-Kashmir in respect of observations of independent research reports regarding disappearance of some native species of aquatic plants and clogging of non-native species in the Lake. Measures were also not taken for overcoming decrease in depth of the Lake and for mitigation of deterioration in water quality of the Lake due to increase in nutrient loads.

WD-Kashmir had not carried out any research to evaluate water quality of the Lake and to study fishes and water bird population in the Lake. Disappearance of native species and invasion of noxious species, if any, due to heavy inflow of silt, sewage flowing into Lake from its catchment area had also not been assessed. However, research carried out by scholars of various universities on various themes of the Lake indicated that health of the Lake had deteriorated due to different factors as detailed in the succeeding Paragraphs:

- **Disappearance of native and invasion of exotic species of aquatic plants**

A research report (2019)[7] revealed that three aquatic plants viz. *Acoruscalamus, Euryale ferox,* and *Nelumbonucifera* had disappeared from the Lake, while non-native species such as *Azolla spp., Salvinianatans,* and *Menynanthese spp.* had clogged the Lake.

A research paper[8] titled 'Study on Phytosociology and biomass changes (above ground and below ground of emergent microphytes in Hokersar wetland of Kashmir)' revealed that a major part of the macrophytes (biomass/ organic matter) of the Lake was under the Lake soils and these macrophytes act as a huge carbon sink.

According to the Report, though the Lake was highly productive with a large carbon sequestration potential, there was a risk of losing it if measures were not taken to maintain the trophic status of the Lake by overcoming the problem of decrease in the depth of the Lake. However, no action was taken by the WD-Kashmir on the recommendation of the research reports.

- **Water quality of the Lake**

A research report (2019)[9] titled 'Current status of wetlands in Srinagar city: Threats, management, strategies, and future perspective' revealed that water quality of the Lake had deteriorated as there was increase in the nutrient loads[10] and decrease in dissolved oxygen in the Lake. This was attributed to untreated discharge of domestic sewage,

7 Current Status of Wetlands in Srinagar City: Threats, Management Strategies, and Future Perspectives (January 2020) by Shahid Ahmad Dar, Sami Ullah Bhat, Irfan Rashid and Sajad Ahmad Dar.
8 Published in November 2016 (Afreen J Lolu and two others)
9 By Shahid Ahmad Dar, Sami Ullah Bhat, Irfan Rashid and Sajad Ahmad Dar.
10 Phosphate phosphorous, nitrate nitrogen and anmoniacal nitrogen

agricultural effluents and animal waste into the Lake. The report suggested for adoption of proper bioremediation techniques to curtail release of major pollutants from catchments into the Lake. However, WD-Kashmir had taken no action on these suggestions.

These independent research outputs were not taken into consideration by the WD-Kashmir for preparation of plans for Conservation and Management of Hokersar Lake.

The Forest, Ecology & Environment Department replied (October 2022) that the health of Hokersar wetland alongwith all other important wetlands was being assessed by MoEF&CC and the results in the shape of health card were being published and uploaded on the national website.

The reply is not convincing as in the health card uploaded on the Wetlands of India Portal[11], the uploaded data pertains to the year 2019. Further, the uploaded health card states that only 60 to 80 *per cent* of samples were meeting the criteria of the BOD[12]/ COD[13]/ dissolved oxygen. No data has been uploaded on the Portal after 2019 despite lapse of over three years. Further, by shifting onus on the GoI, the Department cannot absolve from its responsibility to adopt a proper bioremediation technique to curtail release of major pollutants from catchments into the Lake as suggested in the research report.

6.1.10 Conclusion

Point sources/ non-point sources of pollution entering the Lake had not been identified. Lack of dredging and construction of flood spill channel through the Lake area had resulted in decrease in open water area of the Lake and increase in other land uses such as scrub, area under siltation, area under river, area under built-up structures and area under aquatic vegetation. No comprehensive plan was formulated for Conservation and Management of the Lake. Wildlife Protection Department had formulated only annual plans which did not address the root causes of degradation of Lake such as change in hydrological regimes, pollution or loss of biodiversity in the Lake. Due to lack of survey and demarcation, Lake area measuring 2,528.10 *kanals* had been encroached upon.

6.1.11 Recommendations

- ***Point sources/ non-point sources of pollution entering the Hokersar Lake need to be identified and treated.***
- ***Proper dredging of the Lake should be carried out to increase open water area of the Lake.***
- ***Survey and demarcation of the Lake needs to be undertaken so that the Lake area is not susceptible to encroachment and concerted efforts should be made to clear encroachment of 2,528.10 kanals of Lake area.***

[13] Chemical Oxygen Demand

6.2 Conservation and Management of Surinsar and Mansar Lakes

6.2.1 Introduction

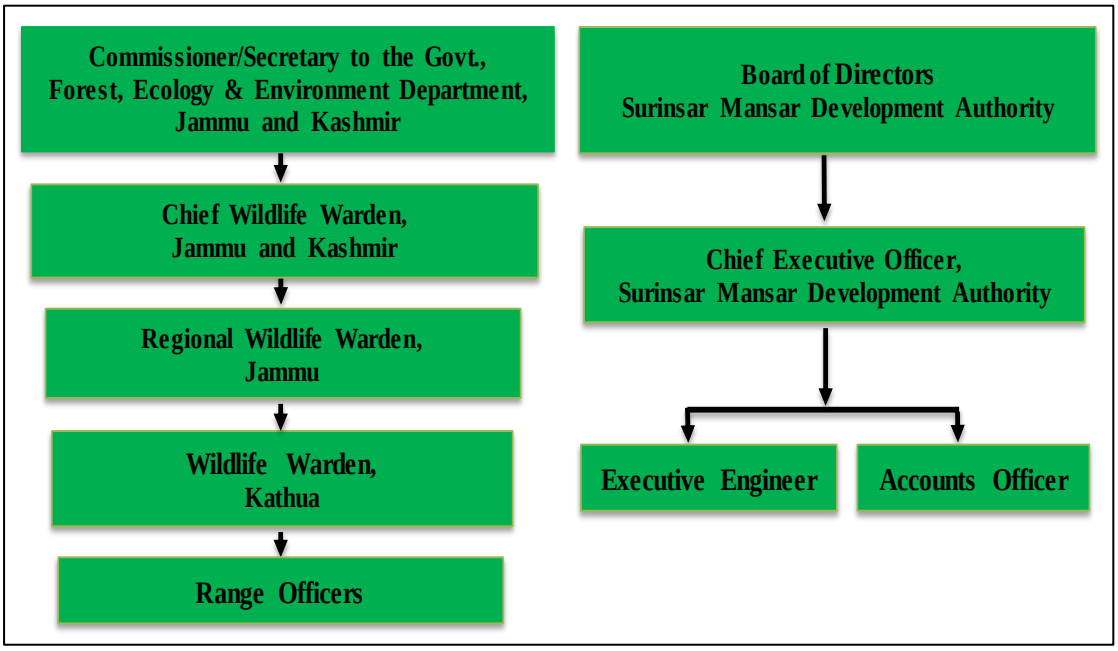
Mansar and Surinsar Lakes are situated about 60 km east of Jammu city in Udhampur and Jammu Districts respectively. The sources of water in the Lakes are springs in and around the Lake, rainfall and surface run-off. The Lake fringes are spread over an area of 0.90 Sq. km. The twin Lakes of Surinsar and Mansar are under the control and management of Wildlife Warden, Kathua (WLW-Kathua) and Surinsar-Mansar Development Authority (SMDA).

Mansar Lake	Surinsar Lake

6.2.2 Organisational Setup

The administrative control of WLW-Kathua and SMDA vests with Commissioner/ Secretary, Forest, Ecology, & Environment Department, GoJ&K and Commissioner/ Secretary, Tourism Department, GoJ&K respectively. The organisational setups of WLW-Kathua and SMDA are given in **Chart 6.4**:

Chart 6.4: Organisational setups of WLW-Kathua and SMDA



6.2.3 Land use changes in Surinsar and Mansar Lakes and their catchments

- **Analysis of remote sensing data of EE&RSD to ascertain land use changes within Surinsar and Mansar Lakes and their catchment area**

According to data of EE&RSD, there were spatio-temporal changes in land use of the Lakes during 2014-20 as detailed in **Table 6.2**

Table 6.2: Slight change in the open water of Surinsar and Mansar Lakes

Surinsar Lake		Mansar Lake	
2014	**2020**	**2014**	**2020**
Open water 28.60 hectares	Open water 28.59 hectares	Open water 58.61 hectares	Open water 59 hectares

(Source: data of EE&RSD)

Although there was slight change in open water of these Lakes falling within the protected zone of wildlife area, Lake conservation and management had suffered inadequacies as discussed in the succeeding Paragraphs:

- **Analysis of Google Earth Pro images to ascertain spatio-temporal changes in catchment of Mansar Lake**

Clear images of Mansar Lake and its catchment available on Google Earth Pro from 2002-2022 indicate gradual increase in built-up in the catchment/ at the fringes of the Lake i.e. in areas of Jassor, Lodili *Mohalla* and Moriyan. The catchment area are without any sewage treatment. The Google Earth Pro images of the Mansar Lake and its catchment area, depicting spatio-temporal changes in Lake, are shown in **Satellite Images 6.14 to 6.26:**

6.2.4 Planning

Neither WLW-Kathua nor SMDA had a specific legal framework and clear demarcation of responsibility for Conservation and Management of Lakes. As of March 2022, SMDA had not finalised a master plan of the area resulting in continuous unplanned development and construction works in and around the Lakes. In absence of any comprehensive Integrated Management Plan for Conservation and Management of Lakes, WLW-Kathua and SMDA were carrying out Lake-related activities in an ad-hoc manner. Monitoring committee constituted (December 2020) to oversee Conservation and Management of the two Lakes had not held any meeting as of March 2022 to monitor Conservation and Management of the Lakes.

6.2.4.1 Mandate of the WLW-Kathua and SMDA

The SMDA was created on 26th June 2006 under Jammu and Kashmir Development Act, 1970 to promote and facilitate development of the area (including Lakes) falling under its jurisdiction. As per provisions of the Act, the SMDA had to prepare a master plan of the designated area for carrying out development of the area, including Mansar and Surinsar Lakes, indicating the proposed land usage and stages of development.

Audit examination revealed the following deficiencies:

- Despite a lapse of 16 years (as of March 2022) since its creation, SMDA could not finalise a master plan of the designated area. This resulted in continuous unplanned development and construction works in and around the Lakes thereby defeating the purpose for which SMDA was formed.
- SMDA had been largely preparing annual plans for execution of works related to tourism development of the area such as construction of view-points in and around Lakes, sanitation/ face-lifting of the area and creation of bathing *ghats* with only limited plans for Conservation and Management of Lakes.
- Lake-related plans were not based on baseline data. Although, a draft master plan for SMDA was submitted (April 2019) by SMDA to the Tourism Department for approval, Tourism Department had made observations (February 2020) regarding the master plan which were to be addressed by March 2020. The issues remained unaddressed and no further action in this regard was taken by SMDA (March 2022).
- There was no clear or specific mandate of WLW-Kathua regarding Conservation and Management of the twin Lakes. As these Lakes are part of Surinsar-Mansar Wildlife Sanctuary, they come under the management and control of WPD which had focused more on Wildlife management and less on Conservation and Management of Lakes.

Due to non-finalisation of master plan, there was unplanned urbanisation of the areas around the Lake because of which Conservation and Management of the Lakes suffered continuously.

The Forest, Ecology & Environment Department replied (October 2022) that SMDA is looking after the tourism related activities whereas WLW-Kathua is looking after the conservation work. It was further stated that WPD had taken up preparation of comprehensive management plan with Wildlife Institute of India (WII) which had recently submitted a draft management plan, which is yet to be finalised.

Thus, neither WLW-Kathua nor SMDA had a specific legal framework and clear responsibility for Conservation and Management of Lakes.

6.2.4.2 Preparation of Management Plans for Lake

As per Guidelines for National Lake Conservation Plan (NLCP) 2001 and National Wetland Conservation Programme 2009, later subsumed into National Plan for Conservation of Aquatic Ecosystems (NPCA), 2017, investment for conservation of wetlands shall be based on Integrated Management Plan (IMP) formulated by State/ UT Administration[14] and financial assistance under NPCA shall be on the basis of IMP.

Audit noticed that WPD had prepared an Integrated Plan for Wildlife Management of the area for the period (2006-11) which was approved (May 2012) by MoEF&CC under Prime Minister's Reconstruction Package (PMRP). The Plan was implemented from the year 2008-09 and stretched up to 2021-22. WII submitted (July 2019) a Rapid Survey Report regarding the course of action that would be followed for preparation of IMP for the period 2020-25. Thereafter, WPD advanced (August 2019) ₹ 18.63 lakh to WII. Subsequently, a draft Management plan of Mansar-Surinsar Wetlands was prepared (December 2021) by WII. The WPD made (December 2021) some observations on the plan for deliberation with WII which remained unaddressed (March 2022) and the IMP was not approved as of March 2022.

WLW-Kathua accepted (January 2021) the audit observation that it had carried out Lake related activities according to the earlier Management plan framed in 2006-11.

While a rejuvenation and development plan for Mansar Lake was drafted by the SMDA, the plan was not approved (March 2022). No management plan in respect of Surinsar Lake was prepared as of August 2022.

The Forest, Ecology & Environment Department replied (October 2022) that WPD had initiated the process for preparation of management plan of Surinsar-Mansar Lakes with WII which has carried out scientific studies for the purpose and final draft has been

[14] The Wetlands Authorities, created as per provisions of Wetlands (Conservation and Management) Rules, 2017, within States/ UT administration will be the nodal agency for all matters concerned with the implementation of NPCA.

received for finalisation. It was further stated that the comprehensive Mansar Rejuvenation Plan had been examined by WPD and comments thereon conveyed to Director Tourism, Jammu.
The reply should be seen in light of the fact that no details have been furnished in the reply such as date of taking up the matter with WII and agreement/ MoU entered into with the latter and date of receipt of draft for finalisation and reasons for its pendency.

Thus, in the absence of any comprehensive IMP for Conservation and Management of the two Lakes, both the Authorities (SMDA and WLW-Kathua) were carrying out Lake-related activities in a directionless and ad-hoc manner.
During the exit conference (September 2022), it was stated that the five-year Integrated Management Plan (IMP) of Lake have been prepared after the matter was raised by NGT and Audit.

6.2.4.3 State Level Monitoring Committee

To oversee the Conservation and Management of the two Lakes, the GoJ&K constituted (December 2020) a State Level Monitoring Committee. However, as of March 2022, no meeting of the committee was held with the result the Conservation and Management of the Lakes could not be overseen.

6.2.5 Underutilisation of funds for management of Lakes

Funds of ₹ 2.22 crore allocated (2017-22) to WLW-Kathua for management of Lakes were partly spent as ₹ 1.40 crore (63 *per cent*) had remained unutilised. Out of ₹ 5.03 crore received by SMDA under other Central/ State schemes during 2017-22 for Lake-specific activities, ₹ 4.68 crore was said to have been expended on Conservation and Management of twin Lakes.

WLW-Kathua received ₹ 32.28 crore under various Central/ State schemes during 2017-18 to 2021-2022 for Mansar and Surinsar Lakes. The amount included ₹ 2.22 crore (seven *per cent*) for Lake-specific activities. Audit noticed that ₹ 0.82 crore was spent on restoration of degraded habitat of turtles by construction of turtle breeding farm, providing safe passage for turtles from Lake to land, plantation of fruit bearing tress in the catchment area of the Lake, education and awareness. The meagre funds allocated for management of the Lakes were also partly spent as ₹ 1.40 crore (63 *per cent* of allocated amount on Lake-specific activities) had remained unutilised.

WLW-Kathua attributed (January 2021) underutilisation of funds to late release of funds in respect of Centrally Sponsored Scheme "NPCA" and non-submission of annual action plan under NPCA to higher authorities.

Similarly, ₹ 14.52 crore received by SMDA under other Central/State schemes during 2017-18 to 2021-22 included ₹ 5.03 crore (35 *per cent*) for Lake-specific activities.

Audit noticed that out of ₹ 5.03 crore, ₹ 4.68 crore was said to have been expended on Conservation and Management of twin Lakes.

6.2.6 Programme implementation

As of March 2022, SMDA and WPD had not prepared the document indicating demarcation of boundary of Surinsar-Mansar Lakes and as such the two Lakes had remained un-demarcated and open to encroachments. Provision for de-weeding of Surinsar-Mansar Lakes was not kept by WPD in Annual Plan of Operations (APOs) during 2017-21. SMDA and WPD had not conducted any survey to identify the point and non-point sources of waste and sewage entering the Lakes. No STPs were in place for treatment of sewage generated by inhabitants living in the vicinity of the Lakes resulting in discharge of untreated waste and sewage into the Lakes. SMDA had carried out construction works amounting to ₹ 4.36 crore within 50 m of the two Lakes during 2017-18 to 2021-22. WPD had failed to prevent illegal construction of private buildings within the periphery of 50 m of the Lake.

For Conservation and Management of a Lake the activities to be carried out included survey and demarcation of Lake, identification/ treatment of its catchment area, identification and protection of water sources, water budgeting, improving water quality of Lakes by flushing, biodiversity conservation, assessment of life of the Lake, sewage treatment in catchment area, prohibition in diversion of Lake area, preventing encroachments and stopping illegal lifting of water. Lake management also included de-weeding and dredging of Lake and generating public awareness. Against these activities, only catchment management works and efforts for conservation of turtles were done during the period 2017-22. The deficiencies noticed in the implementation of the Conservation and Management activities of the two Lakes are discussed below.

6.2.6.1 Demarcation

Wetlands (Conservation and Management) Rules, 2017 provide that the concerned Department/ Authority of the State Government or Union Territory Administration shall, within a period of one year from the date of publication of these rules[15], prepare a brief document in respect of each wetland identified for notification indicating boundary of wetland supported by accurate digital maps and validated by ground-truthing. Based on the brief document, the Department/ Authority had to make recommendations to the State Government or Union Territory Administration for notifying the wetlands. The document was also to demarcate catchment area (zone of influence) of wetlands and to indicate site-specific activities to be permitted and regulated within the wetland and its zone of influence.

[15] By 26 September 2018.

Records of SMDA and WLW-Kathua showed that the brief document indicating demarcation of the boundary of Surinsar-Mansar Lakes had not been prepared as of March 2022. No survey was conducted to assess the zone of influence (catchment area) including sources of water of the two Lakes. Thus, the two Lakes had remained un-demarcated and open to encroachments.

Against ₹ 3.78 crore earmarked by the WPD for catchment management works[16], ₹ 3.76 crore was spent as of March 2022 as afforestation, construction/ widening of drains and de-silting of silt chambers were not taken up. Therefore, flow of sediments and nutrients into the Lakes could not be prevented. Impact of works executed at a cost of ₹ 3.76 crore was also not assessed by the WLW-Kathua.

During the exit conference (September 2022), it was stated that catchment management works would be taken up on scientific lines and silt channels/ traps had been prepared to stop siltation of Lake.

6.2.6.2 De-Weeding

Audit noticed that provision for de-weeding of Surinsar/ Mansar Lakes was not kept by WPD in Annual Plan of Operations (APOs) during 2017-18 to 2020-21. This had resulted in growth of weeds in the two Lakes up to the level of water as can be seen from the pictures below. After being pointed out by audit, WPD made a provision of ₹ 2.98 lakh for de-weeding of both the Lakes in the APOs of 2021-22. An expenditure of ₹ 2.97 lakh was incurred on de-weeding of two Lakes during 2021-22.

WLW-Kathua stated (January 2021) that de-weeding of aquatic vegetation and dredging would be included in future APOs.

During the exit conference (September 2022), it was stated that process of de-weeding of Surinsar Lake had been initiated.

Photographic evidence of floating weeds in the Lakes is given below.

Floating weeds inside Surinsar Lake	**Growth of weeds at the fringe of Mansar Lake**

[16] Check walls in dry stones masonry, gully plugging in RS masonry dry, afforestation in area trench plantation etc.

6.2.6.3 Sewage treatment system and disposal of waste

- **Sewage system**

Wetlands (Conservation and Management) Rules, 2010 and 2017 prohibit discharge of untreated wastes and effluents from villages and other human settlements into wetlands.

Audit examination revealed the following deficiencies:

- SMDA and WPD had not conducted any exhaustive survey to identify the point and non-point sources[17] of waste and untreated sewage entering the Lakes.
- No STPs were in place for treatment of sewage generated by inhabitants living in the vicinity of the Lakes.
- Although SMDA projected (December 2018) requirement of ₹ 5.60 crore under PMDP (Phase-II) for installation of eight STPs[18] for these two Lakes and requested (November 2019) the Chief Engineer (UEED) to depute technical experts/ engineers to explore feasibility for installation of STPs and drainage systems, there was no further progress in this regard. As a result, funds could not be obtained from MoEF&CC for construction of STPs under PMDP (Phase-II).
- A provision of five STPs kept in the Mansar rejuvenation plan (2021) under PMDP Phase-II was yet to be approved as of March 2022.

Thus, untreated waste and sewage generated from the households in the vicinity of the two Lakes continued to be discharged into the Lakes resulting in deterioration in the water quality of these Lakes. Photographic evidence is given below:

Untreated sewage from households flowing into Mansar Lake

[17] Pollution originating from a single, identifiable source, such as a discharge pipe from a factory or sewage plant, is called point-source pollution. Pollution that does not originate from a single source, or point, is called non-point source pollution.

[18] Five at a cost of ₹ 3.50 crore for Mansar Lake and three at a cost of ₹ 2.10 crore for Surinsar Lake.

Drain water flowing into Surinsar Lake near a residential area	**Drain water from commercial establishments flowing into Mansar Lake**

- **Solid Waste Management**

Rule 4 of Wetlands (Conservation and Management) Rules, 2010 and 2017 prohibits dumping of solid waste within wetlands. Further, Waste Management Rules, 2016 (notified by MoEF&CC) prescribe actions to be taken for collection, transportation, treatment and disposal of waste together with monitoring and evaluation of compliance of these Rules.

Audit noticed that SMDA and WLW-Kathua had not taken measures for source segregation and door-to-door collection and disposal of solid waste generated by households in the vicinity of the Lakes. Though SMDA spent ₹ 0.35 crore during 2017-18 to 2021-22 on disposal of solid waste, it had not identified land for dumping of solid waste with the result waste generated by households, shops, visitors and pilgrims was being dumped on the fringes of these Lakes as depicted in the photographs below. The animal waste generated in the deer park situated along the banks of Mansar Lake was also finding its way into the Lake. Photographic evidence is given below.

Waste dumped by visitors at the fringes of Mansar Lake (26.01.2021)

Out of funds of ₹ 6.16 lakh released (2017-18 to 2021-22) by GoJ&K to WLW-Kathua for solid waste management, ₹ 1.74 lakh (28 *per cent*) was not spent.

SMDA stated (January 2021) that installation of STP and identification of land for dumping site were under process. WLW-Kathua stated (January 2021) that steps would be taken for disposal of garbage/ waste in a scientific manner and that the animal waste from the deer park would be disposed of by vermicomposting**.**

6.2.6.4 Construction works executed in contravention of wetland rules

Rule 4 of Wetlands (Conservation and Management Rules), 2010 and 2017 stipulates that no construction of a permanent nature except for boat jetties shall be undertaken by any Authority within 50 meters from the mean high flood level of a water body. Audit noticed that in contravention of these rules, SMDA had carried out construction works amounting to ₹ 4.36 crore within 50 meters of the two Lakes during 2017-18 to 2021-22. The works included construction/ upgradation of wooden viewpoints and construction of cemented tiled paths along the periphery of the two Lakes.

It was also noticed that WLW-Kathua had failed to prevent illegal construction of private buildings within the periphery of 50 m of the Mansar Lake, as can be seen in the following photographs.

Illegal constructions within 50 meters from Mansar Lake

The CEO, SMDA stated (Jan 2021) that SMDA was in the process of preparing a Master plan in consultation with the stakeholders to define land use of Lakes. It was further stated that the Directorate of Tourism had prepared Mansar Rejuvenation Plan in consultation with the Chief Wild Life Warden, Jammu to undertake the development of the area.

The reply was not relevant as no justification was offered by the CEO, SMDA regarding constructions carried out in the vicinity of the Lakes in contravention of Wetland Rules.

During the exit conference (September 2022), it was admitted that pathways constructed around Surinsar-Mansar were wrongly executed by SMDA. It was further stated that there had been improvement in coordination between WPD and SMDA.

6.2.7 Measures for conservation of turtles

Rapid Survey Report (RSR) of WII revealed (June 2019) that there were 26 turtles belonging to two species[19] in Mansar Lake and 17 turtles belonging to three species[20] in Surinsar Lake. Native to northern India, these turtle species enjoy protection under Schedule-I of the Indian Wildlife Protection Act, 1972. *Nilssonia Gangeticus* specie found in Mansar Lake is considered as vulnerable. As such, measures were needed to be taken by providing underground passage for this species, constructing turtle breeding cum basking farms on banks and developing nesting sites to support their population.

WII in its RSR (June 2019) as well as WLW-Kathua apprised (April 2022) CEO, SMDA that construction of concrete tiled path along the periphery of Lakes by SMDA without obtaining NOC from WLW-Kathua had resulted in raising of water level of these Lakes causing obstruction in movement of turtles to the shores of the Lakes for basking/ laying of eggs. As of March 2022, no action was taken in this regard by SMDA. Audit noticed (April 2022) during on spot verification that though construction of turtle breeding cum basking farms was completed (December 2022) by WLW-Kathua in Surinsar Lake, movement of turtles to the shores for laying eggs continued to remain hampered. Due to raising of water level, the breeding cum basking farm constructed (December 2022) in Mansar Lake was submerged in water.

The Forest, Ecology & Environment Department replied (October 2022) that serious efforts had been made by WPD for conservation of two species of turtles and that during the last three years, 10 turtle breeding grounds/ basking sites and five underpasses had been made in the Lakes. It was also stated that the water level in the Lakes had been lowered to expose the shore area.

The reply should be seen in light of the fact that during physical verification (December 2022) of Mansar Lake it was found that there were six breeding farms in the Lake out of which, one had continued to remain submerged, four were improperly fenced exposing turtle eggs to being eaten by stray animals/ birds and only one was in good condition. Photographic evidence is presented in the following photographs:

[19] 15 individuals of Nilssonia Gangeticus and 11 individuals of Lissemys Punctata.

[20] Lissemys Punctata, Nillsonia Gangeticus and Pangshura tecta.

Concrete wall constructed around Mansar Lake

Turtle breeding ground submerged in water

6.2.8 Other issues

Instead of delinking the source of water for water supply scheme from Mansar Lake, Jal Shakti Department continued to irregularly lift water of the Lake for supply of water. Water quality tests of the Lakes conducted (November/ December 2018) by the Pollution Control Board (PCB) revealed that Biological Oxygen Demand, Chemical Oxygen Demand, levels of ammonium nitrate and nitrate nitrogen were not within the permissible limits. Unofficial introduction into the Lake of exotic species had resulted in dwindling of native fishes.

6.2.8.1 Irregular Lifting of water

Rule 4 of Wetlands (Conservation and Management), Rules 2010 and 2017 stipulate that the wetlands shall be conserved and managed in accordance with the principle of 'wise use'. Further, these rules prohibit discharge of untreated wastes and effluents into the wetlands.

Under 'Water Supply Scheme Channi Mansar' a water filtration plant using water of Mansar Lake was completed in 1994. A new Water Supply Scheme (WSS) under

Accelerated Rural Water Supply Programme (ARSWP)/ Special Task Force with '*Gambhir Nallah'* as source of water was completed (March 2014) by the Department of Jal Shakti (Public Health Engineering) at a cost of ₹ 5.28 crore to meet increase in demand for water and delink its source from Mansar Lake.

Audit noticed that instead of delinking the source of water from Mansar Lake, Jal Shakti Department continued to irregularly lift water from the Lake for supply of water. Further, the residual waste from the water filtration plant was being discharged back into Mansar Lake in contravention of the Wetlands rules, thus affecting the physico-chemical properties of the Lake.

The fact of change in the physio-chemical properties was also corroborated (August 2019) by the J&K Pollution Control Board. Although several notices were issued (between May 2016 and March 2022) by the Wildlife Protection Department to the Jal Shakti Department, Udhampur, the latter continued to irregularly lift (March 2022) water from the Lake for the WSS.

WLW-Kathua stated (January 2021) that despite repeated reminders, the Jal Shakti Department continued unregulated siphoning of water from the twin Lakes.

Irregular lifting of water by Jal Shakti (PHE) Department from Mansar Lake

6.2.8.2 Water quality of the Lakes

National Green Tribunal (NGT) issued (September 2020) directions regarding prevention of littering of waste near the banks of the Lakes, prevention of direct entry of waste water from surrounding commercial establishments and households directly into Lakes and installation of Sewage Treatment Plants (STPs) around the Lakes. Water quality tests of Lakes conducted (November/ December 2018) by State Pollution Control Board (SPCB) revealed that Biological Oxygen Demand, Chemical Oxygen Demand, levels of ammonium nitrate and nitrate nitrogen were not within the permissible limits.

Although the SPCB (August 2019) had instructed SMDA to ensure that no untreated water is discharged into the Lakes, no action in this regard was taken by SMDA as of March 2022.

WLW-Kathua stated (January 2021) that water quality of the Lakes had deteriorated due to discharge of untreated sewage into the Lakes and that a proposal for installation of STPs around the Lakes under PMDP was under consideration.

6.2.8.3 Dwindling local fish species

As of June 2019, there were nine species[21] of native fishes in Surinsar-Mansar Lakes and exotic carp (*Cyprinus Carpio*) fish species in these Lakes. Rapid Survey Report of Wildlife Institute of India revealed (June 2019) that the number of native fishes had dwindled in Mansar Lake due to abundance of exotic carp species in the Lake and recommended for periodical removal of common carp species from the Lake.

Audit observed that although WLW-Kathua has put up a notice board for public information regarding prohibition of artificial feeding of fishes in Mansar Lake, no measures were taken by WLW-Kathua and SMDA to enforce the prohibition. It was also noted during joint physical verification (January 2021) that these exotic fishes were being fed with *atta* (flour) by pilgrims and tourists visiting the Lakes. As of March 2022, no action had been taken (March 2022) by the WLW-Kathua for removal of carp species from Mansar Lake.

WLW-Kathua stated (April 2022) that for revival of native aquatic fauna, provision of ₹ six lakh had been kept in the APO of Compensatory Afforestation Fund Management and Planning Authority (CAMPA) for the year 2022-23 for shifting of common carp in the Lakes.

The Forest, Ecology & Environment Department replied (October 2022) that due to religious sentiments of people regarding the fish of the Lakes, consultations were held with them for removal of exotic fish but only stakeholders of Surinsar Lake could be convinced and accordingly provision of ₹ six lakh was kept during 2022-23 for initiating the process in consultation with Fisheries Department.

The fact remained that as of March 2022, no measures were taken by WLW-Kathua and SMDA for removal of common carp species from the twin Lakes. As a result, native fish species in the Lakes continued to be affected. Photographic evidence is presented in the following photographs:

[21] Mansar Lake: (i) *Channa gachua*, (ii) *Danio rerio*, (iii) *Pethia conchonius*, (iv) *Rasbora daniconius* Surinsar Lake: (i) *Channa gachua*, (ii) *Channa punctatus*, (iii) *Danio rerio*, (iv) *Puntius chola* and (v) *Rasbora danicanius*

Dominant exotic carp fish species in Mansar Lake	**Tourists feeding *atta* (flour) to fishes in Mansar Lake**

6.2.9 Research carried out by scholars of universities

Management of Lakes calls for continuous research to address the drivers of change in the Lake. Audit noticed that WPD and SMDA had not got any research carried out to evaluate water quality of Mansar-Surinsar Lakes and to determine fishes and water bird population in the Lake. Disappearance of native species and invasion of noxious species, if any, due to heavy inflow of silt and sewage into Lake from its catchment area had also not been assessed. However, research carried out by scholars of various universities indicated that the health of the Lakes had deteriorated due to factors detailed in **Tables 6.3 and 6.4**.

Table 6.3: Mansar Lake-Conclusions and Suggestions in Research Reports

Sl. No.	Research Reports of Mansar Lake	Name of the researchers	Conclusions	Suggestions
1.	Water Quantity and Quality of Mansar Lake Located in the Himalayan Foothills, India of January 2009	Vijay Kumar, S.P. Rai and Omkar Singh of National Institute of Hydrology, Roorkee	Due to anthropogenic pressure around the Lake, wastes from surrounding areas, runoff from catchment area and residues from construction activities carried out around the Lake were entering the Lake causing increase in pollution of Lake water. There was absence of oxygen in the	Developing a buffer zone around the Lake to prevent nutrient inflow into the Lake from point and non-point sources and putting a ban on anthropogenic activities in the zone.

Sl. No.	Research Reports of Mansar Lake	Name of the researchers	Conclusions	Suggestions
			hypolimnion[22] zone of the Lake and increase in fish mortality due to circulation of hypolimnetic water in winter.	
2.	Biomonitoring the Health of Lake Mansar (Jammu), using Phytoplankton of November 2020	Assadullah Sheikh and Deepika Slathia of Department of Environmental Sciences, University of Jammu, J&K	There was high organic pollution in the Lake due to presence of algal genus. (Pollution index score: 36)	Formulation and implementation of sustainable management plan to prevent further deterioration of the Lake and regular monitoring of the Lake.
3.	Arithmetic Water Quality Index for evaluation of drinking water quality of Lake Mansar, J&K, India of 2018	Sheetu Dhar and Deepika Slathia of Department of Environmental Sciences, University of Jammu, J&K	Water quality parameters (electrical conductivity, turbidity, free carbon dioxide, bicarbonate, biological oxygen demand, chloride, calcium, magnesium, total hardness, phosphate, nitrate, silicate, sulphate) at the polluted site of the Lake, were higher in comparison with non-polluted site. The deterioration in quality of Lake water at the polluted site was due to direct discharge of domestic sewage, and agricultural run-off into the Lake. Siltation, deforestation and tourist pressure were also contributing to pollution in the Lake.	The authorities should take concrete steps on urgent basis to prevent the Lake from further deterioration and degradation.
4.	Tourism impact on physio-chemical parameters of the Mansar Lake of 2016	Pallavi Chauhan, Deepali Rana, Anil Bisht and Usha Sharma of Department of Zoology, Uttaranchal College of Biomedical Sciences and Hospital, Dehradun	Seasonal variation in the physio-chemical parameters of the Lake due to visit of tourists.	

[22] Lower region of a stratified water body that extends from the thermocline layer (warm water in the top of the water column and cold water in the bottom and these warm and cold layers do not mix) to the bottom of the Lake, and is isolated from circulation with the upper waters, thereby receiving little or no oxygen from the atmosphere. It is the coldest layer of a Lake in summer and the warmest layer during winter.

Table 6.4: Surinsar Lake-Conclusions and Suggestions in Research Reports

Sl. No	Research Reports of Surinsar Lake	Name of the researcher/ published by	Conclusions	Suggestions
1.	Water quality study of Surinsar Lake of 1994-95	Case study published by National Institute of Hydrology, Jammu	Deforestation and denudation in the catchment area of the Lake were causing degradation of Lake due to siltation.	As the Lake water was found fit for drinking, regular monitoring was needed to retain the quality of water in the Lake.
2.	Analysis of abiotic parameters of Surinsar Lake, Jammu (J&K) of 2013-14	Kunal Sharma, Meenu Sharma and Sapna Jangral of Department of Zoology, University of Jammu	The Lake water was found to be under stress as physio-chemical parameters were above the prescribed limits. As per research report, the surface run-off, waste discharge, bathing of cattle, washing, performing religious rituals, littering by tourists could be contributing factors for increased pollution in the Lake.	Generating public awareness and collective effort by stakeholders including Government, community members and NGOs to prevent the Lake from further deterioration.
3.	Study on zooplankton and water productivity of different Lakes in Jammu division, India of 2018	Sapna Kundal, Arup Giri, Indu Kumari and Rajesh Kumar of Department of Life Sciences, Arni University, Kathgarh, Himachal Pradesh.	Presence of a smaller number of zooplankton might be due to higher level of pollution in the Lake which was not suitable for growth of fishes.	Improvement in the quality of Lake water for sustenance of biodiversity of the Lake.

WLW-Kathua and SMDA had not taken conclusions and suggestions of the above-mentioned research outputs into consideration for taking corrective measures in respect of Conservation and Management of the twin Lakes.

6.2.10 Conclusion

WPD and SMDA did not have a specific legal framework and clear demarcation of responsibility for Conservation and Management of the two Lakes**.** In absence of any comprehensive Integrated Management Plan for Conservation and Management of Lakes, WPD and SMDA were carrying out Lake-related activities in a directionless and ad-hoc manner. The State Level Monitoring Committee had not monitored Conservation and Management of the twin Lakes. SMDA and WLW-Kathua had not carried out demarcation of boundary of Surinsar-Mansar Lakes due to which the two Lakes had remained open to encroachments. No STPs were in place for treatment of sewage generated by inhabitants living in the vicinity of the Lakes resulting in discharge of untreated waste and sewage into the Lakes. Introduction into the Lake of exotic species had resulted in dwindling of number of native fishes.

6.2.11 Recommendations

- ***Government should provide a specific legal framework and clear demarcation of responsibility to WPD and SMDA for undertaking Conservation and Management of the two Lakes.***
- ***Monitoring committee needs to oversee Conservation and Management of the Lakes.***
- ***The boundary of the two Lakes needs to be demarcated to avoid chances of encroachment of Lake area.***
- ***STPs are required to be installed for treatment of sewage generated by inhabitants living in the vicinity of the Lakes.***
- ***Exotic species of fishes need to be controlled to promote growth of native fishes.***
- ***Construction works going around the Lake need to be restricted.***

6.3 Conservation and Management of Manasbal Lake

6.3.1 Introduction

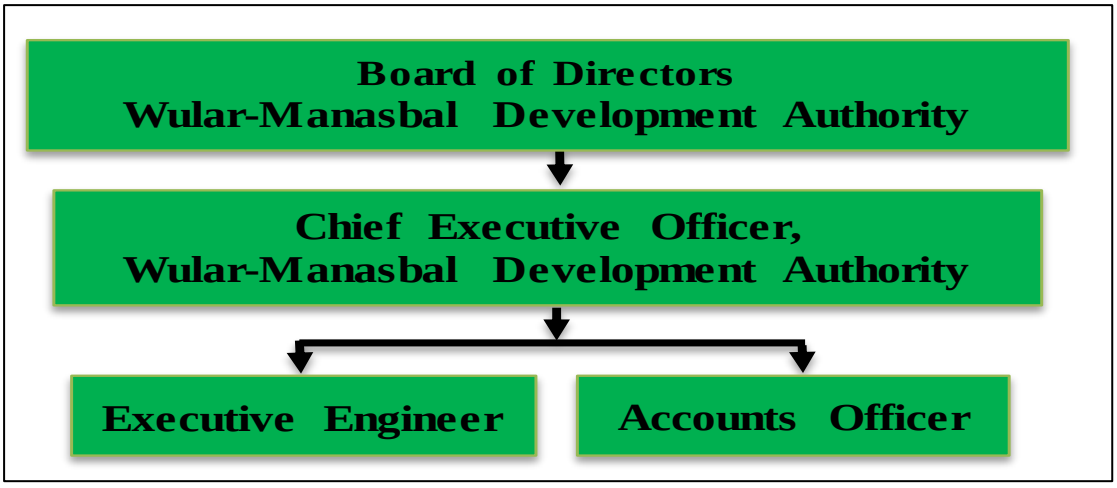
Manasbal, a fresh water Lake, is located in District Ganderbal and is the deepest Lake in Kashmir. The major source of water of the Lake is Lar Irrigation Khul and 1,200 springs existing in and around the Lake. Rainfall and melting snow in the catchment area of the Lake also form a source of water for the Lake. The Lake has an outlet from where water leaves the Lake and enters the river Jhelum. The Lake is looked after by the Wular Manasbal Development Authority (WMDA) which was created under Development Act, 1970.

Manasbal Lake

6.3.2 Organisational Setup

The administrative control of WMDA vests with Commissioner/ Secretary of the Tourism Department, Government of Jammu and Kashmir. The organisational setup of the WMDA is shown in **Chart 6.5**:

Chart 6.5: Organisational setup of Wular Manasbal Development Authority



6.3.3 Land use changes within the Lake and its catchment

- **Analysis of remote sensing data of EE&RSD to ascertain land use changes in Lake**

According to data of EE&RSD, there were spatio-temporal changes in land use of the Lake during 2014-20, as detailed in **Table 6.5, Maps 6.3 and 6.4 and Charts 6.6 and 6.7.**

Table 6.5: Changes in land use of Manasbal Lake

Class Name	Area Ha (2014)	Area Ha (2020)
Aquatic Plantation	55.36	23.95
Marshy	19.35	19.24
Open Water	185.29	216.81
Total	**260**	**260**

(Source: data of EE&RSD)

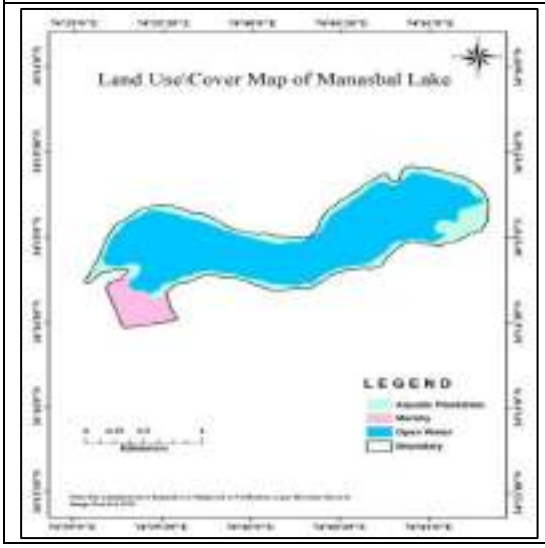
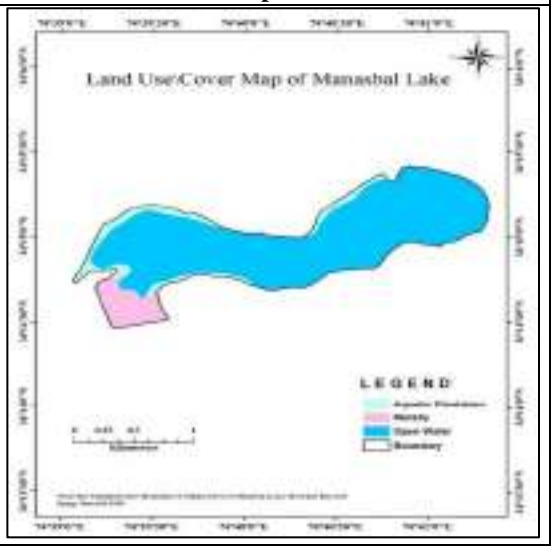
Map 6.3



Map 6.4



Charts 6.6 and 6.7: Changes in land use of Manasbal Lake

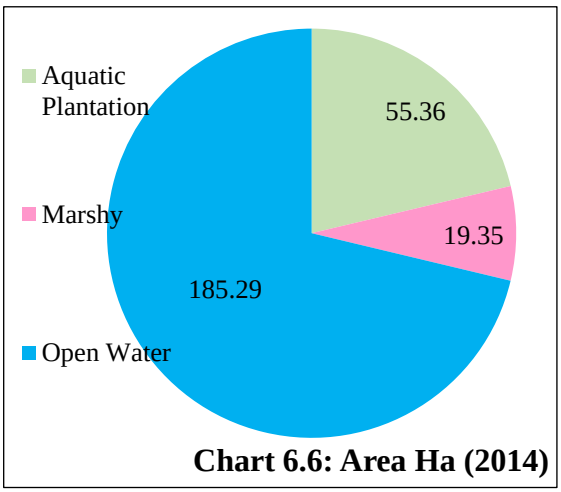


Chart 6.6: Area Ha (2014)

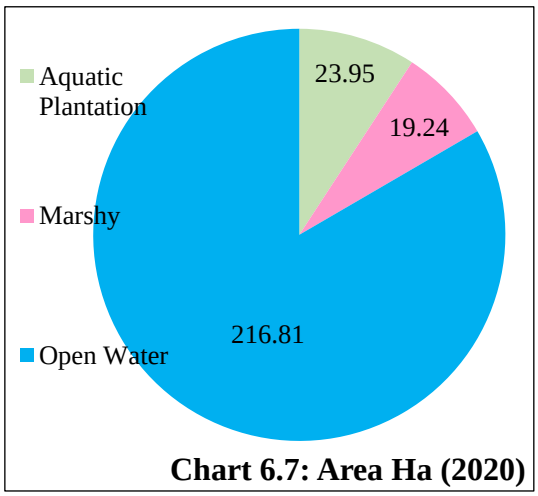

Chart 6.7: Area Ha (2020)

Even though Conservation and Management of the Lake had suffered from inadequacies, there was positive change in the open water area of the Lake which showed an increasing trend. However, causes of increase in water area, whether due to siltation, choking up of Lake outlets, melting of glaciers or heavy rainfall in the areas of these Lakes, were not monitored/ analysed by WMDA.

In absence of monitoring of these parameters by WMDA, Audit could also not ascertain whether increase in the surface area of Lakes had actually led to increase in water volume of the Lake or not.

- **Analysis of Google Earth Pro images to ascertain spatio-temporal changes in the catchment of Manasbal Lake**

Clear images of Manasbal Lake and its catchment area of Kondabal and Gratabal available on Google Earth Pro for the period 2002-2022 indicate increase in the built-up in these areas which also included Lake fringes. The Google Earth Pro images of the Lake and its catchment depicting spatio-temporal changes in the Lake are shown in the **Satellite Images 6.40 to 6.48**:

Satellite Image 6.40: Manasbal and its catchment in 2022

Yellow marked boundary "A-(Kondabal) & B-(Gratabal)" indicates catchment area of Manasbal. Zoomed images of these catchment area are given below.

Satellite Image 6.47: B-Gratabal -2016

Satellite Image 6.48: B-Gratabal -2022

6.3.4 Planning

Comprehensive plan for Conservation and Management of Manasbal Lake was not framed but Lake management plans were formulated, financed and implemented on annual basis. Works included in the annual plans were mostly related to tourism development with only marginal Lake-related activities such as sanitation of the area and de-weeding/ dredging of Lake. The annual plans did not address the root causes of degradation such as change in hydrological regimes, pollution or loss of biodiversity of the Lake. WMDA did not have a specific legal framework and clear-cut responsibility for Conservation and Management of the Lake. No meeting was held by WMDA after the year 2017. As such, policy decisions including those in respect of preparation of master plan and finalisation of proposals for Conservation and Management of the Lake, could not be taken.

6.3.4.1 Mandate of the WMDA

As per provisions in the Development Act 1970, WMDA had to prepare a master plan of the area falling under its jurisdiction for carrying out development of the area which also included Manasbal Lake.

Audit noticed that the master plan for the area had not been prepared and as such development activities in the area were carried out without any comprehensive planning. It was also noticed that WMDA did not have a specific legal framework and clear-cut responsibility for Conservation and Management of the Lake.

After being pointed out, WMDA stated (May 2022) that due to non-availability of requisite manpower[23] and laboratory it was not able to carry out Conservation and Management programme in respect of the Lake.

6.3.4.2 Oversight by the Board of Directors

As per Section 4 of the Development, Act 1970, the affairs and policy matters of WMDA were to be run by the Board of Directors with the Chief Minister as Chairman of the Board. Audit observed that only seven meetings were held by the WMDA between January 2006 and December 2017. No meeting was held thereafter. Without existence of the Board, policy decisions including in respect of the preparation of master plan and comprehensive plan for Conservation and Management of the Lake could not be taken.

[23] Environmental and Hydrological engineers, wetland ecologist, limnologists, ecologists, biologists, chemists, remote sensing and GIS specialist, hydrologists, ornithologists, micro biologists etc.

6.3.4.3 Funding for management of Lake

During the period between January 2006 and March 2022, WMDA spent ₹ 48.87 crore[24] on various tourist development activities. Out of this amount, only ₹ 3.04 crore[25] (six *per cent*) was spent on Lake-related activities such as sanitation of the area and de-weeding/ dredging and revival of springs of the Lake. Audit observed that major Lake generic activities could not be implemented as discussed in **Paragraph 6.3.5**.

6.3.5 Lake Management

Non-demarcation of seven km of length of the Lake had exposed the Lake to encroachments. An expenditure of ₹ 0.51 crore (2015-22) was incurred on de-weeding during the months which were not specified months for de-weeding. WMDA had spent ₹ 0.64 crore (2006-22) on dredging without any bathymetric survey. WMDA had not identified sources of sewage entering the Lake, which were mainly responsible for pollution in the Lake. For over 15 years, no outcome-based action had been taken to either shift the inhabitants of Kondabal village from the Lake area or to get STPs constructed resulting in continuous discharge of untreated sewage into the Lake.

For Conservation and Management of the Lake the activities to be carried out included survey and demarcation of the Lake, identification and treatment of its catchment area, identification and protection of water sources, water budgeting, improving water quality of the Lake by flushing, biodiversity conservation, assessment of life of the Lake, sewage treatment in catchment area and prohibition in diversion of Lake area. Lake management also included de-weeding and dredging of the Lake and generating public awareness.

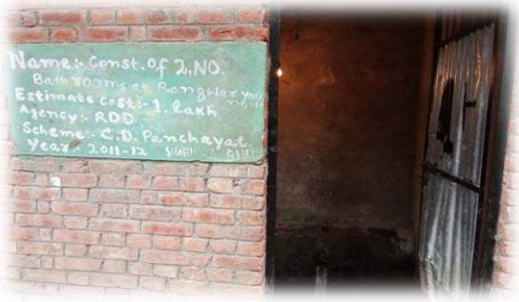
However, Audit noticed lack of survey, identification and treatment of catchment area, identification and protection of water sources, water budgeting, improving water quality of Lakes by flushing, biodiversity conservation, assessment of life of the Lake, sewage treatment in catchment area and prohibition in diversion of the Lake area and public awareness. Further, there were inadequacies in Lake management viz. demarcation, de-weeding and dredging and STPs as discussed in succeeding Paragraphs.

During joint inspection by the audit party with the members of the audited entity, non-protection of water sources was noticed. Photographic evidence is presented in the following photographs:

[24] ₹ 44.59 crore (January 2006 to March 2020) and ₹ 4.28 crore (April 2020 to March 2022)

[25] ₹ 2.44 crore (January 2006 to March 2020) and ₹ 0.60 crore (April 2020 to March 2022)

Water sources of the Lake not protected	
Two bathrooms constructed by Rural Development Department on a spring from which water flows to the Lake	**Dumping of garbage at the spring/ water source of the Lake at Rangwar Youngore**
	



6.3.5.1 Demarcation

Manasbal Lake was demarcated except for a length of seven km (from Kanabal to Naninara) which had not been demarcated due to land dispute and paucity of funds. Non-demarcation of a part of Lake exposed the Lake to encroachments. Photographic evidence is given below.

Due to non-demarcation of a part of the Lake, there were construction of illegal cow-shed and earth filing at fringe of the Lake at Hanji *Mohallah*	**Conversion of land mass into vegetable field by earthfilling at Hanji *Mohallah***

6.3.5.2 De-weeding of Lake

As per National Wetland Conservation Programme, Guidelines for Conservation and Management of Wetlands in India (2009), de-weeding is to be carried out for removing unwanted plants from the Lake. The exercise was to be carried out before flowering/ fruiting and formation of propagules in plants. Weeds were to be removed at a controlled rate of 40 to 50 *per cent* (maximum up to 75 *per cent*) of submerged vegetation. Some selected areas were to be left undisturbed for fish spawning and feeding of waterfowls.

During test check of records, it was observed that ₹ 1.24 crore[26] was paid (January 2006 to March 2022) by WMDA to contractors for de-weeding of Lake. The payment

[26] ₹ 1.02 crore (January 2006 to March 2020) and ₹ 0.22 crore (April 2020 to March 2022)

included ₹ 0.51 crore spent (2015-22) during the months which were not specified months for de-weeding.

WMDA did not have year/ basin/ area-wise vegetation map of the Lake alongwith data of weed cover. Data regarding areas from which weeds were removed and areas left undisturbed for spawning of fish and feeding of waterfowls was also not maintained. Impact assessment of de-weeding such as decrease/ increase in visibility through water and decrease/ increase in dissolved oxygen, nitrogen and phosphorus in Lake water was also not carried out.

6.3.5.3 Dredging of Lake

As per National Wetland Conservation Programme, Guidelines for Conservation and Management of Wetlands in India (2009), dredging is carried out to improve water flow in the Lake by removing nutrient rich sediments, shoals and solid land mass. Dredging of a Lake has to be based on a bathymetric survey of the Lake, indicating location of blocked channels, area of the Lake to be dredged out, the depth up to which it has to be done, sites where the dredged out material has to be disposed of and cost involved.

WMDA had spent (2006-22) ₹ 0.64 crore[27] on dredging without any bathymetric survey. No record was maintained to show locations at which dredging was carried out and places where dredged out material was dumped. No study was conducted to assess the impact of dredging on the Lake.

After being pointed out, WMDA stated (May 2022) that de-weeding and dredging of the Lake were being done as per need and availability of funds.

Photographic evidence of accumulation of silt in the Lake and growth of enormous weed/ red algae in the Lake is given below.

Source of water of Lake at Lar Khul carrying silt and garbage into the Lake. The accumulated silt and garbage not dredged out	**Dumped garbage and silt geting carried into the Lake from source of water at Lar khul. The accumulated silt and garbage was not dredged out**

[27] ₹ 0.60 crore (January 2006 to March 2020) and ₹ 0.04 crore (April 2020 to March 2022)

Growth of red algae in the Lake due to siltation and garbage entering into the Lake	**Growth of weed above 10 feet spread over an area of 1,000 meters in the Lake due to non carrying of de-weeding**

6.3.5.4 Treatment and disposal of waste/ sludge

WMDA had not identified sources of sewage entering the Lake which were responsible for pollution in the Lake. No system of wetland technology or STPs for treatment of waste generated by inhabitants living next to the Lake was in place.

Although the tendering process for preparation of DPR for setting up of STPs on the banks of Manasbal Lake in Kondabal village was started by WMDA (May 2007), the process was not finalised due to poor response to the tenders. Thereafter, no action was taken by WMDA for over five years up to August 2013.

WMDA decided (September 2013) to shift inhabitants of Kondabal village to Kohistan Colony and submitted (June 2015) request for release of funds to the administrative Department for acquisition of land measuring 149 *kanals* and 13 *marlas* for rehabilitation of 214 families. No further action was taken up to December 2017.

WMDA further decided (December 2017) to explore the possibility of shifting inhabitants of Kondabal village to Kohistan Colony or setting up an STPs for inhabitants of Kondabal. Accordingly, the Tourism Department assigned the preparation of DPR of two STPs at Kondabal to M/s Enco Safe Designs, which prepared the DPR at a cost of ₹ 5.91 crore.

Audit noticed that the population of the area had not been mentioned in the DPR for estimation of capacity of STPs for present and future use and also details were not indicated therein about parameters to be treated by the STPs. Civil works of one of the STPs, to be completed within six months, was allotted (November 2019) to a contractor at a cost of ₹ 0.55 crore. As of March 2020, the contractor was paid ₹ 0.55 crore for civil works executed by him. As of March 2022, the work remained abandoned as allotment of mechanical component of the STPs was not initiated. Funds of ₹ 0.30 crore received (2020-22) were lying unspent with the WMDA.

Thus, for over 15 years no outcome-based action had been taken to either shift the inhabitants of Kondabal village from the Lake area or to get STPs constructed resulting in continuous discharge of untreated sewage into the Lake.

Joint inspection by the audit team alongwith officials from WMDA revealed that drains and sewers were discharging waste directly into the Lake. Cow-dung and garbage were also dumped on the fringes of the Lake and into *nallahs* entering the Lake.

Photographic evidence is given below.

Sewage from drains entering the Lake	**Marked in yellow is the stagnation of sewage of houses creating cesspools near the Lake (Kondabal area)**
Dumping of cow-dung at the fringe of Lake (Hanji *Mohallah)*	**Wash off from garbage and silt at Lake fringe (parking space) entering Lake through one of the water sources of Lake (Lar Khul)**
Drain water entering the Lake in Kondabal area	**Impact of sewage and dumping of garbage turning Lake into cesspool**

6.3.6 Encroachment of Lake

WMDA did not have details (whether Government or proprietary) of land which formed part of the Lake and its fringes. Due to non-finalisation of Master Plan of the area, unrestricted development/ construction work was going on around the Lake and there were 40 cases of encroachment and unauthorised construction works.

After creation (January 2006) of WMDA, 1,192 *kanals* and six *marlas* of land was transferred to it by the Tourism Department. Audit observed that WMDA did not have details of land which formed part of the Lake and its fringes and details as to whether it was Government or proprietary land.

As per directions of the Hon'ble High Court, no construction can be raised within 500 square yards from the fringe of the Lake and WMDA has to grant permission for any development/ construction work carried out around the Lake in accordance with master plan of the area. Audit observed that due to non-finalisation of the Master Plan of the area by WMDA, unrestricted development/ construction work was going on around the Lake. Records of WMDA showed that there were 40 cases of encroachment and unauthorised construction works. WMDA had not demarcated 500 square yards from the fringes of the Lake area resulting in illegal construction of bathrooms, latrines, cowsheds and in dumping of cow dung on the fringes of the Lake.

Joint inspection of the area by audit alongwith WMDA officials also revealed that huge structures had come up close to the Lake.

Lime stone Kiln on the periphery of the Lake	**Illegal construction (new) coming up at the Lake fringe**
Illegal construction coming up within restricted zone of the Lake	**Illegal construction within restricted zone of the Lake**

6.3.7 Research carried out by scholars of various universities

WMDA had not carried out any research to evaluate water quality of the Lake and to study fish and water bird population in the Lake. Research carried out by scholars of various universities pointed out that stone quarrying was causing land use changes in the catchment area of the Lake, anthropogenic activities were causing discharge of effluents into the Lake and native fish species had become extinct.

WMDA had not carried out any research to evaluate water quality of the Lake and study fish and water bird population in the Lake. Disappearance of native species and invasion of noxious species, if any, due to heavy inflow of silt and sewage flowing into Lake from its catchment areas had also not been assessed. However, research carried out by scholars of various universities on various themes of the Lake indicated that:

- Land use changes were happening in the catchment area of the Lake as stone quarrying was ongoing in the catchment area of Lake, and
- Activities like bathing and washing of clothes by people of adjoining areas of the Lake and discharge of effluents of organic waste into the Lake were going on.

As a result, water quality of the Lake had deteriorated and was not fit for drinking purposes. Further, nutrient and silt load from the catchment area of the Lake had increased resulting in extinction of the abundantly available fish species (*Bortiabirdi*) and aquatic plant (*Eurayleferox*) in the Lake. Besides, dominance of *rotifera brachionus calyciflorus*[28] at the littoral zone was causing fast eutrophication of the Lake. Details of research papers are in the ***Appendix-6.1.***

6.3.8 Joint Inspection of catchment area of Manasbal Lake

WMDA had not carried out afforestation of mountain ranges of Gratabal and Konbal resulting in huge inflow of sediments into the Lake from these mountain ranges. Sewers from households living on the periphery of the Khul between village Wayul and village Lar enter the Khul and ultimately enter the Manasbal Lake. Heaps of waste/ garbage/ cow dung were being dumped at the fringes of the Khul/ *Nallah*. Solid waste dumpers/ dust bins and sewer networking system were not available in the Lake vicinity. Huge constructions had come up and WMDA had not carried out a detailed survey to ascertain details of illegal constructions/ encroachments in catchment area of the Lake.

The catchment area of the Manasbal Lake is a mountain range spread over 13 sq. km. The catchment receives precipitation through rainfall and snowfall which contributes water to the Lake through surface flow or from recharged aquifers. Joint inspection

[28] A microscopic or near-microscopic animal species occurring in freshwater.

(April 2022) by the audit team with officials of WMDA carried out in the catchment area[29] of the Lake revealed as follows:

6.3.8.1 Afforestation of catchment area

The Manasbal Lake is surrounded by two mountain ranges of Gratabal and Konabal. Gratbal mountains are devoid of forests whereas Konbal mountain range has a 10 *per cent* forest cover. Absence of forests had resulted in huge inflow of sediments into the Lake from these mountain ranges due to run-off during precipitation hastening ageing of the Lake with adverse consequences for the Lake ecosystem.

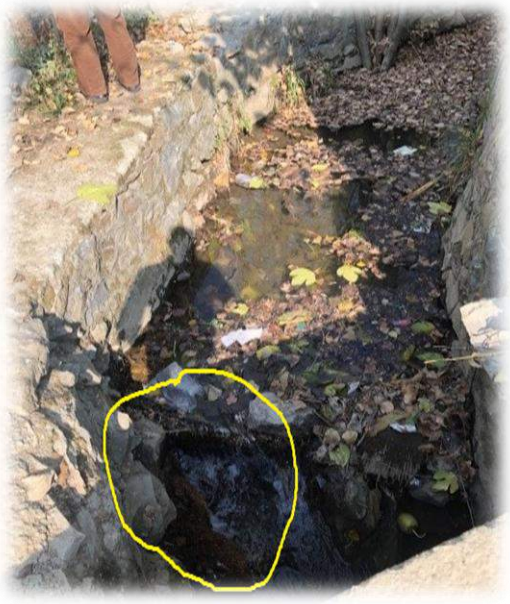
WMDA had not carried out afforestation of these mountain ranges either through the Forest Department or on their own as mandated by the National Wetland Conservation Programme, Guidelines for Conservation and Management of Wetlands in India (2009).

Denuded Forests (Gratabal and Kondabal) marked with yellow boundary

6.3.8.2 Solid Waste Management/ Sewer networking system in the catchment area

Lar Khul, a major source of water for Manasbal Lake, is an irrigation channel which receives water from Wayul *Nallah*. The surplus water from the Khul is discharged by Irrigation and Flood Control Department into the Lake. The sewers of the households located on the periphery of the Khul between village Wayul and village Lar enter the Khul and ultimately enter the Manasbal Lake. Heaps of waste /garbage/ cow dung were being dumped on the fringes of Khul/ *Nallah* and the Lake as sites had not been designated by the Irrigation Department/ Municipal Council/ WMDA for dumping of waste. Solid waste dumpers/ dust bins and sewer networking system were not available in the Lake vicinity. Photographic evidence is presented in the following photographs:

[29] Gratabal, Konabal, Lar Wayul Khul, Dub Khul, Hakeem *Mohalla*, Jaroka Bagh, Kondiangan, Gamdar, Potar *Mohalla*, Gulabbagh, Hanji *Mohalla*, Rather *Mohalla* and Bhagwaan *Mohalla.*

Household sewer discharged in the inlet of the Lake	Household sewer discharged in the inlet of the Lake
	


6.3.8.3 Non-availability of infrastructure to prevent pollutants from entering the Lake

Dumping site near Dub Khul at Hakeem *Mohalla* near I&FC regulatory gate	Run-off of silt and garbage (near Dub Khul) marked in yellow finding its way into one of the water sources of Lake
Run-off from garbage and silt finding its way into the Lake	**Garbage and silt causing reclamation of land mass and decrease in open water area**

Although annual contracts were entered into by WMDA for shifting of waste and de-weeded material away from the Lake, it had not created infrastructure such as trash chambers and artificial wetlands to stop garbage, silt and nutrients from entering the Lake. Joint inspection of audit team with officials of WMDA revealed that solid waste/ de-weeding material were dumped at the fringes of the Lake instead of shifting them away from the Lake resulting into leaching into the Lake. Photographic evidence is given below:photo

Disposal of solid waste and silt removed from the Lake and dumped at the fringes of the Lake near Jaroka Bagh	**Dumping of garbage at the main entry gate near open air theater (Lake fringes)**

6.3.9 Springs

The draft master plan of Wular and Manasbal villages envisaged that there were approximately 1,200 springs which serve as one of the water sources of Manasbal Lake. Audit noticed that WMDA had not carried out any survey to assess the actual number of springs in and around the Lake and ensure their protection.

It was further noticed that water from seven springs[30] restored by WMDA was discharging into the Lake. 13 springs[31] had not been restored/ protected by WMDA. Accumulation of silt around these springs was finding its way into the Lake and was hastening ageing of the Lake. Photographic evidence is given below:

Unprotected spring (marked in yellow) at Hakim *Mohallah*- Spring water with silt finding way into the Lake	**Unprotected spring (marked in yellow)- spring water with silt finding its way into the Lake**

30 Existing at {(near Temple-Kondbal, parking area, Main Park, one rural museum (Gratbal), Open air theatre and two at kralpora (Jamia-Masjid)}

31 Existing at {kondiangan, Gamdar, Khul *Mohalla* at Kondbal (two), near 2nd Rural museum, Potar *Mohalla* (two), Gulab bagh (two), Hanji *Mohalla* (two), Rather *Mohalla* and Bhagwaan *Mohalla*}

One of the springs restored by the WMDA

6.3.10 Constructions in the catchment area of Lake without building permission

There was construction in the catchment area of the Lake as substantial structures had come up without building permissions from WMDA. WMDA had not carried out a detailed survey in collaboration with the concerned Departments including Irrigation and Flood Control Department to ascertain details of illegal constructions/ encroachments in catchment area of the Lake.

6.3.11 Conclusion

No Comprehensive plan was in place for Conservation and Management of Manasbal Lake. WMDA did not have a specific legal framework and clear-cut responsibility for Conservation and Management of the Lake. Lake management plans were formulated, financed and implemented through annual plans in which only marginal Lake related activities such as sanitation of the area, de-weeding and dredging of the Lake were included. Non-demarcation of seven km of length of the Lake had exposed the Lake to encroachments. The WMDA had not identified sources of sewage entering the Lake, which were mainly responsible for pollution in the Lake. Due to non-finalisation of the Master Plan of the area, unrestricted development and construction work was going on around the Lake and there were 40 cases of encroachment and unauthorised construction works**.**

6.3.12 *Recommendations*

- ***A comprehensive plan for Conservation and Management of Manasbal Lake needs to be put in place.***
- ***The Government should provide a legal framework and clear responsibility for Conservation and Management of the Manasbal Lake.***
- ***The Lake area needs to be fully demarcated to avoid encroachments.***
- ***Sources from which pollutants enter the Lake needs to be identified and treated.***
- ***Construction works going on around the Lake need to be restricted and encroachments of Lake area need to be vacated.***

Appendix-2.10

(Reference: Paragraph No. 2.5)

Statement showing functions of the Departments/ Authorities/ Boards related to environmental issues which includes preparation of development plans for Lakes

1. J&K, Ecology, Environment and Remote Sensing Department (EE&RSD)

J&K Government had assigned (October 1989) survey and monitoring of Lakes of J&K and preparation of Development Plans for Lakes to EE & RSD. The department had to conduct detailed survey Lakes of the J&K and study their physical, chemical and biological dynamics and prepare detailed plans for development and management of Lakes.

2. Principal Chief Conservator of Forest (PCCF), J&K

PCCF controls all the forest area of J&K through its various divisions. The divisions prepare Annual Plan of Operations (APOs) for execution of various forest management activities such as plantation of degraded forests, fencing/ demarcation of forest areas, establishment of nurseries etc. Besides, J&K Forest Policy (2010) includes strategy for protection & conservation of Lakes and conservation of biodiversity in forests.

3. Wildlife Protection Department (WPD)

WPD controls wild area of J&K through its various divisions. The WPD prepares APOs for management and habitat improvement of wild life in protected areas which included some Lake specific activities viz. survey, demarcation, de-silting, de-weeding, plugging of breaches etc.

4. Union Territory Wetland Authority

National Wetland Conservation Program Guidelines for Conservation and Management of Lakes advised (June 2009) States to constitute Wetland Authority and subsequently Wetland Rules[2]-also envisaged establishment of Wetland Authority in each States / Union Territories. Further, Wetland Rules laid planning / strategies as detailed below:-

- demarcation of Lake boundary supported by accurate digital maps with coordinates and validated by ground-truthing;
- ecological character description of Lakes;
- comprehensive list of activities to be regulated & permitted within the notified Lakes & their zone of influence and mechanisms for maintenance of ecological character through promotional activities in cases wherein lands within boundary of notified Lakes or Lakes complex have private tenancy rights;

[2] 2010 superseded in 2017

- comprehensive digital inventory of all Lakes and its uploading on a web portal to be developed by the Central Government;
- measures for enhancing awareness within stakeholders and local communities;
- strategies for conservation and wise use of Lakes were to be defined; wise use being a principle for managing these ecosystems which incorporates capture of fisheries at subsistence level or harvest of aquatic plants and functions of water storage, groundwater recharging, flood buffering, values of recreation and cultural are maintained or enhanced;
- For notification of Lakes through Central Government, Brief Document comprising broad geographic delineation of Lakes, demarcation of Lake Boundary supported by accurate digital maps with coordinates and validated by ground-truthing, list of activities to be regulated & permitted within the Lakes, etc. was to be prepared.

5. Biodiversity Board, J&K

The Biological Diversity Act, 2002 envisaged conservation of biological diversity and sustainable use of its components. The Lake ecosystem includes wide range of biodiversity so role of BDB for conservation of biological diversity and sustainable use of its components relating to Lakes is very vital. The Act provided for establishment of Biodiversity Board (BDB), appointment of its members to exercise functions of BDB and constitution of Biodiversity Fund (BDF) to be used for conservation and promotion of biological resources.

6. Jammu and Kashmir Pollution Control Board (JK-PCB)

JK-PCB was established (1987) for restoration & maintaining natural water bodies, planning and programs for prevention and control of water pollution and regular monitoring of water quality of water bodies (including Lakes).

7. Development Authorities

There were four Development Authorities established under the Development, Act 1970, for development of the areas falling under their jurisdiction which included Lake areas also.

8. *Rakhs* and Farms Department (R&FD)

Activities of the Department includes receipts of one fourth of agriculture produce from cultivators who cultivate land pertaining to the Department. The cultivable land includes land of eight Lakes[3] (falling in six districts) which sometimes become dry during lean periods.

9. Water Resource Regularity Authority (WRRA)

Water Resources (Regulation and Management) Act 2010 included protection of physical integrity of Lakes & springs (including its source water protection) and their improvement for which WRRA was to be established. The Act envisaged establishment of Water Resource

[3] Sadurkut, Narkara, Chirangpura, Rakh-i-Rabtar, Gungbug, Rak-i-Kujar, Nowgam Jhil and Rakh-i-Arth

Regularity Authority to exercise the functions laid in Water Resources (Regulation and Management) Act 2010.

Further, Act laid preparation of Water Policy and Plan (WP&P) for development, management, planning, utilization & monitoring of water resources, preparation of plans for prevention of encroachment on existing water bodies. Also, Act laid constitution of Committee to discuss policy matters relating to functions of WRRA.

Appendix-4.6
(Reference: Paragraphs No. 4.6.10 and 4.13)

Themes of research papers and its authors, conclusions and suggestions relating to Dal Lake

Sl. No	Research Reports of Dal Lake	Conclusions	Suggestions
1.	Forecasting Past and Future Trend of Physio-chemical Parameters In Dal Lake, Srinagar Kashmir, India using Statistical Analysis and Modelling of December, 2019 by Ishtiyaq Ahmad Rather and Abdul Qayoom Dar	Increase in the nutrients from the catchment due to uncontrolled use of fertilizers and pesticides, unplanned urbanization, encroachment, in & around and tourist influx had resulted in the deterioration of the water quality of Dal Lake and consequently ecology of the Lake is changing. There is drop in the dissolved oxygen of the Lake. The considerable increase in the eutrophication cause hyper eutrophication of the Lake.	For future planning and management of the Lake, planning and implementation of Lake management strategies needed to refine and adapt to improve and preserve the present-day Lake water quality. Artificial Lake aeration should be installed to increase the dissolved oxygen levels in the Lake.
2.	Impact of sewage treatment plant effluent on water quality of Dal Lake, Kashmir, India of 01-2020 by Hafsa Farooq Chashoo, Adnan Abubakr, MH Balkhi & others	Sewage treatment plants installed to treat and improve wastewaters around Dal Lake is improper. STPs are not only malfunctioning but are exacerbating the problem of Lake pollution by bringing a catastrophic consequence as non-point sources of pollution are being made the point source of pollution. This has also manifested by an increase in the oxygen consumption in the hypolimnion, rise in the BOD, COD and the concentration of chlorides, sulphides, phosphorus and nitrogen. The same has also reported by Abu-Bakr & Kundangar (2009).	There is an urgent need to upgrade STPs so to reduce N & P concentrations more efficiently. The long term solution in our opinion is the adoption of proven Root Zone technology/ artificial wetland technology for waste water treatment. The same has been emphasized by Abu-Bakr and Kundangar (2004) and Abu-Bakr and Kundangar (2009)
3.	Environmental impact Assessment Studies on Dal Lake Kashmir of May 2018 by Shabeena Masoodi, M.R.D. Kundangar	Conservation measures to retrieve the Dal Lake are going on for last more than three decades yet there is no appreciable change in the ecological status of the Lake, the Lake continues under ecological stresses and the water quality does not show any significant improvement. The half-hearted approach and faulty proposal by the consultants have overshadowed the earlier achievements. The malfunctioning of STPs have made them point source pollutants. The incomplete sewerage system around Nigeen basin of Dal Lake has further aggravated the problems for the management practices. The houseboat sanitation had remained an unaccomplished job.	There is an urgent need to upgrade STPs to reduce N & P concentrations more efficiently. The long term solution in our opinion is the adoption of proven Root Zone technology/ artificial wetland technology for waste water treatment.
4.	Land use/cover mapping and assessing	There is rapid transformation of various landforms such as agricultural lands to residential class, water bodies into marshy	Land use and water quality are inseparable. Regulation of a proper land use plan in the Dal Lake

Sl. No	Research Reports of Dal Lake	Conclusions	Suggestions
	the impact of solid waste on water quality of Dal Lake catchment using remote sensing and GIS (Srinagar, India) of August 2018 by Junaid Qadir and Perminder Singh	and marshy into either residential or agriculture in the catchment of the Lake. The major land use in the Lake catchment is built-up-area. During the last 3 decades, the area under built-up had increased from 46.94 (ha) in 1981 to 79.54 (ha) in 2011, whereas area under aquatic vegetation had also increased from 54.26 (ha) in1981 to 90.15(ha) in 2011. Increase in the human settlement within and around the Lake and house boats are adding rich solid waste and direct sewer discharge in the Lake. As a result, there are drastic changes in the water quality of the Lake. This had led to eutrophication of the Lake and its ecosystem is deteriorating fast.	catchment is vital for preventing the further nutrient enrichment and sedimentation of the Lake waters.
5.	Assessing the impact of land use and land cover dynamics on water quality of Dal Lake, NW Himalaya, India of April 2020 by Shri Ishtiyaq Ahmad Dar & Shri Abdul Qayoom	The changing land-use practices in the Dal catchment have severe repercussions on its ecology and the long term socioeconomics of the whole Kashmir valley. The main reason for the deterioration of the water quality of Dal Lake is due to increased nutrient and silt loads from its catchment as a result of unprecedented LULC changes. There is decrease in the forest cover from 135.72 km^2 in 1980 to 118 Km^2 in 2018 during four decades. An aquatic vegetation within the Lake had increased 180.65 *per cent*, with only 2.03 km^2 of area in 1980 to 5.70 km^2 in 2018.The amount of nitrogen and phosphorus in the Lake is tremendous, thereby deteriorating its water quality. The ecology of the Lake got severely damaged, resulted in adversely affecting its flora and fauna. The sewage discharge from the urban catchment had amplified the eutrophication of the Lake as well.	A broad framework of policies for sustainable management of sewage of the urban Dal Lake catchment, and a concrete action plan for the conservation and restoration of Lake. Provided essential inputs to Policy makers in understanding the role of land use and land cover changes impacting the water quality of the Lake so there is need to frame an effective and eco-friendly land-use policy for its catchment.

Themes of research papers and its authors, conclusion and suggestions relating to Wular Lake

Sl. No	Research Reports	Conclusions	Suggestions
Themes of research papers & its authors, conclusions and suggestions in respect of Wular Lake			
1	Dying Wular: A Progeny to Preserve dated September-2020 by Zubair Ahmad Naik & Rahul Dabra	Lake has been the victim of the ill planning practices within, around the as well as within the catchment of the Lake. Once known for the quality water and the aquatic life, has become reservoir of the pollution which comes in different forms through the water coming into it. The Lake is shrinking at an alarming rate besides the water quality is getting deteriorated on daily basis. The Lake had deteriorated or vanished in terms of size, ecology, productivity, water-quality, beauty, hydrography etc. At present it is undergoing degradation at a very fast pace. Much of its area has been brought under vegetation, agriculture, human settlement, government departments, tourist hotels etc. The problem of the Lake has not been well recognized until recently. A number of reports and active plans have appeared in recent years but the results are zero. Measures and steps have not been taken as yet to save Lake from becoming a cesspool.	The following remedial measures were laid: - ➢The government should take active role in conservation and maintenance of Lake. ➢People must be educated about modern scientific methods of sanitation, sewage, disposal and processing of the waste matter to avoid sewer pollution in the Lake. ➢Deforestation must be stopped and the process of afforestation be vitalised. ➢There should be only a regulated and controlled township at urban and local levels. ➢Encroachment upon parks, Lakes, rivers and streams must be stopped. ➢There is a need to improve Lakes hydrological connectivity with existing marshes. It will help in water absorption capacity of the wetland system to control flooding and increase retention capacity of Lake. ➢Government should decide to get the boundaries of the Lake identified and proposals formulated for its protection and preservation.
2	On the fish diversity, conservational management and rehabilitation aspects of Wular Lake, Kashmir India Dated 21 Nov, 2016 by Rumysa.K, Sharique A Ali & others	The population of Schizothracine fishes in Lake had considerably decreased over the years particularly after the introduction of common carp in 1956. The fish species like Schizothorax richardsonii and Bangana diplostoma once abundant and even caught in commercial quantities, which has now disappeared. The factors responsible for decline in indigenous fishes is the encroachment of the shallow areas of the Lake for agricultural activities as use of artificial fertilizers, pesticides and herbicides in apple orchards and paddy fields from nearby areas had effected the indigenous fishes. Besides, direct discharge of untreated sewage coming from highly populated villages, catchment runoff, tourist pressure etc. Combinations of these threat factors	➢ Master plan should be developed for the treatment of all point source of pollution entering into the Lake, especially for the sewage coming from the residential area of the Lake which otherwise will affect the water quality and will deteriorate over all ecosystem health. ➢Watershed management plan should be implemented along the catchment area of Lake and construction and human habitation should be prohibited ➢Deforestation and overgrazing should be properly controlled in order to prevent soil erosion and loss of biodiversity. ➢ Indiscriminate mining of sand should be restricted or minimized as this practice destroys the breeding grounds and dwelling place of Lake Fauna. ➢Sustainable fisheries development to maintain/ restore fish diversity and yield. ➢Control of invasive species and enhancing biodiversity. ➢To protect the Lake from silt problem brought in through main feeding channel-and other small streams, settling basins need to

Sl. No	Research Reports	Conclusions	Suggestions
		affect not only fishes but also puts freshwater biodiversity uniquely at risk.	construct near their points into the Lake. ➢ Large areas of the Lake have been illegally encroached and converted into paddy fields and vegetables gardens. The further encroachment in the Lake must be stopped. ➢ Continuous deposition and pouring of domestic wastes, garbage and dead animals into the channels which ends at Lake be stopped under strict orders.
3	Analyzing Vegetation Change Processes at Watershed Level: A Multi-temporal Study of the Wular Catchment dated September 2017 by Zahoor-ul-Hassan, M Imran Malik & T.A. Kanth	Catchment of the Lake is facing drastic changes in vegetation patterns mainly by unplanned utilization and management of natural resources due to influence of increased human activities. The major changes include the growth of hydrophytic vegetation due to increased nutrient levels and also the cultivation of water nuts, fodder etc. on the associated marshes. The change in the land use from paddy to the horticultural land is another important change that had occurred in the catchment. The degradation of forests and their conversion to the grasslands and wastelands is also an important anthropogenic impact on the Catchment.	Watershed is considered to be the ideal unit for analysis and management of natural resources for planning. The soil, vegetation and water are the basic resources, which interact and establish in a watershed. Hence, all these three resources have to be managed collectively and in an integrated way. The continuous monitoring of the land cover changes provides a better understanding of the interactions between human and natural phenomena to manage and use resources. Contain increasing encroachment and deterioration of water quality of Lake.

Appendix-6.1
(Reference: Paragraph No. 6.3.7)

Themes of research papers and its authors, conclusion and suggestions relating to Manasbal Lake

Sl. No	Research Report	Conclusions	Suggestions
1.	Coliform bacterial estimation: A tool for assessing water quality of Manasbal Lake of Kashmir, Himalaya by Sana Shafi, Azra N. Kamili, Manzoor A. Shah and Suhaib A. Bandh from the Department of Environmental Science/Botany/ Centre of Research for Development/ University of Kashmir	High density of total coliform bacteria in the Lake water indicated that the water quality had deteriorated and was not fit for drinking purposes. This was due to poor land use pattern in the immediate catchment and discharge of waste water into the Lake.	Control must be implemented to minimize bacterial transport to such natural systems.
2.	Assessing the Impact of Anthropogenic Activities on Manasbal Lake in Kashmir Himalayas by Irfan Rashid, Majid Farooq, Mohammad Muslim, Shakil Ahmad Romshoo from the Department of Earth Sciences, University of Kashmir, Srinagar	Stone quarrying and subsequent land system changes in the catchment were the main causes responsible for the deteriorating health of the Lake by adversely influencing the erosion and other land surface processes in its catchment area. As a result, there was increase in the nutrient and silt load and their discharge into the Lake. High sediment and nutrient loads have a direct bearing on the distribution of flora and fauna. This had caused extinction of a fish species (Bortia birdi) and an aquatic plant (Eurayle ferox) from the Lake.	Afforestation of barren areas with local coniferous forest species like Pinus wallichiana to reduce the silt load on the Lake body. Continuous monitoring of the Lake, its immediate surrounding and the catchment for land system changes, hydrochemistry, biodiversity and Lake hydrology to develop a robust strategy and action plan for the conservation and restoration of the Lake
3.	Rotifer community in Manasbal Lake of Kashmir of 2014 by Irfan Jamila, A. R. Yousuf, Muni Parveen, Khalida Hassan, Musharaf Rehman and Bashir A. Sheikh from the Center of Research for Development and Department of Zoology, University of Kashmir, Srinagar	Dominance of rotifera- Brachionus calyciflorus at littoral zone of the Lake indicating that Lake is tending fast towards eutrophication due to site being used for many activities like washing, bathing; effluents of organic wastes are discharged into the Lake.

PREFACE

This Report of Comptroller and Auditor General of India for the period ended March 2022 has been prepared for submission to Lieutenant Governor of Jammu and Kashmir under Section 72 of the Jammu and Kashmir Reorganisation Act, 2019 for laying in the Legislative Assembly.

This Report contains Four Chapters. Chapter-I gives brief information regarding revenue receipts of the Government of Union Territory of Jammu and Kashmir. Chapter-II contains the significant audit findings noticed during compliance audit on revenue receipts. Chapter-III gives brief information regarding functioning of Public Sector Undertakings. Chapter-IV present significant audit findings noticed during compliance audit of Public Sector Undertakings.

The instances mentioned in this Report are those which came to the notice in the course of test audit during 2021-22 as well as those which came to notice in earlier years but could not be reported in the previous Audit Reports. Instances relating to the period subsequent to 2021-22 have also been included, wherever necessary.

The audit has been conducted in conformity with the Auditing Standards issued by the Comptroller and Auditor General of India.

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

About the Report

This Report covers matters arising out of the Compliance Audit on the Revenue Receipts of the Union Territory (UT) Government and their Public Sector Undertakings (PSUs). The primary purpose of this Report is to bring to the notice of the Legislature the important results of audit.

The Report has been organised in four chapters as under:

Chapter I: Overview

This Chapter contains brief profile of the UT Government with receipts/ expenditure for the year 2021-22, the authority for audit, audit jurisdiction, planning and conduct of audit, response of the Government to various audit products namely Inspection Reports, audit observations/ paragraphs and follow up action on the Audit Reports.

Chapter-II: Compliance Audit (Revenue Receipts)

This chapter covers Subject Specific Compliance Audit on 'Department's Oversight on GST Payments and Returns Filing'. The key findings are as follows:

There was delay of more than five years in issue of Standard Operating Procedure (SOP) for Scrutiny of Returns for the years 2017-18 and 2018-19 which resulted in minimal scrutiny of returns conducted. Special Investigation Unit (SIU) which was responsible for providing of inputs for scrutiny and necessary action taken by State Taxes Officer (STO) was constituted in 2022-23. The intelligence inputs supposed to be forwarded to the concerned jurisdictional authorities from 2017-18 to 2020-21 were left out which might have resulted in chances of non-detection of unrealised revenue. Due to minimal/ non-scrutiny of monthly and annual returns like GSTR 3B and GSTR-9 cases of mismatch of turnover, taxable turnover, tax paid, ITC availed, due to figures reflected in returns and books of account having implication of revenue loss remain unnoticed.

Further cases of non-initiating of action against non-filers, non-cancellation of registration certificates of return defaulter dealers, non-payment of interest for late payment of tax, non-levy of late fee for delay in filing of returns, cases of un-discharged tax liability and cases in which action was initiated but not completed were also noticed.

Differences were noticed in the MIS report (MIS COMP 01) containing details of non-filers and the information provided by the STOs. Further, there were differences between the MIS reports and information provided by the STOs regarding cases of GSTR-3A and ASMT-13 issued and withdrawn.

Administrative passivity resulted in late issuance of SOP for scrutiny of returns and constitution of internal audit wing. Despite several reminders/ requests, the following records of the taxpayers pertaining to the Circle audit were not produced to Audit:

(i) Red flag reports received from GSTN and shared with Circle authorities.
(ii) Year wise scrutiny details in UT under GST.

Recommendations:

The Department may:

- ***ensure effective scrutiny of cases based on risk analysis; and***
- ***consider fixing year-wise targets to pursue inconsistencies and deviations pointed out by Audit.***

Chapter-III: Functioning of Public Sector Undertakings

As on 31 March 2022, there were 42 PSUs in Jammu & Kashmir under the audit jurisdiction of the CAG. These include 39 Government Companies (including six inactive Government Companies), two Statutory Corporations and one Government Controlled Other Company. One PSU (Jammu & Kashmir Bank Limited) is listed on the stock exchange. There are six inactive PSUs (including four under liquidation) having investment of ₹ 57.57 crore towards capital (GoJ&K: ₹ 56.59 crore and Others: ₹ 0.98 crore) and long term loans ₹ 0.83 crore (GoJ&K: ₹ 0.83 crore and Others: Nil).

(Paragraph: 3.3)

As of 31 March 2022, there were 40 Companies under the purview of CAG's audit. Of these, accounts for the year 2021-22 were due from 34 Government Companies However, only three Government Companies submitted their accounts for the financial year 2021-22 for audit by CAG on or before 30 September 2022. The accounts of Jammu & Kashmir Road Transport Corporation and Jammu & Kashmir Financial Corporation for the years 2019-20 to 2021-22 were awaited as on 30 September 2022.

(Paragraph: 3.6)

Chapter-IV: Compliance Audit (Public Sector Undertakings)

This chapter covers six Compliance Audit paragraphs.

(i) Implementation of Interest Subvention Scheme under Business Revival Package 2020 in Jammu and Kashmir

Government of Jammu and Kashmir (GoJ&K), approved (October 2020) scheme of interest subvention of five *per cent* for all borrowers excluding borrowers under

Kissan Credit Card (KCC), Artisans Credit Card (ACC), loan against deposits, loans under personal segments and Non-Banking Financial Corporation (NBFC) for a period of six months w.e.f. 01 April 2020.

It was noticed that the un-utilised amount of ₹ 85.75 crore remained locked up with Union Territory Level Banker's Committee for 341 days though as per the terms and conditions of the sanction, the funds were to be credited immediately to eligible beneficiaries.

Ineligible benefit of interest subvention of ₹ 59.21 crore was extended to 39,136 accounts. Benefit of interest subvention of ₹ 1.91 lakh was granted to 10 KCC accounts which were not to be covered under the scheme. JKBL also provided the benefit of interest subvention of ₹ 1.07 lakh to 22 accounts under personal segment.

(Paragraph: 4.1)

(ii) Doubtful recovery of ₹ 104.51 crore

Sanctioning of credit facilities by Jammu and Kashmir Bank Limited in favour of M/s Zenica Cars India Pvt. Limited without obtaining adequate collateral securities coupled with non-fulfillment of pre-disbursement conditions and poor monitoring of account led to doubtful recovery of ₹ 104.51 crore.

(Paragraph: 4.2)

(iii) Wasteful expenditure in creation of Jammu and Kashmir Asset Reconstruction Limited

Failure of Jammu and Kashmir Bank Limited and GoJ&K in making the Jammu and Kashmir Asset Reconstruction Limited operational resulted in wasteful expenditure of ₹ 82.18 lakh.

(Paragraph: 4.3)

(iv) Parking of surplus funds and loss of interest of ₹ 2.65 crore

Parking of surplus funds in violation of the Board's directives resulted in loss of interest of ₹ 2.65 crore to Jammu and Kashmir IT Infrastructure Development Private Limited (Company).

(Paragraph: 4.4)

(v) Avoidable interest payment of ₹ 6.88 crore

Non-depositing of advance tax on taxable income during the financial years 2015-16, 2017-18 and 2019-20 by Jammu and Kashmir State Power Development Corporation

Limited as per the provisions of the Income Tax Act, 1961 resulted in avoidable interest payment of ₹ 6.88 crore.

(Paragraph: 4.5)

(vi) Avoidable interest payment of ₹ 0.32 crore

Failure of Jammu and Kashmir Projects Construction Corporation Limited to deposit advance tax on taxable income on due dates for the Financial Year 2017-18 in accordance with the provisions of Income Tax Act, 1961 resulted in avoidable interest of ₹ 0.32 crore.

(Paragraph: 4.6)

CHAPTER-I

OVERVIEW

CHAPTER-I

OVERVIEW

1.1 Introduction

This Report covers matters arising out of the Compliance Audit on the Revenue Receipts of the Union Territory (UT) Government and their Public Sector Undertakings (PSUs). The primary purpose of this Report is to bring to the notice of the Legislature the important results of audit. Findings of audit are expected to enable the Executive to take corrective action as also to frame policies and directives that will lead to improved financial management of the organisations contributing to better governance.

The Report has been organised in four chapters as under:

- **Chapter I** contains a brief profile of the UT Government with the receipt/ expenditure for the year 2021-22, the authority for audit, audit jurisdiction, planning and conduct of audit, response of the Government to various audit products namely Inspection Reports, audit observations/ paragraphs and follow-up action on audit reports.
- **Chapter II** contains observations of the Subject Specific Compliance Audit on 'Department's Oversight on GST Payments and Returns Filing'.
- **Chapter III** contains a brief profile of investments made in PSUs, audit mandate of PSUs and oversight role of the Comptroller and Auditor General of India.
- **Chapter IV** contains audit observations relating to Compliance Audit of Public Sector Undertakings of UT Government.

1.2 Profile of the Union Territory of Jammu and Kashmir

The Union Territory of Jammu and Kashmir is constituted of 20 Districts. The projected population of Union Territory of Jammu and Kashmir for the year 2022 was 1.35 crore. Kashmiri, Dogri, Hindi, Urdu and English are major languages of UT. GSDP of UT of Jammu and Kashmir during 2021-22 was ₹ 1,95,118 crore.

The overall position of receipts and expenditure of the UT Government during the year 2021-22 is given below in **Table 1.1.**

Table 1.1: Overall receipts and expenditure during the year 2021-22

Sl. No	Components	Amounts *(₹ in crore)*
1	Own Tax Revenue	11,707
2	Own Non-Tax Revenue	4,840
3	Share of Union taxes/ duties	0
4	Grants-in-aid and Contributions	42,691
5	Additional Resource Mobilisation	0
6	**Revenue Receipts (1+2+3+4+5)**	**59,238**
7	Recovery of Loans and Advances	1
8	Other Receipts	0
9	Borrowings and other Liabilities	11,151[#]
10	**Capital Receipts (7+8+9)**	**11,152**
11	**Total Receipts (6+10)**	**70,390**
12	**Revenue Expenditure,** of which	**59,269**
13	Interest payments	7,360
14	**Capital Expenditure**	**11,121**
15	Capital outlay	11,047
16	Loan and Advances	74
17	Appropriation to Contingency Fund	0
18	**Total Expenditure (12+14+17)**	**70,390**

Source: Budget 2021-22 and Finance Accounts 2021-22

 # Borrowings and other Liabilities: Net (Receipts-Disbursements) of Public Debt + Net of Contingency Fund + Net (Receipts - Disbursements) of Public Account + Net of Opening and Closing Cash Balance. Public Debt receipts includes ₹ 3,845.49 crore as back-to-back loans from GoI in lieu of GST Compensation shortfall.

The break-up of the various components of tax and non-tax revenues raised by the Union Territory (UT) of Jammu and Kashmir during the year 2021-22, the UT share of net proceeds of divisible Union taxes and duties assigned to the UT and Grant-in-aid received from the GoI during the year are depicted in **Table 1.2**

Table 1.2: Components of revenue receipts

(₹ in crore)

Sl. No.	Particulars	2021-22
1.	**Revenue raised by the UT Government**	
	Tax revenue, of which	**11,707.28**
	Taxes on Sales, Trade etc. including GST	8,300.62
	Taxes on Goods and Passengers	5.73
	State Excise	1,782.79
	Taxes and Duties on Electricity	376.60
	Stamps Duty and Registration Fees	512.02
	Taxes on Vehicles	616.24
	Land Revenue	113.28
	Non-tax revenue, of which	**4,840.45**
	Power	2,715.75
	Forestry and Wildlife	201.23
	Police	68.68
	Non-ferrous, Mining and Metallurgical Industries	128.78
	Water Supply and Sanitation	111.88
	Public Works	29.62

Sl. No.	Particulars	2021-22
	Medical and Public Health	30.99
	Interest Receipts	16.54
	Other Non-tax Receipts	1,536.98
	Total	**16,547.73**
2.	**Receipts from the Government of India**	
	Share of net proceeds of divisible Union taxes and duties	-
	Grants-in-aid	42,690.77
	Total	**42,690.77**
3.	**Total revenue receipts of the State/ UT Government (Total of 1 and 2)**	**59,238.50**
4.	**Revenue raised by UT Government as a percentage of total revenue**	**27.93 %**

(Source: UT's Finance Accounts 2021-22)

During the year 2021-22, the revenue raised by the UT Government (₹ 16,547.73 crore) was 27.93 *per cent* of the total revenue receipts. The balance 72.07 *per cent* was received from the Government of India (GoI) as Grants-in-aid.

Goods and Services Tax (GST) compensation is the revenue of the UT Government under GST (Compensation to States) Act, 2017. However, in addition to receiving the GST compensation of ₹ 892.56 crore as revenue receipts during the year 2021-22, the UT Government also received an amount of ₹ 3,845.49 crore as back-to-back loan from GoI in lieu of GST compensation shortfall under debt receipts of the UT Government, with no repayment liability for the Union Territory.

During the year 2021-22, the share of Capital Expenditure was 15.69 *per cent*, Revenue Expenditure was 84.20 *per cent* and Loans and Advances was 0.10 *per cent* of total expenditure. The combined share of Social Services (₹ 23,655.75 crore) and Economic Services (₹ 16,361.73 crore) which represented Development Expenditure was 56.85 *per cent* of total expenditure during 2021-22, and 43.04 *per cent* of total expenditure was incurred on General Services (₹ 30,298.89 crore).

1.3 Authority for Audit

Authority for audit by the CAG is derived from Articles 149 and 151 of the Constitution of India and the CAG's (Duties, Powers & Conditions of Service) Act, 1971 (DPC Act). CAG conducts audit of expenditure of State Government Departments under Section[1] 13 of the DPC Act. In addition, CAG also conducts audit of other Autonomous Bodies which are substantially financed by the Government under Section[2] 14 of DPC Act. Section 16 of the DPC Act authorises CAG to audit all receipts (both revenue and capital) of the Government of India and of Government of each State and of each Union Territory having a Legislative Assembly. Principles and

[1] Audit of (i) all expenditure from the Consolidated Fund of State, (ii) all transactions relating to Contingency Funds and Public Accounts and (iii) all trading, manufacturing, profit & loss accounts, balance-sheets and other subsidiary accounts.

[2] Several non-Commercial Autonomous/ Semi-Autonomous Bodies, established to implement Schemes for employment generation, poverty alleviation, spread of literacy, health for all and prevention of diseases, environment, etc., and substantially financed by the Government, are audited under Section14.

methodologies for various audits are prescribed in the Regulations on Audit and Accounts (Amendments), 2020 and Auditing Standards issued by the Indian Audit and Accounts Department.

1.4 Planning and conduct of Audit

Compliance Audits are conducted as per the Annual Audit Plan (AAP). Units for Compliance Audit are selected on the basis of risk assessment of the Apex units, Audit Units and Implementing Units.

In revenue sector, the auditable entities under various Departments are categorised into high, medium and low risk units according to their revenue position, past trends of the audit observations and other parameters. The annual audit plan is prepared on the basis of risk analysis which *inter-alia* include critical issues in Government Revenues and Tax administration. During the year 2021-22, there were 148 auditable units (State Taxes: 86; State Excise: 40; Motor Vehicles: 22; Law and Registration[3]) out of which 30 units were planned for audit and were audited.

Inspection Reports are issued to the heads of auditee units after completion of audit. Based on replies received, audit observations are either settled or further action for compliance is advised. Important audit findings are processed further as individual observations/ paragraphs for inclusion in the Audit Report. Detailed Compliance Audit paragraphs are prepared on issues of significance, selection of issues are done following the analogy explained above.

Formal replies furnished by Departments are carefully considered while finalising the materials for inclusion in the Audit Report. Audit Reports are laid before the State Legislature under Article 151 of the Constitution of India.

1.5 Lack of response of Government to Audit

Principal Accountant General (Audit), Jammu and Kashmir, conducts audit of Government Departments to check for compliance to rules and regulations in transactions and to verify the regularity in maintenance of important accounting and other records as per the prescribed rules and procedures. After these audits, Inspection Reports (IRs) are issued to the Heads of Offices inspected with copies to the next higher authorities. Important irregularities and other points detected during inspection,

[3] In Jammu and Kashmir registration of documents and properties was done by the Judicial Officers under the Jammu and Kashmir Registration Act 1977 BK. Upon reorganization of the erstwhile State of Jammu and Kashmir into two Union Territories in terms of the Jammu and Kashmir Reorganization Act, 2019, Jammu and Kashmir Registration Act 1977 BK was repealed and the Registration Act, 1908 made applicable for registration of immovable properties and various types of deeds and documents. Department of Registration under the administrative control of Revenue Department was created as an independent and exclusive Department vide Government order No: 117-Rev (S) of 2019, dated 24th of October, 2019. The creation of cycle of units of Department of Registration has not been initiated yet. Accordingly, figure of auditable units, units planned and units audited of Department of Registration is not included in 148 auditable units. However, the position of IRs/ paragraphs relating to revenue stands included in Table 1.3 (additions during the year 2021-22).

find place in Inspection Reports. Serious irregularities are brought to the notice of the Government by the Office of the PAG.

As per the Regulations on Audit and Accounts (Amendments), 2020, the Officer in-charge of the auditee entity shall send the reply to an Inspection Report (IR) within four weeks of its receipt. On intimation by the PAG of any major irregularity[4], the Government shall undertake *prima facie* verification of facts and send a preliminary report to the PAG confirming or denying facts within three weeks of receipt of intimation. Where the fact of major irregularity is not denied by the Government in the preliminary report, the Government shall further send a detailed report to PAG within two months of preliminary report indicating the remedial action taken to prevent recurrence and action taken against those responsible for the lapse.

For speedy settlement of audit observations/ Inspection Reports (IRs), the Jammu and Kashmir Budget manual provides for prompt response by the Executive to IRs issued by the Principal Accountant General (Audit) to ensure remedial/ rectification action. The auditee offices and their controlling Administrative Departments are required to comply with the observations contained in the IRs and rectify the defects and report their compliance to the Principal Accountant General (Audit).

The summarised position of the Inspection Reports of various departments as on 31 March 2022 are given in **Table 1.3**.

Table 1.3: Position of outstanding IRs and paragraphs as on 31 March 2022

Name of Sector	Opening Balance (01 April 2021)		Additions during the year 2021-22		Settled during the year 2021-22		Closing Balance (31 March 2022)	
	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs
Revenue Sector	965	5,070	42[5]	257[6]	19[7]	303[8]	988	5,024

The pendency of large number of paragraphs indicates lack of adequate response of the Government Departments to Audit. The Government may look into this matter and revamp the system to ensure proper response to the audit observations from the Departments in a time-bound manner.

Four Audit Committee Meetings (ACMs) were held for Revenue Sector settling four Inspection Reports and 35 outstanding paragraphs with a money value of ₹ 7.90 crore.

It is recommended that Government should ensure that a procedure is put in place for (i) prompt replies to IRs/ paragraphs as per the prescribed time schedule, (ii) recovery

[4] Major irregularity means (a) an instance of suspected material fraud or collusion or corruption coming to notice in audit, or (b) an irregularity of serious nature involving public funds, particularly that relating to mismanagement, loss, waste, nugatory expenditure or loss of revenue, serious breakdown/ violation of internal controls etc.

[5] State Taxes: 13; State excise: 11; Motor Vehicle: 16; Registration: 02

[6] State Taxes: 92; State excise: 31; Motor Vehicle: 132; Registration: 02

[7] State Taxes: 05; State excise: 13; Motor Vehicle: 01

[8] State Taxes: 175; State excise: 65; Motor Vehicle: 63

of losses/ outstanding advances/ overpayments, *etc*., in a time-bound manner and (iii) holding at least one meeting of each Audit Committee every quarter.

1.6 Response of Departments to Draft Audit Paragraphs and Detailed Compliance Audit Paragraphs

Regulations on Audit and Accounts (Amendments), 2020 stipulate that responses to Draft Audit Paragraphs proposed for inclusion in the Report of the Comptroller and Auditor General of India should be sent within six weeks[9].

In the last few years, Audit has reported on several significant deficiencies in implementation of various programmes/ activities as well as on the quality of internal controls in selected departments adversely impacting the success of programmes and functioning of the departments. The focus was on auditing specific programmes/ schemes in order to offer suitable recommendations to the Executive for taking corrective action and improving service delivery to the citizens.

The draft audit paragraphs proposed for inclusion in the Report of the Comptroller and Auditor General of India are forwarded by the Principal Accountant General (Audit) to the Principal Secretaries/ Secretaries of the Department concerned drawing their attention to the audit findings and requesting them to send their response within six weeks. The fact of non-receipt of replies from the Departments/ Government is invariably indicated at the end of such paragraphs included in the Audit Report. One compliance paragraph (Revenue sector) and six compliance paragraphs (Public Sector Enterprises) to be included in the Report of the Comptroller and Auditor General of India on Revenue Sector and PSEs for the year ended 31 March 2022 were sent to the Principal Secretaries/ Secretaries of the respective Departments. Out of these, the replies of Government of all these compliance paragraphs were awaited (May 2025).

1.7 Follow-up on Audit Reports

The follow-up on Audit Reports have been found to be inadequate as discussed below:

A. Non-submission of *suo-moto* Action Taken Notes

The erstwhile State Government (Finance Department) had issued instructions in June 1997 to all the Administrative Departments to furnish *suo-moto* Action Taken Notes (ATNs) on all the audit paragraphs featuring in the Audit Reports to the Public Accounts Committee (PAC) irrespective of whether they were taken up for discussion by the Committee or not. These ATNs are to be submitted to the Committee duly vetted by the Principal Accountant General (Audit) within a period of three months from the date of presentation of Audit Reports in the State Legislature.

[9] State Government's Finance (Budget) Department, in its order dated June 1982, however, directed all the Departments to submit their responses to proposed Draft Paragraphs within one month

It was, however, noticed that out of 143 audit paragraphs related to Revenue Sector included in Audit Reports from 2000-01 to 2020-21, *suo-moto* ATNs in respect of 126 audit paragraphs had not been received up to 31 March 2025.

Similarly, it was, noticed that out of 104 audit paragraphs related to Public Sector Enterprises included in Audit Reports from 2000-01 to 2020-21, *suo-moto* ATNs in respect of 37 audit paragraphs had not been received up to 31 March 2025. The year-wise breakup is given in **Table 1.4**.

Table 1.4: Year-wise breakup of for which ATNs had not been received

Sl. No.	Year of Audit Report	Number of Paragraphs
1	2004-05	1
2	2005-06	1
3	2008-09	2
4	2011-12	1
5	2012-13	1
6	2015-16	4
7	2016-17	7
8	2017-18	8
9	2018-19	5
10	2019-20	1
11	2020-21	6
Total		**37**

B. Action taken on recommendations of the PAC/ COPU

Action Taken Notes, duly vetted by the Principal Accountant General (Audit) on the observations/ recommendations made by the PAC/ COPU in respect of the audit paragraphs discussed by them are to be furnished to the Committees within six months from the date of such observations/ recommendations.

Out of 143 audit paragraphs featuring in the Revenue Sector of Audit Reports for the years from 2000-01 to 2020-21, only 17 audit paragraphs have been discussed by the PAC up to 31 March 2025. Recommendations in respect of 17 audit paragraphs were made by the PAC, however, ATNs on the recommendations of the Committee is pending from the UT Government in respect of 13 audit paragraphs.

Similarly, out of 104 audit paragraphs featuring in the Audit Reports of Public Sector Enterprises for the years from 2000-01 to 2020-21, only 67 audit paragraphs have been discussed by the Committee on Public Undertakings (COPU) up to 31 March 2025. Recommendations in respect of 66 audit paragraphs were made by the COPU, however, ATNs on the recommendations of the Committee is pending from the UT Government in respect of 50 audit paragraphs.

CHAPTER-II

COMPLIANCE AUDIT
(REVENUE RECEIPTS)

CHAPTER-II

COMPLIANCE AUDIT (REVENUE RECEIPTS)

Finance Department
(State Taxes Department)

2.1 Department's Oversight on GST Payments and Returns Filing

2.1.1 Introduction

Introduction of Goods and Service Tax (GST) has replaced multiple taxes levied and collected by the Centre and States. GST which came into effect from 08 July 2017 in J&K, is a destination-based consumption tax on the supply of goods or services or both levied on every stage of value addition. The Centre and States simultaneously levy GST on a common tax base. Central GST (CGST) and State GST (J&K GST)/ Union Territory GST (UTGST) are levied on intra-State supplies, and Integrated GST (IGST) is levied on inter-state supplies.

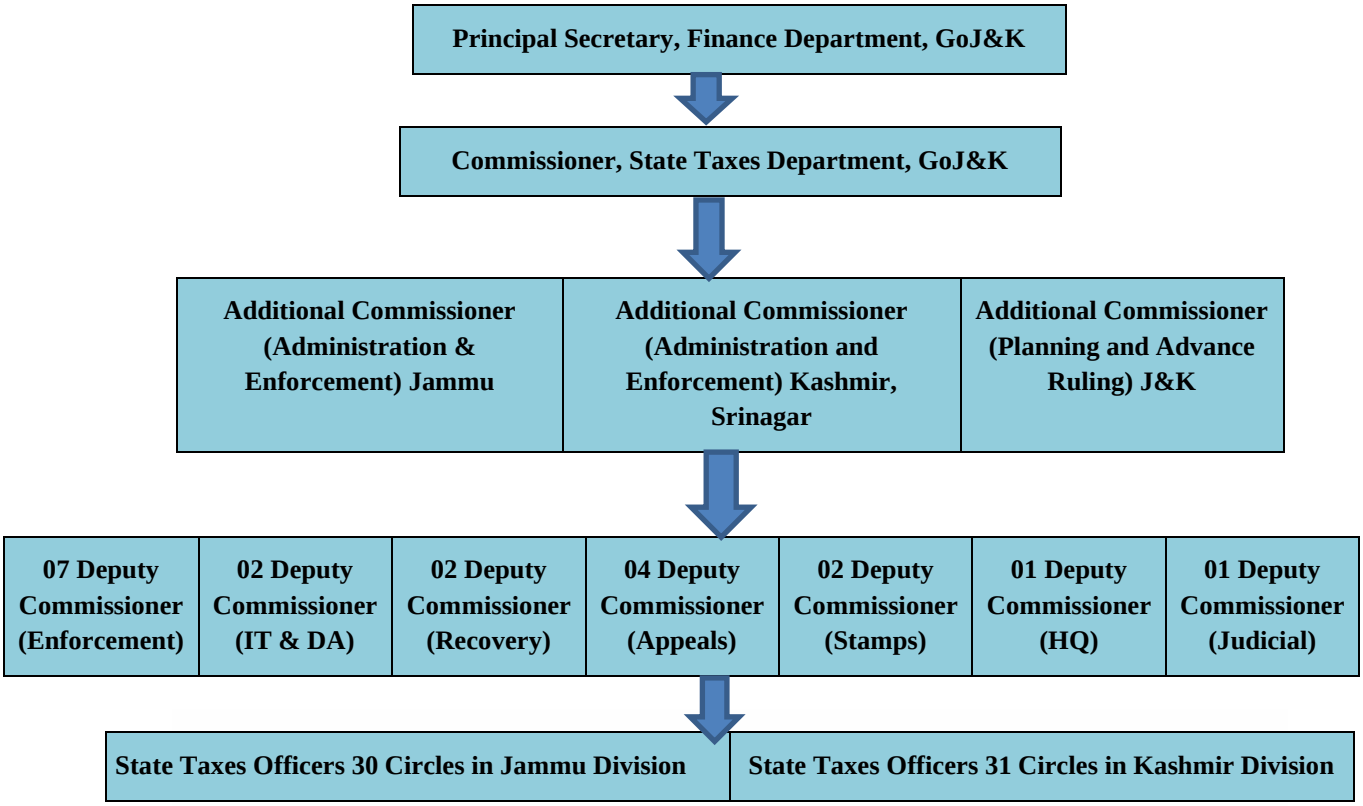
Section 59 of the J&K GST Act 2017 stipulates GST as a self-assessment based tax, whereby the responsibility for calculating tax liability, discharging the computed tax liability and filing returns is vested with the taxpayer. The GST returns must be filed online regularly on the common GST portal, failing which penalties will be payable. Even if the business had no tax liability during a particular tax period, it must file a nil return mandatorily. Further, Section 61 of the Act read with Rule 99 of J&K GST Rules 2017 stipulate that the proper officer may scrutinise the return and related particulars furnished by taxpayers, communicate discrepancies to the taxpayers and seek an explanation.

This Subject Specific Compliance Audit (SSCA) was taken up considering the significance of the control mechanism envisaged for tax compliance and the oversight mechanism of the Jammu and Kashmir State Taxes Department (STD).

2.1.2 Organisational Setup

The Organisational Setup of Government of Jammu and Kashmir (GoJ&K) Taxes Department is shown in the **Chart 2.1.1**. The Department works under administrative control of the Finance Department and is headed by Commissioner, State Taxes.

Chart: 2.1.1 Organisational Setup



2.1.3 Audit Objectives

This audit was oriented towards providing assurance on the adequacy and effectiveness of systems and procedures adopted by the Department with respect to tax compliance under GST regime. Audit of 'Department's Oversight on GST Payments and Return Filing' was taken up with the following audit objectives to seek an assurance on:

(i) Whether the rules and procedures were designed to secure an effective check on tax compliance and were being duly observed by taxpayers; and

(ii) Whether the scrutiny procedures, internal audit and other compliance functions of the Circles were adequate and effective.

2.1.4 Audit Methodology and Scope

This SSCA was predominantly conducted based on data analysis, which highlighted risk areas and red flags pertaining to the period July 2017 to March 2018 in case of Limited Audit and Detailed Audit and from July 2017 to March 2021 in respect of Circle Audit (Departmental Field Formation). Through data analysis, a set of 12 deviations were identified across the domains of Input Tax Credit, Discharge of tax liability, Registration and Return filing. Such deviations were followed up through a

centralised audit[1], whereby these deviations were communicated to the relevant State Tax Officers (STOs)/ Circles.

The ***centralised audit (Limited Audit)*** was supplemented by a detailed audit involving field visits for verification of records available with the jurisdictional field formations/ Circles. Returns and related attachments and information were accessed through the 'SSOID' application of the STD to examine data/ documents relating to taxpayers (viz. registration, tax payment, returns and other departmental functions). Compliance functions of the departmental formation such as scrutiny of returns, were also reviewed in selected circles.

The review of the scrutiny of returns by the Department and verification of taxpayers' records covered the period from July 2017 to March 2018, while the audit of the functions of selected Circles covered the period July 2017 to March 2021. The SSCA covered only the erstwhile State/ UT administered taxpayers. The audit was conducted from March 2022 to April 2023.

Entry conference of this SSCA was held on 16 December 2021 with Commissioner STD in which the audit objectives, sample selection, audit scope and methodology were discussed. The Exit Conference was held on 21 July 2023 with Commissioner STD in which the audit findings were discussed.

2.1.5. Sampling

A data-driven approach was adopted for planning, as also to determine the nature and extent of substantive audit. The sample for this SSCA comprised a set of deviations identified through data analysis for Limited audit that did not involve field visits; a sample of taxpayers for Detailed audit that involved field visits and scrutiny of taxpayer's records at departmental premises. Besides, a sample of Circles was also selected for evaluating the compliance functions of the Circles.

There are three distinct parts of this SSCA as under:

(i) Part I-Audit of Circles

Four circles with jurisdiction over more than one selected sample case for Detailed Audit were considered as the sample of Circles for evaluation of their oversight functions.

(ii) Part II-Centralised Audit (Limited Audit)

The sample for Limited audit was selected by identification of high-value or high-risk deviations from rules and inconsistencies between returns through data analysis for

[1] Centralised Audit did not involve seeking taxpayer's granular records such as financial statements related ledger accounts, invoices, agreements etc.

evaluation of the adequacy and effectiveness of the scrutiny procedure of the Department. Accordingly, 381 taxpayers were selected for Limited Audit.

(iii) Part III-Detailed Audit

It was conducted by accessing taxpayers' records through Circles for evaluation of the extent of tax compliance by taxpayers. The sample of taxpayers for Detailed Audit was selected on the basis of risk parameters such as Excess ITC, Tax Liability mismatch, Disproportionate exempted turnover to total turnover and Irregular ITC reversal. The 60 taxpayers selected for Detailed Audit comprised[2] of large, medium and small strata taxpayers as well as taxpayers selected randomly. The details of sample for Centralised/ limited audit, detailed audit and audit of Circles selected for this SSCA are brought out in ***Appendix 2.1.1***.

2.1.6. Audit criteria

The source of audit criteria comprised the provisions contained in the CGST/ J&K GST Act, IGST Act, and Rules made there under. The significant provisions are given in **Table 2.1.1**.

Table 2.1.1: Source of criteria

SI. No.	Subject	Act and Rules
1	Levy and collection	Section 9 of J&K GST Act 2017
2	Reverse Charge Mechanism	Section 9(3) of J&K GST Act and Section 5 (3) of IGST Act
3	Availing and utilizing ITC	Sections 16 to 21 under Chapter V of the J&K GST Act & Rules 36 to 45 under Chapter V of J&K GST Rules
4	Registrations	Section 22 to 25 of J&K GST Act & Rules 8 to 26 of J&K GST Rules
5	Supplies	Section 7 and 8 J&K GST Act. Schedule I, II and III of the J&K GST Act.
6	Valuation of supplies	Section 15 of J&K GST Act & Rules 27-34 of J&K GST Rules
7	Payment of Tax	Sections 49 to 53 under Chapter X of the J&K GST Act & Rules 85 to 88A under Chapter IX of the J&K GST Rules.
8	Filing of GST Returns	Sections 37 to 47 under Chapter IX of the J&K GST Act & Rules 59 to 68 and 80 to 81 under Chapter VIII of the J&K GST Rules. Part B of J&K GST Rules prescribes format of returns
9	Zero-rated supplies	Section 16 of IGST Act
10	Assessment and Audit functions	Sections 61, 62, 65 and 66 under Chapter XII & XIII of the J&K GST Act., Rules 99 to 102 under Chapter XI of J&K GST Rules 2017

In addition, the notifications and circulars issued by Central Board of Indirect Taxes and Customs (CBIC)/ STD relating to filing of returns, notifying the effective dates of filing of various returns, extending due dates for filing returns, rates of tax on goods and services, payment of tax, availing and utilising ITC, scrutiny of returns and oversight of tax compliance and Standard Operating Procedures (SOP) containing instructions to departmental officers on various aspects related to filing returns, scrutiny

[2] Sample comprising 36 large taxpayers, 18 medium taxpayers and 6 small taxpayers.

of returns, cancellation of registrations and verification of Director General of Analytics and Risk Management (DGARM) reports etc. also formed part of the audit criteria.

2.1.7. Audit Findings

Audit findings have been categorised into the following three categories: -

- Oversight on returns filing-Audit of Circles
- Limited Audit
- Detailed Audit

2.1.7.1 Oversight on returns filing- Audit of Circles

SSCA on Circle was conducted for the period 2017-18 to 2020-21 covering records of four STD Offices Circle-Baramulla-1, Circle-E Jammu, Circle-I Jammu, and Circle-L Jammu. The five parameters against which records were checked namely, Scrutiny of records, non-filers, cancellation of registrations, DGARM reports and Internal Audit. Audit universe and sample selected are given in **Table 2.1.2**

Table 2.1.2: Records of sample selection Circles

SI. No	Year	Audit Universe		Sample Selection	
		No. of STD Circles	No. of Registered Taxpayers	No. of STD Circles selected	No. of Registered Taxpayers
1	2017-18	61	81,462	04	6,553
2	2018-19	61	1,01,659	04	7,285
3	2019-20	61	1,14,970	04	7,313
4	2020-21	61	1,28,345	04	7,806

(Source: Information collected from Commissioner Office and Backend Portal)

2.1.7.2 Systematic issues observed

(I) Non-production of records

Despite several reminders/ requests, the following records of the taxpayers pertaining to the Circle audit were not produced to Audit.

(i) Red flag reports received from GSTN and shared with Circle authorities.

(ii) Year-wise scrutiny details in UT under GST.

On this being pointed out (June 2022), the Department did not reply (June 2023).

(II) Absence of mechanism for scrutiny of returns

As per Section 61(1) of the GST Act, 2017, the proper officer may scrutinise the return and related particulars furnished by the registered person to verify the correctness of the return. On being queried (June 2022) about the Guidelines/ Mechanism devised by

STD for scrutiny of returns, the Department replied (April 2023) that, the SOP were devised in December 2022. It was also stated that scrutiny of returns for the year 2017-18 were done as per the risk score assigned by BIFA (Business Intelligence & Fraud Analytics) module of GAIN (GST Analytics and Intelligence Network).

It is thus evident that the SOP was framed, with 65 months delay as GST got introduced in the month of July 2017, for proper scrutiny of taxpayers. As such, the cases were not scrutinised from 2017-18 to 2020-21 based on selection criteria. The reasons for late framing of SOP were not intimated (June 2023).

Further, Red flag reports of taxpayers belonging to the erstwhile State/ UT were received from GSTN in the form of raw data. These were sorted and sent by the Additional Commissioner Tax Planning to the concerned circle authorities for further necessary action. However, no information regarding the raw data received was made available by the STOs of selected circles. Further, Audit observed that Special Investigation Unit (SIU) was created at UT level to work as Business Intelligence Unit (BIU) in September 2022.

Thus, SIU which was responsible for providing of inputs for scrutiny and necessary action taken by STO was constituted in 2022-23. The intelligence inputs supposed to be forwarded to the concerned jurisdictional authorities from 2017-18 to 2020-21 were left out which might have resulted in chances of non-detection of unrealised revenue.

2.1.7.3 Compliance Issues

(I) Slow Pace of Scrutiny of Returns cases

Section 61 of the J&K GST Act 2017 stipulates that the proper officer may scrutinise the return and related particulars furnished by the taxpayers to verify the correctness of the returns and information. Under Rule 99 of J&K GST Rules 2017, discrepancies noticed, if any, be communicated to the taxpayer for seeking their explanation in form ASMT-10. If the explanation offered, by the tax payer in form ASMT-11, is found acceptable by the proper officer the proceeding shall be dropped, the taxpayer shall be informed accordingly in form ASMT-12, and no further action in the matter shall be taken. However, if the taxpayer does not furnish a satisfactory explanation or does not take any corrective action within the 30 days of being informed, the proper officer may initiate appropriate action, including the issue of demand notices in form DRC-01 under Section 73 or Section 74 of the Act.

Further, as per Section 61 of the J&KGST Act, where no satisfactory explanation is received within 30 days, or the accepted discrepancies are not rectified, the STO may proceed to determine tax under Section 73 or 74 of the Act or refer the matter to Internal Audit Party (IAP), Special Audit or Anti-Evasion.

Details of cases scrutinised during the financial years 2017-18, 2018-19, 2019-20, and 2020-21 in the sample selected State Taxes Circles is shown in the **Table 2.1.3.**

Table 2.1.3: Number of Returns Scrutinised

Sampled Circle	Baramulla	Circle E	Circle I	Circle L
Year	**As per STO**	**As per STO**	**As per STO**	**As per STO**
2017-18	0	0	0	0
2018-19	0	0	0	0
2019-20	5	0	8	0
2020-21	0	0	0	0
Total	**5**	**0**	**8**	**0**

(Source: information furnished by STOs)

The following deficiencies were noticed:

- All the STOs stated (April 2023) that the SOP on scrutiny of returns were issued in December 2022. No reasons for late framing of SOP were given.

- As per STO Circle Baramulla-I's information, one taxpayer had admitted and paid the tax liability of ₹ 0.04 lakh. It was also noticed that the due process was not completed in remaining cases.

- Audit observed that the STOs had not initiated any action against tax payers by proceeding to determine tax under Section 73 or 74 of the Act or referred the matter to IAP, Special Audit or Anti-Evasion, where no satisfactory explanation was received within 30 days, or who had not rectified the accepted discrepancies

Further the STOs of Circle-E Jammu, Circle-L Jammu and Circle-I Jammu replied that 22, 22 and 5 cases respectively recommended for the year 2017-18 under Section 61 of J&K GST after issuance of SOP are under process. Baramulla-I did not provide the relevant information.

Overall number of cases being scrutinised by the STOs/ Department are few despite of lapse of six years from the date of implementation of GST.

Recommendation

- ***The Department may ensure higher number of scrutiny of cases based on risk analysis and red flagging of cases.***

(II) Verification of Non-filers

As per Rule 68 of J&K GST Rules, 2017, GSTR-3A has to be issued to the taxpayer, where GST returns has not been filed. If the taxpayer still fails to file the return within 15 days of the receipt of notice, then an assessment order in ASMT-13 under Section 62 of the J&K GST Act read with Rule 100 of the J&K GST Rules has to be issued to determine tax liability of the taxpayers.

(a) Mismatch in data of non-filers

As per information made available (June 2022 to July 2022) by the STOs of selected circles, cases of non-filers of GST returns for years 2017-18 to 2020-21 were 'Nil' for Circle-I Baramulla, 'Nil' for Circle-E, 453 for Circle-L. For Circle-I, it was 'Nil' for year 2017-18 to 2019-20, and 90 for the year 2020-21.

However, examination (June 2022) of MIS report (MIS COMP 01) containing details of non-filers of various GST returns available on the GST backend portal revealed difference in data of non-filers vis-a-vis information provided by the STOs. The details of non-filers of GST returns as per MIS report (non-filers Report) are given in **Table 2.1.4.**

Table 2.1.4: Details of non-filers of GST returns as per MIS Report

Return Forms	GSTR-1	GSTR-3B	GSTR-4	GSTR-9
Circle-I Baramulla	0	0	0	0
Circle E Jammu	1,483	260	487	508
Circle I Jammu	614	133	114	231
Circle L Jammu	2,069	453	598	635
Total	**4,166**	**846**	**1,199**	**1,374**

(Source: MIS reports from backend portal)

When reasons for mismatch were sought (April 2023), it was stated (April 2023) that the online functionality of non-filer assessment was not available on portal and the same started working from November 2020 only. Further, it was stated that no reports in respect of non-filers were being generated before November 2020.

The reply of the Department does not explain the information mismatch and no reply in this regard was furnished by the Department (June 2023).

(b) Action initiated but assessment not completed

Data available, in respect of notice in GSTR-3A issued but assessment not completed, as per information provided by the STOs (June 2022 to July 2022), and available from MIS report (June 2022) is given in **Table 2.1.5**

Table 2.1.5: Details of cases under Assessment

Sample	Circle E		Circle I		Circle L		Circle-1 Baramulla	
Particular	**STO**	**MIS Report**	**STO**	**MIS Report**	**STO**	**MIS Report**	**STO**	**MIS Report**
GSTR-3A Issued	214	44	90	11	00	00	00	NA
ASMT-13 Issued	214	06	06	02	00	00	00	NA
Assessment Completed	26	NA	NA	NA	NA	NA	NA	NA
Demand Issued (₹ in Crore)	1.58	1.03	NA	NA	NA	NA	NA	NA

Sample	Circle E		Circle I		Circle L		Circle-1 Baramulla	
Particular	**STO**	**MIS Report**	**STO**	**MIS Report**	**STO**	**MIS Report**	**STO**	**MIS Report**
Recovery Made (₹ in Crore)	00	00	00	00	NA	NA	NA	NA
ASMT-13 Withdrawn	14	02	01	01	NA	NA	NA	NA
Pending Cases	**174**	**NA**	**84**	**NA**	**NA**	**NA**	**NA**	**NA**

(Source: information furnished by STOs and MIS report)

Discrepancies between the data provided by the STOs and MIS Report, in cases of GSTR-3A and ASMT-13 issued and withdrawn were noticed. It was seen that no recovery was done in completed cases. Once issued, ASMT-13 should not have been withdrawn, unless the returns are filed within the period of 30 days from the service of assessment order in ASMT-13. Cases were observed where the ASMT-13 is withdrawn, however, system does not reflect reason for withdrawal in such cases. On being pointed out (June 2022), it was stated (April 2023) that the online functionality of non-filer assessment was not available on portal as the same started working from November 2020 only and no reports in this respect were being generated before. Also, the withdrawal of ASMT-13 was allowed by the system itself.

The reply suggests that withdrawal of ASMT-13 is allowed without recording of reason for withdrawal, which suggests that there was lacuna in the system operating in the Department. Moreover, no reasons for the differences pointed out were furnished (June 2023).

The matter was brought (April 2023) to the notice of Additional Commissioner, Tax Policy Planning and Advance Ruling J&K. The reply was awaited (June 2023).

(c) Overview of non-filers and Returns not filed

As per the description of MIS report (Report ID MIS COMP 01[3]) GSTR-3B non-filers, the report helps to estimate the loss of revenue based on previous year's SGST paid in cash or through ITC of IGST, where GSTR-3B has not been filed.

On examination of these report, Audit observed that 7,219 returns in GSTR-3B were not filed by 846 taxpayers who during previous years had paid tax in cash or through ITC of IGST. The details for the years 2017-18 to 2020-21 is given as per **Table 2.1.6**.

Table 2.1.6: Details of non-filling of return in GSTR-3B

(₹ in lakh)

Sample	Number of non-filers	Number of Returns not filed	Expected SGST
Circle Baramulla-I	0	0	0
Circle E	260	2,175	230.01
Circle I	133	1,214	28.39

[3] Based on J&K GST paid by cash and J&K GST paid by IGST for previous years, total average J&K GST paid is calculated.

Sample	Number of non-filers	Number of Returns not filed	Expected SGST
Circle L	453	3,830	155.43
Total	**846**	**7,219**	**413.83**

(Source: GSTR-3B MIS COMP 01 reports from backend portal)

In respect of sampled Circles, the expected SGST was ₹ 413.83 lakh. The STOs did not take any cognizance of the defaulters and no action was initiated.

On being pointed out (June 2022), it was stated (April 2023) that the online functionality of non-filer assessment was not available on portal and the same started working from November 2020 only and no reports in respect of non-filers were being generated before November 2020.

The fact remains that STOs need to ensure issuance of GSTR-3A in case of non-filing of returns and follow it up with necessary actions either resulting in recovery or cancellation of registration with recovery.

(III) Cancellation of registrations

Cancellation of GST registration means that the taxpayer will no longer be a registered person under GST and will not have to pay or collect any GST, claim an input tax credit or file returns. GST registration cancellation is covered under Section 29 of the J&K GST Act and Rules 20 to 22 of the J&K GST Rules.

Following deficiencies were observed by the Audit: -

(a) *Suo-moto*/ on-application cancellation of registration

The information in relation to *suo-moto*/ on-application cancellation of registration provided (June 2022 to July 2022) by the State Taxes Officers (STOs) and information available (June 2022) in MIS Report on GST Backend Portal is depicted in **Table 2.1.7**

Table 2.1.7: Details of Suo-moto and on application cancellation

Particular	Circle I Baramulla		Circle E		Circle I		Circle L	
	STO	MIS REG 1.18	STO	MIS REG 1.18	STO	MIS REG 1.18	STO	MIS REG 1.18
Suo-Moto	882	899	644	507	201	201	598	612
On Application	80	106	206	209	31	31	150	150
Total	**962**	**1,005**	**850**	**716**	**232**	**232**	**748**	**762**
Difference	**43**		**134**		**00**		**14**	

On being enquired (June 2022 to July 2022), no reason for mismatch in data were furnished (June 2023) by STOs.

(b) Due diligence not exercised in cases of *suo-moto* cancellation of registration.

Rule 22(1) of the J&K GST Rules, 2017 states that in all cases of *suo-moto* cancellation, the STO has to issue a notice in REG-17 requiring the taxpayer to show cause within a period of seven working days as to why the registration shall not be cancelled. Details is depicted in **Table 2.1.8**.

Table 2.1.8: Cases of Cancellation

Particulars	Circle-1 Baramulla	Circle-E Jammu	Circle-I Jammu	Circle-L Jammu	Total
Suo-Moto Cancellation	882	644	201	598	2,325
Issuance of REG-17 SCN	00	11	01	00	12

(Source: information furnished by STOs)

Verification from GST back-end Portal revealed that detailed view of REG-17 was not available. So, in the absence of the details like date of issue, date of receipt of the response from taxpayer etc. related to REG-17, to ascertain whether the due process was followed or not, in all the cancellation cases, was not possible.

In response all, the STOs provided (June 2022 and April 2023) replies which did not pertain to specific query related to viewing of REG-17 information.

(c) Delay in cancellations

As per Rule 22 of the J&K GST Rules, 2017, the cancellation order in REG-19 has to be issued within 30 days from the date of application in case of cancellation on application by taxpayer or date of reply in the form of GST REG-18 to Show cause notice in the form of GST REG-17 in case of *suo-moto* cancellation. Delay in cancellation was noticed in all four sampled circle jurisdictions, the delay from date of application ranged from 01 to 1,076 days, as detailed in **Table 2.1.9**.

Table 2.1.9: Cases of delay in cancellation

Particulars\ Sample	Circle-I Baramulla	Circle-E Jammu	Circle-I Jammu	Circle-L Jammu
Cancellation Cases	1,005	716	232	762
Delayed Cases	232	291	21	87
Range (days)	01 to 307	01 to 497	06 to 495	01 to 1076

(Source: MIS reports from backend portal)

On being pointed out (April 2023), all the circles replied (April 2023) that the delay is caused as the verification of replies is very cumbersome process and delay is not intentional and due care will be taken in future.

(d) Follow-up action on non-filing of GSTR-10

As per Section 45 of the J&K GST Act, 2017, GSTR-10 has to be filed within three months of the effective date of cancellation or the date of order of cancellation, whichever is later. As per the information provided by selected STOs, the details of

GSTR-10 filed and action taken is given in **Table 2.1.10**. The details of GSTR-10 filing status through MIS report was not available during the course of audit.

Table 2.1.10: Details of Action taken against non-filers of Returns

Particulars/ Sample	Circle-I Baramulla	Circle-E Jammu	Circle-I Jammu	Circle-L Jammu
Cancellation Cases	962	850	232	762
GSTR-10 Filed	47	47	09	00
Action Taken against Non-Filers	00	00	00	00

(Source: information furnished by STOs)

As per Rule 68 of J&K GST Rules, 2017, GSTR-3A has to be issued to the taxpayer, where GSTR-10 has not been filed. If the taxpayer still fails to file the final return within 15 days of the receipt of notice, then an assessment order in ASMT-13 under Section 62 of the J&K GST Act read with Rule 100 of the J&K GST Rules shall have to be issued to determine the liability of the taxpayer under sub-section (5) of Section 29 of J&K GST Act. If the taxpayer files the final return within 30 days of the date of service of the order ASMT-13, the said order shall be deemed to have been withdrawn. However, the liability for payment of interest and late fee shall continue. If the said return remains unfurnished within the statutory period of 30 days from the issuance of order ASMT-13, the proper officer may initiate proceedings under Section 78 and recovery under Section 79 of the J&K GST Act.

As per information provided by the sampled circle STOs, no action was taken against non-filers of GSTR-10. The STOs neither issued notice in GSTR-3A nor was any ASMT-13 issued during this period. Thus, no recovery proceedings were initiated by the STO against the defaulters.

STO Circle Baramulla-I replied (June 2022) that proceedings against the dealers wherever applicable have been initiated now. Remaining three Circles' STOs stated (April 2023) that the online functionality of non-filer assessment was not available on portal and the same started working from November 2020 only and no reports in respect of non-filers were being generated before November 2020.

Now as the non-filers report are being generated, efforts to take timely action is required from STOs.

(IV) Compliance to DGARM Reports

With the aim of studying, interpreting and analysing the GST data and sharing the results with various stakeholders, DGARM was formed in July 2017 and it started functioning from June 2018 by generating reports on taxpayers on various risk parameters. The Circle Officer should take action on such reports received by Jurisdictional Executive Commissionerate. After due verification, compliance should be uploaded to the Directorate of Data Management (DDM).

The STOs Circle E, I, & L Jammu informed (June 2022) that they had not received any DGARM reports during 2017-18 to 2020-21 while the STO of Circle Baramulla-I stated (June 2022) that DGARM report for the one dealer had been received during the same period and after verification of same and taking action, the recovery of ₹ 0.66 crore was still pending.

(V) Internal Audit

As per Section 65 of the J&K GST Act, 2017, the Commissioner or any officer authorised by him, by way of a general or a specific order, may undertake audit of any registered person for such period, at such frequency and in such manner as may be prescribed. Section 2 (13) of the J&K GST Act, 2017, defines "Audit" as the examination of records, returns and other documents maintained or furnished by the registered person under this Act or the Rules made thereunder or under any other law for the time being in force to verify the correctness of turnover declared, taxes paid, refund claimed and input tax credit availed, and to assess his compliance with the provisions of this Act or the Rules made thereunder.

The information regarding the audit undertaken for the financial year 2017-18 was sought (September 2022) from the Department. The Department stated (May 2023) that there was no provision for internal audit by subordinate offices/ ranges. It was further stated that taxpayers were bound to get their accounts audited by Chartered Accountants (CAs). The matter was brought to the notice of Commissioner, STD, J&K for taking up the issue with appropriate authorities. However, Department on suggestion (September 2022) of Audit belatedly constituted (October 2022) the Internal Audit Wing (IAW) which is mandated to conduct audit under Section 65 of J&K GST Act. Thus, the delayed constitution of IAW resulted in non-initiation of internal audit of the taxpayers by the Department during July 2017 to September 2022 and possible delay/ non-detection of revenue evasion and recovery.

Recommendation

- ***Year-wise targets under Section 65 of J&K GST Act, 2017, may be fixed to ensure the timely compliance of internal audit along with recovery of pointed out amounts of dues before the time barring of cases.***

2.1.8 Limited Audit

2.1.8.1 Inconsistencies in GST Return

In Limited audit, deviations from rules and inconsistencies in returns filed and evaluation of the adequacy and effectiveness of the scrutiny procedure of the Department was checked.

Audit analysed GST returns data pertaining to 2017-2018 as made available by GSTN. Rule-based deviations, and logical inconsistencies between GST returns filed by

taxpayers were identified on a set of 12 parameters, which can be broadly categorised into two domains - ITC and Tax payments.

Out of the 13 prescribed GST returns[4], the following basic returns that apply to normal taxpayers were considered for the purpose of identifying deviations, inconsistencies and mismatches between GST returns/ data:

- GSTR-1: Monthly return furnished by all normal and casual registered taxpayers making outward supplies of goods and services or both and contains details of outward supplies of goods and services.

- GSTR-3B: Monthly summary return of outward supplies and input tax credit claimed, along with payment of tax by the taxpayer to be filed by all taxpayers except those specified under Section 39(1) of the Act. This is the return that populates the credit and debits in the Electronic Credit Ledger and debits in Electronic Cash Ledger.

- GSTR-6: Monthly return for Input Service Distributors providing the details of their distributed input tax credit and inward supplies.

- GSTR-8: Monthly return to be filed by the e-commerce operators, who are required to deduct TCS (Tax collected at source) under GST, introduced in October 2018.

- GSTR-9: Annual return to be filed by all registered persons other than an Input Service Distributor (ISD), Tax Deductor at Source/ Tax Collector at Source, Casual Taxable Person and Non-Resident taxpayer. This document contains the details of all supplies made and received under various tax heads (CGST, SGST and IGST) during the entire year along with turnover and audit details for the same.

- GSTR-9C: Annual audit form for all taxpayers having a turnover above ₹ five crores in a particular financial year. It is basically a reconciliation statement between the annual returns filed in GSTR-9 and the taxpayer's audited annual financial statements.

- GSTR-2A: A system-generated statement of inward supplies for a recipient. It contains the details of all B2B transactions of suppliers declared in their Form GSTR-1/ 5, ISD details from GSTR-6, details from GSTR-7 and GSTR-8 respectively by the counterparty and import of goods from overseas on bill of entry, as received from ICEGATE Portal of Indian Customs.

[4] (i) GSTR-1, (ii) GSTR-3B, (iii) GSTR-4 (taxpayers under the Composition scheme), (iv) GSTR-5 (non-resident taxable person), (v) GSTR-5A (Non-resident OIDAR service providers), (vi) GSTR-6 (Input service distributor), (vii) GSTR-7 (taxpayers deducting TDS), (viii) GSTR-8 (E-commerce operator), (ix) GSTR-9 (Annual Return), (x) GSTR-10 (Final return), (xi) GSTR-11 (person having UIN and claiming a refund), (xii) CMP-08 and (xiii) ITC-04 (Statement to be filed by a principal/ job-worker about details of goods sent to/received from a job-worker).

The pan J&K data analysis pertaining to J&K jurisdiction on the 12 identified parameters and extent of deviations/ inconsistencies observed are summarised in ***Appendix* 2.1.2 and 2.1.3**. The details of data analysis undertaken is given in **Table 2.1.11 (a) and Table 2.1.11 (b).**

Table: 2.1.11 (a): Details of Data Analysis undertaken

SI. No.	Algorithm used	Impact
Domain: ITC		
1.	ITC available as per GSTR-2A with all its amendments was compared with the ITC availed in GSTR-3B in Table 4A (5) (accrued on domestic supplies) excluding the reversals in Table 4B (2) but including the ITC availed in the subsequent year from Table 8C of GSTR-9 and blocked credits.	ITC mismatch between GSTR-2A and GSTR-3B
2.	RCM in GSTR-3B Table 3.1(d) (with proof of tax paid) is compared with ITC availed due to RCM in GSTR-9 Table (6C+6D+6F); OR if GSTR-9 is not available, RCM liability in GSTR-3B Table 3.1 (d) is compared with ITC availed in GSTR-3B Table {4A(2) + 4A(3)}.	Incorrect availing of ITC under RCM
3.	ISD ITC availed in GSTR-9 Table 6G or GSTR-3B Table 4(A)(4) of recipient was compared with the sum of Table 5A, Table 8A, and Table 9A of GSTR-6 of distributor GSTINs	Incorrect availing of ISD credit
	Domain: Annual Return and financial statements (FS)	
4.	Negative figure in GSTR-9C Table 9R and examination of reasons provided in Table 10 for mismatch	Mismatch in tax paid between books of accounts and returns
5.	Positive figure in GSTR-9C Table 12F and examination of reasons provided in Table 13 for mismatch	Mismatch of ITC availed between Annual returns and Books of accounts
	Domain: Tax and Interest payment	
6.	RCM payments in GSTR-9 Table 4G (tax payable) were compared with ITC availed in GSTR-9 Table 6C, 6D and 6F (ITC availed). In cases where GSTR-9 was not available, RCM payment in GSTR-3B Table 3.1(d) was compared with GSTR-3B 4(A)(2) and 4A(3). Greater of difference in GSTR-9 and GSTR-3B considered where both were available	Short payment of tax under RCM versus ITC availed in GSTR-3B/ GSTR-9
7.	The greater of tax liability between GSTR-1 (Tables 4 to 11), considering advances and amendments, and GSTR-9 (Tables 4N, 10 and 11) was compared with tax paid details in GSTR-3B Tables 3.1(a) and 3.1(b). In cases where GSTR-9 was not available, GSTR-3B tax paid was compared with GSTR-1 liability	Unsettled liabilities
8.	E-commerce GSTR-8 became effective from 1 October 2018 when TCS provisions became effective. GSTINs declared in GSTR-8 who are also filing GSTR-4/CMP-08 under composition scheme.	Composition taxpayers also availing e-commerce facility
9.	Taxpayers who have not filed GSTR-3B but have filed GSTR-1 or where GSTR-2A available, indicating taxpayers carrying on the business without discharging tax	GSTR-3B was not filed but GSTR-1 is available

SI. No.	Algorithm used	Impact
10.	Interest calculated at the rate of 18 *per cent* on cash portion of tax payment on delayed filing of GSTR-3B vis-à-vis interest declared in GSTR-3B	Short payment of interest

Table 2.1.11 (b): Details of Data Analysis undertaken (Turnover mismatch)

SI. No.	Algorithm used	Impact
1.	Negative figure in GSTR-9C Table 5R and examination of reasons provided in Table 6 for mismatch	Mismatch in taxable turnover declared in GSTR-9C Table 7G
2.	Negative figure in GSTR-9C Table 7G and examination of reasons provided in Table 8 for mismatch	Mismatch in taxable turnover declared in GSTR-9C Table 7G

The pan J&K data analysis depicted many deviations with considerable money value which points towards lack of basic validation control that should have been built into the application software. For example, for unreconciled gross revenue (Table 5R of GSTR-9C), the number of instances for deviations were 50 amounting to ₹ 1,330.89 crore and for unreconciled taxable revenue (Table 7G of GSTR-9C), the number of deviations were 50 with money value of ₹ 1,271.74 crore. These huge money value figures indicated that controls to input and validate data in GST system and E-Way Bill (EWB) system may either not working properly or are entirely absent.

Audit issued 381 audit queries in Limited audit. The replies furnished by the STOs were examined. The audit findings are given as under:

(I) Result of Limited Audit

Out of 381 audit observation issued to the Department under 12 dimensions, initial responses in 368 cases had been received from the Department. In 13 cases, replies were not received from the Department. The 12 audit dimensions have been translated into compliance deviations, and is summarised in ***Appendix 2.1.4 and 2.1.5***. The category-wise details of cases are mentioned in ***Appendix 2.1.6-(I to VIII)***.

Summary of Centralised/ Limited Audit

Out of 381 audit observations issued, replies were not furnished by the Department in 13 cases amounting to ₹ 9.11 crore (details in ***Appendix 2.1.6-I***) which were related to mismatch of tax liability/ input tax credit amounting ₹ 6.05 crore (11 cases) and mismatch of Turnover amounting to ₹ 3.06 crore (two cases). The Department furnished the responses in 368 cases amounting to ₹ 2,760.72 crore, which relates to mismatch of tax liability/ input tax credit amounting to ₹ 163.66 crore in 270 cases and mismatch of Turnover amounting to ₹ 2,597.06 crore in 98 cases.

Out of the 270 responses received in respect of mismatch of tax liability/ input tax credit, in 80 cases the Department accepted the audit findings. Out of these 80 cases, in 30 cases recovery have been affected amounting to ₹ 2.06 crore (Column No 4 and 5 in ***Appendix 2.1.4***). In 46 cases, SCN/ ASMT-10 have been issued amounting to

₹ 59.96 crore (Column No 6 and 7 in ***Appendix 2.1.4***). In four cases involving amount of ₹ 1.18 crore, the Department accepted audit observation and stated that matter is under correspondence with taxpayer (Column No 8 and 9 in ***Appendix 2.1.4***).

Relatively higher rates of deviations were noticed in risk parameters such as mismatch in availing of ITC, mismatch in tax paid between books of accounts and annual return, cases where GSTR-3B not filed but GSTR-1 or GSTR-2A available, short payment of interest on delayed payments, undischarged liability *etc*.

In 184 cases (Column No 12, 14 and 16 in ***Appendix 2.1.4***), constituting 68.15 *per cent* of responses regarding tax liability/ Input Tax Credit, where the replies of the Department were acceptable to Audit; data entry errors by taxpayers comprised 83 cases (Column No 12 and 13 in ***Appendix 2.1.4***); the Department had proactively taken action in 56 cases (Column No 14 and 15 in ***Appendix 2.1.4***) and 45 cases (Column No 16 and 17 in ***Appendix 2.1.4***) had other valid explanations.

In six cases (Column No 18 and 19 in ***Appendix 2.1.4***), constituting 2.22 *per cent*, the Department did not accept the deviations pointed out by Audit without providing any documentary evidence.

Similarly, Audit also noticed turnover related mismatches in 98 cases (Column No 4, 6, 8, 12, 14, 16 and 18 in ***Appendix 2.1.5***). Of these, in two cases recovery has been affected (Column No 4 and 5 in ***Appendix 2.1.5***), in four cases SCN including ASMT-10 has been issued to the taxpayers (Column No 6 and 7 in ***Appendix 2.1.5***), in two cases Department stated that matter is under correspondence with tax payer (Column No 8 and 9 in ***Appendix 2.1.5***).

Out of 85 cases (Column No 12, 14 and 16 in ***Appendix 2.1.5***), where the replies of the Department were acceptable to Audit, data entry errors by taxpayers comprised 18 cases (Column No 12 and 13 in ***Appendix 2.1.5***); the Department had proactively taken action in one case (Column No 14 and 15 in ***Appendix 2.1.5***) and 66 cases (Column No 16 and 17 in ***Appendix 2.1.5***) had other valid explanations.

In five cases (Column No 18 and 19 in ***Appendix 2.1.5***) the Department did not accept the deviations pointed out by Audit without providing any documentary evidence.

Recommendation

- ***Department may urgently pursue inconsistencies and deviations pointed out by Audit in these 13 cases, for which responses have not been provided.***

One case from each audit dimensions in which the Department had accepted the audit objections are detailed in ***Appendix 2.1.7***. The cases are described below.

(i) Dimension-Mismatch of ITC availed GSTR-3B vs GSTR-2A

GSTR-2A is a purchase related dynamic tax return that is automatically generated for each business by the GST portal, whereas GSTR-3B is a monthly return in which summary of outward supplies along with ITC declared and payment of tax are self-declared by the taxpayer.

To analyse the veracity of ITC utilisation, relevant data were extracted from GSTR-3B and GSTR-2A for the year 2017-18, and the ITC paid as per suppliers' details was matched with the ITC credit availed by the taxpayer. The methodology adopted was to compare the ITC available as per GSTR-2A with all its amendments and the ITC availed in GSTR-3B in Table 4A(5)[5] considering the reversals in Table 4B(2)[6] but including the ITC availed in the subsequent year 2018-19 from Table 8C of GSTR-9.

ITC mismatch of ₹ 1.25 crore between GSTR-3B and GSTR-2A noticed in respect of a taxpayer, under STO Circle P-Jammu, was communicated (March 2022) to the STO. In response, the Department issued (December 2023) demand notice DRC-07 for ₹ 2.58 crore to the taxpayer. Further reply/ progress/ recovery was awaited (October 2024).

(ii) Dimension-Mismatch in availment of ITC on RCM

In Reverse Charge Mechanism, the liability to pay tax is fixed on the recipient of supply of goods or services instead of the supplier or provider in respect of certain categories of goods or services or both under Section 9(3) or Section 9(4) of the J&K GST/ CGST Act, 2017 and under sub-section (3) or sub-section (4) of Section 5 of the IGST Act, 2017.

GSTR-9 is an annual return to be filed once for each financial year, by the registered taxpayers who were regular taxpayers, including SEZ units and SEZ developers. The taxpayers are required to furnish details of purchases, sales, input tax credit or refund claimed or demand created etc.

To analyse the veracity of ITC availed on tax paid under Reverse Charge Mechanism (RCM) for the year 2017-18, the datasets pertaining to GSTR-3B and annual return GSTR-9 were compared to check whether the ITC availed on RCM was restricted to the extent of tax paid. The methodology adopted was to compare the RCM payments in GSTR-3B Table 3.1(d)[7] with ITC availed in GSTR-9 Table 6C[8], 6D[9] and 6F[10]. In cases where GSTR-9 was not available, the check was restricted within GSTR-3B,

5 All other eligible ITC
6 Other ITC reversed.
7 Inward supplies (liable to reverse charge)
8 Inward supplies receive from unregistered persons liable to reverse charge.
9 Inward supplies received from registered persons liable to reverse charge.
10 Import of services.

where the tax discharged part in R3B Table 3.1(d) was compared with the ITC availing part of R3B 4A (2)[11] and 4A (3)[12].

In case of a taxpayer under STO Circle-E Jammu, the tax paid under in Table 3.1(d) of GSTR-3B was ₹ 0.11 crore and the ITC availed in Table 4A(2) and (3) of GSTR-3B was ₹ 0.28 crore. This resulted in mismatch of ITC of ₹ 0.17 crore which was communicated (March 2022) to the STO. In response, the Department issued (December 2023) demand notice DRC-07 for ₹ 0.35 crore to the taxpayer. Further recovery/ action is awaited (October 2024).

(iii) Dimension-Mismatch of ITC availed on RCM without payment of Tax

The extent of availing of ITC under RCM for the year 2017-18 without discharging equivalent tax liability or, in other words, short payment of tax under RCM was analysed by comparing the datasets pertaining to GSTR-3B and annual return GSTR-9 to check whether the tax has been discharged fully on the activities/ transactions under RCM. In cases where GSTR-9 was filed, the RCM payments in Table 4G[13] was compared with ITC availed in Table 6C, 6D and 6F. In cases where GSTR-9 was not available, RCM payments in GSTR-3B Table 3.1(d)[14] was compared with GSTR-3B Table 4(A)(2)[15] and 4A(3)[16].

Audit observed that in case of taxpayer under STO Circle-J Kashmir, the RCM payments in Table 6.1 (B) of GSTR-3B was ₹ 0 and the ITC availed in Table 4(A)(3) of GSTR-3B was ₹ 0.02 crore. This resulted in excess in availment of ITC on RCM without payment of tax amounting to ₹ 0.02 crore which was communicated (March 2022) to the State Taxes Office/ Circle. In response, the Department confirmed (April 2022) the recovery of ₹ 0.02 crore.

(iv) Dimension-Mismatch in tax paid between annual return and tax paid in Table 9R of GSTR-9C

The certified reconciliation statement submitted by the taxpayer as required under Rule 80(3) of J&K GST Rules in form GSTR-9C for the year 2017-18 was analysed at data level to review the extent of identified mismatch in tax paid between the Annual Return and the books of account. Table 9 of the form GSTR-9C attempts to reconcile the tax paid by segregating the turnover rate-wise and comparing it with the tax discharged as per annual return GSTR-9. The unreconciled amounts could potentially indicate tax levied at incorrect rates, incorrect depiction of taxable turnover as exempt or *vice versa* or incorrect levy of CGST/ SGST/ IGST. There can also be situations wherein supplies/ tax declared are reduced through amendments (net of debit notes/

11 Import of services.
12 Inward supplies (liable to reverse charge).
13 Inward supplies on which tax is to be paid on reverse charge basis.
14 Inward supplies (liable to be reverse charge).
15 Import of services.
16 Inward supplies liable to be reverse charge other than Import of Goods and Services.

credit notes) in respect of the 2017-18 transactions carried out in the subsequent year from April to September 2018. Consequential interest payments both short payments and payments under incorrect heads also need to be examined in this regard**.**

Audit query on unreconciled payment of Tax in Table 9R of GSTR-9C, amounting to ₹ 0.41 crore was issued in respect of Taxpayer under STO Circle-Kishtwar Jammu and communicated (March 2022) to the STO. In response, the Department confirmed (December 2022) recovery of ₹ 0.41 crore (November 2022).

(v) Dimension-Mismatch of ITC between annual return and Table 12F of GSTR-9C

Table 12 of GSTR-9C reconciles ITC declared in annual return (GSTR-9) with ITC availed as per audited Annual Financial Statement or books of accounts. Column 12F of this Table deals with unreconciled ITC.

The certified reconciliation statement submitted by the taxpayer as required under the Rule 80(3) of J&K GST Rules in form GSTR-9C for the year 2017-18 was analysed at data level to review the extent of identified mismatch in ITC declared in the Annual Return with the Financial Statements**.**

In one case under STO Circle-P Jammu, unreconciled ITC of ₹ 0.30 crore declared in Table 12F of GSTR-9C, being ITC availed in GST returns in excess of eligible ITC based on Financial Statements, was noticed and communicated (March 2022) to the State Taxes Office. In response, the Department issued (December 2023) demand notice DRC07 for ₹ 0.21 crore to the taxpayer. Further progress/ recovery was awaited (October 2024)

(vi) Dimension-GSTR-3B not filed but GSTR-1 or GSTR-2A available

Taxpayers who have not filed GSTR-3B but have filed GSTR-1 or whose GSTR-2A was available were identified. GSTR-3B return is the only instrument through which the liability is offset and ITC is availed. The very availability of GSTR-1 and 2A and non-filing of GSTR-3B indicates that the taxpayers had undertaken/ carried on the business during the period but have not discharged their tax liability. These red flags potentially indicate cases of irregular passing on of ITC**.**

Undischarged Tax liability of ₹ 0.14 crore as a result of non-filing of GSTR-3B but have filed GSTR-1 was noticed in case of one taxpayer under Circle-I Kashmir and the same was communicated (March 2022) to the STO. In response, the Department issued (May 2022) demand notice DRC07 for ₹ 0.27 crore to the taxpayer.

(vii) Dimension-Short declaration of tax liability

GSTR-1 depicts the monthly details of outward supplies of Goods or Services. This details also assessed by the taxpayer and mentioned in annual return GSTR-9 in the relevant columns. Further, taxable value and tax paid thereof also shown in GSTR-3B.

To analyse the undischarged tax liability, relevant data were extracted from GSTR-1 and GSTR-9 for the year 2017-18 and the tax payable in these returns was compared with the tax paid as declared in GSTR-9. Where GSTR-9 was not available, a comparison of tax payable between GSTR-1 and GSTR-3B was resorted to. The amendments and advance adjustments declared in GSTR-1 and 9 were also considered for this purpose.

For the algorithm, Tables 4 to 11 of GSTR-1 and Tables 4N, 10 and 11 of GST-9 were considered. The greater of the tax liability between GSTR-1 and GSTR-9 was compared with the tax paid declared in Tables 9 and 14 of GSTR-9 to identify the short payment of tax. In the case of GSTR-3B, Tables 3.1(a)[17] and 3.1(b)[18] were taken into account**.**

It was observed that in case of one taxpayer under Circle-J Jammu, the tax payable in Table 4 to 11 of GSTR-1 was ₹ 13.47 crore and the tax payable declared in Tables 3.1(a) and 3.1(b) of GSTR-3B was ₹ 6.65 crore. This resulted in mismatch of tax liability amounting to ₹ 6.82 crore between GSTR-1 and GSTR-3B which was communicated (March 2022) to the State Taxes Office/ Circle. In response, the Department issued (August 2022) DRC07 amounting to ₹ 19.28 crore (Tax liability of ₹ 6.79 crore, Interest ₹ 5.70 and Penalty ₹ 6.79) to the taxpayer. Further progress/ recovery in this regard was awaited (June 2023).

(viii) Dimension-Short payment of interest

Section 50 of the Act stipulates that every person liable to pay tax in accordance with the provisions of this Act or the Rules made there under but fails to pay the tax or any part thereof to the Government within the period prescribed, shall for the period for which the tax or any part thereof remains unpaid, pay interest at the rate notified.

The extent of short payment of interest on account of delayed remittance of tax during 2017-18 was identified using the tax paid details in GSTR-3B and the date of filing of the GSTR-3B. Only the net tax liability (cash component) has been considered to work out the interest payable**.**

Audit observed that a taxpayer under STO Circle-K Srinagar had interest liability of ₹ 3.68 crore on account of delayed net discharge of liability via cash of ₹ 16.04 crore. On being pointed out (March 2022), the Department issued (June 2022) DRC-07 for ₹ 3.68 crore to the taxpayer. Further progress was awaited (June 2023).

[17] Outward taxable supplies (other than zero rated, nil rated and exempted).
[18] Outward taxable supplies (zero rated).

(ix) Dimension-Irregular availing of ITC by recipient on ISD credit

To analyse whether the ITC availed by the taxpayer is in excess of that transferred by the Input Service Distributor (ISD), ITC availed as declared in the returns of the taxpayer is compared with the ITC transferred by the ISD in their GSTR-6. The methodology adopted was to compare Table 6G[19] of GSTR-9 or Table 4(A)(4)[20] of GSTR-3B of the recipient taxpayers under the jurisdiction of this erstwhile State/ UT with the sum of Table 5A[21], Table 8A[22], and Table 9A[23] of GSTR-6 of the respective ISD**.**

In case of taxpayer under Circle-E Jammu, Audit observed that the ITC availed in Table-6G of GSTR-9 was ₹ 1.39 crore and the ITC transferred by the ISD in Table (5A+8A+9A) of GSTR-6 was ₹ 1.17 crore. This resulted in excess availment of ITC transferred by the ISD amounting to ₹ 0.22 crore, which was communicated (May 2022) to the State Taxes Office. In response, the Department issued (December 2023) demand notice DRC07 for ₹ 0.48 crore to the taxpayer.

(x) Dimension-Mismatch of total turnover in Table 5R of GSTR-9C

Table 5 of GSTR-9C is the reconciliation of turnover declared in audited Annual Financial Statement with turnover declared in annual return (GSTR-9). Column 5R of this Table captures the unreconciled turnover between the annual return GSTR-9, and that declared in the Financial Statement for the year after the requisite adjustments.

The certified reconciliation statement submitted by the taxpayer as required under Rule 80(3) of J&K GST Rules in form GSTR-9C for the year 2017-18 was analysed at data level to review the extent of identified mismatch in turnover reported in the Annual Return *vis-a-vis* the Financial Statements. The unreconciled amount in cases where the turnover declared in GSTR-9 is less than the Financial Statement indicates non-reporting, under-reporting, short-reporting, omission, error in reporting of supplies leading to evasion or short payment of tax. It could also be a case of non-reporting of both taxable and exempted supplies**.**

In one case under STO Circle-D Jammu, unreconciled turnover in Table 5R of GSTR-9C, amounting to ₹ 1.62 crore was noticed and communicated (March 2022) to the STO. In response, the Department reported (January 2023) recovery of ₹ 0.03 crore.

---

19 ITC received from ISD.
20 Inward supplies from ISD.
21 Distribution of the amounts of eligible ITC for the tax period.
22 Mismatch of ITC reclaimed and distributed.
23 Redistribution of ITC distributed to a wrong recipient.

(xi) Dimension-Mismatch of taxable turnover in Table 7G of GSTR-9C

Table 7 of GSTR-9C is the reconciliation of taxable turnover. Column 7G of this Table captures the unreconciled taxable turnover between the annual return GSTR-9 and that declared in the financial statement for the year after the requisite adjustments.

The certified reconciliation statement submitted by the taxpayer as required under the Rule 80(3) of J&K GST Rules in Form GSTR-9C for the year 2017-18 was analysed at data level to review the extent of identified mismatch in taxable turnover reported in the Annual Return *vis-à-vis* the Financial Statements. The unreconciled amount in cases where the turnover in GSTR-9 is less than the Financial Statement indicates non-reporting, under-reporting, short-reporting, omission, error in reporting of taxable supplies. It could also be on account of non-reporting of both taxable and exempted supplies**.**

Audit query on unreconciled taxable turnover in Table 7G of GSTR-9C, amounting to ₹ 7.05 crore was noticed in respect of taxpayer under STO Circle-Budgam Kashmir and communicated (March 2022) to the STO. In response, the Department issued (December 2023) demand notice DRC-07 for ₹ 1.08 crore to the taxpayer. Further progress/ recovery in this regard was awaited (October 2024).

(II) Analysis of causative factors

Considering the Department's response to 368 cases out of the sample of 381 data deviations/ inconsistencies, the factors that caused the data deviations/ inconsistencies are as follows:

(a) Deviations from GST law and Rules

Out of the 12 audit dimensions summarised in ***Appendix 2.1.2 and 2.1.3,*** the Department accepted the audit observations or initiated examination in 88[24] cases with tax effect of ₹ 72.80 crore which represent a mismatch of turnover of ₹ 9.60 crore in 8 cases, mismatch of tax liability/ input tax credit of ₹ 63.20 crore in 80 cases. Out of these cases, the Department recovered ₹ 2.09 crore in 32 cases ***(Appendix 2.1.6-II)***, issued SCN/ DRC07 and ASMT10 in 50 cases for ₹ 62.97 crore ***(Appendix 2.1.6-III)*** which relates to mismatch of tax liability/ input tax credit amounting to ₹ 59.95 crore in 46 cases and mismatch of Turnover in four cases amounting to ₹ 3.02 crore. In six cases for ₹ 7.74 crore, Department stated that they are under correspondence with tax payer which relates to mismatch of tax liability/ input tax credit amounting to ₹ 1.18 crore in four cases and mismatch of turnover in two cases amounting to ₹ 6.56 crore (***Appendix 2.1.6-IV***).

[24] Recovered: 32 (₹ 2.09 crore), SCN/ASMT10: 50 (₹ 62.97 crore), and case under examination: 6 (₹ 7.74 crore)

(III) Data entry errors by taxpayers:

The data entry errors in 101 cases constituted 27.44 *per cent* of the total 368 responses received and 269[25] (73.09 *per cent)* responses out of total 368 responses received from the Department were accepted by the Audit. These data entry errors did not have any revenue implication. These data entry errors relate to mismatches in availing of ITC (74 cases), tax liability (nine cases) and turnover (18 cases) as detailed in ***Appendix 2.1.6-V***. An illustrative case is brought out below:

A deviation amounting to ₹ 0.54 crore was identified as unpaid RCM ITC of a taxpayer under Circle-Kupwara and the same was communicated (March 2022) to the STO of the Circle. On receipt of Department's reply (July 2022), it was seen that the deviation was caused due to a typographical error. The dealer had inadvertently mentioned regular ITC of ₹ 0.54 crore in Table 6D instead of Table 6B of GSTR-9 whereas the same has been correctly reflected in Table 4(A)5 of GSTR-3B. The system allowed for such data entry errors, which could have been avoided with proper validation controls.

(IV) Action taken before issue of Audit Queries:

As summarised in ***Appendix 2.1.4 and 2.1.5,*** the Department had already taken action in 57 cases constituting 15.49 *per cent* of the 368 responses received. Details are mentioned in ***Appendix 2.1.6-VI.***

(V) Valid explanations:

The Department had provided satisfactory explanations with relevant documents in 111 cases **{**Column 16 of **(*Appendix 2.1.4 and 2.1.5*)}** constituting 30.16 *per cent* of the 368 responses received. Details are mentioned in ***Appendix 2.1.6-VII.***

(VI) Cases where department's reply is furnished without documentary evidence

Department's reply in 11 cases amounting to ₹ 13.18 crore representing mismatch of tax liability/ input tax credit and mismatch in turnover in which Department did not accept audit observation without providing documentary evidence in support of its reply. Details of these cases are given in ***Appendix 2.1.6-VIII*.**

Recommendation:

- ***Department may consider introducing validation controls in GST Returns as highlighted above to curb data entry errors, enhance taxpayer compliance and facilitate better scrutiny***.

[25] DEE-101, ATBQ-57, Valid reply-111; 269/368*100=73.09 *per cent*

2.1.9. Detailed Audit of GST Returns

In a self-assessment regime, the onus of compliance with law is on the taxpayer. The role of the Department is to establish and maintain an efficient tax administration mechanism to provide oversight. With finite level of resources, for an effective tax administration, to ensure compliance with law and collection of revenue, an efficient governance mechanism is essential. An IT driven compliance model enables maintaining a non-discretionary regime of governance on scale and facilitates a targeted approach to enforce compliance.

From an external audit perspective, Audit also focused on a data driven risk based approach. Thus, apart from identifying inconsistencies/ deviations in GST returns through pan J&K data analysis, a detailed audit of GST returns was also conducted as a part of this review. A risk based sample of 60 taxpayers was selected for this part of the review. The methodology adopted was to initially conduct a desk review of GST returns and Financial Statements filed by the taxpayers as part of the GSTR-9C and other records available in the back end system to identify potential risk areas, inconsistencies/ deviations and red flags. Desk review was carried out in the CAG field audit office. Based on desk review results, detailed audit was conducted and the audit findings are categorised under a) Returns b) Utilisation of ITC and c) Discharge of tax liability.

2.1.9.1 Scope Limitation (Non-Production of Records)

There was scope limitation of Audit due to non-production of granular record by the Department. During the desk review of taxpayers' returns available in the backend system, Audit identified the risks related to excess ITC and tax liability mismatches for detailed examination. On the ITC dimension, the mismatches were identified by comparing GSTR-3B with GSTR-2A and GSTR-9, and the declarations made in Table 12 and 14 of GSTR-9C. On the tax liability dimension, the mismatches were identified by comparing GSTR-3B with GSTR-1 and GSTR-9 and the declarations in Table 5, Table 7 and Table 9 of GSTR-9C. However, in none of the selected cases, the Department provided the corresponding granular records such as the supplementary financial ledgers, invoices, agreement copies etc. required for examining the causative factors for mismatches of ITC and tax liability. Audit requisitioned these granular records of the taxpayers through the respective circles.

In none of the cases, requisitioned records were produced to Audit by the Department, due to which the identified risks in 51 cases relating to excess/ irregular ITC availing and undischarged tax liability of ₹ 66.33 crore could not be examined in detail by the Audit.

On being pointed out (September 2022), the Department during Exit Conference stated (June 2023) that the internal Audit under Section 65 of J&K GST Act had not been conducted till date and the required financial statements were not available with them.

It was also stated that the same could not be called for at that stage as there is no provision under the said Act.

2.1.9.2 Returns

Section 50 (1) of J&K GST Act, 2017, provides that every person who is liable to pay tax in accordance with the provisions of this Act or the Rules made thereunder, but fails to pay the tax or any part thereof to the Government within the period prescribed, shall for the period for which the tax or any part thereof remains unpaid, pay, on his own, interest at such rate, not exceeding 18 *per cent*, as may be notified by the Government on the recommendations of the Council.

(2) The interest under sub-section (1) shall be calculated, in such manner as may be prescribed, from the day succeeding the day on which such tax was due to be paid.

The extent of short payment of interest on account of delayed remittance of tax during 2017-18 was identified using the tax paid details in GSTR-3B and the date of filing of the GSTR-3B. Only the net tax liability (cash component) was considered to work out the interest payable. In this regard, the discrepancies noticed were as below: -

(I) Non-payment of interest by taxpayers

Audit observed in 14 cases out of the 60 cases examined, that taxpayers had either filed their GSTR-3B returns with delay or had paid the net tax liability (cash component) belatedly but the interest amounting to ₹ 0.45 crore was not discharged. Out of the 14 cases, in 11 cases amount of ₹ 0.17 crore was recovered via DRC 03, in one case demand notice DRC07 was issued. In remaining two cases, reply of the Department had not been received. **(*Details in Appendix 2.1.8*)**.

Illustrative Case:

Under STO Circle-H Jammu, a tax payer had filed the GSTR-3B returns for the period August 2017 to February 2018 with delay but interest liability of ₹ 0.09 crore on delayed payment of tax of ₹ 1.69 crore (net liability discharged through cash) was not discharged. On being pointed out (December 2022), the Department stated (December 2023) that DRC-07 has been issued to the taxpayer.

(II) Late fee on belated/ non-filing of returns

Section 47 (2) of J&K GST Act states that any registered person who fails to furnish the return required under Section 44 by the due date shall be liable to pay a late fee of one hundred rupees for every day during which such failure continues subject to a maximum of an amount calculated at a quarter *per cent* of his turnover in the State.

Audit observed in 14 cases out of the 60 cases examined, that taxpayers had filed their GSTR-9/ 9C returns belatedly but late fee amounting to ₹ 0.13 crore was not

discharged. Out of the 14 cases, in six cases amount of ₹ 0.03 crore was recovered via DRC-03, in seven cases DRC-07 were issued and in one case, ASMT-10 was issued (October 2024). (***Details mentioned in Appendix 2.1.9***).

Illustrative case

Under STO Circle-R Kashmir, a tax payer had filed the GSTR-9 returns for the financial year 2017-18 after a delay of 415 days. Late fees on delayed filed returns worked out of ₹ 83,000/-. On being pointed out (November 2022), the Department stated (March 2023) that amount of ₹ 83,000/- was deposited by the taxpayer.

(III) Data entry errors or technical glitches

Audit observed the data entry mistakes were made by the taxpayers while filing GST returns. The data entry errors in the returns were noticed in seven cases involving amount of ₹ 2.10 crore (***detailed in Appendix 2.1.10***), constituting 11.67 *per cent* of the examined cases**.** The errors were mainly in the areas such as ITC for Table 4(A)5 which was inadvertently shown against Table 4(A) 3 RCM ITC in GSTR-3B, excess availing of ITC through Table 6J of GSTR-9 was due to wrongly showing the amount under table 8C of GSTR-9 instead of Table 6B, Tax paid under RCM was wrongly shown under Table 4(A)4 ISD of GSRT-3B instead of Table 4(A) 3 etc.

Illustrative case:

Under STO Circle Kathua-I, one dealer exhibited excess ITC in GSTR-9 through Table 6J. On being pointed out (November 2022), the Department stated (March 2023) that amount of ₹ 0.98 crore was inadvertently credited in Table 8C instead of Table 6B of the return GSTR-9, due to which excess ITC was reflected. The reply was found acceptable.

2.1.9.3 Utilisation of Input Tax Credit

Section 16(2) of the J&K GST Act prescribes the conditions for availing ITC, which are (i) Taxpayer should be in possession of tax invoice or any other specified tax-paying document, (ii) Taxpayer has received the goods or services, (iii) Tax has actually been paid by the supplier, (iv) Taxpayer has furnished the return to avail the ITC, (v) The value of the goods or services along with the tax should have been paid to the supplier within 180 days from the date of issue of invoice.

Rule 36 of J&K GST Rules prescribe the documentary requirements for claiming ITC. A tax payer can avail ITC based on the following documents namely (i) Invoice issued by a supplier of goods or services or both, (ii) Invoice issued by recipient along with proof of payment of tax, (iii) A debit note issued by supplier, (iv) Bill of entry or similar document prescribed under Customs Act, (v) Revised invoice and (vi) Document issued by Input Service Distributor.

(I) Mismatches in Input Tax Credit

Audit analysed the dataset of GSTR-2A in respect of selected taxpayers along with datasets of GSTR-3B, GSTR-9 and GSTR-9C filed by the taxpayers and noticed mismatches of Input Tax Credit and Reverse Charge Mechanism (RCM) among returns. Audit could not examine mismatches in detail since relevant granular records were not produced by the Department. The details of mismatches in input tax credit noticed by Audit are given in **Table 2.1.12**.

Table -2.1.12: Mismatch in Input Tax Credit claimed by taxpayers

SI. No	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Remarks
1	**ITC mismatch between GSTR-2A and GSTR-3B/ GSTR-9**: The ITC available as per GSTR-2A was compared with the ITC availed under GSTR-3B/ GSTR-9 return. ***(Appendix 2.1.11)***	30	18	64.19	On being pointed out (between November 2022 and January 2023), the Department replied (September 2024) that in seven cases recovery of ₹ 1.94 crore was made, in 22 cases DRC07 had been issued and in one case ASMT-10 was issued to the taxpayer.
2.	**Non/ short reversal of ITC availed for exempt and non-GST supplies**: As per Section 17(2) of Jammu and Kashmir GST Act 2017, read with Rules 42 of J&K GST Rules 2017, the amount of credit shall be restricted to so much of the input tax as is attributable to the said taxable supplies including zero-rated supplies. ***(Appendix 2.1.12)***	7	5	0.97	On being pointed out (between November 2022 and December 2022), the Department replied (September 2024) that in three cases recovery of ₹ 1.89 lakh was made and in four cases demand notice DRC07 was issued.
3	**ITC mismatch between GSTR-2A and GSTR-9**: The ITC available as per GSTR-2A was compared with the ITC availed under Table 8A of GSTR-9 return. ***(Appendix 2.1.13)***	2	2	0.90	On being pointed out (between November 2022 and December 2022), the Department replied (September 2024) that in one case recovery of ₹ 0.27 lakh was made and in one case demand notice DRC07 was issued.

SI. No	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Remarks
4	**Unreconciled ITC in GSTR-9 after adjustments-** Table 8D of GSTR-9 captures the difference between ITC available as per GSTR-2A under Table 8A of GSTR-9 and that of availed as per GSTR-3B with subsequent period's adjustments under Table 8C of GSTR-9. The negative figure in Table 8D of GSTR-9 indicates that ITC is availed in excess over eligible. ***(Appendix 2.1.14)***	3	2	0.29	On being pointed out (between November 2022 and December 2022), the Department replied (September 2024) that in two cases recovery of ₹ 0.06 crore was made, in one case demand notice DRC07 was issued.

2.1.9.4. Tax Liability

(I) Un-discharged Tax Liability

The taxable event in the case of GST is supply of goods and/ or services. Section 9 of the Jammu and Kashmir GST Act 2017 is the charging section authorising levy and collection of tax called State/ Centre Goods and Services Tax on all intra-state supplies of goods or services or both, except on supply of alcoholic liquor for human consumption, on value determined under Section 15 of the Act ibid and at such rates not exceeding 20 *per cent* under each Act, i.e., CGST Act and J&K GST Act. Section 5 of the IGST vests levy and collection of Integrated GST on interstate supply of goods and services with Central Government with maximum rate of 40 *per cent*.

Audit findings and mismatches noticed related to discharge of tax liabilities are discussed below.

(II) Mismatches relating to discharge of tax liability

Audit scrutinised GSTR-1, GSTR-3B and GSTR-9 returns filed by the taxpayers for the year 2017-18 and noticed mismatch in discharge of tax liability by comparing the tax liability furnished in the returns. Audit could not examine these mismatches in detail since relevant granular records were not produced by the Department. The details of mismatches are given in **Table 2.1.13**.

Table -2.1.13: Mismatch related to discharge of tax liability

Sl. No	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Remarks
1.	**Un-discharged tax liability on comparing greater of the tax liability of GSTR-1, GSTR-9 with reference to Tax payment in GSTR-9/ 3B** GSTR-1 and GSTR-9 for the year 2017-18 and the tax payable in these returns was compared with the tax paid and declared in GSTR-9/ 3B. ***(Appendix-2.1.15)***	9	7	0.61	The Audit had pointed this out in November 2022 to January 2023, Department replied (September 2024) that in six cases recovery amounting to ₹ 0.14 crore was made, in three cases demand notice DRC07 was issued.(October 2024).

2.1.10. Conclusion

The Subject Specific Compliance Audit (SSCA) on Department's Oversight on GST Payments and Return Filing was undertaken in the context of varying trend of return filing and continued data inconsistencies with an objective of assessing the adequacy of the system in monitoring return filing and tax payments, extent of compliance and other departmental oversight functions.

This SSCA was predominantly based on data analysis, which highlighted risk areas, red flags and in some cases, rule-based deviations and logical inconsistencies in GST returns filed for 2017-18. The SSCA entailed assessing the oversight functions of Jammu and Kashmir State Tax Department jurisdictional formations (Circles) at two levels i.e. at the data level through pan State/ UT data queries and at the functional level with a deeper detailed audit of Circles, GST returns and internal audit which involved accessing taxpayer records. The audit sample therefore comprised four Circles, 381 high value inconsistencies across 12 parameters selected through Pan-State queries and 60 taxpayers selected on risk assessment for detailed audit of GST returns for the year 2017-18

There was delay in issue of Standard Operating Procedure (SOP) for Scrutiny of Returns for the years 2017-18 and 2018-19 which resulted in minimal scrutiny of returns conducted. Due process not being followed on cancellation of registrations. It was also noticed that internal audit of the taxpayers was not conducted due to delay in constitution of the Internal Audit Wing.

Due to minimal/ non-scrutiny of monthly and annual returns like GSTR-3B and GSTR-9 cases, deviations were noticed in risk parameters such as mismatch in availing of ITC, mismatch in tax paid between books of accounts and annual return, cases where GSTR-3B not filed but GSTR-1 or GSTR-2A available, short payment of interest on delayed payments, undischarged liability *etc*.

Further, non-payment of interest for late payment of tax, non-levy of late fee for delay in filing of returns, mismatches in availing of ITC and cases of un-discharged tax liability were also noticed in the cases selected under detailed audit.

Administrative passivity resulted in late issuance of SOP for scrutiny of returns and constitution of internal audit wing.

2.1.11. *Recommendations*

- ***The Department may ensure higher number of scrutiny of cases based on risk analysis and red flagging of cases.***
- ***Year-wise targets under Section 65 of J&K GST Act, 2017, may be fixed to ensure the timely compliance of internal audit along with recovery of pointed out amounts of dues before the time barring of cases.***
- ***Department may urgently pursue inconsistencies and deviations for which responses have not been provided.***
- ***Department may consider introducing validation controls in GST Returns to curb data entry errors, enhance taxpayer compliance and facilitate better scrutiny.***

CHAPTER-III

FUNCTIONING OF PUBLIC SECTOR UNDERTAKINGS

CHAPTER-III

FUNCTIONING OF PUBLIC SECTOR UNDERTAKINGS

This chapter discusses the functioning of Public Sector Undertakings (PSUs) in Jammu and Kashmir. PSUs comprise of Government of Jammu and Kashmir (GoJ&K) owned Companies set up under the Companies Act, 2013, Statutory Corporations set up under the statutes enacted by the Parliament and Government Controlled Other Companies (GCOCs).

3.1 Definition of Government Company

A Government Company is defined in Section 2(45) of the Companies Act, 2013 as a Company in which not less than 51 *per cent* of the paid-up share capital is held by Central Government, or by any State Government or Governments, or partly by the State Government and partly by one or more State Governments and includes a Company which is a subsidiary of a Government Company.

Besides, any other Company[1] owned or controlled directly or indirectly, by the Central Government, or by any State Government or Governments, or partly by the Central Government and partly by one or more State Governments are referred to in this Report as Government Controlled Other Companies.

3.2 Mandate of Audit

Audit of Government Companies and Government controlled other Companies is conducted by the CAG under the provisions of Section 143(5) to 143(7) of the Companies Act, 2013 read with Section 19 of the CAG's (Duties, Powers and Conditions of Service) Act, 1971 and the Regulations made there under. Under the Companies Act, 2013, the CAG appoints Chartered Accountants as Statutory Auditors for Companies and gives directions on the manner in which the accounts are to be audited. In addition, CAG has right to conduct a supplementary audit. The statutes governing Statutory Corporations require their accounts to be audited by CAG.

3.3 PSUs in Jammu and Kashmir

PSUs are established to carry out activities of commercial nature keeping in view the welfare of people and occupy an important place in the economy of J&K. As on 31 March 2022, there were 42 PSUs in Jammu & Kashmir under the audit jurisdiction

[1] Companies (Removal of Difficulties) Seventh Order, 2014 issued by Ministry of Corporate Affairs vide Gazette Notification dated 4 September 2014.

of the CAG. These include 39 Government Companies (including six[2] inactive Government Companies), two Statutory Corporations and one Government Controlled Other Company[3]. The names of these PSUs are given in ***Appendix 3.3.1.***

One PSU (Jammu & Kashmir Bank Limited) is listed on the stock exchange. There are six inactive PSUs (including four under liquidation) having investment of ₹ 57.57 crore towards capital (GoJ&K: ₹ 56.59 crore and Others: ₹ 0.98 crore) and long term loans ₹ 0.83 crore (GoJ&K: ₹ 0.83 crore and Others: Nil).

3.4 Investment in PSUs and Budgetary Support

(A) Equity holding and Loans given

Details of Investment made in 42 PSUs in form of equity and long term loans upto 31 March 2022 are given in ***Appendix 3.3.2.*** Sector wise summary of this investment is given in **Table 3.1**.

Table 3.1: Government of J&K investment in PSUs

(₹ in crore)

Name of Sector	Number of PSUs	Investment				Total Investment	Total Investment of GoJ&K
		Equity		Long term loans			
		Total	GoJ&K	Total	GoJ&K		
Power Sector PSUs	6	6,029.99	2,593.54	11,984.80	0.00	18,014.79	2,593.54
Non power Sector PSUs	36	1,127.51	975.87	6,176.05	1,539.42	7,303.56	2,515.29
Total	**42**	**7,157.50**	**3,569.41**	**18,160.85**	**1,539.42**	**25,318.35**	**5,108.83**

(Source: Compiled based on information received from PSUs)

The thrust of investment was mainly on power sector. This sector had attracted 71.15 *per cent* (₹ 18,014.79 crore) of total investment of ₹ 25,318.35 crore. The GoJ&K had invested 50.77 *per cent* (₹ 2,593.54 crore) of its total investment of ₹ 5,108.83 crore in power sector PSUs.

(B) Subsidy and Grant to PSUs

The GoJ&K provides financial support to the PSUs in various forms through the annual budget as equity, loans, grants/ subsidies, loans written off and loans converted into equity.

Summarised details of budgetary outgo towards equity, loans, grants/ subsidies, loans written off and loans converted into equity in respect of PSUs for the last three years ending March 2022 are given in **Table 3.2**.

(Source: Compiled based on information received from PSUs)

**** Number of PSUs represents those PSUs which have received outgo from budget under one or more heads i.e. equity, loans and grants/ subsidies.***

 # This includes ₹500 crore in respect of J&K Bank. 16,76,72,702 equity share of ₹one (face value) each issued to GoJK on preferential basis at the issue price of ₹29.82 per share (including share premium of ₹28.82 per share).

The increase in assistance during 2021-22 was mainly due to grant/ subsidy given to five power sector PSUs viz. Jammu and Kashmir Power Development Corporation, Jammu and Kashmir Power Corporation Limited, Jammu and Kashmir Power Transmission Corporation Limited, Jammu Power Distribution Corporation Limited and Kashmir Power Distribution Corporation Limited.

The increase in guarantee commitments in the year 2021-22 were in case of Jammu and Kashmir Power Development Corporation Limited (₹ 1,209.83 crore), Jammu and Kashmir Power Corporation Limited (₹ 10,321.83 crore), Jammu and Kashmir Infrastructure Development Finance Corporation (₹ 750.00 crore), Jammu and Kashmir SC, ST and Backward Classes Development Corporation Limited (₹ 101.38 crore), Jammu and Kashmir Women's Development Corporation Limited (₹ 91.61 crore), Jammu and Kashmir and Ladakh Financial Corporation Limited (₹ 44.94 crore) and Jammu and Kashmir Cement Limited (₹ 3.13 crore).

3.5 Oversight Role of CAG

Audit of Public Sector Undertakings (PSUs)

Comptroller and Auditor General of India (CAG) appoints the Statutory Auditors of a

State Government Company and State Government Controlled Other Company[4] under Section 139 (5) and (7) of the Companies Act, 2013. The Statutory Auditors in case of a State Government Company are to be appointed by the CAG within a period of 180 days from the commencement of the financial year. CAG has a right to conduct a supplementary audit and issue comments upon or supplement the Audit Report of the statutory auditor. Statutes governing some Corporations require that their accounts be audited by the CAG and a report be submitted to the State Legislature.

3.6 Submission of accounts by PSUs

(A) Need for timely submission

According to Section 395 of the Companies Act 2013, Annual Report on the working and affairs of a Government Company, is to be prepared within three months of its Annual General Meeting (AGM) and as soon as may be after such preparation laid before both the Houses of State Legislature together with a copy of the Audit Report and any comments upon or supplement to the Audit Report, made by the CAG. Almost similar provisions exist in the respective Acts regulating statutory corporations. This mechanism provides the necessary legislative control over the utilisation of public funds invested in the companies from the Consolidated Fund of State.

Section 96 of the Companies Act, 2013 requires every company to hold AGM of the shareholders once in every calendar year. It is also stated that not more than 15 months shall elapse between the date of one AGM and that of the next. Further, Section 129 of the Companies Act, 2013 stipulates that the audited Financial Statement for the financial year has to be placed in the said AGM for their consideration.

Section 129 (7) of the Companies Act, 2013 also provides for levy of penalty like fine and imprisonment on the persons including directors of the company responsible for non-compliance with the provisions of Section 129 of the Companies Act, 2013.

Despite above, annual accounts of various PSUs were pending as on 30 September 2022, as detailed in the following paragraph.

[4] A Government Company is defined in Section 2(45) of the Companies Act, 2013 as a company in which not less than 51 *per cent* of the paid up share capital is held by Central Government, or by any State Government or Governments, or partly by the Central Government and partly by one or more State Governments and includes a company which is a subsidiary of a Government Company. Any other company owned or controlled, directly, or indirectly, by the Central Government or by any State Government or Governments, or partly by the Central Government and partly by one or more State Governments are referred to in this Report as Government controlled other Companies.

(B) Timeliness in preparation of accounts by Government Companies

As of 31 March 2022, there were 40 Government Companies under the purview of CAG's audit. Of these, accounts for the year 2021-22 were due[5] from 34 Government Companies[6]. However, only three Government Companies submitted their accounts for the financial year 2021-22 for audit by CAG on or before 30 September 2022. Accounts of 31 Government Companies were in arrears for various reasons. Details of arrears in submission of accounts of these are given in **Table 3.3**:

Table 3.3: Details of arrears in submission of accounts

Particulars		Total
Total number of Companies under the purview of CAG's audit as on 31.03.2022		40
Less: New Companies from which accounts for 2021-22 were not due		0
Less: Companies under liquidation/ inactive[7]		6
Number of companies from which accounts for 2021-22 were due		34
Number of companies which presented 2021-22 accounts for CAG's audit by 30 September 2022		3
Number of companies with accounts in arrears		31
Breakup of Arrears	(i) Defunct	0
	(ii) First Accounts not submitted	4
	(iii) Others	27
Age-wise analysis of arrears against 'Others' category	Up to one year (2021-22)	3
	Up to two years (2020-21 and 2021-22)	7
	Three years and more	24

Details of these companies along with the position of GoJ&K investment in these PSUs during the period of arrear accounts are indicated in ***Appendix 3.3.3.***

*(*C) Timeliness in preparation of accounts by Statutory Corporations

As of 31 March 2022, there were two Statutory Corporations under the purview of CAG's audit. Audit of Statutory Corporations is governed by their respective legislations. Out of the two Statutory Corporations, the CAG is the sole auditor for Jammu and Kashmir Road Transport Corporation. In respect of Jammu and Kashmir and Ladakh Financial Corporation, the audit is conducted by Chartered Accountants and supplementary audit is conducted by the CAG.

The accounts of Jammu and Kashmir Road Transport Corporation and Jammu and Kashmir Financial Corporation for the years 2019-20 to 2021-22 were awaited as on 30 September 2022.

Details of these Corporations along with the position of GoJ&K investment in these Corporations during the period of arrear accounts are indicated in ***Appendix 3.3.3.***

[5] The due date for submission of accounts has been considered as 30 September 2022

[6] Excluding inactive Companies

[7] Jammu and Kashmir Asset Reconstruction Limited, Tawi Scooters Limited, Himalayan Wool Combers Limited and Jammu and Kashmir State Handloom Handicrafts Raw Materials Supply Organisation Limited (under liquidation); Jammu and Kashmir State Road Development Corporation Limited and Jammu and Kashmir International Trade Centre (inactive)

3.7 CAG's oversight - Audit of accounts and supplementary audit

(A) Financial reporting framework

Companies are required to prepare the Financial Statements in the format laid down in Schedule III to the Companies Act, 2013 and in adherence to the mandatory Accounting Standards prescribed by the Central Government, in consultation with National Advisory Committee on Accounting Standards. The Statutory Corporations are required to prepare their accounts in the format prescribed under the rules, framed in consultation with the CAG and any other specific provision relating to accounts in the Act governing such Corporations.

(B) Audit of accounts of Government Companies by Statutory Auditors

The Statutory Auditors appointed by the CAG under Section 139 of the Companies Act 2013, conduct audit of accounts of the Government Companies and submit their reports thereon in accordance with Section 143 of the Companies Act, 2013.

The CAG plays an oversight role by monitoring the performance of the statutory auditors in audit of Public Sector Undertakings with the overall objective that the Statutory Auditors discharge the functions assigned to them properly and effectively. This function is discharged by exercising the power:

- to issue directions to the Statutory Auditors under Section 143 (5) of the Companies Act, 2013 and
- to supplement or comment upon the Statutory Auditor's report under Section 143 (6) of the Companies Act, 2013.

Supplementary Audit of accounts of Government Companies

The prime responsibility for preparation of Financial Statements in accordance with the financial reporting framework prescribed under the Companies Act, 2013 or other relevant Act is of the management of an entity.

The certified accounts of selected Government Companies along with the report of the Statutory Auditors are reviewed by CAG by carrying out a supplementary audit. Based on such review, significant audit observations, if any, are reported under Section 143 (6) of the Companies Act, 2013 to be placed before the Annual General Meeting.

3.8 Result of CAG's oversight role

Position of supplementary audit of the Financial Statements of the PSUs conducted by the Comptroller and Auditor General (CAG) of India for the year 2021-22 (or of earlier years which were finalised during current year) is discussed in the next paragraph.

(A) Audit of accounts of Government Companies under Section 143 of the Companies Act, 2013

Financial statements for the year 2021-22 were received from two[8] Government Companies and one Government Controlled Other Company[9] by 30 September 2022. Of these, Financial Statements of two[10] Government Companies were reviewed in audit by the CAG.

31 accounts of previous years in respect of 11 PSUs were also received during the period 1 December 2021 to 30 September 2022, of which comments were issued in case of 21 accounts and 10 accounts were pending as of 30 September 2022. Further, 36 accounts of six PSUs relating to previous years which were received before 1st December 2021 were also reviewed during current year and comments were issued for all these 36 accounts of six PSUs.

3.9 Recommendations

- ***The Government may impress upon those PSUs with arrear in accounts to ensure early finalisation of their Financial Statements as in the absence of their finalisation, Government investments in such PSUs remain outside the legislative oversight; and***

- ***The Government needs to take an early decision regarding commencement of liquidation process in respect of the inactive PSUs as they are neither contributing to economy nor meeting the objectives for which they were set up.***

[10] Non-review certificate was given to JKB Financial Services Limited for the year 2021-22

CHAPTER-IV

COMPLIANCE AUDIT
(PUBLIC SECTOR UNDERTAKINGS)

CHAPTER-IV

COMPLIANCE AUDIT (PUBLIC SECTOR UNDERTAKINGS)

Finance Department

Jammu and Kashmir Bank Limited

4.1 Implementation of Interest Subvention Scheme under Business Revival Package 2020 in Jammu and Kashmir

4.1.1 Introduction

Considering the difficulties being faced by the various sectors of the economy in Jammu and Kashmir, a committee was constituted (August 2020) by the Industries and Commerce Department, Government of Jammu and Kashmir (GoJ&K) for preparing a proposal for relief and revival of the Business sector in the Union Territory. The Committee submitted (September 2020) its report after deliberations with various business associations in the UT.

Based on the recommendations of the Committee, the Finance Department, GoJ&K approved (October 2020) scheme of interest subvention of five *per cent* for all borrowers excluding borrowers under Kissan Credit Card (KCC), Artisans Credit Card (ACC), loan against deposits, loans under personal segments and Non-Banking Financial Corporation (NBFC) for a period of six months w.e.f. 01 April 2020. The benefit under the scheme was to be provided to those borrowers whose accounts were standard[1] as on 31 July 2019 or 31 March 2020, whichever is applicable. The scheme also provided for pending interest subvention under the rehabilitation schemes of 2014 and 2016.

The scheme was floated by Industries and Commerce Department, GoJ&K whereas the Finance Department, GoJ&K was the implementing agency and the Union Territory Level Banker's Committee (UTLBC)[2] acted as a monitoring agency for the scheme.

4.1.2 Audit Scope, Methodology and Criteria

The records relating to the implementation of Interest Subvention Scheme of 2020 were test checked in Industries and Commerce Department, Finance Department, UTLBC and four selected banks/ financial institutions[3]. The records of selected banks/ financial institutions for the period from July 2019 to February 2023 were examined between

---

1 Credit Accounts for which the repayments of principal and/ or interest are being made on time or within the allowed grace period

2 UTLBC is a committee comprising of representatives from financial institutions operating in the UT Government.

3 Jammu and Kashmir Bank Limited, Jammu and Kashmir Gramin Bank, Anantnag Central Co-operative Bank, Jammu and Kashmir and Ladakh Financial Corporation.

November 2022 and March 2023. Business loan accounts in the selected banks/ financial institutions were evaluated against the sanction of the scheme.

The audit findings are discussed in the succeeding paragraphs.

4.1.3 Release and Utilization of Funds

The Finance Department, GoJ&K approved (October 2020) the Business Revival Package with financial implication of ₹ 950 crore for the Interest Subvention Scheme of 2020 and an amount of ₹ 139.24 crore for rehabilitation schemes of 2014 and 2016. The Finance Department, GoJ&K however, released ₹ 750 crore in three[4] tranches during October 2020 to May 2021 to UTLBC which included an amount of ₹ 138.03 crore, earmarked for rehabilitation schemes of 2014 and 2016.

Out of ₹ 750 crore, an amount of ₹ 526.50 crore was utilised towards five *per cent* Interest Subvention Scheme of 2020 and an amount of ₹ 137.75 crore was utilised for the Interest Subvention Schemes of 2014 and 2016. It was also noticed that the unutilised amount of ₹ 85.75 crore remained locked up with UTLBC for 341 days[5] though as per the terms and conditions of the sanction, the funds were to be credited immediately to eligible beneficiaries and were not to be parked unnecessarily. The UTLBC refunded the balance amount in April 2022.

On being pointed out by audit (April 2023), Government attributed (December 2023) the reasons for parking of funds to the receipt of representations by UTLBC from the trade bodies, individuals and firms claiming their eligibility under the scheme.

The reply of the Government is not satisfactory as the funds were required to be credited immediately to the eligible beneficiaries and were not to be parked as per terms and conditions of the sanction order, whereas the unutilised funds remained parked for 341 days with the UTLBC.

4.1.4 Interest Subvention to ineligible accounts

4.1.4.1 Providing Interest Subvention to sub standard accounts

As per the conditions of the Scheme, the benefit was to be provided to those borrowers whose accounts were standard as on 31 July 2019 or 31 March 2020 whichever is applicable.

It was noticed that Jammu and Kashmir Bank Limited (JKBL) provided interest subvention to 2.43 lakh accounts under the Scheme which included 1,243 accounts that were restructured by the JKBL in February 2017 under the Rehabilitation Package rolled out by it. Audit analysis showed that these 1,243 accounts were wrongly considered as standard accounts as on 31 July 2019 by the JKBL and were provided

[4] ₹ 250 crore on 28 October 2020; ₹ 250 crore on 29 January 2021; and ₹ 250 crore on 6 May 2021
[5] From 14 May 2021 to 19 April 2022

interest subvention of ₹ 6.78 crore under the scheme of 2020. These accounts were classified as Non-Performing Assets (NPA) by the Bank in March 2020 with retrospective effect in accordance with the RBI norms.

By considering these 1,243 accounts as standard accounts on 31 July 2019, the Bank extended undue benefit of interest subvention of ₹ 6.78 crore under the scheme of 2020, against the conditions governing the Scheme as these accounts were NPA as on 31 July 2019 as well as on 31 March 2020.

On being pointed out by audit (April 2023), JKBL confirmed that these accounts were downgraded as NPA w.e.f. February 2017. The Government replied (December 2023) that these accounts have been provided interest subvention as per the guidelines of the scheme as they were 'standard' as on 31 July 2019.

The reply of the Government has not taken into account the fact that the effective NPA classification dates of these accounts were when they were restructured (between November 2016 and February 2017).

4.1.4.2 Interest Subvention to more than one account of beneficiaries

The terms and conditions of the sanction orders for release of three tranches aggregating to ₹ 750 crore stipulated that only one account of beneficiary shall be eligible for relief under interest subvention. However, the Finance Department, GoJ&K neither framed the guidelines for implementation of the scheme nor communicated the terms and conditions for release of interest subvention to the banks, as a result of which, benefit was provided to more than one account of the beneficiaries. Audit noticed that

- An amount of ₹ 202.47 crore was credited by the JKBL to 65,456 accounts. Scrutiny of these accounts revealed that 30,019 beneficiaries, who had more than one account were provided subvention of ₹ 57.80 crore. This resulted in providing interest subvention of ₹ 57.80 crore to 35,437 ineligible accounts by the JKBL.

- Similarly, the J&K Grameen Bank (JKGB) credited an amount of ₹ 5.08 crore to 7,151 accounts of 3,452 beneficiaries who had more than one account. As a result, interest subvention amounting to ₹ 1.41 crore was provided to 3,699 ineligible accounts of these beneficiaries by JKGB.

On being pointed out in audit, the JKGB admitted (March 2023) that as per the guidelines received from UTLBC, there was no mention of any condition with regard to providing of benefit to only one account of the beneficiary. However, it can be seen that this condition was mentioned in the sanction of GoJ&K of October 2020.

The Government while endorsing the replies of JKBL and JKGB, stated (December 2023) that the condition regarding disbursement of interest subvention to more than one account of the beneficiary was not mentioned in the sanction order.

The Government's reply may be seen in light of the fact that all three sanction orders of the Finance Department contain the condition that only one account of the beneficiary was eligible for relief under the scheme.

4.1.4.3 Interest Subvention to KCC, ACC and loans under personal segment

As per the sanction order (October 2020) for the scheme, interest subvention was not to be provided to borrowers under KCC, ACC, loan against deposits and loan under personal segments.

Audit observed that JKBL violated the conditions for the release of interest subvention despite the same being clearly mentioned in the original sanction order for the Scheme. Scrutiny of beneficiary accounts revealed that benefit of interest subvention of ₹ 1.91 lakh was granted to 10 KCC accounts which were not to be covered under the scheme**.** It was also observed that JKBL provided the benefit of interest subvention of ₹ 1.07 lakh to 22 accounts under personal segment.

On being pointed out by audit (April 2023), the Government replied (December 2023) that out of 10 KCC accounts, eight accounts were eligible under the scheme as these were wrongly opened in KCC GL Head and the recovery of ₹ 1.41 lakh against the remaining two accounts shall be made. Further, it was stated that 22 accounts were eligible under the scheme as they were wrongly opened under GL Head *'Personal Saholiat'* instead of GL Head *'Saral Finance'*.

The reply of the Government regarding extending of benefit of interest subvention to 22 accounts opened under Personal segment is not acceptable as at the time of extending the scheme benefit, these accounts were categorised under the personal segment, rendering them ineligible for the benefits as per the scheme guidelines.

4.1.5 Conclusion

The scheme was formulated without conducting any survey with regard to its financial requirements. The guidelines/ terms and conditions for the release of the benefit under the scheme were not communicated to the Banks. Interest subvention of ₹ 6.78 crore was provided to 1,243 ineligible accounts which were substandard on 31 July 2019 as well as on 31 March 2020. Ineligible benefit of interest subvention of ₹ 59.21 crore was extended to 39,136 accounts by providing interest subvention in more than one account.

Finance Department

Jammu and Kashmir Bank Limited

4.2 Doubtful recovery of ₹ 104.51 crore

Sanctioning of credit facilities in favour of M/s Zenica Cars India Pvt. Limited without obtaining adequate collateral securities coupled with non-fulfillment of pre-disbursement conditions and poor monitoring of account led to doubtful recovery of ₹ 104.51 crore.

M/s Zenica Cars India Pvt. Limited (Borrower Company) was dealing in sale of Audi cars purchased from the manufacturer and the cars were pre-financed by M/s Volkswagen Finance Private Limited (VFPL) upto a period of 90 days. Jammu and Kashmir Bank Limited (Bank) sanctioned (March 2017) Cash Credit (CC) facility of ₹ 40 crore in favour of the Borrower Company for refinancing the inventories funded by VFPL. As per the arrangement, the finance to be granted by the Bank was for the maximum period of 90 days after the expiry of 90 days finance extended by VFPL. The Borrower Company was also availing various credit facilities from other lenders under the Multi Banking Arrangement.

The CC facility was granted against the primary security by way of hypothecation of inventories and book debts created out of funding of inventories of VFPL. The collateral security was also obtained by way of personal guarantee of the Directors of the Borrower Company and a property at Gurugram valuing ₹ 10.97 crore.

The Borrower Company availed (April 2017) CC facility of ₹ 39.95 crore from the Bank which was due for repayment by 28 July 2017. However, the Borrower Company could not repay the due amount and the outstanding balance as on 20 September 2017 was ₹ 39.89 crore. The Borrower Company requested (20 and 28 September 2017) for sanctioning of *ad hoc* facility of ₹ 10 crore for purchase of stocks in order to meet the demand of upcoming festival season and Bank Guarantee (BG) of ₹ five crore to be provided to VFPL. The Bank sanctioned (4 October 2017) the *ad hoc* facility of ₹ 10 crore for a period of 45 days against existing securities and BG of ₹ five crore against security of two plots at Chandigarh valuing ₹ 2.14 crore. The Borrower Company could not repay the credit facilities[6] within the stipulated time and the Bank granted extension for adjustment of account thrice[7] upto 8 June 2018.

Owing to non-servicing of the credit facilities[8] by the Borrower Company, the account was declared (31 August 2018) as NPA with outstanding balance of ₹ 55.65 crore and notice under SARFAESI Act, 2002 was issued (28 September 2018) followed by lodging (1 March 2019) of FIR against the Borrower Company for committing fraud.

[6] Including *adhoc* facility of ₹ 10 crore
[7] Extended up to 5 January 2018 and further extended up to 3 April 2018 and then up to 8 June 2018
[8] Including BG of ₹ five crore encashed (20 June 2018) by VFPL

One of the lenders, HDFC Bank Limited had also lodged (29 August 2018) an FIR against the Borrower Company with the Economic Offence Wing, New Delhi.

The outstanding balance against the Borrower Company as of May 2023 was ₹ 118.48 crore[9] whereas the value of securities available with the Bank was ₹ 13.97 crore[10]. An application for resolution under Insolvency and Bankruptcy Code, 2016 was filed (March 2021) by M/s VFPL in National Company Law Tribunal (NCLT) and the Resolution Professional had taken over the mortgaged properties of the Borrower Company.

Audit observed (November 2021) that:

- The Bank extended (October 2017) *ad hoc* facility of ₹ 10 crore to the Borrower Company against extension of charge on existing securities and BG of ₹ five crore against security of two plots valuing ₹ 2.14 crore despite the fact that the Borrower Company had defaulted, was irregular in servicing of existing credit facilities and was showing early warning signs of stress.

- The Bank granted three extensions to the Borrower Company for adjustment of its account and the due date for repayment was rescheduled from 28 July 2017 to 8 June 2018. As a result, the account escaped the NPA classification during the period between October 2017 and August 2018.

- The Bank assigned (March 2017) internal rating of 7 (moderate degree of default) to the Borrower Company. Further, ICRA Limited[11], an external rating agency had also assigned (October 2016) BBB rating for ₹ 150 crore bank facilities of the Borrower Company, which according to the Bank's Credit Policy carried a moderate degree of safety with moderate degree of credit risk. The Bank, however, did not obtain adequate tangible collateral security considering the credit risk perception as evident from the fact that against the outstanding NPA balance of ₹ 55.64 crore as of May 2023, the collateral securities were valued at ₹ 13.97 crore.

- As per the pre-disbursement conditions, the Borrower Company was to furnish a No Objection Certificate (NOC) from other lenders within three weeks of sanction certifying that inventories financed by the Bank would have exclusive charge over them. However, the Bank released the funds to the Borrower Company without obtaining NOC from other lenders as a result of which it could not take possession of the stocks.

- As per the sanction order, the Branch Management was required to disburse the credit as per the drawing powers available on stocks, debtors and creditors

[9] NPA balance: ₹ 55.64 crore and Unapplied Interest: ₹ 62.84 crore
[10] Primary Security: Nil and Collateral Security: ₹ 13.97 crore
[11] formerly Investment Information and Credit Rating Agency of India Limited

computed on monthly basis. However, the Drawing Power Register was not maintained by the Branch. Further, the stock audit which was required to be conducted on annual basis as per the Bank's credit policy was not conducted by the Bank indicating poor post-disbursement monitoring.

The Management replied (June 2023) that external rating of BBB assigned to the Borrower Company does not in any way infer that lenders cannot extend further exposure to the Borrower Company. Further, the Management admitted that the NOC from other lenders was not obtained by the Branch as per the sanction stipulation and the stock audit of the account was not conducted.

The Management's reply may be seen in light of the fact that the Bank did not obtain adequate collateral securities to safeguard its interest especially considering the credit risk involved in extending credit facilities to the Borrower Company and despite default in payment of credited loan. Further, non-fulfillment of pre-disbursement conditions and poor post-disbursement monitoring of account resulted in doubtful recovery of ₹ 104.51 crore[12] from M/s Zenica Cars India Pvt. Limited and undue favour.

The matter was referred to the Government in June 2023. The reply was awaited (April 2025).

Finance Department

Jammu and Kashmir Bank Limited

4.3 Wasteful expenditure in creation of Jammu and Kashmir Asset Reconstruction Limited

Failure of Jammu and Kashmir Bank Limited and GoJ&K in making the Jammu and Kashmir Asset Reconstruction Limited operational resulted in wasteful expenditure of ₹ 82.18 lakh

Pursuant to the Hon'ble Supreme Court's judgement (December 2016) wherein SARFAESI Act, 2002[13] was made applicable to Jammu and Kashmir, the Government of Jammu and Kashmir (GoJ&K) alongwith Jammu and Kashmir Bank Limited (JKBL) started (January/ February 2017) the process of setting up Jammu and Kashmir Asset Reconstruction Limited (Company). The Company was to purchase Non-Performing Asset (NPA) accounts from the banks in Jammu and Kashmir and to help them in releasing the funds blocked in NPAs. The initial capital of the Company was to be ₹ two crore, out of which GoJ&K was to subscribe ₹ 1.02 crore (51 *per cent*) and JKBL ₹ 0.98 crore (49 *per cent*). The JKBL applied (19 April 2017) for incorporation of the Company with the Registrar of Companies (RoC) and the Certificate of Incorporation was issued to the Company on 28 April 2017.

[12] Outstanding amount of ₹ 118.48 crore less value of securities available ₹ 13.97 crore
[13] The Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002

Scrutiny (April 2021) of the records of JKBL revealed that expenditure of ₹ 82.18 lakh[14] was incurred by the JKBL towards pre-incorporation expenses of the Company. Moreover, neither of the promoters viz. GoJ&K and JKBL paid the subscribed amount (equity). Further, the Board and Managing Director of the Company were not appointed by the GoJ&K and the Company did not obtain certificate of registration from the Reserve Bank of India to commence the business of Asset Reconstruction.

As the company was not able to start its operations within the stipulated period of one year, GoJ&K and JKBL decided (October 2019) to wind up the Company. Accordingly, JKBL took up the matter regarding removal of the Company with RoC. The formal notification/ order regarding the same was awaited (July 2024). JKBL requested (December 2019 and February 2020) GoJ&K to reimburse its share (51 *per cent*) of pre-incorporation expenses amounting to ₹ 41.91 lakh to JKBL. However, the GoJ&K had not reimbursed its share of expenses (July 2024).

Audit noticed that lackadaisical approach of the JKBL and GoJ&K in making the company operational rendered the pre-incorporation expenditure of ₹ 82.18 lakh as wasteful.

On being pointed out, the JKBL Management stated (July 2022) that GoJ&K failed to subscribe their share of Capital and delay in nomination of the Managing Director of the Company led to winding up of the Company.

The reply of the JKBL Management confirmed the audit contention that adequate measures were not taken by both the stakeholders to make the Company operational leading to wasteful expenditure of ₹ 82.18 lakh.

The matter was referred to the Government in June 2023. The reply was awaited (April 2025).

Industries and Commerce Department

Jammu and Kashmir IT Infrastructure Development Private Limited

4.4 Parking of surplus funds and loss of interest of ₹ 2.65 crore

Parking of surplus funds in violation of the Board's directives resulted in loss of interest of ₹ 2.65 crore.

Jammu and Kashmir IT Infrastructure Development Private Limited (Company) was incorporated (March 2019) with the mandate to develop IT infrastructure in the UT of J&K by way of establishing IT Parks/ Towers and Business Process Operations.

[14] Registration fee: ₹ 76.33 lakh; fee for hiring of professional services for drafting of Memorandum of Association/ Article of Association: ₹ 5.85 lakh

Accordingly, Government of Jammu and Kashmir (GoJ&K) released (March 2019) ₹ 5.50 crore (₹ five crore for construction of IT Towers and ₹ 0.50 crore as Equity contribution) to the Company. The GoJ&K further released (March 2022) ₹ 50 crore for construction of IT Towers at Jammu and Srinagar.

The Board of Directors (BoDs) of the Company in its first meeting (March 2019) resolved that the idle funds should not be kept in current account but income must be generated by way of secured investments exclusively like in liquid investments as permitted under Companies Act, 2013. Secured investment in liquid assets shall be treated as investment policy of the Company which includes investment in Fixed Deposits with Bank but not an investment in equity shares.

In order to construct IT Towers at Jammu and Srinagar, NBCC India Limited (Contractor) was engaged (January 2020) for planning, designing and execution of IT Towers and a Memorandum of Understanding (MoU) was also signed (January 2021) between the Company and the Contractor. The cost of IT Towers was estimated at ₹ 149.85 crore for Jammu and ₹ 168.47 crore for Srinagar. The sites were identified and possession of the sites at Jammu and Srinagar was handed over to the Company by Industries and Commerce (I&C) Department, GoJ&K in February 2021 and August 2021 respectively.

The BoDs in its 4th meeting (December 2021) decided to put the construction of IT Towers on hold and advised the Company Management to explore the larger market for IT investment in J&K. Meanwhile, the land identified for construction of IT Towers in Jammu and Srinagar was transferred back (March 2022) to I&C Department, GoJ&K. Subsequently, the land was allotted (February 2023) by the I&C Department to M/s Magna Buildtech Private Ltd. for establishment of IT Multipurpose Tower.

The Company parked the surplus funds[15] in its Current Account which not only violated the Board's directives but also resulted in interest loss of ₹ 2.65 crore[16] to the Company. Although the Company took up (November 2022) the matter regarding the investment of ₹ 50 crore as Fixed Deposits with the GoJ&K, there was no communication from the GoJ&K and the Company invested (June 2023) the amount of ₹ 50 crore in Fixed Deposits with the Jammu and Kashmir Bank Limited. Thus, the funds remained parked in the current account of the Company during the period between March 2022 and May 2023.

Further, due to indecisiveness on part of GoJ&K, the Company which was incorporated with the main objective to develop IT infrastructure in J&K could not achieve its objective even after lapse of more than four years from date of its incorporation and despite availability of funds of ₹ 55 crore. In May 2023, the Industries and Commerce

[15] ₹ 5.25 crore parked in current account between December 2019 and March 2021; ₹ 50 crore remained parked in the current account from March 2022 to April 2023

[16] ₹ 0.25 crore*0.04*572/365 + ₹ five crore*0.04*469/365= ₹ 0.27 crore; ₹ 50 crore*0.04*435/365 = ₹ 2.38 crore. Simple interest is calculated on the amount at rate of four *per cent* per annum

Department passed (May 2023) instructions for closure of the Company. However, the Company was still operational.

The Management replied (April 2022) that due to frequent changes of Managing Director, decision to invest the funds could not be taken. The Management further stated (June 2023) that the Company could not achieve its objective due to change (February 2022) in Government's policy with regards to Promotion of Foreign Investment in Industrial Sector in J&K.

Thus, idle parking of surplus funds by the Company in violation of its BoDs directives resulted in loss of interest of ₹ 2.65 crore.

The matter was referred to the Government in June 2023. The reply was awaited (April 2025).

Jammu and Kashmir Power Development Department

Jammu and Kashmir State Power Development Corporation Limited

4.5 Avoidable interest payment of ₹ 6.88 crore

Non-depositing of advance tax on taxable income during the financial years 2015-16, 2017-18 and 2019-20 by Jammu and Kashmir State Power Development Corporation Limited as per the provisions of the Income Tax Act, 1961 resulted in avoidable interest payment of ₹ 6.88 crore

Section 208 of the Income Tax Act, 1961 provides that advance tax shall be payable during a financial year in every case where the amount of such tax payable by the assessee during that year is ten thousand rupees or more. Further, Section 234A provides that in case the return of income for any assessment year is furnished after a due date or is not furnished, the assessee shall be liable to pay interest. Moreover, Section 234B of the Act stipulates that where in any financial year, an assessee who is liable to pay advance tax under section 208 has failed to pay such tax or where the advance tax paid by such assessee under the provisions of section 210 is less than 90 *per cent* of the assessed tax, the assessee shall be liable to pay interest for defaults in payments of advance tax. Section 234C further provides that where the advance tax paid by an assessee on its current income on or before the 15th day of June is less than fifteen *per cent* of the tax due or the amount of such tax paid on or before the 15th day of September is less than forty five *per cent* of the tax due or the amount of such tax paid on or before the 15th day of December is less than seventy five *per cent* of the tax due or the advance tax paid by the assessee on the current income on or before the 15th day of March is less than the tax due on the returned income then the assessee shall be liable to pay interest for deferment of advance tax.

Scrutiny of the records (December 2021) of the Jammu and Kashmir State Power Development Corporation Limited (Company) revealed that the Company had failed to deposit 90 *per cent* of the tax due on the assessed income as the advance tax during the financial years (FY) 2015-16, 2017-18 and 2019-20 as per the provisions of Sections 234B of Income Tax Act, 1961. Further, the Company did not timely pay the advance tax for these financial years as per the requirement of section 234C of the Act. As a result, it had to pay penal interest of ₹ 6.88 crore[17] at the time of filing of Income Tax Returns (ITRs) for the respective financial years.

The Income Tax Department, while assessing the Company under section 143(3) of the Act for the FYs 2015-16 (December 2018), 2017-18 (August 2021) and 2019-20 (August 2023) assessed that the Company was liable to pay penal interest of ₹ 8.17 crore[18] against the penal interest of ₹ 6.88 crore actually paid by the Company for these financial years under sections 234B and 234C of the Act. Further, the Tax Department also imposed penalty of ₹ 0.27 crore[19] on the Company under section 234A of the Act for FYs 2015-16 and 2017-18. The Company filed for Appeals under section 246A against the Assessment Orders for the FYs 2015-16 (January 2019), 2017-18 (September 2021) and 2019-20 (September 2023). However, the final outcome of the Appeals was awaited (September 2024).

The Management while accepting the audit contention stated (January 2022) that due to delay in receipt of dues of power sold to Power Development Department, Govt. of Jammu and Kashmir, the Company was facing liquidity crisis and was not in position to pay advance tax.

The reply may be viewed in light of the fact that the Company had bank balances of ₹ 48.46 crore, ₹ 39.75 crore and ₹ 203.61 crore as on 31 March 2016, 31 March 2018 and 31 March 2020, respectively. Further, despite being pointed out in the Report of the Comptroller and Auditor General of India on Revenue and Public Sector Undertakings of the Government of Jammu and Kashmir for the year ended 31 March 2018, the Company has continued with the practice of non-deposition of advance tax as per the provisions of the Act resulting in avoidable interest payment of ₹ 6.88 crore.

The matter was referred to the Government in June 2023. The reply was awaited (April 2025).

[17] 2015-16 (234B: ₹ 0.52 crore and 234C: ₹ 0.47 crore); 2017-18 (234B: ₹ 1.24 crore and 234C: ₹ 0.78 crore); 2019-20 (234B: ₹ 1.77 crore and 234C: ₹ 2.10 crore)

[18] 2015-16 (234B: ₹ 1.13 crore and 234C: ₹ 0.58 crore); 2017-18 (234B: ₹ 1.72 crore and 234C: ₹ 0.78 crore) and 2019-20 (234B: ₹ 1.86 crore and 234C: ₹ 2.10 crore)

[19] 2015-16: ₹ 0.26 crore and 2017-18: ₹ 0.01 crore

Public Works Department

Jammu and Kashmir Projects Construction Corporation Limited

4.6 Avoidable interest payment of ₹ 0.32 crore

Failure of Jammu and Kashmir Projects Construction Corporation Limited to deposit advance tax on taxable income on due dates for the Financial Year 2017-18 in accordance with the provisions of Income Tax Act, 1961 resulted in avoidable interest of ₹ 0.32 crore

Section 208 of the Income Tax Act, 1961 provides that advance tax shall be payable during a financial year in every case where the amount of such tax payable by the assessee during that year is ten thousand rupees or more. Section 234C of the Income Tax Act provides that where the advance tax paid by an assesse on its current income on or before the 15th day of June is less than fifteen *per cent* of the tax due or the amount of such tax paid on or before the 15th day of September is less than forty five *per cent* of the tax due or the amount of such tax paid on or before the 15th day of December is less than seventy five *per cent* of the tax due or the advance tax paid by the assesse on the current income on or before the 15th day of March is less than the tax due on the returned income then the assesse shall be liable to pay interest for deferment of advance tax.

Audit scrutiny (March 2022) of records of the Jammu and Kashmir Project Construction Corporation Limited (Company) revealed that the Company had deposited[20] advance tax for financial year 2017-18, however, the timelines fixed under section 234C of the Act were not adhered to. As a result, the Company had to pay interest of ₹ 0.32 crore for deferment of payment of advance tax under section 234C for the financial year 2017-18.

The Management replied (March 2022) that due to nature of activity being carried out and unpredictability associated with it, it is very difficult to anticipate volume of business to be achieved during the year and the profits to be earned thereon. For the year 2017-18, it was more difficult as the Company suffered loss of ₹ 3.95 crore and ₹ 25.24 crore during 2014-15 and 2015-16, respectively whereas profit of ₹ 3.33 crore was booked during 2016-17. Further, the system of accounting being manual and unorganized and poor Management Information System (MIS) of the Company had made it difficult to estimate the profit for the year 2017-18.

Reply of the Management may be seen in view of the fact that profitability of the Company depends on value of work done and there is a system in place to prepare the physical and financial progress reports covering all the works under execution by the Company on monthly basis. During the year 2016-17, the value of work done was

[20] ₹ 4.50 crore on 15th November 2017 and ₹ six crore on 28th of March 2018

recorded as ₹ 250.65 crore while the same was booked as ₹ 464.67 crore during 2017-18 implying that the Company was aware of sharp increase in its value of work done on monthly basis and the impact thereof on the Company's profitability during 2017-18. Further, devising and putting in place an organised system of accounting and proper MIS is the responsibility of the Company Management.

The matter was referred to the Government in June 2023. The reply was awaited (April 2025).

Summary of pan J&K sampled data analysis

Sl. No.	Parameter Algorithm used	Number of deviations	Amount (₹ in crore)
	Mismatch in availing of ITC		
1	Mismatch ITC GSTR2A v GSTR3B: ITC available as per GSTR-2A (with all its amendments) is compared with the ITC availed in GSTR-3B {Table 4A(5) for domestic supplies) after considering (i) reversals of ITC (Others pertaining to Table 4(B)(2)) and (ii) ITC availed in subsequent year (Table 8(C) of GSTR-9)	50	51.09
2	Under Reverse Charge Mechanism[1] (RCM): RCM in GSTR-3B Table 3.1(d) (with proof of tax paid) is compared with ITC availed due to RCM in GSTR-9 Table (6C+6D+6F); OR if GSTR-9 is not available, RCM liability in GSTR-3B Table 3.1 (d) is compared with ITC availed in GSTR-3B Table {4A(2) + 4A(3)}.	50	5.43
3	Annual check of Reverse Charge Mechanism (ignoring proof of tax paid) RCM liability declared in GSTR-9 Table 4G is compared with ITC availed in GSTR-9 Table (6C+6D+6F); (in case GSTR-9 is not available it reverts to Parameter No. 2)	17	0.38
	Mismatch in Annual Return and Financial Statements (FS)		
4	Negative figure in GSTR-9C Table 9R: Lower figure of tax paid between books of accounts and annual return	50	12.55
5	Positive figure in GSTR-9C Table 12F: Higher amount of ITC claimed than credit that is due when compared between annual return and financial statements (Table 12F of GSTR-9C)	25	16.72
	Shortfall in Tax paid or Interest and Other deviations		
6	Tax not remitted due to GSTR-3B not filed: Cases where GSTR-3B not filed but GSTR-1 or GSTR-2A available Taxpayers who had not filed GSTR-3B but filed GSTR-1 or where GSTR-2A available, indicating taxpayers had carried the business without discharging tax.	13	0.53
7	Tax short-paid: Compare GSTR-1 (Table 4 to 11) or GSTR-9 (Table 4N, 10 & 11) with tax paid details declared in Tables 9 and 14 of GSTR-9. In cases where GSTR-9 is not available, tax paid details declared in Table 3.1(a)[2] and 3.1(b) in GSTR-3B[3] is compared with GSTR-1 liability. The amendments and advance adjustments declared in GSTR-1 and GSTR-9 are duly considered.	25	77.53
8	Short payment of interest on delayed payments Interest calculated at the rate of 18 *per cent* on cash portion of tax payment on delayed filing of GSTR- 3B vis-à-vis interest declared in GSTR-3B Table 6.1.	25	8.46

[1] In Reverse Charge Mechanism the liability to pay tax is fixed on the recipient of supply of goods or services or both instead of the supplier or provider for certain notified categories of goods or services or both

[2] Outward taxable supplies (other than zero-rated, nil rated and exempted)

[3] Outward taxable supplies (zero-rated)

Sl. No.	Parameter Algorithm used	Number of deviations	Amount (₹ in crore)
9	Composition taxpayers also availing e-commerce facility E-commerce GSTR-8 became effective from 01.10.2018 when TCS provisions became effective. GSTINs declared in GSTR-8 who are also filing GSTR-4 under composition scheme.	1	NA
10	ISD credit incorrectly availed by the recipients ISD received in GSTR-9 Table 6G or GSTR-3B Table 4(A) (4) of the recipients was compared with ITC transferred in GSTR-6 of the distributor.	25	6.37
	Total	**281**	**179.06**

Category wise details of cases

☞Audit Dimension Number has been mentioned against each case detailed below in Tables I to VIII. Please correlate Audit Dimension Number with serial number of Appendix 2.1.4 & 2.1.5 under Para 2.1.8.1 of this report for getting gist of Audit Dimension and details of algorithm used by Audit on datasets of sample cases.

☞Tables I to VIII included in this Appendix are listed below:

I Details of cases where reply is not received
II Detail of cases, where Department had accepted audit queries and recoveries were made
III Detail of cases, where Show Cause Notices/ DRC-07/ ASMT-10 were issued in response to audit queries
IV Detail of cases, where Department stated that they were examining the audit query
V Details of cases, where mismatches were due to data entry errors
VI Detail of cases, where action had been taken before audit query
VII Detail of cases, where Department had valid explanations
VIII Detail of cases, in which Department's replies were not acceptable (Audit Rebuttal) and appropriate documentary evidences were not furnished

I-Details of cases where reply is not received

PREFACE

This Report of Comptroller and Auditor General of India for the period ended March 2022 has been prepared for submission to Lieutenant Governor of Jammu and Kashmir under Section 72 of the Jammu and Kashmir Reorganisation Act, 2019 for laying in the Legislative Assembly.

This Report contains three Chapters. Chapter-I gives brief profile on receipts and expenditure of the Government of Union Territory of Jammu and Kashmir. Chapter-II and Chapter-III present significant audit findings noticed during Performance Audit and Compliance Audit of various Government Departments.

The instances mentioned in this Report are those which came to the notice in the course of test audit during 2021-22 as well as those which came to notice in earlier years but could not be reported in the previous Audit Reports. Instances relating to the period subsequent to 2021-22 have also been included, wherever necessary. The Report has been updated as per replies received up to February 2025.

The Audit has been conducted in conformity with the Auditing Standards issued by the Comptroller and Auditor General of India.

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

About the Report

This Report covers matters arising out of the Performance Audit and Compliance Audit of the Departments of Government of Union Territory (UT) of Jammu and Kashmir (J&K). The Report has been organised in three chapters as under:

Chapter- I: Introduction

This Chapter contains brief profile of the J&K UT Government with receipts/ expenditure for the year 2021-22, the authority for audit, audit jurisdiction, planning and conduct of audit. This report also covers response of the Government to various audit products namely Inspection Reports, audit observations/ paragraphs and follow-up action on the Audit Reports.

Chapter-II: Performance Audit

This chapter covers Performance Audit on "Direct Benefit Transfer (DBT) in Integrated Social Security Scheme (ISSS)".

During 2018-19 to 2021-22, ₹ 10,849.32 crore (Cash and Kind) was paid via DBT mode to 3,77,30,264 beneficiaries. Of the cash transfers of ₹ 10,649.32 crore, an amount of ₹ 4,362.33 crore (41 *per cent*) was transferred by the Social Welfare Department (SWD) to beneficiaries through 28 schemes.

Under Integrated Social Security Scheme (ISSS), ₹ 1,000 is provided as Old Age Pension (OAP) to men above 60 years and women above 55 years of age, Women in Distress (WID) i.e. Widow and Divorcee women above 40 years, Physically Challenged Persons (PCP) and Transgender Community (TG). During 2018-2022, Social Welfare Department (SWD) transferred ₹ 1,974.01 crore (45 *per cent* of ₹ 4,362.33 crore) to the beneficiaries through DBT under ISSS.

Social Welfare Department had not followed the Standard Operating Procedure outlined for DBT and was not able to eliminate the intermediaries for transfer of pension assistance to beneficiaries. The Department did not transfer the benefits directly to the bank accounts of beneficiaries as the Treasury Officer, to whom the bills were submitted by Director, Social Welfare Department (DSWD) transferred the amount into the DDO bank account of DSWD.

The Protocol Document prescribed by the GoI for DBT in States provides for Aadhaar seeding of beneficiary database so that benefit could be transferred directly into bank accounts, preferably Aadhaar linked bank accounts of beneficiaries. Despite instructions of Finance Department (June 2020) to ensure authentication of beneficiaries by linking bank accounts with their Aadhaar number, it was noticed that

as of October 2022, only 6,29,684 (70 *per cent*) out of 9,02,151 ISSS beneficiaries bank accounts of beneficiaries were Aadhaar linked. In six test-checked Districts, shortfall in Aadhaar linking of bank accounts of beneficiaries ranged between 02 *per cent* (Budgam) and 40 *per cent* (Rajouri).

No review to check the completeness, authenticity and correctness of the legacy data was conducted after uploading the beneficiaries' data in Application software. The data had been uploaded on the portal after delay ranging between 02 months and 38 months, resulting in delayed payment of benefits.

The main purposes of integrating the Centrally Sponsored Schemes/ UT Specific Schemes with PFMS were real-time monitoring and tracking of fund flow from the Government to the end beneficiary, reducing leakages by facilitation of direct transfer of benefits to beneficiaries' bank accounts and maintaining a comprehensive audit trail of every financial transaction. Finance Department, GoJ&K instructed (June 2020) all Administrative Secretaries to create user agencies on the PFMS portal for all the Centrally Sponsored/ UT Specific Schemes implemented by the respective Departments by the end of June 2020. Despite Finance Department instructions, due to non-integration, Department of Social Welfare could not get the advantage of better monitoring & tracking and reducing leakage of DBT beneficiaries' accounts.

The SWD was required to maintain records showing initial date of sanction of pension in favour of beneficiaries. Audit noticed in six test-checked Districts that in violation of the Rules, no such records had been maintained by the Department.

As per Rule 6 (5) of ISSS Guidelines, pension was to be disbursed monthly to the beneficiaries. Audit noticed that there was delay of 04 months to 134 months in sanction of 26,135 cases out of test-checked 27,195 cases in five out of six test-checked District offices (no details had been maintained in District Rajouri).

Audit noticed cases of duplicate records of beneficiaries, non-exclusion of ineligible beneficiaries, payment of financial assistance to same beneficiaries under more than one scheme and payments to ineligible beneficiaries.

Mechanism for identification of deceased beneficiaries to ensure discontinuance of financial assistance after demise was absent in the Social Welfare Department.

Audit noticed in four out of six test-checked Districts, ₹ 1.41 crore was recovered (December 2018 to March 2022) from the bank accounts of deceased beneficiaries and credited into the bank accounts of the respective DSWOs. This fact was not communicated to the higher authorities in contravention to Rule 2.59 of J&K Financial Code Vol-I. The amount was held in the DDO bank accounts and was not credited into proper head of Government account.

Recommendations

- *Department needs to complete the process of linking the Aadhaar Card details of beneficiaries with their bank accounts on priority.*
- *There is a need to carry out comprehensive review of data of beneficiaries including the legacy data already ported in application to ensure its completeness, authenticity and correctness.*
- *Department should comply with instructions of Finance Department on PFMS for better monitoring and tracking.*
- *Social Welfare Department may examine the failed transactions reported by respective banks expeditiously.*
- *Beneficiaries' data need to be integrated with the death data available with the Registrar General of India to ensure discontinuance of financial assistance in respect of deceased beneficiaries.*

Chapter-III: Compliance Audit

This chapter covers two Compliance Audit topics. The major findings of these topics are as follows:

(i) Compliance Audit on "Solid Waste Management in Urban Local Bodies (ULBs)"

The SSCA on Solid Waste Management (SWM) in ULBs covered the period 2017-18 to 2021-22. It entailed examination (October 2022 to March 2023) of the records relating to SWM in the Administrative Department i.e. Housing & Urban Development Department (H&UDD), Mission Director, Swacch Bharat Mission (SBM), Directors of Urban Local Bodies (ULBs), Jammu/ Kashmir and 15 ULBs out of 76 ULBs selected on the basis of Probability proportional to size without Replacement method. The significant findings are as follows:

GoJ&K had not prepared any policy/ action plan/ strategy for implementation of Reduce, Reuse and Recycle (3 Rs) in respect of solid waste.

During 2017-22, only 31 *per cent* to 39 *per cent* of collected waste was treated leaving a major portion of solid waste dumped at landfill/ dumping sites, carrying the risk of harmful impact on the environment.

Solid waste Processing facilities such as Waste to Energy Plant, Leachate Treatment Plant, City Compost Plant, Waste Disposer Machine and Bailing machine remained non-functional in various ULBs of the State/ UT.

In 17 ULBs, segregation of waste at source/ house was not being carried out during 2017-22. In 11 ULBs, coverage of door-to-door collection of solid waste from households and commercial establishments was partial. Three ULBs had not carried out door-to-door collection of waste.

In 17 sampled ULBs, there was shortfall in collection of user charges. Besides, two ULBs (MC Hiranagar and MC Rajouri) were dumping solid waste unauthorisedly and unscientifically.

No processing/ treatment facilities were in place at the waste dumping sites of 15 ULBs, as such the waste was being dumped without modifying its physical, chemical or biological characteristics resulting in potential danger to the environment.

In 17 sampled ULBs, shortage of Manpower ranged between 9.25 *per cent* (Bijbehara) and 75 *per cent* (Langate).

Jammu & Kashmir Pollution Control Committee (J&KPCC) had not conducted any air quality assessment in respect of landfills/ dumpsites and had not assessed the risk of contamination of ground water near landfill/ dumping sites.

Recommendations

- *ULBs may ensure that waste is actually segregated at source. ULBs should ensure 100 per cent collection of solid waste from households/ commercial establishments etc.*
- *ULBs should take measures to collect user charges from all households/ commercial establishments.*
- *ULBs may put in place facilities for processing/ treatment of solid waste at dumping sites to modify its physical, chemical or biological characteristics so that no harm is caused to the environment.*
- *J&KPCC may conduct air quality assessment in respect of landfills/ dumpsites and assess risk of contamination of ground water, rivers and streams near landfill/ dumping sites.*

(ii) Compliance Audit on Central Road Infrastructure Fund (CRIF)

Between 2000-01 and 2018-19, 292 projects were sanctioned out of which 117 projects were completed as of March 2022.

Out of 208 projects sanctioned under CRIF during 2000-2001 to 2016-2017, only 115 (55 *per cent*) projects were completed. These projects were scheduled for completion between 2003-04 and 2019-20.

Projects were not prioritised by the Department which resulted in not completing ongoing as well as new projects as of March 2022.

Bids of 75 projects were seriously unbalanced i.e. they were below the advertised cost of works in the range of 15 to 42 *per cent*. Of these, 24 projects amounting to ₹ 214.83 crore were allotted whose bids were liable to be cancelled. Performance security and additional performance security of only ₹ 81.38 crore were obtained against actual of ₹ 121.98 crore in respect of 104 contracts executed during March 2012 to April 2022.

Out of 76 sanctioned projects (2005-06 to 2018-19), 66 projects were sanctioned before completion of land acquisition and shifting of utility services and 24 projects were sanctioned without forest clearance. Execution of 72 projects was taken up without grant of Technical Sanction. Quantities of WBM-II, WBM-III/ WMM[1] laid were in excess of quantities required to be laid in respect of widened portions of roads resulting in extra avoidable expenditure of ₹ 3.67 crore in respect of 11 CRIF road projects.

Provisions of Indian Road Congress (IRC) relating to width of road formation and carriageway were not adhered to in 17 projects which led to additional financial burden of ₹ 60.80 crore on Government exchequer.

Scope of four projects were changed during execution without obtaining approval of the competent authorities of GoI/ GoJ&K.

Recommendations

- *Prioritising the completion of ongoing projects rather than proposing new ones, in view of the fixed allocation under CRIF*.
- *Ensuring that only those projects with encumbrance-free sites are proposed for sanction under CRIF and Technical Sanction must be assured before execution of projects.*
- *Carrying out proper site surveys before preparation of DPRs to ensure that quantities in the DPR are based on actual site conditions and tender documents are prepared as per the current schedule of rates.*
- *Putting in place a mechanism to monitor the expiry and renewal of Bank Guarantees (BGs) obtained from contractors on account of Performance Guarantee and Additional Performance Guarantee.*

[1] WBM: Water Bound Macadam, WMM: Wet Mix Macadam.

CHAPTER- I

INTRODUCTION

CHAPTER-I

INTRODUCTION

1.1 Budget Profile

There are 36 Departments and 111 Autonomous Bodies in the Union Territory (UT) of Jammu and Kashmir. The position of budget estimates, revised estimates and expenditure of the Union Territory of Jammu and Kashmir during 2021-22 is shown in **Table 1.1**.

Table 1.1: Budget and Expenditure of the UT of Jammu and Kashmir during the year 2021-22

(₹ in crore)

Particulars	2021-22		
	Budget Estimates	Revised Estimates	Actuals
Revenue expenditure			
General Services	30,247.98	30,580.82	29,639.86
Social Services	24,827.89	24,782.07	20,933.14
Economic Services	13,727.93	11,874.01	8,696.33
Grants-in-aid[1] and contributions	0.00	0.00	0.00
Total (1)	**68,803.80**	**67,236.90**	**59,269.33**
Capital expenditure			
Capital Outlay	35,434.47	30,839.41	11,047.04
Loans and advances disbursed	108.90	114.90	73.77
Repayment of Public Debt[2]	26,436.62	41,575.98	41,575.17
Contingency Fund	0.00	0.00	0.00
Public Accounts disbursements[3]	5,110.60	6,605.39	28,543.10
Closing Cash balance	0.00	0.00	1,447.65
Total (2)	**67,090.59**	**79,135.68**	**82,686.73**
Grand Total (1+2)	**1,35,894.39**	**1,46,372.58**	**1,41,956.06**

(Source: Annual Financial Statements and Finance Accounts of the Government of UT of J&K)

1.2 Application of resources of the UT Government

During the year 2021-22, the total expenditure[4] of the Union Territory of Jammu and Kashmir was ₹ 70,390.14 crore. During this period, the Capital Outlay constituted 16 *per cent* of total expenditure.

1.3 Funds transferred directly to Government Departments of UT

During the period 2021-22, various Ministries/ Departments of the Central Government released ₹802.04 crore directly to various Government Departments of

1 Grants-in-aid paid by the UT Government is included in the General, Social and Economic Services.

2 Includes transactions under Ways and Means Advances.

3 Actuals exclude transactions of investment of cash balance and departmental cash balance.

4 Total expenditure includes revenue expenditure, capital outlay and disbursement of loans and advances.

the Union Territory of Jammu & Kashmir without routing these through UT Budget. Consequently, these amounts remained outside the Budgetary and Accounting system of the UT Government during the year.

1.4 Grants-in-aid from Government of India

The grants-in-aid received from Government of India during 2021-22 is depicted in **Table 1.2.**

Table 1.2: Grants-in-aid from GoI

(₹ in crore)

Particulars	2021-22
Grants for Centrally Sponsored Plan Schemes	6,713.77
Other transfers/ Grants to States/ Union Territories with Legislature	35,977.00
Total	**42,690.77**
Revenue Receipts	59,238.50
Percentage of total grants to Revenue Receipts	72

(Source: Finance Accounts of 2021-22)

During the year 2021-22, the Government of Union Territory of Jammu and Kashmir received ₹ 42,690.77 crore as Grants-in-aid from Government of India, which accounts for 72 *per cent* of Revenue receipts during the period.

1.5 Audit process

The audit process starts with the risk assessment of various Departments, Autonomous Bodies, Schemes/ Projects etc., which takes into account the criticality/ complexity of activities, level of delegated financial powers, internal controls and concerns of stakeholders and previous audit findings etc. Based on this risk assessment, the frequency and extent of audit are decided and an Annual Audit Plan is formulated.

After completion of audit, an Inspection Report containing the audit findings is issued to the Head of the Office with a request to furnish replies within one month. On receipt of replies, audit findings are either settled or further action for compliance is advised. Important audit observations pointed out in these Reports are processed for inclusion in the Audit Reports of the Comptroller and Auditor General of India (C&AG). The audit findings incorporated in the Audit Report are based only on test-check of the transactions of the Government of Jammu and Kashmir.

During 2021-22, out of 7,487 Drawing and Disbursing Officers (DDOs) in the UT of J&K, compliance audit of 859 was planned and audit of 989 DDOs was conducted by the Office of the Principal Accountant General (Audit), Jammu & Kashmir. Out of 111 Autonomous Bodies (ABs), audit of 12 ABs was planned and conducted during 2021-22.

1.6 Response of Government to Audit Report Paragraphs

Audit has reported on several significant deficiencies in implementation of various programmes/ activities as well as on the quality of internal controls in selected Departments which have a negative impact on the success of programmes and functioning of the Departments. The focus was on auditing specific programmes/ schemes in order to offer suitable recommendations to the Executive for taking corrective action and improving service delivery to the citizens.

The audit paragraphs[5] proposed for inclusion in the Report of the Comptroller and Auditor General of India are forwarded by the Principal Accountant General (Audit) to the Principal Secretaries/ Secretaries of the Department concerned drawing their attention to the audit findings and requesting them to send their response within six weeks. The fact of non-receipt of replies from the Departments/ Government is invariably indicated at the end of such paragraphs included in the Audit Report.

Three audit paragraphs[6] proposed to be included in this Composite Audit Report of the Comptroller and Auditor General of India for the year ended 31 March 2022 were sent to the Principal Secretaries/ Secretaries of the respective Departments. Replies of Government were received in respect of all the three audit paragraphs and same have been included in the Report.

1.7 Response of Government to Compliance Audit Reports

The Handbook of instructions for speedy settlement of audit observations/ Inspection Reports (IRs) issued by the Government (Finance Department) provides for prompt response by the Executive to IRs issued by the Principal Accountant General (Audit) to ensure remedial/ rectification action in compliance with the prescribed rules and procedures. The heads of auditee offices and their controlling administrative Departments are required to comply with the observations contained in the IRs and rectify the defects and report their compliance to the Principal Accountant General (Audit).

Based on the results of test audit, 47,492 audit observations contained in 10,986 IRs were outstanding for settlement as on 31 March 2022 as given in **Table 1.3.**

Table 1.3: Details showing the audit observations outstanding at the end of 31 March 2022

Name of Sector	Opening Balance[7] (01 April 2021)		Additions during the year 2021-22		Settled during the year 2021-22		Closing Balance (31 March 2022)	
	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs
Civil Departments	11,397	50,261	1,280	7,273	1,691	10,042	10,986	47,492

5 Performance Audits, Subject Specific Compliance Audits (SSCAs) and Draft Paragraphs.

6 Includes one Performance Audit and two Subject Specific Compliance Audits.

7 Variation in the closing balance of 31.03.2021 and opening balance of 01.04.2022 is due to the reason that some IRs/paragraphs were transferred to Principal Director of Audit (Central), Chandigarh.

The pendency of large number of paragraphs indicates lack of adequate response of the Government Departments to Audit. The Government may look into this matter and revamp the system to ensure proper response to the audit observations from the Departments in a time-bound manner.

During the year 2021-22, 11 Audit Committee meetings were held in which 255 audit paragraphs were settled.

1.8 Follow-up on Audit Reports

1.8.1 Non-submission of *suo-motu* Action Taken Notes

To ensure accountability of the Executive to the issues dealt with in various Audit Reports, the Government (Finance Department) issued instructions in June 1997 to the Administrative Departments to furnish *suo-motu* Action Taken Notes (ATNs) to the Public Accounts Committee (PAC)/ Committee on Public Undertakings (COPU) on all the audit paragraphs featuring in the Audit Reports, irrespective of whether these are taken up for discussion by these Committees or not. These ATNs are to be submitted to these Committees duly vetted by the Principal Accountant General (Audit) within a period of three months from the date of presentation of Audit Reports in the Legislature.

It was, however, noticed that out of 836[8] audit paragraphs featuring in the Audit Reports from 2000-01 to 2020-21, *suo-motu* ATNs in respect of 472[9] audit paragraphs had not been received up to 31 March 2025.

1.8.2 Action taken on recommendations of the PAC/ COPU

Action Taken Notes, duly vetted by the Principal Accountant General (Audit) on the observations/ recommendations made by the PAC/ COPU in respect of the audit paragraphs discussed by them are to be furnished to these Committees within six months from the date of such observations/ recommendations. Out of 836 audit paragraphs featuring in the Audit Reports for the years from 2000-01 to 2020-21, only 329[10] audit paragraphs have been discussed by the PAC and COPU up to 31 March 2025. Recommendations in respect of 306[11] audit paragraphs have been made by the PAC/ COPU. However, ATNs on the recommendations of the PAC/ COPU are pending from the Government in respect of 228[12] audit paragraphs.

8 Civil: 589; Revenue:143; PSUs: 104
9 Civil: 309; Revenue: 126; PSUs: 37
10 Civil: 245; Revenue: 17; PSUs: 67

12 Civil: 165; Revenue: 13; PSUs: 50

CHAPTER- II

PERFORMANCE AUDIT

CHAPTER-II

PERFORMANCE AUDIT

Social Welfare Department

2.1 Performance Audit on "Direct Benefit Transfer in Integrated Social Security Scheme (ISSS)"

2.1.1 Introduction

Direct Benefit Transfer (DBT) is a major reform initiative launched by the Government of India on 1st January 2013 to re-engineer the existing delivery of benefits to the people using modern Information and Communication Technology (ICT) applications. It is an attempt at providing timely benefits to the people by using Aadhaar number as a unique identifier, ensuring greater transparency/ accountability and curbing the role of middlemen. The Scheme envisages identification of eligible beneficiaries of Government schemes and removal of ineligible beneficiaries. Electronic transfer of benefits directly to bank accounts of beneficiaries minimises levels involved in benefit flow and reduces delay in payments.

2.1.1.2 Status of Direct Benefit Transfer in the erstwhile State/ UT

In accordance with DBT Mission Guidelines regarding adoption of the DBT framework in the erstwhile State/ UT level, a DBT Cell was constituted (September 2017) in the Finance Department of Government of Jammu and Kashmir (GoJ&K) under the chairmanship of Director General Accounts and Treasuries (DGA&T) and Deputy Director, Budget as Member Secretary to put all the schemes implemented by various Departments on the DBT Bharat portal which includes data of beneficiaries of all States/ UTs.

2.1.1.3 Physical and Financial Status of DBT schemes in the erstwhile State/ UT

There are 100 on-boarded Government schemes and programmes comprising 74 Centrally Sponsored Schemes (CSSs) and 26 erstwhile State/ UT Specific Schemes being operated by 18 Departments of the UT Government where under the entitlements like Government subsidies, benefits and services are being transferred to intended beneficiaries by DBT using National Informatics Centre (NIC) platform.

Information/ Data of DBT schemes implemented by 18 Departments of UT Government ported (December 2022) from DBT Portal is detailed in **Table 2.1.1.**

Table 2.1.1: DBT schemes implemented by 18 Departments of erstwhile State/ UT Government of J&K

Year	Cash Transfer (A)			
	No of Schemes	No of Programme Implementing Departments	No of Beneficiaries	Amount Transferred (₹ in crore)
2018-19	74	18	53,82,370	3,178.73
2019-20	74	18	38,54,903	1,696.53
2020-21	74	18	57,98,606	3,284.47
2021-22	74	18	67,23,630	2,490.06
Total (A)			**2,17,59,509**	**10,649.79**
In-Kind Transfer (B)				
2018-19	13	6	81,95,023	6.66
2019-20	13	6	2,34,755	32.70
2020-21	13	6	49,11,511	24.40
2021-22	13	6	15,853	28.46
Total (B)			**1,33,57,142**	**92.22**
Cash and In-Kind Transfer (C)				
2018-19	13	6	19,008	8.58
2019-20	13	6	9,12,558	7.93
2020-21	13	6	8,37,445	27.14
2021-22	13	6	8,44,602	63.66
Total (C)			**26,13,613**	**107.31**
Total A+B+C			**3,77,30,264**	**10,849.32**

The **Table 2.1.1** shows that ₹ 10,849.32 crore (Cash and Kind)[1] was paid via DBT mode to 3,77,30,264 beneficiaries during 2018-19 to 2021-22. Out of 100[2] schemes, 74 are cash bound schemes under which benefit of ₹ 10,649.79 crore was transferred by 18 Departments to 2,17,59,509 beneficiaries during the period 2018-2022. Out of ₹ 10,649.79 crore, ₹ 4,362.33 crore (41 *per cent*) was transferred by the Social Welfare Department (SWD) to beneficiaries through 28 schemes including payment of pension under National Social Assistance Programme (NSAP) through IGNOAPS[3], a CSS where Central Assistance to States/ UT is determined on the basis of Below Poverty Line (BPL) population of the State as per the Census of 2001 and the poverty ratio is determined by the Planning Commission. In view of the limitation of fund available, if there are more deserving beneficiaries, the State has the option to give them pension from its own resources.

The GoJ&K was paying pension/ assistance to old age persons/ widows and transgenders through Integrated Social Security scheme (ISSS) since 1994. ISSS is 100 *per cent* financed by the GoJ&K. Out of ₹ 4,362.33 crore transferred by SWD to

[1] Cash is transferred directly into bank account of beneficiaries and in-kind benefit is provided by Government through service providers/ suppliers.

[2] Cash bound schemes: 74; In-kind schemes: 13 and Cash-in and in-kind schemes: 13

[3] 'Indira Gandhi National Old Age Pension Scheme' (IGNOAPS) under the Umbrella scheme 'NSAP'.

beneficiaries during 2018-2022, ₹ 1,974.01 crore (45 *per cent*) was transferred to the beneficiaries through DBT under ISSS. SWD started (December 2018) DBT under ISSS with the aim of reforming Government delivery system for simpler and faster flow of information and funds and for reduction of fraud.

2.1.2 Audit Framework

2.1.2.1 Selection of Department and Scheme

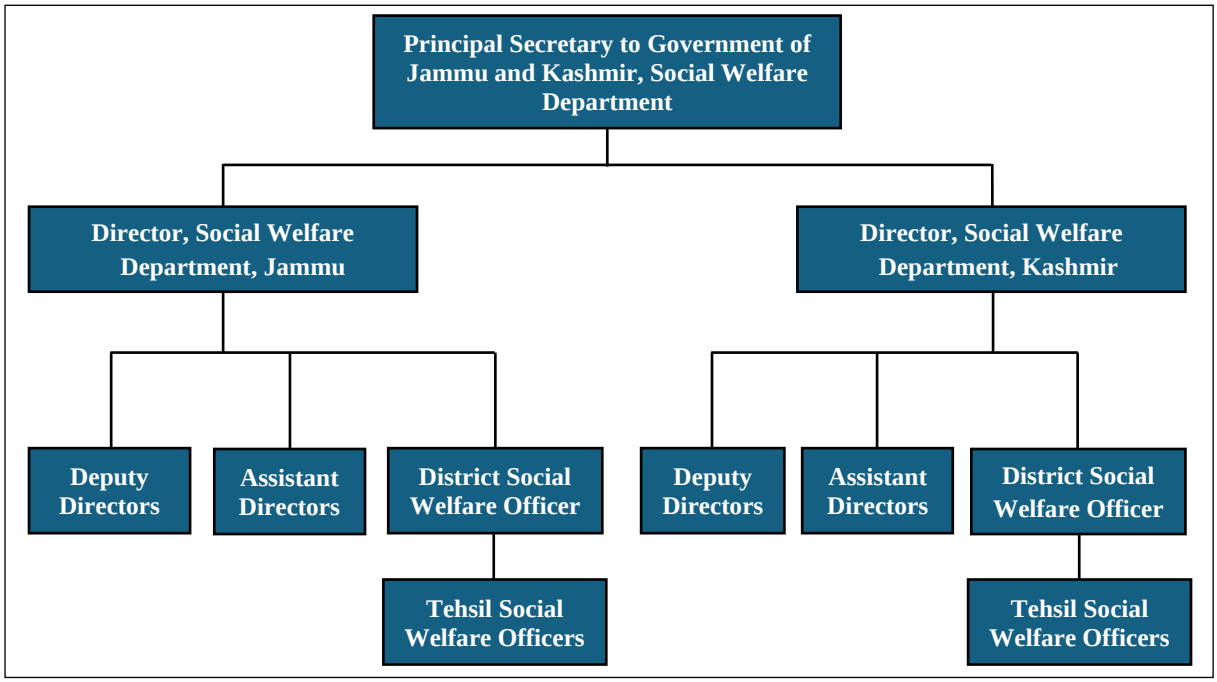
Under Integrated Social Security Scheme (ISSS), ₹ 1,000 is provided as Old Age Pension (OAP) to men above 60 years and women above 55 years of age, Women in Distress (WID) i.e. Widow and Divorcee women above 40 years, Physically Challenged Persons (PCP) and Transgender Community (TG) whose gender identity does not match with their sex assigned at birth.

Considering the criticality of escalating financial outlays and its relative impact on social security schemes which aim at providing monthly financial support to alleviate economic deprivation of marginalised and weaker sections of the community, ISSS was selected on the basis of quantum of expenditure[4] incurred under the Scheme for conducting the Performance Audit of DBT (cash transfer).

2.1.2.2 Organisational Setup

The organisational Setup of Social Welfare Department responsible for implementation of ISSS is indicated in **Chart No: 2.1.1.**

Chart 2.1.1: - Organisational Setup



(Source: Departmental Data)

[4] Out of five erstwhile State Sponsored DBT Schemes involving expenditure of ₹ 4,362.33 crore during 2018-19 to 2021-22, expenditure in respect of ISSS was ₹ 1,974.01 crore (45 *per cent*) as such ISSS was selected for Performance Audit.

2.1.2.3 Audit Objectives

The broad objectives of Performance Audit were to assess:

- Whether the scheme was planned efficiently to cover all the eligible beneficiaries and to exclude ineligible beneficiaries;
- Whether the ISSS scheme was fully digitised with end-to-end IT solutions with necessary re-engineering;
- Whether overall financial management of the scheme ensured timely availability and release of funds to the implementing agency for disbursal to the beneficiaries in a time bound manner; and
- Whether effective control mechanisms existed to avoid duplication in payments and for monitoring the scheme.

2.1.2.4 Audit Coverage, Scope and Methodology

Performance Audit of DBT in respect of implementation of ISSS covering the period from December 2018[5] to March 2022 was conducted by check of data dump of all beneficiaries of ISSS in the erstwhile State/ UT provided by Centre for Development of Advance Computing[6] (C-DAC) and test-check (April 2022 to September 2022) of records of 27,195 cases in six selected Districts[7] out of 20 Districts in the UT of Jammu and Kashmir and in two *Tehsils* selected in each selected District. Districts and *Tehsils* were selected by simple random sampling without replacement method on the basis of number of beneficiaries. Audit also carried out survey of 1,200 beneficiaries in 12 Tehsils of six selected Districts.

An Entry Conference was held with the Commissioner/ Secretary to Government, Social Welfare Department, GoJ&K on 21 February 2022, wherein the objectives, scope, criteria and methodology of audit were discussed. Audit findings were discussed in an Exit Conference held with the Commissioner Secretary to Government, Social Welfare Department, GoJ&K on 22 December 2022. Replies provided by the Department in September 2024 and February 2025 have been incorporated in this report at relevant places.

2.1.2.5 Audit Criteria

Audit criteria were derived from the following:

- Jammu and Kashmir Integrated Social Security Scheme (ISSS) 1994, Rules;
- Jammu and Kashmir Financial Code;
- General Financial Rules, 2017; and

5 Start of DBT under ISSS in J&K.
6 Implementing agency for creation and maintenance of erstwhile State portal for 27 e-services.
7 Jammu, Kathua, Rajouri, Baramulla, Budgam and Kupwara.

- Erstwhile State Government Orders/ instructions, departmental instructions and manuals and Public Financial Management System/ DBT related orders and instructions regarding implementing, monitoring and evaluating the scheme.

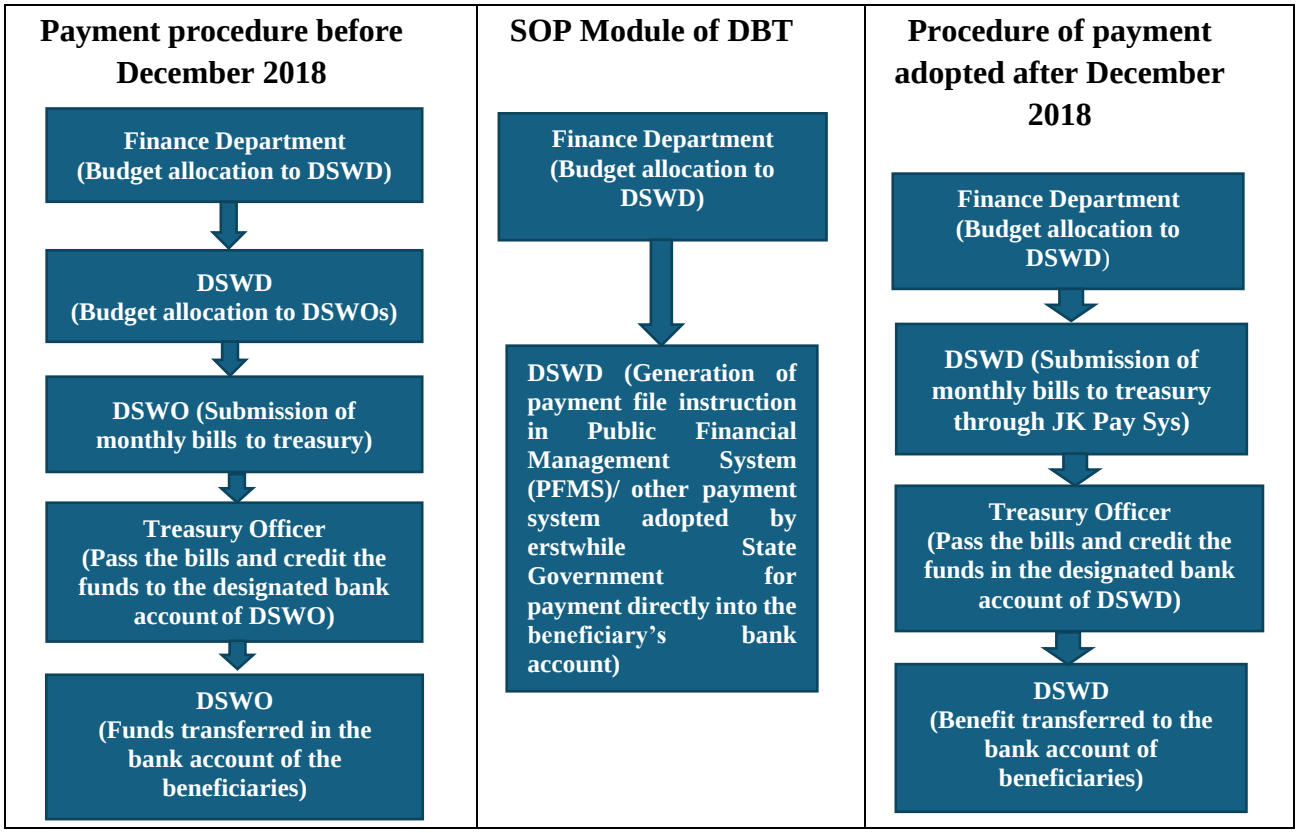
2.1.3 Implementation of Direct Benefit Transfer in respect of ISSS

2.1.3.1 Intermediary Levels not Minimised

According to Rule 87 of the General Financial Rules 2017, benefits should be transferred directly to beneficiaries under various Government Schemes and Programmes using Information and Communication Technology (ICT). Necessary process re-engineering to minimise intermediary levels, to prevent pilferage and duplication in payments and to reduce delay in payments to intended beneficiaries should be put in place.

Payment procedure followed by SWD before December 2018, payment process required to be followed by the GoJ&K as per Standard Operating Procedure (SOP) of DBT after deciding (December 2018) to transfer benefits to ISSS beneficiaries by DBT and procedure actually adopted by SWD after December 2018 is detailed in the **Flowchart 2.1.2.**

Flowchart 2.1.2: Procedure followed by SWD for payments under ISSS before and after introduction of DBT



(DSWD: Director, Social Welfare Department; DSWO: District Social Welfare Officer, PFMS: Public Financial Management System, PaySys: Payment Systems)
(Source: Departmental Data)

It can be seen from the **flowchart 2.1.2** that the SWD had not followed the SOP of DBT and was not able to eliminate the intermediaries for transfer of pension assistance to beneficiaries. The Department did not transfer the benefits directly to the bank accounts of beneficiaries as the Treasury Officer, to whom the bills were submitted by DSWDs transfers the amount into the DDO bank account of DSWD.

Social Welfare Department stated (September 2024) that after Government advised to make all disbursements at the Directorate level from the year 2018, involvement of all *tehsil* and District level offices was accordingly regulated in accordance with SOP module of DBT. The reply furnished did not specifically address the observation of reducing the intermediary steps.

2.1.3.2 Budget Allotment and Expenditure

The position of funds allotted for ISSS and expenditure incurred during 2018-22 is given in **Table 2.1.2.**

Table: 2.1.2 Details of budget allotment and expenditure incurred under ISSS during 2018-22

(₹ in crore)

Year	Allotment		Total	Expenditure		Total	Amounts lapsed (percentage)
	Jammu	Kashmir		Jammu	Kashmir		
2018-19	278.99	295.48	574.47	202.27	225.33	427.60	146.87 (26)
2019-20	378.42	354.37	732.79	273.78	354.37	628.15	104.64 (14)
2020-21	476.94	489.90	966.84	323.62	421.22	744.84	222.00 (23)
2021-22	510.65	531.10	1,041.75	410.55	490.99	901.54	140.21 (13)
Total	**1,645.00**	**1,670.85**	**3,315.85**	**1,210.22**	**1,491.91**	**2,702.13**	**613.72**

(Source: Departmental data)

Against release of ₹ 3,315.85 crore for ISSS, expenditure of ₹ 2,702.13 crore was incurred by SWD during 2018-19 to 2021-22. Yearly lapse of funds under the scheme ranged between 13 *per cent* and 26 *per cent.* Despite availability of funds there was delay in payments and denial of payments to the beneficiaries as detailed in **Paragraphs 2.1.4.1** and **2.1.4.2** respectively. Lapse of funds was also indicative of the fact that correct annual plans and perspective plans were not prepared at the apex level.

Social Welfare Department stated (September 2024) that under the scheme number of future beneficiaries are unpredictable due to which budgetary estimates are projected on higher side for coverage of additional beneficiaries. It added that weeded out beneficiaries due to death, remarriage and change in financial status are replaced by fresh sanctions eliminating chances of underutilisation of funds with minimum chances of denial of benefits to the eligible beneficiaries. The reply could be seen in light of the fact that every year the undisbursed amount was more than ₹ 100 crore.

2.1.3.3 Digitisation of Beneficiaries

With the objective of providing a single window access to the information and services (including ISSS) provided by the Administration of UT of J&K, the Information

Technology Department, GoJ&K appointed (February 2011), C-DAC, Mumbai (Premier Research and Development Organisation of Ministry of Electronics and Information Technology, GoI) for design and development of the State portal and Electronic Form Application. The State portal was launched in J&K in September 2014. C-DAC is the implementing agency for creation and maintenance of State portal for 27 e-services.

Social Welfare Department (SWD) approached (December 2015) the Information Technology Department, GoJ&K for online submission of applications and registration of beneficiaries of ISSS under State Services Delivery Gateway[8] (SSDG) for implementation by J&K e-Governance Agency (JaKeGA) through Centre for Development of Advanced Computing (C-DAC). The scheme was rolled out in March 2019.

Details of ISSS beneficiaries uploaded on the State portal by DSWOs during 2018-19 to 2021-22 are given in **Table 2.1.3.**

Table: 2.1.3: Details of ISSS beneficiaries uploaded on the State portal during 2018-19 to 2021-22

Pension category	Position as on March 2022		Total
	Jammu	Kashmir	
Old Age Pension (OAP)	2,56,795	2,84,384	5,41,179
Physically Challenged Pension (PCP)	92,956	94,847	1,87,803
Widow (WID)	67,090	1,06,017	1,73,107
Transgender (TG)	0	62	62
Total	**4,16,841**	**4,85,310**	**9,02,151**

(*Source: Departmental data*)

2.1.3.4 Uploading of Legacy Data

Audit analysis of the database of SWD revealed that there were 4,35,960 ISSS beneficiaries in the UT receiving pension before introduction (December 2018) of DBT mode of payments. The SWD was to upload data of all existing beneficiaries as of December 2018 on the State portal for timely disbursement of pension. Audit noticed that:

- The data had been uploaded on the portal after delay[9] ranging between 02 months and 38 months. Delay in uploading data on the State portal had resulted in delay in payment of pension to the beneficiaries defeating the purpose of providing social security in the form of income support to the beneficiaries on monthly basis.

[8] SSDG is a middleware platform or infrastructure that acts as a bridge between National e-Governance Service Delivery Gateway (NSDG) and various State level e-Governance applications to ensure faster delivery of Government services to citizens. It is supposed to handle a large number of transactions and also keep a track and time stamping of all these transactions of State Government.

[9] Jammu: 1,84,540 beneficiaries, delay 02 to 38 months; and Kashmir: 2,51,420 beneficiaries, delay 01 to 11 months.

- No review had been conducted by the Department to check completeness and correctness of data to determine whether details of all eligible beneficiaries had been uploaded on the portal and death/ remarriage cases had been weeded out.

- In six selected Districts, payments to beneficiaries were being made by Directorates of Jammu and Kashmir on the basis of database maintained by C-DAC, which was not accurate as payments had been made to ineligible beneficiaries as detailed in **Paragraph 2.1.5.**

While accepting the audit observation, Social Welfare Department stated (September 2024) that uploading of huge number of beneficiaries with full details for implementation of DBT in ISSS at initial stage with imperfect/ unsound technical system was a huge task due to which there might have been some delay in timely disbursement of assistance among the beneficiaries.

2.1.3.5 Linking of Aadhaar Number with Beneficiary Account

The Protocol Document prescribed by the GoI for DBT in States provides for Aadhaar seeding[10] of beneficiary database so that benefit could be transferred directly into bank accounts, preferably Aadhaar linked bank accounts of beneficiaries.

Finance Department, GoJ&K instructed (June 2020) the SWD to ensure authentication of beneficiaries by linking bank accounts with their Aadhaar number.

Audit noticed that out of 9,02,151 ISSS beneficiaries in the erstwhile State/ UT of J&K as of October 2022, bank accounts of only 6,29,684 (70 *per cent*) beneficiaries were Aadhaar linked.

Shortfall in linking of beneficiary database with Aadhaar number carries a risk of payments to ineligible beneficiaries [like payment of pension to beneficiaries who had not attained prescribed age **(Paragraph 2.1.5.1)**, double/ triple Payments to the same beneficiary **(Paragraph 2.1.5.2)**, payment of pension to beneficiaries without seeking required documents **(Paragraph 2.1.5.3)**, benefits credited into wrong bank accounts **(Paragraph 2.1.5.4)**, payment into accounts of deceased beneficiaries **(Paragraph 2.1.5.6)**] as detailed in succeeding Paragraphs.

In six test-checked Districts, shortfall in Aadhaar linking of bank accounts of beneficiaries ranged between 02 *per cent* (Budgam) and 40 *per cent* (Rajouri) as detailed in **Table 2.1.4.**

[10] Aadhaar seeding is the process of linking an individual's Aadhaar number to their bank account or other essential services like mobile number or PAN card.

Table 2.1.4: Number of beneficiaries whose bank accounts were linked with Aadhaar numbers in six test-checked Districts

(Number in lakh)

Sl. No	Name of district	OAP		WID		PCP		Total		
		Beneficiaries digitized	Aadhaar linked	Beneficiaries digitized	Aadhaar linked	Beneficiaries digitized	Aadhaar linked	Beneficiaries digitized	Aadhaar linked	Percentage
1.	Jammu	0.73	0.56	0.19	0.13	0.14	0.09	1.06	0.78	74
2.	Kathua	0.32	0.22	0.07	0.05	0.09	0.06	0.48	0.33	69
3.	Rajouri	0.35	0.22	0.09	0.05	0.14	0.08	0.58	0.35	60
4.	Baramulla	0.50	0.42	0.16	0.13	0.14	0.11	0.80	0.66	83
5.	Budgam	0.39	0.39	0.12	0.12	0.10	0.09	0.61	0.60	98
6.	Kupwara	0.47	0.46	0.13	0.12	0.19	0.18	0.79	0.76	96
Total		**2.76**	**2.27**	**0.76**	**0.60**	**0.80**	**0.61**	**4.32**	**3.48**	**80**

(OAP: Old Age Pension; WID: Widow/ Women in Distress; PCP: Physically Challenged Persons)
(Source: Departmental data)

Social Welfare Department stated (September 2024) that in terms of Government Order (August 2021), payments are now only disbursed to Aadhaar seeded bank accounts of the beneficiaries.

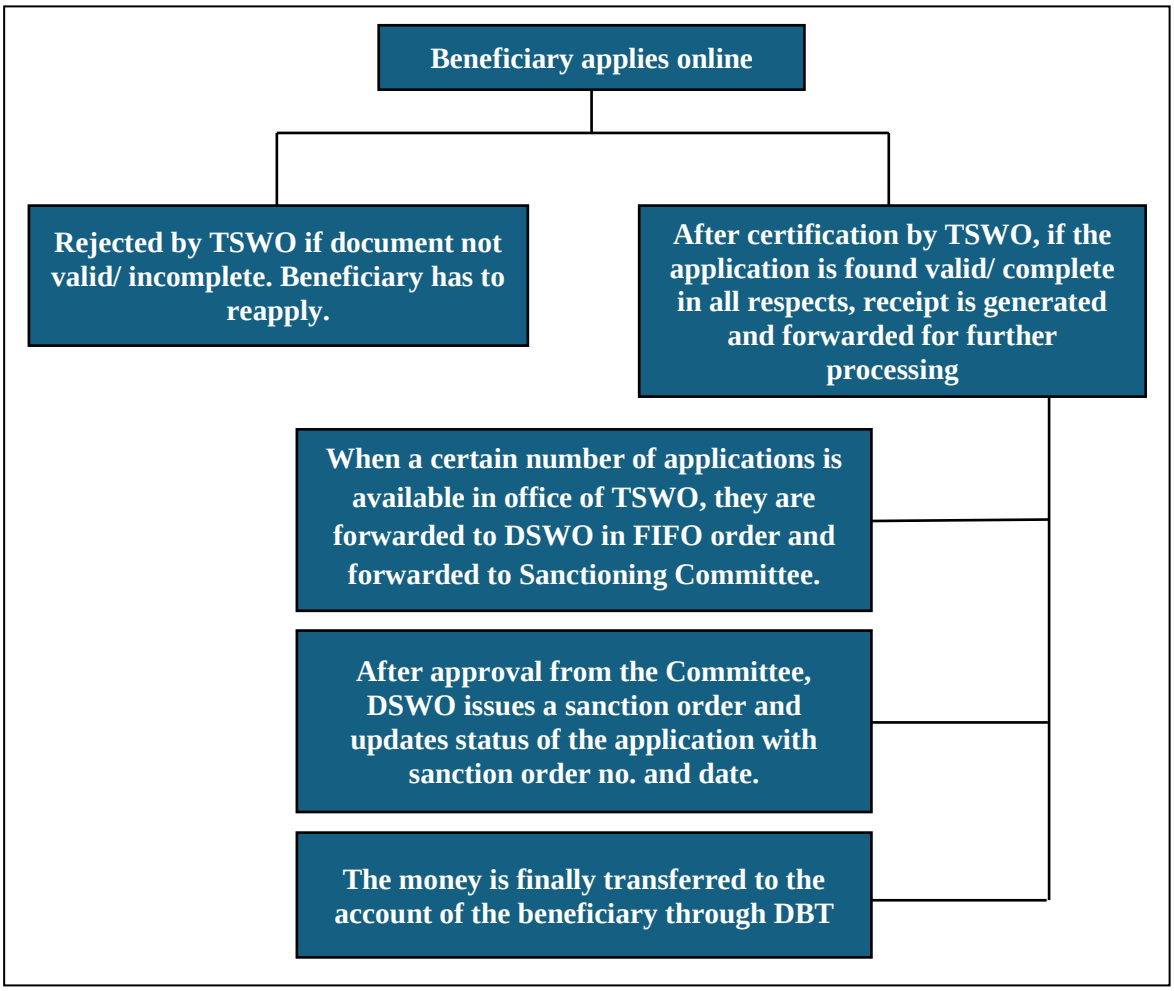
2.1.3.6 Partial Implementation of Online System of Registration

As per Office Memorandum[11] (March 2021) of Cabinet Secretariat, DBT Mission, GoI, for ensuring seamless and transparent delivery of benefits of major DBT Schemes to citizens, the State Governments/ UT Administration are required to develop end-to-end digitised IT-based platform which should inter-alia include (i) Online registration of beneficiaries, (ii) Computerised processing of applications and (iii) Electronic payment directly into the beneficiary's bank account. This was to be achieved by March 2022.

SWD was required to seek applications for registration of ISSS beneficiaries on the State portal developed by C-DAC. The Department was to follow system detailed in the **flowchart 2.1.3** for receipt of applications from intended beneficiaries, verification of applications, sanction of pension in favour of beneficiaries under the scheme and transfer of money into the bank account of beneficiaries.

[11] Vide No.D-13016/01/2021- DBT of March 2021.

Flow Chart 2.1.3: System to be followed by SWD for sanction and payment of benefits under ISSS



(Source: Departmental data)

Audit, however noticed that the Department had continued manual registration and verification of applicants defeating the intended purpose of DBT to reform benefit delivery system under ISSS. The portal was being used only at the stage of uploading sanctioned list of beneficiaries and payments made to them. The DBT system was not used to process the cases but was instead used only to keep the database. Details of manual registration of 4,66,191 applicants in the erstwhile State/ UT under ISSS during December 2018 to March 2022 are given in **Table 2.1.5.**

Table: 2.1.5: Details of Manual registration from December 2018 to March 2022

Region	Manual registration from December 2018 to March 2022				
	OAP	PCP	WID	TG	Total
Jammu	1,81,599	28,420	22,282	0	2,32,301
Kashmir	1,99,063	19,480	15,285	62	2,33,890
Total	**3,80,662**	**47,900**	**37,567**	**62**	**4,66,191**

(Source: C-DAC data)

Financial Advisor & CAO, Social Welfare Department, Srinagar in its reply stated (December 2022) that a new website namely JANSUGAM was launched during

October 2022 for full digitisation of ISSS under which application forms submitted online are automatically forwarded to TSWOs and whole process is made digital till sanction and subsequent payment to the beneficiaries. It was also stated (December 2022) that Director, SWD Jammu had received 967 applications on the new website out of which 12 were sanctioned and Director, SWD, Srinagar had sanctioned 100 cases on the new platform.

Social Welfare Department stated (September 2024) that under new ISSS Rules 2022 notified (September 2022), registration of new and existing beneficiaries is fully online.

2.1.3.7 Non-Integration with PFMS

Public Financial Management System (PFMS) is managed by the Controller General of Accounts (CGA), Ministry of Finance, and is used by various Government Departments and Implementing Agencies.

The main purposes of integrating the Centrally Sponsored Schemes/ UT specific schemes with PFMS were real-time monitoring and tracking of fund flow from the Government to the end beneficiary, reducing leakages by facilitation of direct transfer of benefits to beneficiaries' bank accounts and maintaining a comprehensive audit trail of every financial transaction.

Finance Department, GoJ&K impressed upon (June 2020) all Administrative Secretaries to create user agencies on the PFMS portal for all the Centrally Sponsored/ UT Specific Schemes implemented by the respective Departments by the end of June 2020. Despite Finance Department instructions, due to non-integration Department of Social Welfare could not get the advantage of better monitoring & tracking and reducing leakage of DBT beneficiaries account. Director, SWD, Jammu reported (January 2021) to its Administrative Department that ISSS pension was being disbursed smoothly in DBT mode on State portal maintained by C-DAC. It was also stated that data of pensioners was substantial and it was too time consuming to be loaded on PFMS portal before 1st February 2021. Audit noticed that as of April 2022, SWD had not been created as a user on the PFMS portal for disbursement of pension under ISSS.

Social Welfare Department stated (September 2024) that State Nodal Officer (SNO), PFMS has informed that they have been instructed by the Government to map all schemes that are fully funded by the Central Government on PFMS. It added that ISSS being a UT sponsored scheme could not be mapped on the PFMS. The reply is not acceptable as the instructions (June 2020) were applicable in respect of both Centrally Sponsored and UT Schemes. Thus, there was no real time monitoring and tracking of fund flow from the Government to the beneficiary.

2.1.3.8 Beneficiary data not updated

As per Rule 6 (5) of ISSS Rules, 1994, the validity of the pension to be disbursed on monthly basis shall be for a period of five years after which fresh application shall have

to be furnished by each beneficiary. The SWD was required to maintain records showing initial date of sanction of pension in favour of beneficiaries. Audit noticed in six test-checked Districts that in violation of the Rules, no such records had been maintained by the Department and fresh applications were not being obtained from the ISSS beneficiaries who may have availed the benefit under the scheme for over five years. Thus, by not checking validity of existing beneficiaries, de-weeding of ineligible beneficiaries could not be carried out.

It was also noticed that the centralised database lacked the field for recording the date from which beneficiaries were drawing pension prior to the implementation of DBT scheme. As such, it was not ascertainable which beneficiaries were continuously drawing pension for more than five years.

Social Welfare Department stated (September 2024) that ISSS Rules, 1994 have been repealed and ISSS Rules, 2022 have been notified (September 2022) wherein the scheme has been made end-to-end digitised. It added that weeding out of expired and remarried beneficiaries and those whose financial status has changed is a regular exercise and validity of existing beneficiaries and removal of ineligible beneficiaries is constant and automatic. The reply is elusive to the audit observation that before October 2022, the Department had not maintained records showing initial date of sanction of pension in favour of the beneficiaries and fresh applications were not being obtained from the ISSS beneficiaries availing the benefit under the scheme for over five years. Moreover, the date since when the beneficiary is taking benefit under ISSS is still not available on the centralised database.

2.1.3.9 Uploading of Beneficiary Details on JK Payment System

JK Payment System (JKPaySys) is the billing module under Integrated Financial Management System[12] (IFMS) and provides a common and integrated platform for DDOs to prepare all types of bills online for submission to treasuries for drawal of funds.

According to GoJ&K Circular of Finance Department (August 2020), while submitting bills to treasury on JKPaySys, a DDO has to upload orders sanctioning payment of assistance in favour of beneficiaries with details of amounts to be credited into their bank accounts by DBT.

Scrutiny of records of Directorates of SWD, Jammu and Kashmir revealed that in contravention of the Finance Department circular, bills were drawn on treasuries through JKPaySys without uploading orders sanctioning payment of assistance in favour of ISSS beneficiaries with details of amounts to be credited into their bank

[12] Integrated Financial Management System (IFMS) is an IT based budgeting and accounting system that integrates all financial functions of the Government such as budgeting, expenditure management, receipts, payments, accounting and reporting into a single framework.

accounts by DBT. Thus, no check was in place at treasuries to see that payments were credited by DBT only to the sanctioned beneficiaries and only sanctioned amounts were paid to them. This resulted in disbursement of pension to the beneficiaries online on the State portal without verification of beneficiaries at the treasuries.

Social Welfare Department stated (September 2024) that beneficiary details were not uploaded on JKPaySys, as it has the option to upload any file of up to only 515 KB but details of ISSS beneficiaries run into lakhs and the size of file goes up to 2 GB. It added that the matter would be taken up with the Finance Department.

2.1.4 Disbursement of Pension

2.1.4.1 Delay in Sanction of Pension

ISSS Rules, 1994 provide for application for grant of pension to be submitted in the office of Tehsil Social Welfare Officer (TSWO) between 1st of April and 10th of June every year. Expeditious and accurate payment of financial assistance were to be ensured in such a manner that most needy and deserving get top priority at the time of sanction. As per Rule 6 (5) of ISSS Guidelines, pension was to be disbursed monthly to the beneficiaries.

Audit noticed that:

- In five out of six test-checked District offices in which 1,79,944 cases were sanctioned during December 2018 to March 2022 (no details had been maintained in District Rajouri), 27,195 cases were test-checked to find out whether there was delay in sanction of pension cases. It was noticed that there was delay of 04 months to 134 months in sanction of 26,135 cases as detailed in **Table 2.1.6.**

Table 2.1.6: Delay in sanction of cases in five test-checked District offices

Name of the District	No of test-checked cases	Delay in sanctioning of cases (in months)
Jammu	3,844	4 to 98
Kathua	6,414	5 to 80
Baramulla	5,990	4 to 134
Budgam	5,357	4 to 134
Kupwara	4,530	4 to 24
Total	**26,135**	

(Source: Records of Sampled Districts)

It is evident from the **Table 2.1.6** that beneficiaries whose cases were sanctioned after delay were eligible but they were denied the pension for considerable periods defeating the intended objective of the scheme to provide expeditious assistance to the beneficiaries.

Social Welfare Department stated (September 2024) that ISSS has now been shifted (October 2022) to JANSUGAM portal and pension cases are sanctioned by DSWOs as per departmental Guidelines. It added that timelines have been fixed at various levels for processing of pension cases and any delays are automatically reported to the Appellate Authorities. The fact remained that before October 2022, eligible beneficiaries were denied the pension for considerable periods which defeated the intended objective of the scheme to provide expeditious assistance to the beneficiaries.

2.1.4.2 Denial of Assistance to the Beneficiaries

After receipt of pension cases under ISSS in the offices of District Social Welfare Officers (DSWOs), the documents enclosed with cases are verified and forwarded to Directorate Offices of Jammu and Kashmir, which further check the validity of documents and get bank account numbers of the beneficiaries verified by the concerned bank. Thereafter the beneficiary data was being uploaded by DSWOs on the State portal.

Audit analysis of the database provided by the C-DAC revealed that data of 36,553 eligible beneficiaries (Jammu: 20,202 and Kashmir: 16,351) who were receiving pension before the introduction (December 2018) of DBT, had been uploaded by 20 DSWOs of the UT of J&K on the portal from December 2018 onwards but no payment was made to these beneficiaries as of March 2022, resulting in denial of intended benefit of the scheme to these beneficiaries as detailed in **Table 2.1.7**.

Table 2.1.7: Denial of assistance to eligible beneficiaries

Year	Number of beneficiaries		Total
	Kashmir	Jammu	
2018-19	2,081	2,244	4,325
2019-20	2,269	2,720	4,989
2020-21	2,074	3,149	5,223
2021-22	9,927	12,089	22,016
Total	**16,351**	**20,202**	**36,553**

(Source: C-DAC Data)

In six test-checked Districts, 17,831 eligible beneficiaries (OAP: 14,790; WID: 1,475; PCP: 1,506; TG: 11, Saksham[13]: 49) were not paid pension as of March 2022 despite their data was uploaded on the portal from December 2018 onwards. No reasons were on record for non-payment of pension to these beneficiaries.

Social Welfare Department stated (September 2024) that details of beneficiaries uploaded on the portal are required to be got validated/ verified from the bank and the concerned DSWOs. It added that the Department tries to approach the beneficiaries, who could not be validated by the bank/ DSWOs, through DSWOs to get their details

[13] Paid to families of persons who died of Covid-19.

validated but at times contact with beneficiaries who reside in far flung areas cannot be made due to which their payments cannot be timely processed. The Department further stated that payments were made to a good number of beneficiaries who updated their account details and those who did not turn up were deactivated from the portal. The reply is not based on fact as audit scrutiny of database of beneficiaries revealed that none of the 36,553 beneficiaries who were earlier drawing pension, were either deactivated or paid pension assistance after their data were uploaded from December 2018 onwards up to September 2022.

2.1.5 Irregularities in payment of pension

Eligibility criteria for providing financial assistance to beneficiaries under ISSS is detailed in **Table 2.1.8.**

Table 2.1.8: Eligibility criteria for providing financial assistance under ISSS

Sl. No.	Particulars	OAP	WID	PCP
1.	Age	Men above 60 years and Women above 55 years	Widows/ Divorcees above 40 years	Physically Challenged Persons (PCP) with disability of 40 *per cent.*
2.	Verification	Proof of Date of Birth	Death certificate of husband and proof of Date of Birth	Disability certificate from Government Medical Officer
3.	Annual income Ceiling	Less than ₹ 75,000/- (Income Certificate from Tehsildar concerned)		

(*Source: ISSS Rules, 1994*)

2.1.5.1 Payment of Pension to Beneficiaries who had not Attained Prescribed Age

In six test-checked Districts, out of 9,170 OAP and WID beneficiaries whose physical files were test-checked, it was noticed that, in respect of five Districts that no mechanism had been put in place by DSWOs to check whether the beneficiaries had attained prescribed age for payment of pension assistance. Resultantly, 89 beneficiaries who had not attained the prescribed age of 60, 55 or 40 years had been paid inadmissible pension of ₹ 7.93 lakh under the scheme as detailed in **Table 2.1.9.**

Table: 2.1.9: Details of beneficiaries who had not attained prescribed age

Name of the District	Number of Beneficiaries		Inadmissible Payment (In ₹)
	OAP	WID	
Rajouri	3	27	6,00,000
Kathua	5	8	67,000
Budgam	15	-	33,000
Baramulla	15	-	45,000
Kupwara	16	-	48,000
Total	**54**	**35**	**7,93,000**

(*Source: Records of sampled Districts*)

While accepting the audit findings, Social Welfare Department stated (September 2024) that the issue has now been addressed as the payments are being made to sanctioned beneficiaries on JANSUGAM portal as per Guidelines of ISSS. It added that pension payments were halted in cases where beneficiaries had not attained the prescribed age and beneficiaries are now required to provide valid proof of age for preventing payments to ineligible individuals.

2.1.5.2 Double/ Triple Payments to the Same Beneficiary

In Rajouri District two WID beneficiaries[14] had been uploaded on the portal twice with different bank account numbers and pension was credited into both the account numbers resulting in excess payment of ₹ 56,000 to these beneficiaries.

In view of lockdown period due to Covid-19, Finance Department, GoJ&K instructed (March 2020) SWD that under ISSS two installments of pension may be paid immediately to nearly 7.7 lakh persons including 1.7 lakh pending cases. SWD sanctioned the pending 1.7 lakh cases in April 2020.

Audit noticed in three test-checked Districts[15] that out of 28,254 (Jammu: 16,109, Kathua: 6,470 and Rajouri: 5,675) new cases sanctioned by the Department, 2,864 beneficiaries (OAP: 1,228; PCP: 938 and WID: 698) were paid ₹ 57.28 lakh for April and May 2020 both by respective DSWOs and Directorate of SWD Jammu through DBT mode resulting in double payment of ₹ 57.28 lakh.

Further, for the months of April and May 2020 names and bank account numbers of 194 ISSS beneficiaries[16] (OAP: 149; PCP: 01 and WID: 44) were included twice or thrice in the same bank advice resulting in double/ triple payment to the same beneficiary amounting to ₹ 3.92 lakh.

Thus, lack of oversight and monitoring by SWD had resulted in double payment to the beneficiaries causing financial loss to the Government.

Social Welfare Department stated (September 2024) that double payment of pension of ₹ 20.51 lakh stands recovered by DSWO Rajouri and DSWOs of Jammu and Kathua have approached the banks for initiation of recovery from the concerned accounts.

2.1.5.3 Payment of Pension to Beneficiaries without Seeking Required Documents

Scrutiny of 9,170 application forms pertaining to beneficiaries of six test-checked Districts revealed that assistance was sanctioned and paid to beneficiaries either without seeking necessary documents or were ineligible for reasons including husband and wife[17] both receiving pension as detailed in **Table 2.1.10.**

---

[14] G********n K**r: (Bank A/c No:084**********23; 002**********53); R****d B****m: (Bank A/c No: 061**********17; 002**********33).

[15] The comment is about three Districts of Jammu Division as Payments in Kashmir division were made at the Directorate level.

[16] Jammu: 104, Kathua: 78 and Rajouri: 12

[17] As per Rule 2 (h) of ISSS Rules 1994, destitute for the purpose of grant of OAP means a person who has no relation of son above 20 years of age or husband/ wife.

Table 2.1.10: Payment of pension without required documents and payments to both husband and wife

Component	District	No of test-checked cases	Income certificate not appended	Both husband and wife drawing pension	Disability certificate not appended/ temporary/ invalid	Death certificate not appended	Forms verified by DSWO/ TSWO
OAP	Baramulla	1,000	71	161	0	0	Nil
	Budgam	775	41	119	0	0	Nil
	Kupwara	1,500	12	190	0	0	Nil
	Kathua	1,071	187	43	0	0	Nil
	Jammu	930	153	25	0	0	Nil
	Rajouri	793	38	10	0	0	Nil
	Total	**6,069**	**502**	**548**	**0**	**0**	**Nil**
WID	Baramulla	100	12	0	0	0	Nil
	Budgam	100	20	0	0	0	Nil
	Kupwara	100	22	0	0	0	Nil
	Jammu	228	73	0	0	10	Nil
	Kathua	421	97	0	0	15	Nil
	Rajouri	529	30	0	0	41	Nil
	Total	**1,478**	**254**	**0**	**0**	**66**	**Nil**
PCP	Baramulla	115	05	0	7	0	Nil
	Budgam	100	27	0	3	0	Nil
	Kupwara	165	37	0	2	0	Nil
	Jammu	450	20	0	17	0	Nil
	Kathua	421	0	0	29	0	Nil
	Rajouri	372	1	0	35	0	Nil
	Total	**1,623**	**90**	**0**	**93**	**0**	**Nil**
	Grand total	**9,170**	**846**	**548**	**93**	**66**	**Nil**

(*Source: Records of Sampled Districts*)

Sanction and payment of pension to beneficiaries without seeking necessary documents and payment to other ineligible beneficiaries (both husband and wife) was indicative of deficient process for sanction of assistance in favour of applicants under ISSS, including deficiency in registration and scrutiny of applications forms. Further, the applications forms were not verified by the respective DSWO/ TSWO.

2.1.5.4 Benefits Credited into Wrong Bank Accounts

Analysis of data of beneficiaries of erstwhile State/ UT provided by C-DAC revealed that in 12 out of 20 Districts of Jammu and Kashmir, as of March 2022, pension of ₹ 9.97 crore payable to 5,552 ISSS beneficiaries for period ranging between 02 and 39 months had been credited to the bank accounts of persons other than these beneficiaries as verified by the concerned bank authorities resulting in payment to ineligible beneficiaries and denial of pensionary benefit to eligible beneficiaries.

This was indicative that SWD had conveyed wrong details of beneficiaries to the bank for credit of pension sanctioned for ISSS beneficiaries. Details are given in **Table 2.1.11.**

Table 2.1.11: Benefit credited into wrong bank accounts

S. No	Name of District	Number of beneficiaries	Amount credited (in ₹)
1.	Jammu	71	22,22,000
2.	Kathua	228	74,15,000
3.	Rajouri	83	25,14,000
4.	Budgam	113	29,06,000
5.	Ganderbal	6	88,000
6.	Baramulla	84	21,35,000
7.	Kupwara	4,709	7,95,48,000
8.	Samba	182	15,41,000
9.	Ramban	25	3,95,000
10.	Doda	6	1,33,000
11.	Udhampur	9	99,000
12.	Poonch	36	7,25,000
	Total	**5,552**	**9,97,21,000**

(*Source: C-DAC Data*)

Due to credit of pension to persons other than the eligible beneficiaries, chance of fraud and misappropriation of funds by the departmental authorities cannot be ruled out.

While accepting the audit contention, Social Welfare Department stated (September 2024) that the necessary corrections have been made and in case of incorrect accounts recoveries have been initiated.

2.1.5.5 Payment credited other than prescribed rates of pension

Audit analysis of data of beneficiaries in the UT of J&K revealed that 7,215[18] beneficiaries were paid more than ₹ 1,000 per month (ranging between ₹ 1,008 and ₹ 10,000) resulting in excess payment of ₹ 2.89 crore to these beneficiaries and 233[19] beneficiaries were paid less than ₹ 1,000 per month (ranging between ₹ 66 and ₹ 167) resulting in less payment of ₹ 2.01 lakh to these beneficiaries. No monitoring/ internal control mechanism was in place either in the database or otherwise to avoid irregular excess/ less payments to the beneficiaries.

Social Welfare Department stated (September 2024) that amounts are directly credited to Aadhaar seeded accounts at ₹ 1,000 per month. The reply is not acceptable as payments were credited to the beneficiaries at rates other than the prescribed one.

[18] Ganderbal: 4,002, Budgam: 01, Shopian: 3,208 and Kupwara: 04

[19] Kathua: 167 and Poonch: 66

2.1.5.6 Payment into accounts of deceased beneficiaries

The DBT Mission, GoI recommends that database of beneficiaries of DBT schemes being maintained by respective Departments needs to be dynamic and linked to death registrations. Paragraph 7 (4) of ISSS Rules 1994 stipulates that in case of death of a beneficiary who was getting pension on a monthly basis, un-drawn pension before his/ her death shall lapse. Further as per Paragraph 7 (5) of said rules, the Tehsil Officer shall obtain life certificate in respect of the beneficiary every month before making payment.

Audit noticed that Tehsil Officers of the Department were not obtaining life certificate from the beneficiary every month before making payment and no mechanism was in place to identify deceased beneficiaries from details of deaths registered in municipalities, hospitals, etc., so that no financial assistance after their death was transferred to their bank accounts. The Department was not able to ensure that irregular payments were not made in respect of the deceased pensioners as it was relying only on information of deaths received from Aanganwadi workers, Sarpanches of Gram Panchayats and banks.

Audit scrutiny (April 2022 to October 2022) of records of deceased beneficiaries maintained[20] in five out of six test-checked Districts revealed that the DSWOs had not stopped payment of pension even in respect of those deceased beneficiaries' information about whose death was known to them. DSWO Baramulla had not maintained any records of deceased beneficiaries.

Audit noticed that:

- During 2018-2022, pension of ₹ 3.95 lakh had been transferred into bank accounts of 44 beneficiaries after their death resulting in blockade of money in their bank accounts.
- Legal heirs of 72 deceased beneficiaries had drawn ₹ 9.37 lakh from bank accounts of deceased beneficiaries resulting in loss to the Government.
- One beneficiary drawing widow pension was not eligible for pension under ISSS as she was drawing family pension of ₹ 10,830 per month. Pension benefits of ₹ 29,000 was paid to the ineligible beneficiary under ISSS with effect from January 2019 to May 2021. It was also noticed that pension was credited to her bank account even after her death on 06 March 2021.

Social Welfare Department stated (September 2024) that deletion of data of death cases is a regular process after receipt of check list from DSWOs. The reply is not based on fact as no mechanism was in place in the Department to identify deceased beneficiaries from details of deaths registered in municipalities, hospitals, etc. so that no financial assistance was made to deceased beneficiaries.

[20] On the basis of information received from a relative of the deceased pensioner or any other source.

2.1.6 Other issues

- **Non-accounting of ₹ 1.41 crore recovered from accounts of deceased beneficiaries by four DSWOs**

Rule 2.59 of J&K Financial Code Vol-I stipulates that amounts withdrawn from the treasury/ bank during a month are required to be reconciled with the treasury/ bank records at the end of the month and verified monthly figures are to be communicated to the Controlling Officer.

Audit noticed in four out of six test-checked Districts, ₹ 1.41 crore[21] recovered (December 2018 to March 2022) from the bank accounts of deceased beneficiaries and credited into the bank accounts of the respective DSWOs, had not been communicated to the higher authorities. The amount was held in the DDO bank accounts and was not credited into proper head of Government account.

Social Welfare Department stated (September 2024) that instructions have been issued to DSWOs for conducting verification of balances with the bank and identification of amounts recovered from the accounts of deceased beneficiaries.

- **Management of failed transactions**

As per Section 7 of Standard Operating Procedures for DBT, failed payment transactions are to be re-initiated by the Department after carrying out required modification/ rectification.

Audit observed in six test-checked Districts that though information of failed transactions was available in Directorates of Jammu and Kashmir and DSWOs, only limited steps had been taken by the Department in respect of failed payment transactions.

During audit analysis of data of beneficiaries of erstwhile State/ UT, 49,504 (Jammu: 20,519; Kashmir: 28,985) failed transactions amounting to ₹ 4.95 crore were noticed in respect of 18,261 (Jammu: 8,192; Kashmir: 10,069) beneficiaries during December 2018 to March 2022 as detailed in **Table 2.1.12.**

Table 2.1.12: Number of failed ISSS transactions in the erstwhile State/ UT

Year	Kashmir	Jammu	Total
2018-19	2,064	3,788	5,852
2019-20	6,933	7,183	14,116
2020-21	9,596	5,484	15,080
2021-22	10,392	4,064	14,456
Total	**28,985**	**20,519**	**49,504**

(*Source: C-DAC Data*)

As of March 2022, out of 49,504 failed transactions, only 9,913 failed transactions (Jammu: 3,067 and Kashmir: 6,846) pertaining to 3,355 beneficiaries (Jammu: 885;

[21] Jammu: ₹ 4.39 lakh; Budgam: ₹ 53.01 lakh; Baramulla: ₹ 69.17 lakh; and Kupwara: ₹ 14.40 lakh.

Kashmir: 2,470) were updated. Out of 9,913 updated failed transactions, only 4,939 transactions (Jammu: 1,759 and Kashmir: 3,180) were cleared by the bank by crediting amounts in the bank accounts of the beneficiaries. Non-clearance of remaining 4,974 transactions out of 9,913 updated transactions and 44,565 out of total 49,504 failed transactions implied that failed transactions were not promptly tracked, monitored and reconciled by the Department resulting in deprivation of financial assistance to intended beneficiaries of ISSS.

Social Welfare Department stated (September 2024) that failed transactions are due to submission of incorrect details like IFSC code, Bank Account etc. by the beneficiaries and payment of pension is made after verification and validation of accounts. It added that no eligible beneficiary is deprived of the due benefit. The reply does not address the fact that failed transactions were not promptly tracked, monitored and reconciled by the Department resulting in deprivation of financial assistance to intended beneficiaries of ISSS.

- **SMS alert to beneficiaries**

Paragraph 16 (4.1) of 'Standard Operating Procedure for DBT payments' stipulates that Destination bank[22] should inform credit/ debit status to beneficiary through SMS. Information regarding returned transactions (return of funds to Sponsor bank) should also be sent by the Destination bank to the beneficiary through SMS. Audit observed that as of October 2022, no mechanism had been put in place to inform the beneficiary through SMS about payment of financial assistance by DBT into their account or about returned transactions.

Social Welfare Department stated (September 2024) that audit instructions have been noted and passed on to the banks so that beneficiaries are updated about debit/ credit status through SMS.

- **Deactivation of beneficiaries**

Audit analysis of database of beneficiaries of erstwhile State/ UT revealed that as of March 2022, 45,784 (Jammu: 13,471 and Kashmir: 32,313) beneficiaries had been deactivated. Though there was a field for capturing reasons for deactivation of beneficiaries, reasons for deactivation of these beneficiaries were not captured in the database.

Months for which social security payments were made to these beneficiaries before their deactivation ranged between 02 months and 40 months.

Social Welfare Department stated (September 2024) that deactivation is done only in respect of expiry, remarriage and change in financial status of beneficiaries. The reply is not convincing as reasons for deactivation were not captured in the database.

[22] In a credit transfer, the destination bank is the payee's bank.

- **Lack of convergence with similar schemes**

SWD disburses Old Age, Disability and Widow pension under State/ UT sponsored ISSS and Centrally sponsored National Social Assistance Programme (NSAP). ISSS is intended to cover such destitute persons who may not be covered under NSAP.

Audit noticed that though same procedure was followed for registration and sanction of pensionary benefits under the two schemes up to December 2021, no mechanism was in place to prevent availing of benefit by a beneficiary under both the schemes.

Comparison of data of the two schemes revealed that 6,219 beneficiaries had been availing the benefit in the erstwhile State/ UT both under NSAP and ISSS.

Comparison of list (October 2022) of NSAP payments furnished by six test-checked DSWOs to Audit with list (March 2022) of ISSS beneficiaries as per C-DAC revealed that 1,627 beneficiaries were included in both the lists. A sample cross-check of 1,627 beneficiaries with their bank statements showed that 1,474 beneficiaries were paid pension of ₹ 8.49 crore (ISSS: ₹ 3.89 crore and NSAP: ₹ 4.60 crore) either under one of the two schemes or under both the schemes for different periods during December 2018 to November 2022. ₹ 3.24 crore was paid to these beneficiaries under both the schemes during the period. Audit further noticed that as of November 2022, only 375 out 1,474 beneficiaries were removed from one of the two schemes while 1,099 (75 *per cent*) continued to be paid pension under both the schemes.

Social Welfare Department stated (September 2024) that ISSS is now implemented on JANSUGAM portal on which applicants must provide an affidavit that they are not receiving benefits from other schemes. However, the reply was silent with regard to action taken in respect of 6,219 beneficiaries who irregularly availed benefits of both the schemes.

2.1.7 Beneficiary Survey

A survey of 1,200 beneficiaries in 12 TSWOs of six sampled Districts revealed that:

- 102 (nine *per cent*) beneficiaries were not eligible to receive pension under ISSS as 12 beneficiaries had income of over ₹ 6,500 per month and in 90 cases (eight *per cent*) both husband and wife were beneficiaries.

- 70 respondents (six *per cent*) stated that SWD had sanctioned their cases three months to six months after they had submitted their applications. 540 beneficiaries (45 *per cent*) stated that the Department had taken 06 months to 12 months to approve their cases, 232 (19 *per cent*) beneficiaries reported that the Department took about one to two years to sanction their cases while 204 beneficiaries (17 *per cent*) stated that processing of their cases took over two years.

- 800 beneficiaries (67 *per cent*) had collected the application forms free of cost from TSWOs and 400 beneficiaries (33 *per cent*) had purchased application forms from Photostat shops.

- Only 69 *per cent* beneficiaries were aware about details of the Scheme.

- Out of the total beneficiaries (69 *per cent* as mentioned above) who were aware, 54 *per cent* beneficiaries stated that they got information about the scheme from the SWD and other 46 *per cent* stated that they got the information from other sources.

2.1.8 Monitoring

Monitoring and oversight mechanism for implementation of ISSS as envisaged in ISSS Rules, 1994 were not in place in test-checked Districts as discussed in succeeding paragraphs.

2.1.8.1 Non-constitution of District Level Monitoring Committees

To weed out ineligible beneficiaries who had become self-sufficient, Rule 8 (2) of ISSS Rules, 1994 stipulates constitution of District Level Committees (DLCs) for quarterly/ annual review of all cases sanctioned under the scheme. Audit noticed in test-checked Districts that DLCs had not been constituted for reviewing sanctioned cases and District Development Commissioners or DSWOs had not conducted random checks to identify ineligible beneficiaries.

Social Welfare Department stated (September 2024) that after notification (September 2022) of revised ISSS Rules, 2022 meetings of Gram Sabha/ Ward Committee would be conducted after every quarter for identification of left over eligible beneficiaries and weeding out of ineligible cases. The reply is silent about non-constitution of DLCs for quarterly/ annual review of all cases sanctioned under the scheme.

2.1.8.2 Non-constitution of departmental DBT Cell/ Committee

Paragraph 2.1 of 'Protocol Document on DBT in States' provides that apart from State DBT Cell, individual Departments shall also constitute a DBT Cell/ Committee, to ensure that DBT framework is adopted in implementation of schemes. Audit noticed that as of March 2022, SWD had not constituted a DBT Cell/ Committee as envisaged in the Protocol Document.

Social Welfare Department stated (September 2024) that audit observation has been noted for compliance and constitution of departmental DBT Cell/ Committee is under process.

2.1.8.3 Inadequate grievance redressal mechanism

SWD had not put in place a grievance redressal mechanism in the DSWOs to keep

record of complaints received from public regarding implementation of the scheme and action taken thereon. DSWOs had not monitored public grievances as no such records/ registers were maintained in these offices.

Social Welfare Department stated (September 2024) that the JANSUGAM portal is integrated with Auto Appeal System to comply with Public Services Guarantee Act and applications not processed within 30 days are automatically forwarded to the Director, SWD.

2.1.8.4 Conclusion

Despite lapse of over four years since GoJ&K decided (December 2018) to bring the social security schemes under DBT, during the period covered under audit, the SWD was using the DBT portal only as a database and not as an end-to-end solution from registration of beneficiaries to payment of pension. Bank accounts of only 70 *per cent* ISSS beneficiaries in the erstwhile State/ UT were linked with Aadhaar numbers. After uploading the beneficiaries' data in Application software, any review to check the completeness, authenticity and correctness of the legacy data was not conducted. Audit noticed cases of duplicate records of beneficiaries, non-exclusion of ineligible beneficiaries, payment of financial assistance to same beneficiaries under more than one scheme and payments to ineligible beneficiaries. Mechanism was not in place in the SWD for identification of deceased beneficiaries to ensure discontinuance of financial assistance in respect of deceased beneficiaries.

2.1.8.5 *Recommendations*

- ***Department needs to complete the process of linking the Aadhaar Card details of beneficiaries with their bank accounts on priority.***
- ***There is a need to carry out comprehensive review of data of beneficiaries including the legacy data already ported in application to ensure its completeness, authenticity and correctness.***
- ***Department should comply with instructions of Finance Department on PFMS for better monitoring and tracking.***
- ***Social Welfare Department may address the failed transactions reported by respective banks expeditiously.***
- ***Beneficiaries' data need to be integrated with the death data available with the Registrar General of India to ensure discontinuance of financial assistance in respect of deceased beneficiaries.***
- ***To avoid delays, the Government may ensure end-to-end integration of DBT scheme so that payments are directly transferred in real time basis into the bank accounts of beneficiaries through PFMS/ IFMS without involvement of DDO Bank account.***

CHAPTER- III

COMPLIANCE AUDIT

CHAPTER-III

COMPLIANCE AUDIT

Housing and Urban Development Department

3.1 Solid Waste Management in Urban Local Bodies (ULBs)

3.1.1 Introduction

As per the Solid Waste Management (SWM) Rules, 2016, framed under the Environment (Protection) Act, 1986, 'Solid Waste' (SW) includes solid or semi-solid domestic waste, sanitary waste, commercial waste, institutional waste, catering and market waste, other non-residential wastes, street sweepings, silt removed or collected from the surface drains, horticulture waste, agriculture and dairy waste.

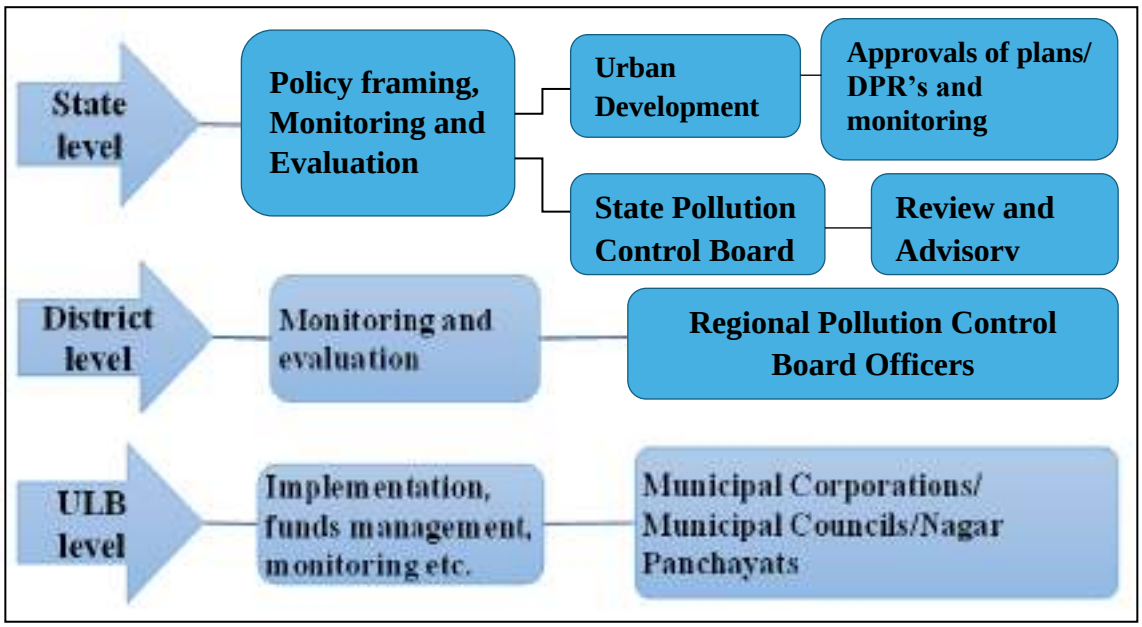
Further, SWM Rules, 2016, provide a legal framework for disposal and management of Solid waste and entrust responsibilities at State/ Urban Local Body/ Citizen level. Guidelines for preparation of a comprehensive plan for prevention, control or abatement of pollution by using scientific SWM techniques have been issued by Government of India (GoI) from time to time.

3.1.2 Administrative Control and Monitoring

In UT of Jammu & Kashmir, function of Solid Waste Management (SWM) is being carried out by the Urban Local Bodies (ULBs).

Role of various authorities in planning, execution and monitoring SWM is depicted in **Chart 3.1.1.**

Chart 3.1.1: Role of Various Authorities



Housing & Urban Development Department (H&UDD) headed by Commissioner/ Secretary is responsible for Solid Waste Management in Union Territory of J&K. He is assisted at the apex level by Director Planning, Mission Director (Swachh Bharat Mission), Director Finance and at the implementation level by Chairmen, Jammu Municipal Council (JMC) and Srinagar Municipal Council (SMC), Directors ULBs Jammu/ Kashmir and 76 Chief Executive Officers (CEOs) of Municipal Councils/ Committees. Commissioner, Forest, Ecology and Environment Department assisted by Chairman, Jammu and Kashmir Pollution Control Committee (J&KPCC) and its two Regional Directors Jammu/ Kashmir are also responsible for implementation of the solid waste management rules in State/ UT of J&K.

3.1.3 Audit Objectives

This Subject Specific Compliance Audit (SSCA) was conducted to assess whether:

- strategy and planning of SWM in ULBs is commensurate with the wastes generated and aligns with the prevailing legal framework;
- collection, segregation, storage, transportation and disposal of solid waste were effective, efficient and economical.
- planning, construction, commissioning, operation and maintenance of SWM projects were effective, efficient and financially sustainable;
- steps were taken for social inclusion of informal waste workers and
- monitoring and evaluation of SWM system were effective in ensuring awareness generation, citizen engagement for behavioural change, complaint redressal and assessment of environmental impact.

3.1.4 Audit Scope, Sample and Methodology

The SSCA on SWM in ULBs covered the period 2017-18 to 2021-22. It entailed examination (October 2022 to March 2023) of the records relating to SWM in the Administrative Department i.e Housing & Urban Development Department (H&UDD), Mission Director, Swachh Bharat Mission (SBM), Directors of Urban Local Bodies (ULBs), Jammu/ Kashmir and 15 ULBs (Kashmir: eight[1]; Jammu: seven[2]) out of 76 ULBs which were selected on the basis of Probability proportional to size without Replacement method. Additionally, records of Jammu Municipal Corporation (JMC) and Srinagar Municipal Corporation (SMC), Chairman, Jammu and Kashmir Pollution Control Committee (J&KPCC) and Regional Directors, J&KPCC, Jammu/ Kashmir were also audited.

[1] ULB's Anantnag, Sumbal, Kupwara, Langate, Budgam, Kulgam, Bijbehara and Khansahib.
[2] ULB's Doda, Rajouri, Sunderbani, Reasi, Kathua, Udhampur and Hiranagar.

An Entry Conference was held on 27th January 2023 with the Director Finance, Housing and Urban Development Department (H&UDD) of the Jammu and Kashmir Government during which the audit objectives, scope, and methodology were explained. Audit findings were discussed in an Exit Conference held with the Commissioner/ Secretary to Government, H&UDD on 10th February 2025. The replies furnished during the Exit Conference have been incorporated in the report at relevant places.

The audit methodology involved document analysis, responses to audit queries, joint physical inspections with municipal staff and collection of photographic evidence.

3.1.5 Audit Criteria

The Audit was conducted against the following criteria:

- Solid Waste Management (SWM) Rules, 2016 and Manuals (Part-I and II) of Municipal Solid Waste Management (MSWM) issued by GoI in the Year 2016;
- Construction and Demolition Waste Management (C&DWM) Rules, 2016;
- E-Waste Management Rules, 2016;
- Environment (Protection) Act and Rules, 1986;
- National Urban Sanitation Policy, 2008;
- Revised Swachh Bharat Mission Guidelines issued by Ministry of Housing and Urban Affairs (MoH&UA), GoI; and
- Instructions, guidelines, policies issued from time to time by Central Pollution Control Board (CPCB), J&K Pollution Control Committee (J&KPCC), GoI/ GoJ&K in respect of SWM.

3.1.6 Swachh Survekshan Survey/ CPCB Annual Report

Swachh Survekshan is an annual ranking exercise started by the Ministry of Housing and Urban Affairs (MoH&UA), GoI in the year 2016 to assess urban areas of country on their levels of cleanliness and active implementation of Swachhta mission initiatives in a timely and innovative manner. Rankings of sampled cities of J&K based on the coverage of 4,354 cities in the country, which are categorised into National ranking and Zonal ranking depending upon the population of a city, for the year 2022 are detailed in **Table 3.1.1.**

Table 3.1.1: Ranking of Cities/ Towns of J&K under Swachh Survekshan

Rank	Total Cities	Population	Name of City	Score obtained out of 7,500
National ranking				
41	45	More than 10 lakh	Srinagar	2,986.75
199	382	1 lakh to 10 lakh	Jammu	2,983.22
380	382	1 lakh to 10 lakh	Anantnag	827.69
Zonal ranking				
65	96	50k to 1 lakh	Kathua	2,186.39
76	96	50k to 1 lakh	Udhampur	1,978.75
80	199	25k to 50k	Rajouri	2,502.48
255	284	15k to 25k	Doda	1,504.94
274	284	15k to 25k	Kulgam	1,077.35
278	284	15k to 25k	Bijbhera	938.5
280	284	15k to 25k	Budgam	895.68
281	284	15k to 25k	Kupwara	849.67
152	437	Less than 15k	Hiranagar	2,316.79
255	437	Less than 15k	Sunderbani	1,956.35
370	437	Less than 15k	Reasi	1,512.08
415	437	Less than 15k	Sumbal	1,162.93
431	437	Less than 15k	Khansahib	870.01
434	437	Less than 15k	Langate	785.15

(*Source: Swachh Survekshan Survey*)

It may be seen from the **Table 3.1.1** that in Swachh Survekshan National ranking, Srinagar ranked 41 out of 45 cities having population of over 10 lakh. Jammu and Anantnag ranked 199 and 380 respectively out of 382 cities having a population between one lakh and 10 lakh. All the other sampled ULBs had ranked more than 100 in Zonal ranking except Kathua, Udhampur and Rajouri.

Similarly, according to Central Pollution Control Board (CPCB) Annual Report 2019-20 on Implementation of SWM Rules, 2016, J&K ranked 26th out of 35 States/ UTs and in the Annual Report 2020-21, J&K ranked 25th out of 35 States/ UTs of the country in environmental performance in respect of SWM.

The below-average rankings of J&K as per Swachh Survekshan Survey and CPCB Annual Report were indicative of poor performance of ULBs of the State/ UT in SWM.

The Department stated (January 2024) that it is taking various initiatives like setting up of two waste processing facilities for proper waste management through

segregation, collection, transportation, processing and disposal of waste, which would help to achieve the best rank in Swachh Survekshan assessment. It was also stated that for ensuring scientific processing of Municipal Solid Waste, establishment of Solid Waste Management Centres (SWMCs)/ Material Recovery Facility (MRF) in 46 locations has been undertaken out of which 23 are already functional with work in progress at remaining 23 sites.

3.1.7 Solid Waste Management Planning

Rule 11 (a) of SWM Rules, 2016 envisaged that the Secretary, Urban Development Department in the State or Union Territory through the Commissioner or Director of Municipal Administration or Director of local bodies shall prepare a state policy and solid waste management strategy for the State or the Union Territory. Further, Rule 11 (b) envisaged that while preparing State policy and strategy on waste management, emphasis should be laid on waste reduction, reuse, recycling, recovery and optimum utilisation of various components of solid waste to ensure minimisation of waste going to the landfill and minimise impact of solid waste on human health and environment.

Audit examination disclosed that although GoJ&K prepared SWM strategy policy in 2017, it had not been finalised/ notified as of January 2024. As such, implementation of 3 Rs (Reduce, Reuse and Recycle) in the State/ UT of J&K for SWM was deficient in policy direction.

During Exit Conference, Commissioner/ Secretary H&UDD admitted (February 2025) that policy has not been notified. It was further stated that SBM Guidelines alongwith Report of MoH&UA regarding solid and liquid waste management are quite detailed and there is no requirement of separate strategy document to be framed by GoJ&K. However, J&K is working on circular economy framework, first draft of which is under discussion.

The reply is not acceptable, as the SWM strategy policy prepared in 2017 has not been finalised/ notified as of February 2025 and the first draft is under discussion. The notified policy as envisaged in rules 11 (a) and (b) of SWM Rules, 2016 would have provided a laid down framework for waste management to all the ULBs in the UT of J&K.

3.1.7.1 Solid Waste Management Plan of ULBs

(I) Rule 15 (e) of SWM Rules, 2016 envisages that ULBs should frame bye-laws incorporating the provisions of SWM Rules, 2016 within one year from the date of notification of SWM Rules, 2016 and ensure timely implementation.

Audit observed that in the 17 sampled ULBs, including JMC and SMC, bye-laws under SWM Rules had been notified by GoJ&K, after delay of over two years (in 2019 and 2020).

The Department attributed (January 2024) the delays to various reasons observed in the State/ UT from 2016 to 2019 and added that elections to the ULBs were held in 2018 after eight years and after that bye-laws were framed by the ULBs. The bye-laws have been published and enforced now.

(II) Section 1.4.6 of Municipal Solid Waste Management (MSWM) Manual, 2016 envisaged that ULBs should prepare a short-term SWM plan for five years and a long-term plan for a period of 20-25 years. Each short-term plan was to be reviewed every two-three years to ensure higher success in implementation of plan activities. The implementation plan should also include a detailed estimate of required human resources and investments.

Audit noted that an action plan for five years (2021-22 to 2025-26) was prepared in the offices of Directors, Jammu and Kashmir for all ULBs of J&K, which was belatedly approved in March and July 2021. In respect of JMC and SMC, while short-term plans were prepared, no long-term plans were prepared. In the other 15 sampled ULBs, neither short-term nor long-term plans for SWM were prepared. Not preparing of short-term and long-term plans were one of the reasons for various operational inefficiencies such as non-segregation of Municipal Solid Waste (MSW) at source **(Paragraph 3.1.9.2),** partial door-to-door collection of MSW from households/ commercial establishments etc. **(Paragraph 3.1.9.3)** and unscientific dumping/ disposal of waste **(Paragraph 3.1.9.4).**

In reply, 10 ULBs[3] assured (December 2022 and April 2023) preparation of these action plans in future. Accounts Officer, JMC stated (April 2023) that action plan for SWM has been prepared to fulfill short-term requirements for next five years to achieve Service Level Benchmarks. SMC admitted (April 2023) that MSW Plan had not been prepared.

The Department replied (January 2024) that SWM action plan was prepared which envisages collection and transportation of solid waste for five years and its processing and disposal for 20-25 years. It was also stated that JMC has also prepared long term plan with horizon of 20-25 years for waste processing and collection. It was further stated that JMC would review the plan from time to time in terms of development of new technologies and implement it, if required.

The Departmental reply also contradicts the replies furnished by 10 ULBs, JMC and SMC which stated that no short-term and long-term plans for MSW management were prepared and no long-term plans were prepared by JMC and SMC.

[3] (i) MC Anantnag, (ii) MC Doda, (iii) MC Hiranagar, (iv) MC Kathua (v) MC Kulgam, (vi) MC Kupwara, (vii) MC Rajouri, (viii) MC Reasi, (ix) MC Sunderbani and (x) MC Udhampur.

3.1.7.2 Involvement of Stakeholders in Preparation of SWM Action Plan

Section 1.4.4.1 and 1.4.4.1.3 of MSWM Manual, 2016 stipulate that the main responsibility for preparing a SWM plan lies with the ULB which shall constitute a core team or advisory team (internal stakeholders)[4] and a stakeholder committee (external stakeholders)[5] for preparing MSWM plan. The core team had to consult key persons of the ULB such as political head/ mayor/ chairman, District Magistrate and representative from J&K Pollution Control Committee etc.

Audit noted that neither a core/ advisory team (internal stakeholders) nor a stakeholder committee (external stakeholders) was constituted in 17 sampled ULBs including JMC and SMC as of January 2024. Non-constitution of core/ advisory team as well as stakeholder committee had deprived the Government of intended advice/ feedback.

The Department stated (January 2024) that action plan had been prepared in consultation with officials of SBM and sectoral heads of JMC. Regarding SMC, it was stated that SMC had prepared action plan of SWM in consultation with all the committee members of SWM & SBM under the chairmanship of Commissioner, SMC.

The reply is not acceptable as neither a core/ advisory team (internal stakeholders) nor a stakeholder committee (external stakeholders) had been constituted as of January 2024 for preparation of SWM action plans.

3.1.8 Financial Position

Funds for Solid Waste Management (SWM) were received by the Finance Department of GoJ&K from GoI under SBM and 14th Finance Commission (14th FC)[6]. The Finance Department released SBM funds to H&UDD which further released the funds to Mission Director, SBM and Director, ULB Jammu. To monitor and manage all funds under SBM, the Director, ULB Jammu was designated by H&UDD as Single Nodal Agency (SNA) in July 2021. The SNA further released SBM funds to Director, ULBs, Kashmir, JMC and SMC. H&UDD directly released 14th FC funds to Directors of ULBs and JMC and SMC.

The position of funds received by ULBs of the State/ UT including JMC and SMC and expenditure incurred during 2017-18 to 2021-22 is given in **Table 3.1.2.**

[4] Commissioner or Chief Executive of ULB, Head of the SWM Department, Head of Town Planning Department, Heads of Water Supply Department, Public Health, Sanitation and Sewage.

[5] Includes households, businesses, industries, informal sector, NGOs, Self Help Groups, Secondary school and College students.

[6] Expenditure under 14th FC is treated as funds received.

Table 3.1.2: Position of Funds Released for SWM and expenditure incurred during 2017-22

(₹ in crore)

Year	Opening Balance (A)	SWM/ IEC[7] (B)	14th FC (SWM) (C)	Total [D=(A+ B+C)]	Expenditure			Unutilised funds H= (D-G)	Percentage of unutilised funds I=(H/D)*100
					SWM/ IEC (E)	14th FC (SWM) (F)	Total G= (E+F)		
2017-18	21.89	2.62	0.00	24.51	3.98	0.00	3.98	20.53	84
2018-19	20.53	28.55	0.96	50.04	5.72	0.96	6.68	43.36	87
2019-20	43.36	4.79	9.6	57.75	4.98	9.6	14.58	43.17	75
2020-21	43.17	0.00	11.25	54.42	2.78	11.25	14.03	40.39	74
2021-22	40.39	89.55	6.12	136.06	29.16	6.12	35.28	100.78	74
Total		**125.51**	**27.93**		**46.62**	**27.93**	**74.55**		

(Source: Information furnished by H&UDD, Directors, ULBs, Jammu/ Kashmir, JMC and SMC)

As against fund availability of ₹ 175.33 crore[8] for SWM in the State/ UT during 2017-22, an expenditure of only ₹ 74.55 crore (43 *per cent*) was incurred. The underutilisation of funds ranged between 74 and 84 *per cent* during the year 2017-22. The underutilisation of funds in the year 2018-19 can partly be attributed to non-utilisation of ₹ 28.55 crore released for Solid Waste Management under SBM. For 2021-22, underutilisation of funds was attributed to release of ₹ 89.55 crore at the fag end (30th March 2022) of the financial year by H&UDD, GoJ&K.

The Department stated (May 2023) that cluster-based approach was earlier adopted under SBM for establishment of integrated SWM facilities which could not be allotted in Public Private Partnership mode due to low waste generation and lack of response to tenders floated multiple times. It was further stated that there was low utilisation of funds as bidders were asking for higher Viability Gap Funding[9] which was not provided for under the mission Guidelines.

3.1.8.1 Delay in Release of Funds

As per Paragraph 10.4.6 of Guidelines of SBM(U), the State/ UT Governments shall evolve a suitable mechanism to release funds along with State/UT Share to ULBs within
30 days of release of Central share by Ministry of Housing and Urban Development (MoH&UD).

Audit noted that the Finance Department of GoJ&K released funds to H&UDD with

7 Information, Education and Communication.

8 ₹ 175.33 crore = (Opening balance of 2017-18: ₹ 21.89 crore + SWM/IEC receipts during 2017-22: ₹ 125.81 crore + 14th FC receipts during 2017-22: ₹ 27.93 crore).

9 Viability Gap Funding (VGF) is a scheme where the Government provides financial support in the form of grants one time or deferred to infrastructure projects that are economically desirable but not commercially viable. The VGF scheme is administered by the Department of Economic Affairs, Ministry of Finance.

delays ranging between 04 days and 192 days. Also, there was a delay ranging between 15 days and 972 days for release of SBM funds from H&UDD to implementing agencies. The delays in release of funds contributed to underutilisation of funds and consequent inadequate implementation of SWM activities.

During Exit Conference Commissioner/ Secretary accepted (February 2025) that there was delay but could not provide reasons for the same.

3.1.9 Programme Execution

3.1.9.1 Assessment of Quantity/ Composition of Waste Generated

(I) According to Section 1.4.3.3.1 of MSWM Manual, 2016, the waste generated by a specific class of waste generators can be estimated only by averaging data from samples collected continuously for seven days at multiple representative locations within jurisdiction of a ULB in each of the three main seasons of summer, winter and rainy. The quantities of waste can then be extrapolated to the entire ULBs for assessment of per capita generation of waste. The exercise should be repeated once every three to five years at the time of the review of the MSWM plan.

A weighbridge should be placed at a suitable location to weigh waste before being transferred to different treatment or processing and disposal facilities.

Schedule-I (B) (iv) of SWM Rules, 2016 envisages provision of weighbridge to measure quantity of waste brought at landfill site.

Audit noticed that no system was in place in the ULBs of J&K to calculate total waste generated, waste collected and waste treated.

Audit further noticed:

(II) Not adopting of prescribed method for assessment of waste: Audit noted in sampled 17 ULBs including JMC and SMC that the method of averaging data through collection of samples in three main seasons had not been adopted for assessment of waste generation. Instead, the generation of waste was being estimated on the basis of average quantity of waste generated per person. Thus, estimation of waste generation was not realistic.

Accounts Officer, JMC stated (April 2023) that seasonal estimation of waste generation had not been carried out as only one-time estimation was done. SMC stated (April 2023) that the system of quantification of waste generation on the basis of seasonal sample collection would be adopted in future. Sampled ULBs also stated (December 2022 to March 2023) that the method would be implemented in future.

The Department stated (January 2024) that in absence of the per capita waste generation data in the three main seasons, the method for computation of waste

generation prescribed[10] in MSWM Manual, 2016 and SBM Guidelines can be adopted. It was further stated that JMC would do the survey of per capita waste for another two seasons on priority basis.

(III) Absence of weighbridges and MIS: Weighbridges and computerised Management Information System (MIS) were not available at the waste dumping sites of 16 sampled ULBs including JMC to work out the actual waste collected.

The Department stated (January 2024) that as per Central Public Health and Environmental Engineering Organisation Guidelines (CPHEEO) (MSWM Manual, 2016), the quantity of waste has been calculated on population basis so weighbridge is not required in ULBs where population and waste generation is very less. It was further stated that if any cross-check is required for some particular task, the total waste of one day can be checked from the nearby weighbridge installed in ULBs.

The reply is not acceptable as the population criterion is utilised for estimating the quantity of waste generated. However, for depiction of actual quantities of waste collected, it should have been weighed first. The fact also remained that weighbridge had not been installed even by JMC which manages waste in the city of Jammu having a large population.

(**IV) Generation, Collection and Processing of Solid Waste:** Details furnished by J&KPCC in respect of solid waste generated, collected and processed by ULBs of the State/ UT including JMC and SMC during 2017-18 to 2021-22 are given in **Table 3.1.3**.

Table 3.1.3: Solid Waste Generated, Collected and Treated in the ULBs of the State/ UT of J&K during 2017-22

(in Metric Ton/ day)

Year	ULB name	Waste Generated	Waste Collected (*per cent* of waste generated)	Waste Treated (*per cent* of collected waste treated)
2017-18	Kashmir Division	930.60	833.30	450 (450 by SMC)
	Jammu Division	662.18	614.33	3.55
	Total	**1,592.78**	**1,447.63 (91)**	**453.55 (31)**
2018-19	Kashmir Division	828.33	800.50	454.50 (450 by SMC)
	Jammu Division	697.70	641.40	4.90
	Total	**1,526.03**	**1,441.90 (95)**	**459.40 (32)**
2019-20	Kashmir Division	826.75	791.25	461.00 (450 by SMC)
	Jammu Division	687.66	669.90	79.40
	Total	**1,514.41**	**1,461.15 (96)**	**540.40 (37)**
2020-21	Kashmir Division	806.63	792.21	513.50 (500 by SMC)
	Jammu Division	651.6	640.82	34.00
	Total	**1,458.23**	**1,433.03 (98)**	**547.50 (38)**
2021-22	Kashmir Division	875.69	866.34	530.50 (520 by SMC)
	Jammu Division	669.10	669.85	75.70
	Total	**1,544.79**	**1,536.19 (99)**	**606.20 (39)**

(Source: Information provided by the J&KPCC)

[10] As per Section 1.4.3.3 of MSWM Manual, 2016 other studies and observations indicate that waste generation rate is between 200 and 300 gm/ capita/ day in small towns and cities with a population below 2,00,000. It is usually 300-350 gm/ capita/ day in cities with a population between 2,00,000 and 5,00,000; 350-400 gm/ capita/ day in cities with a population between 5,00,000 and 10,00,000; and 400-600 gm/ capita/ day in cities with a population above 10,00,000.

It may be seen from the **Table 3.1.3** that generation of solid waste had decreased from 1,592.78 Metric Ton (MT) per day in 2017-18 to 1,544.79 MT per day in 2021-22. During 2017-22, 91 *per cent* to 99 *per cent* of waste generated in the ULBs of the State/ UT was being collected. Only 31 *per cent* to 39 *per cent* of collected waste was treated leaving a major portion of solid waste dumped at landfill/ dumping sites, carrying the risk of harmful impact on the environment.

Commissioner/ Secretary during Exit Conference stated (February 2025) that for scientific processing of the Municipal Solid Waste under SBM 2.0, establishment of 78 Solid Waste Management Centres (SWMCs) was approved, out of which 33 were made operational till 2024-25.

However, keeping in view meagre quantity (39 *per cent*) of waste treated and the risk involved in unscientific or non-disposal of Municipal waste, there is urgent need for early completion of all the 78 WMCs.

(V) Discrepancy in Solid Waste Data: Audit noticed a significant difference between the quantities of Solid Waste Generated (WG), Waste Collected (WC) and Waste Treated (WT) furnished to Audit by JMC and SMC and the quantities depicted in the annual reports of J&KPCC as detailed in **Table 3.1.4**.

Table 3.1.4: Difference in Quantities of Waste Generated (WG)/ Waste Collected (WC)/ Waste Treated (WT) shown by JMC and SMC and Quantities Depicted By J&KPCC

(MT per day)

Year	Quantities as per SMC and JMC			Quantities as per J&KPCC			Difference		
	WG	WC	WT	WG	WC	WT	WG	WC	WT
2017-18	610.00	461.00	21.23	830.00	800.00	450.00	220.00	339.00	428.77
2018-19	665.00	485.00	37.00	830.00	800.00	450.00	165.00	315.00	413.00
2019-20	722.00	588.00	80.00	900.00	900.00	516.90	178.00	312.00	436.90
2020-21	770.00	666.00	157.50	970.00	950.00	520.00	200.00	284.00	362.50
2021-22	893.00	778.00	325.00	990.00	970.00	540.00	97.00	192.00	215.00

(Source: Records of SMC, JMC and J&KPCC)

Due to difference in data, the accuracy of the information was not ensured. It was also suggestive of poor monitoring by the J&KPCC which had not counter-checked correctness of data provided by ULBs including JMC and SMC. Details are given in ***Appendix 3.1.1.***

The Department stated (January 2024) that the average per capita waste generation in SMC is about 0.4 kg which is approximately 600-610 MT per day (MTPD). It was also stated that the details provided by J&KPCC were incorrect.

Commissioner/ Secretary during Exit Conference stated (February 2025) that ULBs sometimes furnish inconsistent data regarding generation, collection and treatment of solid waste. As such the data in this regard furnished by the Department to National Green Tribunal (NGT) will be furnished.

The reply is not acceptable as the quantities of waste, depicted in the annual reports of J&KPCC, are provided by the JMC and SMC to J&KPCC.

3.1.9.2 Segregation of Waste at Source

Segregation means sorting and separate storage of various components of solid waste such as biodegradable waste[11] and non-biodegradable waste[12]. Rule 4 of SWM Rules, 2016 and Section 2.2.1 of MSWM Manual 2016 stipulate that segregation of waste shall be done at source/ waste generator.

Records of 17 sampled ULBs including JMC and SMC revealed that during 2017-22, segregation of waste at source or household level was not being done. Municipal Council, Doda claimed partial segregation during 2020-21 and 2021-22 and JMC claimed partial segregation of waste during 2021-22. During joint physical inspection (December 2022 to March 2023) it was noticed that waste was being collected in unsegregated manner.

The Department stated (January 2024) that 40 *per cent* of the Municipal Solid Waste (MSW) generated in the ULBs is being segregated at source and that they plan to achieve 100 *per cent* source segregation for which continuous IEC activities are being conducted in ULBs for changing mindset of the people. It was also stated that dustbins are being distributed to houses and commercial establishments to bring in behavior change among the people.

During Exit Conference Commissioner/ Secretary H&UDD accepted (February 2025) that waste collecting vehicles of ULBs do not have segregated compartments. It was further stated that door-to-door collection of waste in JMC has been outsourced and now all vehicles have segregated compartments.

The fact remains that without segregated compartments in the vehicles collecting waste, the segregation of waste at source was not being carried out. Joint physical inspection of ULBs also revealed that the waste was being collected and dumped in an unsegregated form.

[11] Agriculture and dairy waste.

[12] Recyclable waste, non-recyclable combustible waste sanitary waste, non-recyclable inert waste, domestic hazardous wastes and construction and demolition waste.

Picture 3.1.1: Collection of waste in unsegregated form

<table>
<tr><td> </td><td> </td></tr>
<tr><td colspan="2">Waste being collected in unsegregated form in MC Bijbehera</td></tr>
<tr><td> </td><td> </td></tr>
<tr><td>Unsegregated waste at Transfer Station Bhagwati Nagar</td><td>Waste collected in unsegregated manner by MC Reasi</td></tr>
</table>

(I) Not Segregating of Domestic Hazardous Waste (DHW)

Rule 15 (i) and (j) of SWM Rules, 2016 define roles and responsibilities regarding Domestic Hazardous Waste (DHW). The ULBs were to notify list of items classified as DHW so as to ensure their segregation at source.

Audit noticed that out of 17 sampled ULBs, only eight ULBs[13] had notified the list of items classified as DHW to be segregated at source.

Regarding disposal of DHW in 17 sampled ULBs including JMC and SMC, audit further noticed that:

- No waste deposition centres had been established for safe disposal of DHW.
- DHW was being disposed of along with MSW without segregation.
- Records of seven sampled ULBs of Jammu Division indicated that the DHW was being disposed of by burial in pits. However, during joint physical inspection (December 2022 to March 2023) of waste dumping sites of these seven ULBs, audit did not find evidence of disposal of DHW by deep pit burial as claimed by ULBs.

[13] (i) MC Anantnag, (ii) MC Bijbehara, (iii) MC Budgam, (iv) MC Khansahib, (v) MC Kulgam, (vi) MC Kupwara, (vii) MC Langate, (viii) MC Sumbal.

Non-segregation of DHW at source and its disposal along with Municipal Solid Waste was fraught with potential health risks to the public.

In reply, six sampled ULBs[14] of Jammu Division assured (December 2022 to February 2023) that collection, segregation and transportation of DHW would be done as per Guidelines in future. MC Doda, JMC and SMC did not furnish reply.

The Department stated (January 2024) that JMC has procured new waste collection vehicles with the provision of 4 bins with one of them (the black one) for separate collection of DHW and JMC is disposing of DHW through Material Recovery Facility (MRF) centre and other waste management stakeholders. It was also stated that SMC separately collects DHW which is processed at landfill site through incineration. It was added that all the ULBs of Kashmir Division have notified list of items classified as DHW and ULBs are generating awareness to segregate waste in separate bins for collection of DHW from each household.

The fact remained that segregation of DHW had not been ensured by any of the 17 sampled ULBs for its separate collection and facilities for separate disposal of DHW at the dumping sites had not been provided. The position informed about SMC and JMC is not factual as the MRF facility started at JMC during 2021-22 was not utilised to its full capacity and waste generated in SMC could not be processed due to non-establishment of waste to Energy plant at landfill site Acchan/ non-functional Leachate Treatment plant as detailed in **Paragraphs 3.1.9.5 (I)** and **3.1.9.5 (II)** respectively.

(II) Not Segregating of Sanitary Waste

Rule 4 (b) of SWM Rules of 2016 stipulates that waste generator shall wrap sanitary waste like diapers, sanitary pads etc., in the pouches provided by the manufacturers of these products or in a suitable wrapping material as instructed by the local authorities and shall place the sanitary waste in the bin meant for dry waste or non-biodegradable waste.

Audit noted in 17 sampled ULBs that sanitary waste was not being segregated at source, as for collection of dry or non-biodegradable waste, no separate bins were used so that it could be disposed of separately without causing potential health risks to the general public.

The Department stated (January 2024) that JMC had procured new waste collection vehicles with the provision of 4 bins with one of them (the red one) dedicated for sanitary waste and JMC has notified public for wrapping the sanitary waste in paper for handing it over to waste collectors. It was also stated that SMC separately collects sanitary waste which is processed at landfill site through incineration. It was further

[14] (i) MC Hiranagar, (ii) MC Kathua, (iii) MC Rajouri, (iv) MC Reasi, (v) MC Sunderbani and (vi) MC Udhampur.

stated that sanitary disposal machines proposed for all the ULBs of Kashmir Division will be deployed within one year and ULBs of Jammu Division had installed sanitary disposal machines in 14 MRF centres and for the remaining centres installation is under process.

The fact remained that sanitary waste was not being segregated at source in all sampled ULBs. The fact also remained that JMC had not actually ensured collection and disposal of segregated sanitary waste. Reply in respect of SMC is not based on fact as sanitary waste was not being segregated at source.

3.1.9.3 Collection of Solid Waste

Rule 15 (b) of SWM Rules 2016 and Section 2.3.1 of MSWM Manual of 2016 require ULBs to arrange for door-to-door collection of segregated solid waste from all households (including slums and informal settlements), commercial establishments and other non-residential premises.

- Records of 17 sampled ULBs for the period 2017-18 to 2021-22 revealed that 15 ULBs were collecting solid waste using their own vehicles and remaining, two ULBs (Kathua and Udhampur) had outsourced the collection of solid waste. In seven ULBs[15] of Jammu Division, coverage of door-to-door collection of solid waste from households and commercial establishments was partial and ranged from nil to 100 *per cent* as detailed in ***Appendix 3.1.2***.
- Four[16] ULBs had not carried out door-to-door collection of waste during this period except for MC Kathua which carried out door-to-door collection only during 2018-19.
- Although the remaining six[17] ULBs including JMC and SMC claimed 100 *per cent* door-to-door collection of waste as of March 2022, Audit noted that the deficient user charges collected from households, commercial establishments etc., did not corroborate the claim that there was 100 *per cent* coverage for door-to-door collection of waste in these six ULBs.

In reply, 16 sampled ULBs including SMC stated (December 2022 to March 2023) that due to shortage of manpower and vehicles, there was less door-to-door collection. However, JMC did not furnish any reply.

The Department stated (January 2024) that 100 *per cent* door-to-door collection is being done in all the ULBs of Jammu and Kashmir Divisions.

The reply is contradictory to the information furnished by sampled ULBs. In their reply 16 ULBs accepted that there was less/ partial door-to-door collection of waste.

[15] (i) MC Doda, (ii) MC Hiranagar, (iii) MC Kathua, (iv) MC Rajouri, (v) MC Reasi, (vi) MC Sunderbani and (vii) MC Udhampur.
[16] (i) MC Budgam, (ii) MC Kathua and (iii) MC Khansahib and (iv) MC Kulgam.
[17] (i) Bijbehara, (ii) JMC, (iii) Kupwara (iv) SMC (v) Sunderbani and (vi) Udhampur.

Further, during joint physical inspection, Audit had noticed waste lying open on the roadside in ULBs of both Jammu and Kashmir Divisions.

Shortfall in Collection of User Charges

According to Rule 15 (zg) (ix) of SWM Rules of 2016, for sustainable SWM, a ULB has to impress upon waste generators to pay monthly user charges to waste collectors or ULB or any other person authorised by the ULB.

Audit check of records of 17 sampled ULBs including JMC and SMC revealed that no user charges were collected in three sampled ULBs[18] and collection was partial in respect of the remaining 14 ULBs during 2017-18 to 2021-22. Against minimum estimated user charges[19] of ₹ 139.04 crore collectable from waste generators (household/ establishment[20]) covered under door to door collection in the 14 sampled ULBs, only ₹ 35.39 crore had been collected. As such there was shortfall of atleast ₹ 103.65 crore in collection of user charges in these 14 sampled ULBs[21].

The Department attributed (January 2024) the deficit in collection of user charges to shortage of sanitation supervisory staff which has been deployed for revenue collection. It was also informed that JMC is in the process of doing GIS mapping and providing digital door-to-door number to every property for linking user fee with every digital door number and with this JMC will achieve 100 *per cent* collection of user charges by December 2024.

During Exit Conference Commissioner/ Secretary H&UDD stated (February 2025) that position of collection of user charges has improved. Most of the Jammu based ULBs have outsourced collection of waste and user charges to private agencies.

3.1.9.4 Disposal of Waste

Rule 12 of SWM Rules, 2016 provides that Deputy Commissioner (DC) shall allocate land for setting up processing and disposal facilities for solid waste to local authorities in his District and review the performance of local bodies, at least once in a quarter.

Audit noted that concerned DCs had allotted land to 17 sampled ULBs for disposal of waste. As of April 2023, JMC, SMC and 13 other ULBs[22] were disposing of waste at

18 (i) MC Budgam, (ii) MC Khanasahib and (iii) MC Kulgam.

19 Worked out by Audit at the rate of ₹ 50 per month from households and ₹ 100 per month from establishments.

20 Information regarding number of households/ establishments furnished by the ULBs.

21 (i) MC Doda: ₹ 1.15 crore; (ii) MC Rajouri: ₹ 1.79 crore; (iii) MC Sunderbani: ₹ 0.21 crore; (iv) MC Reasi: ₹ 0.41 crore; (v) MC Kathua: ₹ 0.17crore;(vi) MC Udhampur: ₹ 1.94 crore; (vii) MC Hiranagar: ₹ 0.08 crore; (viii) JMC: ₹ 36.79 crore; (ix) MC Anantnag: ₹ 0.62 crore: (x) MC Bijbehara: ₹ 0.28 crore; (xi) MC Sumbal: ₹ 0.13 crore; (xii) MC Langate: ₹ 0.08 crore; (xiii) MC Kupwara: ₹ 1.53 crore; and SMC: ₹ 58.47 crore.

22 (i) MC Anantnag, (ii) MC Bijbehara, (iii) MC Budgam, (iv) M.C Doda, (v) MC Kathua, (vi) MC Khansahib, (vii) MC Kulgam, (viii) MC Kupwara, (ix) MC Langate, (x) MC Reasi, (xi) MC Sumbal, (xii) M.C Sunderbani and (xiii) MC Udhampur.

the allotted sites. However, MC Hiranagar and MC Rajouri were found to be disposing of waste at locations other than the allotted sites, which poses serious environmental concerns.

- The land allotted at two sites[23] in MC Hiranagar could not be utilised due to objection raised by J&K Pollution Control Committee (J&KPCC) at village Hiranagar and by Gram Panchayat at Allu chak. This indicated that the land was identified by concerned authorities without conducting a proper survey.
- As of February 2023, MC Hiranagar was dumping solid waste unauthorisedly and unscientifically near Shamshan Ghat (Ward No.10) adjacent to a drain. This action was also objected to by the locals and J&KPCC which had served (May 2022) notice to MC Hiranagar for unscientific disposal of solid waste by open dumping and burning leading to air and water pollution and unhygienic atmosphere.
- Similarly, Municipal Council, Rajouri was dumping solid waste in open area at the bank of Rajouri River. Audit also noticed that land had been allotted to MC Kathua for dumping solid waste at the bank of Ravi river (Kathua).

In respect of MC Hiranagar, the Department stated (January 2024) that Revenue Department has been approached to provide encumbrance free land for establishment of waste processing facility.

In respect of MC Rajouri, it was stated that the Deputy Commissioner of Rajouri District has been requested to allot encumbrance free land for construction of SWM facility.

The fact remained that two ULBs continued to dump waste in open spaces with potential risk to environment.

Picture 3.1.2: Dumping of waste in open spaces

Dumping of waste in open at Hira Nagar	Dumping of solid waste at the bank of Rajouri river

[23] Village Hiranagar and Allu Chak.

Review Meetings by Deputy Commissioners: Audit also noted that Deputy Commissioners (DCs) of the 11 Districts[24] (where sampled ULBs were located) had not held any meeting to review the performance of ULBs performance in SWM during the period 2017-18 to 2021-22.

Due to not holding of review meetings by DCs, possible solution to vital issues of solid waste management which could have emerged in such meetings remained unaddressed. The Department accepted (January 2024) the audit observation.

(I) Not Disposing of Accumulated Legacy Waste by Recycling/ Treatment

It was observed that as of March 2022, 18.35 lakh MT[25] of unprocessed waste was lying in the open at dumping sites of eight sampled ULBs including SMC and JMC. These ULBs had failed to dispose of the waste by recycling or chemical/ physical/ biological treatment methods specified. The non-disposal of waste carries the risk of serious threat to air, water and soil quality leading to health hazards.

The Department outlined (January 2024) plans for bio-remediation of legacy waste. JMC plans to float tenders for bio-remediation of waste and complete the process by March 2025. It was also stated that removal of legacy waste by way of bio-mining has started in six ULBs of Kashmir Division. In SMC, a DPR has been prepared for bio-remediation of legacy waste at landfill site at Acchan.

During Exit Conference Commissioner/ Secretary H&UDD stated (February 2025) that issue has been resolved in most of the places in Jammu Division and tenders of legacy waste (except 13 ULBs) have been allotted and work is going on.

The fact remained that 18.35 lakh MT of legacy waste of eight ULBs had remained unprocessed.

(II) Illegal and Unscientific Disposal of Solid Waste by ULBs

The two Regional Directors of J&K Pollution Control Committee (J&KPCC), Jammu and Kashmir on receiving reports about illegal and unscientific dumping/ disposal of solid waste by seven ULBs[26] (including three sampled ULBs), imposed penalty/ Environmental Compensation (EC) of ₹ 5.96 crore[27] (November 2019 to January 2022).

---

[24] Jammu, Udhampur and Kulgam (2017-18 to 2021-22); Reasi, Kathua, Rajouri and Srinagar (2017-18 to 2020-21); Budgam, Kupwara and Anantnag (2017-18 to 2018-19); Doda (2017-18 to 2018-19 and 2021-22).

[25] JMC: 4.68 LMT, SMC: 12 LMT, MC Sumbhal: 0.02 LMT, MC Langate: 0.04 LMT, MC Kulgam: 0.33 LMT, MC Khansahib: 0.05 LMT, MC Bijbehara: 0.14 LMT and MC Anantnag: 1.09 LMT.

[26] Municipal Council, Udhampur (at forest land between Jakheni and Kheri); Municipal Council, Rajouri (at the bank of Rajouri River); Municipal Council, Kathua (at the bank of Ravi River); Municipal Council, Bandipora; Municipal Committee, Ramban; Municipal Committee, Katra and Municipal Committee, Sopore.

[27] Municipal Council, Udhampur: ₹ 1.39 crore; Municipal Committee, Katra: ₹ 1.06 crore; Municipal Council, Rajouri: ₹ 0.62 crore; Municipal Council, Kathua: ₹ 0.82 crore; Municipal Committee, Ramban: ₹ 0.13 crore; Municipal Council, Bandipora: ₹ 0.64 crore and Municipal Committee, Sopore: ₹ 1.30 crore.

Besides, the National Green Tribunal (NGT) had also imposed penalty of ₹ one crore on Municipal Council, Budgam for dumping solid waste on the banks of river Doodh Ganga. This amount was to be utilised for restoration of environment as per the plan approved by the Chief Secretary.

Audit further noticed that out of eight ULBs on which penalty was imposed by J&KPCC/ NGT, only two ULBs had deposited (between February 2021 and May 2022) penalty/ EC of ₹ 56.44 lakh[28].

Regional Director, J&KPCC, Jammu assured (October 2022) that follow up action regarding recovery of penalty/ Environment Compensation shall be taken.

CEO, MC, Kathua stated (February 2023) that the matter regarding paying penalty for dumping solid waste in open areas along the bank of River Ravi was under consideration of the Administrative Department.

During Exit Conference Commissioner/ Secretary H&UDD stated (February 2025) that the Department is contesting the penalty issue regarding Municipal Council Udhampur and Budgam.

The fact remains that disposal of waste in an improper manner has not only exposed the environment to risk apart from financial burden by way of penalty but also unnecessary litigation to the respective ULBs.

3.1.9.5 Processing and Treatment of Waste

In terms of Rule 3 (35) of SWM Rules, 2016 Processing means any scientific process by which segregated solid waste is changed for reuse, recycling or transformation into new products. The Rule further clarifies that Treatment means the method, technique or process designed to modify physical, chemical or biological characteristics or composition of any waste so as to reduce its volume and potential to cause harm.

Audit noted that no processing or treatment facilities were in place at the waste dumping sites in 14 ULBs[29] out of 17 sampled ULBs. As such the waste was being dumped without modifying its physical, chemical or biological characteristics.

During Exit Conference Commissioner/ Secretary H&UDD stated (February 2025) that progress has been made in setting up of Material Recovery Facilities (MRFs) in the ULBs. It was also stated that 33 Solid Waste Management Centres (SWMC) have been made operational during 2022-25.

[28] MC Budgam: ₹ 50 lakh and MC Ramban: ₹ 6.44 lakh.

[29] (i) Anantnag, (ii) Sumbal, (iii) Kupwara, (iv) Langate, (v) Budgam, (vi) Kulgam, (vii) Bijbehara, (viii) Khansahib, (ix) JMC, (x) Rajouri, (xi) Sunderbani, (xii) Reasi, (xiii) Hiranagar and (xiv) Kathua.

(I) Failure to Establish Waste to Energy Plant

As per Rule 15 (v) (b) of SWM Rules 2016, duties and responsibilities of ULBs include facilitating construction, operation and maintenance of solid waste processing facilities preferably via waste to energy processes.

- State Cabinet approved (October 2017) establishment of Waste to Energy (WtE) plant[30] for scientific disposal of Solid Waste at landfill site at Achan, Srinagar.
- After authorisation (November 2017) of H&UDD, SMC issued (December 2017) a Letter of Intent (LoI) to the single bidder[31] for establishment of WtE plant under Design, Finance, Build, Own, Operate and Transfer (DFBOOT).
- The Power Development Department (PDD), GoJ&K was to purchase electricity generated from WtE plant at ₹ 7.65 per unit for the period of 25 years. SMC was also responsible to get the Power Purchase Agreement (PPA) vetted by PDD, Finance Department, Law Department and Joint Electricity Regulatory Commission (JERC).
- SMC was to provide land at landfill site and establishment of WtE plant was to be completed within 18 months from the date the PPA was signed.
- Commissioner, SMC requested (November 2019) H&UDD to authorise him to submit a petition for adoption of approved power tariff before Central Electricity Regulatory Commission (CERC) or JERC of the State/ UT to facilitate smooth establishment of WtE Plant.
- After seeking legal opinion from Advocate General, J&K, H&UDD directed SMC to have (February 2020) the Project Proponent[32] to file a petition for adoption of power tariff before JERC.
- Accordingly, SMC asked (March 2020) the Project Proponent to take up matter with JERC.
- SMC provided (May 2018) land to the agency on which the agency carried out earth filling.

Audit noted that as of January 2024, there was no further progress regarding signing of PPA between the concerned parties, which was a necessity before WtE plant could be established. The WtE plant was to be completed within 18 months from the date the PPA was signed. However, despite lapse of over six years since its approval (October 2017), the WtE plant could not be established as of January 2024 due to procedural delays at various levels.

Commissioner, SMC stated (January 2020) that PPA had been vetted by PDD, Finance Department and Law Department but tariff rate of ₹ 7.65 per unit was not adopted by JERC due to unavoidable circumstances, including non-availability of a

30 Waste-to-energy plants burn municipal solid waste (MSW) to produce steam in a boiler and the steam is used to power an electric generator turbine.
31 M/s Highland Automobiles Pvt. Ltd., Srinagar.
32 M/s Syntech Bioenergy Pvt. Ltd. (changed nomenclature of joint venture).

quorum of JERC. The Department stated (January 2024) that the project is under deliberation.

The reply should be seen in the light of fact that even after lapse of over six years PPA could not be executed resulting in not establishing of WtE Plant.

During the Exit Conference Commissioner/ Secretary, H&UDD accepted (February 2025) that the WtE plant could not take off. It was further stated that revised DPR for the project has been submitted for approval under SBM 2.0.

(II) Not Functioning Leachate Treatment Plant

Leachate[33] treatment is important for elimination of harmful contaminants and organic substances that are capable of negatively impacting water sources such as surface water and groundwater which ultimately can affect human health.

SMC was allocated 516 *kanal* of land at Achan, Srinagar for waste dumping and processing of waste in 1986. Since then, the site has been maintained and developed by Economic Reconstruction Agency (ERA) under the supervision of SMC.

J&KPCC issued (July 2018) a notice to SMC for non-functioning of the Leachate Treatment Plant (LTP)[34] in violation of environmental laws and directed to make the plant functional within 15 days failing which it would initiate legal action under the Environmental Pollution Act, 1986.

Despite SMC's directive in August 2018 to ERA to ensure that the LTP remains functional 24x7, as of January 2024, the LTP remained non-functional leading to pollution of water sources and potential spread of diseases.

The Department stated (January 2024) that SMC in its tender floated for Cell No. 4 included Operation and Maintenance of LTP. However, the departmental reply is silent with regard to functional status of the LTP. Non-functional LTP carried the risk of pollution of water sources and potential spread of diseases.

(III) Not Functioning of City Compost Plant at Landfill Site, Achan

While handing over (September 2018) Achan landfill site to SMC, ERA had also handed over City Compost Plant (CCP)[35] to SMC after getting it inspected (November 2017) by the Agricultural Chemist, Quality Control Laboratory, Srinagar. The CCP remained operational up to June 2020 and earned revenue of ₹ 3.51 lakh. Thereafter, the SMC had not utilised the CCP as of January 2024, which resulted in non-conversion of suitable waste to compost and a consequent loss of revenue.

---

33 As per Rule 3 (29) of SWM Rules, 2016 Leachate means the liquid that seeps through solid waste or other medium and has extracts of dissolved or suspended material from it.

34 Leachate Treatment Plant was non-functional when SMC had taken over the landfill site from ERA in September 2018.

35 A city compost plant is a facility that processes organic waste into compost, a nutrient-rich soil amendment.

Chief Sanitation Officer, SMC stated (April 2023) that plant was non-functional due to corrosion of various parts of machines which are beyond repairs.

The Department informed (January 2024) that to process the wet waste scientifically, SMC has proposed a fresh waste to compost plant of 100 MTPD capacity for which the DPR is being prepared.

The fact remained that SMC did not take concrete steps to make the CCP operational again or to commission a new CCP during the period from June 2020 to January 2024.

(IV) Not Functioning Waste Disposer Machine at Municipal Council, Udhampur

The work for installation of advanced fuel-free solid waste disposer, Kill the Waste Machine (KWM)[36] at dumping site of Sui Chakkar, Udhampur including comprehensive maintenance of machine for five years was awarded (September 2019) by MC Udhampur to a firm at a cost of ₹ 59.89 lakh. The firm installed (December 2019) KWM at the dumping site and an amount of ₹ 53.96 lakh was paid in two installments in January 2020 and April 2020. However, the KWM had been rendered non-functional in June 2021 due to unavailability of technical manpower and resentment by local people.

As per terms of the supply order (September 2019), the firm was to operate the commissioned machine at site for 60 days and further provide training to the manpower deputed by MC Udhampur during that period. However, no such training had been imparted by the firm. The KWM remained non-functional as of January 2024.

Thus, inaction of MC Udhampur to make the KWM functional resulted in idle investment of ₹ 53.96 lakh and consequent accumulation of solid waste at the dumping site. The Annual Maintenance Contract of five years included in the cost of installation of KWM had also been rendered ineffective.

The Department stated (January 2024) that local population did not allow the operation of machine alleging emission of harmful gases in the atmosphere. It was further stated that for processing waste at Sui Chakkar, a compost pit and Material Recovery Facility (MRF) has been established. Chief Executive Officer, Municipal Council Udhampur accepted (April 2024) that the MRF and compost pits installed at Sui Chakkar are not functional.

[36] An eco-friendly and economic solution for solid waste disposal. It runs on the principle of controlled combustion through regulated air supply while addressing and solving the major drawbacks of conventional combustion based incinerator system.

(V) Not Functioning Bailing Machine at Municipal Council, Udhampur

MC Udhampur installed (November 2020) a Bailing Machine (BM[37]) at the waste dumping site at Sui Chakkar for compressing the waste material into rectangular bales that can be sorted, shipped, sent for further processing or recycling.

Audit observed that the BM had remained functional up to June 2021 during which it compressed approximately 6,468 kg of plastic waste into rectangular bales. The BM ceased functioning thereafter due to unavailability of technical manpower and resentment by local people. As of January 2024, no substantial efforts have been made by the Department to make the BM operational again, thereby defeating the purpose of installing it.

CEO, MC Udhampur stated (February 2023) that a project for treatment of dumped waste had been started at Sui Chakkar, which would take five to six months to clear the waste. The Department informed (January 2024) that the MRF and compost pit has been established as per the action plan. It was also stated that the old bailing machine will be repaired and used in the same infrastructure.

The reply should be seen in light of the fact that MRF and compost pits installed at Sui Chakkar have not been made functional (April 2024), resulting in continued accumulation of plastic waste without proper disposal measures in place.

(VI) Bio-Mining and Bio-Remediation of Legacy Waste

For decades, JMC had been dumping Municipal Solid Waste in 250 *kanal* of land at Bhagwati Nagar, which had accumulated over time as Legacy Waste (LW). To address this issue, a DPR was prepared for removal of LW at Bhagwati Nagar through the process of Bio-mining[38] and Bio-remediation[39]. The DPR was technically vetted (October 2021) by IIT Jammu. As per DPR, volume of LW assessed through contour survey was estimated at 1.20 lakh MT. In terms of DPR, a baseline study of heavy metals in surface and sub-surface water, rainfall, soil type, hydrology, topography, wind direction etc. was to be conducted before and after bio-mining. Periodic study was also to be carried out after completion of bio-mining to check for any adverse effects in the surrounding area.

The contract for Bio-mining and Bio-remediation of LW was awarded (July 2020) to a contractor[40], at a cost of for ₹ 6.84 crore in anticipation of Administrative Approval which was accorded in November 2020. In the agreement, quantity of LW to be

---

37 A compacting device that to compact and compress material into rectangular bales that can be sorted, shipped, sent for further processing or recycling. It is designed to change similar and dissimilar wastes into configurations that are easy to handle and organise.

38 Uses microorganisms to extract metals from ores, waste and other solid materials.

39 Uses microorganisms to break down hazardous substances into less toxic or non-toxic substances. Bioremediation is often used to clean up heavy metal pollution or recover precious metals from wastewater.

40 M/s Aakansha Enterprises, New Delhi.

treated and area of land to be reclaimed had not been mentioned. As per agreement, removal of LW was to be completed by January 2022. A payment of ₹ 6.84 crore was made by JMC to the contractor for Bio-mining/ Bio-remediation of LW of 1.20 lakh MT, which was completed in April 2022.

As against 250 *kanal* of land required to be cleared, how much land was cleared as a result of Bio-mining/ Bio-remediation of LW was not ascertainable. Neither any survey was conducted after completion of Bio-mining/ Bio-remediation of the area nor any periodic study was done to check for any adverse effects in the surrounding areas.

The contractor had completed Bio-mining/ Bio-remediation of LW after a delay of 82 days, but JMC did not impose penalty of ₹ 28.04 lakh[41] (as per clause 28 of the contract, at the rate of 0.05 *per cent* per day subject to a maximum of 10 *per cent* of contract value) on the contractor at the time of making final payment, thereby providing undue benefit to the contractor.

During Joint Physical Inspection (March 2023) of the site, heaps of waste, including boulders were seen at the site indicating that the area had not been fully cleared of LW. It was also seen that waste collected by JMC from Zone-III of the city was being dumped in the area reclaimed by Bio-mining/ Bio-remediation at Bhagwati Nagar.

The Department stated (January 2024) that the contractor had requested for grant of extension for completion of work and 233 *kanal* of land had been reclaimed. It was further stated that bio-remediation of LW in remaining 17 *kanal* was allotted to another firm. Regarding non-imposition of penalty, it was stated that the contractor had requested for grant of extension on account of disruption of work due to second wave of Covid pandemic during March-June 2021 and the request was agreed.

The reply is not acceptable as no mention was made in the agreement executed with the contractor about quantity of legacy waste to be treated and area of land to be reclaimed due to which the contract for reclaiming the balance 17 *kanal* of land was allotted to another firm. Further, there was no approval of competent authority for extension of time for completion of work.

(VII) Construction and Demolition Waste Management Rules

Ministry of Environment, Forest and Climate Change, GOI notified (March 2016) Construction and Demolition Waste Management (C&DWM) Rules, 2016. These rules apply to every waste resulting from construction, remodeling, repair and demolition of any civil structure of individual or organisation or authority which generates construction and demolition waste such as building material, debris, rubble. Audit noted the following regarding the implementation of C&DWM Rules:

[41] (6,84,00,000 x 0.05 *per cent* * 82).

Delayed Policy Notification

Rule 9 (1) of C&DWM Rules envisage that the Secretary in-charge of Urban Development Department is required to prepare policy document with respect to management of C&DW (Construction and Demolition Waste) in accordance with these rules within one year from the date of final notification (29 March 2016) of these rules.

However, the Department had notified (February 2020) the policy after a delay of 35 months.

Not Implementing Construction and Demolition Waste Management Rules

Rule 6 (4) and (5) of Construction and Demolition Waste Management (C&DWM) Rules, 2016 provides that ULBs shall place appropriate containers for C&DW, remove waste there from at regular intervals either through own resources or by appointing private operators and transport the waste to appropriate sites for processing and disposal.

Further, Rule 4 (c) of MSWM 2016 stipulates that it is the responsibility of the waste generator to store (C&DW), as and when generated, separately in his own premises or get the waste deposited at collection centre made by the ULB.

Despite generation of substantial quantities[42] of C&DW, ranging between 20,979.91 metric ton per annum (MTA) and 38,127.16 MTA during 2018-19 to 2021-22, no measures as per laid down rules such as placing appropriate containers for C&DW, removing waste there from at regular intervals either through own resources or by appointing private operators and transporting the waste to appropriate sites for processing and disposal were taken by the Department for its safe disposal.

Absence of C&DW Containers: No containers had been placed for collection of C&DW in any of the 17 selected ULBs including JMC and SMC. Further, no directions had been issued to public for proper handling and disposal of such waste.

Absence of C&D Waste Processing Facilities: The ULBs had not established waste processing facilities for safe disposal of C&DW within their jurisdiction in accordance with the provisions of the rules.

Improper Disposal Practices: J&KPCC in their annual report to Central Pollution Control Board reported that in absence of any collection and disposal mechanism for C&DW by ULBs, C&DW was being dumped off by owners on unused vacant land and along river banks and only unclaimed waste was transported by local bodies.

[42] 2018-19: 20,979.91 MTA; 2019-20: 36,301.17 MTA; 2020-21: 23,607.40 MTA; and 2021-22: 38,127.16 MTA.

The Department stated (January 2024) that JMC has prepared DPR for setting up a C&DW processing facility at Kot Bhalwal. It has also earmarked a C&DW collection point at Bhagwati Nagar for storage of C&DW which will be recycled after the commissioning of C&DW processing facility. SMC had dedicated service for collection of C&DW through tippers which collect and dump the waste at landfill site Achan. It was added that SMC has proposed 50 MTPD, C&DW plant under SBM 2.0 for which DPR is being prepared.

(VIII) Material Recovery Facilities (MRFs) for Management of Plastic Waste

Memoranda of Understanding (MoU) were signed (August 2019 and September 2019) by JMC with Indian Pollution Control Association (IPCA) and Regional and Urban Development Agency (RUDA)[43] for plastic waste management in Jammu city.

The MoU with IPCA was valid for five years up to November 2024, while the MoU with RUDA is valid for ten years from November 2021 to November 2031.

As per MoUs, IPCA and RUDA were to each install Material Recovery Facilities[44] (MRFs) with a capacity of five MT per day at Bhagwati Nagar and Rakh Bandu, Jammu respectively. Both these agencies were to operate and maintain the MRFs for five years and for ten years respectively. JMC was to provide plastic waste to these agencies for processing.

MRFs with a capacity of five MT per day were installed (August 2019 and September 2019) at Bhagwati Nagar and Rakh Bandu. It was observed that neither IPCA nor RUDA had processed any plastic waste during 2019-21. During the period 2021-22, both the agencies had processed only 4 MT of waste per day as against required 5 MT per day.

The Department informed (January 2024) that JMC is focusing to achieve 100 *per cent* segregation at source so that recovery of the waste can be done efficiently. It was further stated that after achieving the target of segregation of waste, MRF will run in full capacity. The reply is not acceptable as MoUs should have been implemented during its validity by providing segregated plastic waste to IPCA and RUDA. The reply should also be seen in light of the fact that the MoUs were signed without ensuring segregation of waste at source.

(IX) Unscientific Disposal of Plastic Waste

Rule 6 of Plastic Waste Management (PWM) Rules, 2016 provides that every local body shall be responsible for development and setting up of infrastructure for

[43] Implementation partner on behalf of United Nations Development Programme (UNDP).

[44] Materials Recovery Facilities (MRFs) is a facility where non-compostable solid waste can be temporarily stored by the local body or any other entity to facilitate segregation, sorting and recovery of recyclables from various components of waste.

segregation, collection, storage, transportation, processing and disposal of plastic waste either on its own or by engaging agencies or producers.

As per information available with J&KPCC, estimated 2,23,158 MTs[45] of plastic waste was generated in Jammu and Kashmir during 2017-18 to 2021-22.

Audit observed in 17 sampled ULBs that during 2017-18 to 2021-22, there was no record to show that plastic waste was being segregated, collected, transported as per Rule 6 of Plastic Waste Management Rules, 2016.

The Department stated (January 2024) that the total plastic waste generated and collected in 40 ULBs of Kashmir is 50 MTPD and 100 *per cent* of this plastic waste is collected and no waste is left unattended and that record of plastic waste being generated and processed is being maintained by the concerned ULBs. Regarding SMC, it was stated that SMC has 100 MTPD MRF plant at landfill site Achan where plastic waste is being collected and segregated by informal workers on daily or alternate day basis and records in respect of disposal of plastic waste are regularly updated on *Swachhtam* Portal. In respect of JMC, it was informed that two MRFs at Rakh Bandu and Bhagwati Nagar with 5 MTPD capacity each for processing and recycling of plastic waste have been setup where logbook for collection and recycling of plastic waste, on daily basis, are maintained.

The reply is not based on fact as no records regarding segregation, collection, storage, transportation, processing and disposal of plastic waste were produced in sampled ULBs. Further, two MRFs at Rakh Bandu and Bhagwati Nagar started during 2021-22 were not utilised to their full capacity by JMC as mentioned in **Paragraph 3.1.9.5 (VIII)**.

3.1.9.6 Not Assessing Risk to Environment by State Pollution Control Committee

Rule 16 (b) of SWM Rules, 2016 stipulates that State Pollution Control Board or State Pollution Control Committee shall monitor disposal of solid waste according to environmental standards and ensure regular monitoring[46] of ambient air quality at the landfill site and at the vicinity. It shall also conduct periodical monitoring[47] of ground water quality within 50 m of the periphery of landfill site to ensure that the ground water is not contaminated.

Audit examination disclosed that J&K Pollution Control Committee had not conducted any air quality assessment of landfills and dumpsites. J&KPCC admitted (June 2023) that sampling for checking the ground water quality near dumping sites

[45] 2017-18: 27,870 MTs; 2018-19: 34,367 MTs; 2019-20: 74,826 MTs; 2020-21: 51,711 MTs; and 2021-22: 34,384 MTs.
[46] Schedule I {F} (iv) of SWM Rules 2016.
[47] Schedule I {E} (i) of SWM Rules 2016.

and landfill sites has not been carried out on a routine basis. It was also stated that nine rivers in the State/ UT had been polluted due to unauthorised dumping of Solid waste and construction/ demolition waste etc. along these rivers.

Not conducting these assessments leads to unchecked environmental degradation, significant public health risks, as well as regulatory non-compliance and increased economic costs due to inadequate waste management practices. Further, it results in missed opportunities for improving waste management and potential social discontent.

3.1.9.7 Deficient Manpower

Section 1.4.5.4 of MSWM Manual, 2016 stipulates that a ULB should have dedicated SWM department or cell having staff with technical and managerial skill specific to SWM.

Audit noted that none of the 17 sampled ULBs had an exclusive SWM department/ cell having staff with technical and managerial skill specific to SWM. Further, against the sanctioned strength of 4,537 posts in 17 sampled ULBs only 3,893 were in position and 677 posts[48] were vacant. The ULBs were engaging 5,221 casual employees, for managing both SWM and sanitation activities. Shortage of staff ranged between 9.25 *per cent* (Bijbehara) and 75 *per cent* (Langate).

The Department stated (January 2024) that as per Government directions, no new recruitment can be made in any Department as such JMC is carrying out waste management and sanitation activities through own employees and NGO workers. They added that in Directorate Urban Local Bodies, Kashmir, a dedicated and expert PMU has been engaged under SBM-U and in case of dearth of *Safaimitras*, the concerned ULBs are engaging staff on outsource basis.

(I) Not Integrating Informal Waste Collectors in Waste Management

In terms of Section 2.3.7 of MSWM Manual, 2016 and Rule 11(c) and 15 (c) (d) of SWM Rule 2016, the ULBs were to establish a system to recognise organisations of waste pickers or informal waste collectors, facilitate formation of Self Help Groups for them, provide them identity cards and; facilitate their participation in SWM including door-to-door collection of waste. The State Government was to provide broad Guidelines regarding integration of waste picker or informal waste collectors in the SWM system.

Audit noted in sampled 17 ULBs that only SMC and Director, Urban Local Bodies, Kashmir (DULBK) had identified and integrated 283 Rag Pickers, to form Self Help Groups for them. Besides, GoJ&K had not issued (as of January 2024) any Guidelines

[48] 07 ULBs Jammu: 209; JMC: 164; 08 ULBs Kashmir: 75; and SMC: 229.

regarding integration of waste pickers or informal waste collectors in the SWM system.

The Department informed (January 2024) that registration of rag pickers in all the ULBs is under progress. The SMC has involved 179 informal waste pickers and integrated them into waste management system and DULBK has also identified 204 rag pickers/ Eco-guards and integrated them in SWM. It was also stated that JMC had conducted survey of rag pickers and is in the process of formation of SHGs so that all the informal waste pickets may be associated with SWM. The reply is not acceptable as the process of integration of waste pickers and informal waste collectors was to be carried out in the whole UT of J&K and the issuance of Guidelines would have provided a laid down framework for their integration.

(II) Capacity Building/ Trainings

As per Rule 15 (zc) of SWM Rules, 2016 a ULB has to educate workers including contract workers and supervisors regarding door-to-door collection of segregated waste and transportation of unmixed waste to processing or disposal facility.

Audit noted that records pertaining to provision of training to field staff for door-to-door collection and segregation of waste were not being maintained in the 15 sampled ULBs and SMC. In absence of these records, the number of trainings imparted, if any, to the staff of ULBs could not be ascertained. In respect of JMC, although trainings records were maintained, no training sessions were conducted by JMC to its staff prior to 2021-22.

Chief Sanitation Officer, SMC stated (April 2023) that regular training was being imparted to SWM workers and capacity building programmes were being held through Workshops, Seminars and e-learning courses.

The Department stated (January 2024) that from time to time JMC is organising training session on different subjects as per the requirements by engaging internal/ external trainers. It was further stated that over 20 capacity building programmes have been arranged by DULBK from time to time to enhance their capacity in management of solid waste. It was also stated that capacity building programmes are being conducted on regular intervals for training and knowledge enhancement of all sanitation staff and CEOs/ EOs in Jammu as well as Kashmir Division and SMC holds regular training and capacity building programmes for its SWM manpower.

The reply should be seen in light of the fact that no yearly training calendar or any other record related to any seminar or training course conducted by ULBs including SMC were being maintained.

3.1.10 Conclusion

GoJ&K had not prepared any policy/ action plan/ strategy for implementation of Reduce, Reuse and Recycle (3 Rs) in respect of solid waste and sampled ULBs had not taken any steps to generate awareness among the general public regarding importance of 3 Rs. During 2017-22, 91 *per cent* to 99 *per cent* of waste generated in the ULBs was being collected and only 31 *per cent* to 39 *per cent* of collected waste was being treated in the State/ UT. In 17 ULBs, segregation of waste at source/ house was not being carried out during 2017-22. In 11 ULBs, coverage of door-to-door collection of solid waste from households and commercial establishments was partial. Three ULBs had not carried out door-to-door collection of waste. Although JMC and SMC claimed 100 *per cent* door-to-door collection of waste during 2020-22, there was shortfall in collection of user charges. Besides, two ULBs (MC Hiranagar and MC Rajouri) were dumping solid waste unauthorisedly and unscientifically. No processing/ treatment facilities were in place at the waste dumping sites of 15 ULBs, as such the waste was being dumped without modifying its physical, chemical or biological characteristics resulting in potential danger to the environment. J&KPCC had not conducted any air quality assessment in respect of landfills/ dumpsites and had not regularly assessed the risk of contamination of ground water near landfill/ dumping sites.

3.1.11 *Recommendations*

- ***GoJ&K should devise a strategy for implementation of Reduce, Reuse and Recycle (3 Rs) in respect of solid waste.***
- ***ULBs should generate awareness among the general public regarding segregation of solid waste at source and ensure that waste is actually segregated at source. ULBs should ensure 100 per cent collection of solid waste from households/ commercial establishments etc.***
- ***ULBs should take measures to collect user charges from all households/ commercial establishments.***
- ***ULBs may put in place facilities for processing/ treatment of solid waste at dumping sites to modify its physical, chemical or biological characteristics so that no harm is caused to the environment.***
- ***J&KPCC may conduct air quality assessment in respect of landfills/ dumpsites and assess risk of contamination of ground water, rivers and streams near landfill/ dumping sites.***

Public Works Department (Roads and Buildings)

3.2 Central Roads and Infrastructure Fund

3.2.1 Introduction

The Central Road Fund (CRF) Act, 2000 gave statutory status to the Central Road Fund governed by the resolution of Parliament passed in 1988 for development and maintenance of National Highways and improvement of safety at railway crossings. The aim was to develop and maintain National Highways, State roads, Village Roads, railway under/ over bridges etc. and for these purposes to levy and collect by way of cess, a duty of excise and a duty of customs on motor spirit commonly known as petrol and high-speed diesel oil. The CRF Act, 2000 was replaced by the Central Road and Infrastructure Fund (CRIF), 2000 through Finance Act, 2018. The CRF Scheme was introduced in the erstwhile State of Jammu and Kashmir (J&K) in the year 2000-01.

After CRF (State Roads) Rules, 2007 came into force on 10th July 2007, these Rules were revised as Central Road Fund (State Roads) Rules, 2014 and Central Road Fund (State Roads) Amendment Rules, 2016.

A total of 292 roads and bridges projects were sanctioned in J&K under CRIF at a cost of ₹ 4,299.10 crore during 2000-01 to 2018-19[1]. Of these, only 117 (40 *per cent*) had been completed as of March 2022 and 175 incomplete projects continued to be executed under CRIF Scheme. The CRIF projects in J&K were to be completed at allotted cost within three years.

Major CRIF projects with completion between 50 *per cent* and 80 *per cent* were approved by the Hon'ble Lieutenant Governor for completion under Languishing Projects Scheme[2]. Accordingly, 82 projects (out of 292 CRIF projects) were sanctioned by the High-Powered Committee (HPC) headed by Financial Commissioner, Finance Department in its12th meeting (January 2021) under Languishing Projects Scheme for which funds were to be arranged by Jammu and Kashmir Infrastructure Development Finance Corporation (JKIDFC). As per decision of the HPC, the expenditure with respect to CRIF works is reimbursed fully by the GoI and reimbursed amounts shall be taken as a revenue accrual towards JKIDFC for debt servicing.

3.2.1.1 Organisational setup

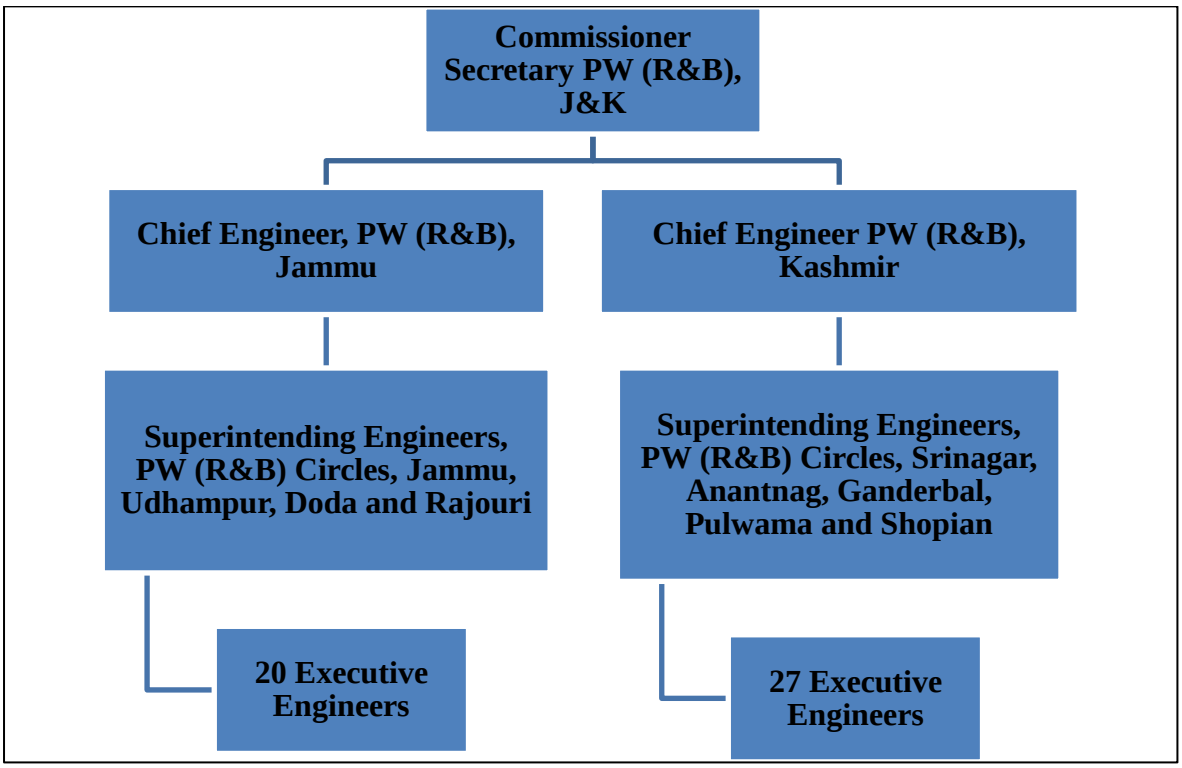
The organisational set up of Public Works Department (Roads and Buildings) responsible for implementing Central Road and Infrastructure Fund (CRIF) projects is shown in **Chart 3.2.1.**

---

1 No CRIF projects were sanctioned after 2018-19 till March 2024.

2 For completion of unfunded/ languishing infrastructure projects in J&K and any other new infrastructure projects, which are a priority for J&K, the Jammu and Kashmir Infrastructure Development Finance Corporation (JKIDFC), in the Finance Department, was established (September 2018) with an authorised capital of ₹ 50 lakh for raising loans from financial institutions including State/ Nationalised banks.

Chart 3.2.1: Organisational Setup



3.2.1.2 Audit objectives

The objectives of conducting SSCA on CRIF were to assess whether:

- Projects were identified and prioritised as per Central Road Fund Rules and as per criteria formulated by the Government of India.
- The allotment of funds was adequate and funds were spent as per the Scheme guidelines.
- Projects were executed in accordance with prescribed CRF Rules and Indian Roads Congress (IRC) specifications.
- Monitoring and quality control system were adequate and effective.

3.2.1.3 Audit criteria

Audit was benchmarked against the following sources of criteria:

- Central Road Fund Act, 2000.
- Central Road Fund (State Roads) Rules 2007 and Central Road Fund (State Roads) Rules 2014.
- Indian Road Congress (IRC) specifications and specifications prescribed by MoRTH.
- Jammu and Kashmir Public Works Account Code, 1962.
- Forest Conservation Act, 1980 and J&K Forest Conservation Act, 1997
- Jammu and Kashmir Financial Code, 2011.

3.2.1.4 Audit Scope, Sampling and Methodology

Audit scope:

The SSCA covered the period from 2017-18 to 2021-22. However, wherever required, records prior to 2017-18 were also reviewed. Test check of records was conducted during May 2022 to April 2023 in the offices of Administrative Department of Public Works (PW) Roads and Buildings (R&B), J&K, two[3] Chief Engineers (CEs) of Kashmir and Jammu, six[4] Superintending Engineers (SEs) and 24[5] executing Divisions across 10[6] Districts.

Audit sample:

Out of total 20 Districts, 10 were selected for audit using Simple Random Sampling without Replacement (SRSWOR) method. All the works executing Divisions implementing CRIF projects in these 10 Districts were audited.

Out of total 292 roads sanctioned under CRIF in J&K between 2000-01 and 2018-19, 189 roads were located in the selected 10 Districts. Out of these 189 roads, 50 roads had been completed before 2017-18 and hence the examination and analysis of remaining 139 roads were selected for audit.

Audit methodology:

Audit methodology entailed examination and analysis of records and documents, as well as issue of audit queries.

An Entry Conference was held with Director Finance, PW (R&B) on 10th May 2022 during which audit objectives, audit criteria, scope and methodology were discussed. This was followed by an Exit Conference on 17th October 2024 during which the audit findings were discussed. The Department's responses to the draft report, as well as those provided during the Exit Conference, have been suitably incorporated into the report.

---

3 Chief Engineer PW (R&B) Kashmir and Chief Engineer PW(R&B) Jammu.

4 Superintending Engineer PW (R&B) Circles (i) Anantnag (ii) Baramulla (iii) Doda (iv) Kathua, (v) Rajouri-Poonch, and (vi) Udhampur.

5 Executive Engineers PW(R&B) Divisions (i) Anantnag, (ii) Bandipora, (iii) Baramulla, (iv) Basohli, (v) Bhaderwah, (vi) Doda, (vii) Gandoh, (viii) Gurez, (ix) Handwara, (x) Kathua, (xi) Kupwara, (xii) Magam, (xiii) Nowshera, (xiv) Qazigund, (xv) Rajouri, (xvi) Samba, (xvii) Sopore, (xviii) Srinagar Division-I, (xix) Srinagar Division-II, (xx) Sumbal, (xxi) Tangdar, (xxii) Udhampur, (xxiii) Uri, and (xxiv) Vailoo.

6 (i) Anantnag, (ii) Bandipora, (iii) Baramulla (iv) Doda, (v) Kathua, (vi) Kupwara (vii) Rajouri, (viii) Samba, (ix) Srinagar, and (x) Udhampur.

Audit findings

3.2.2 Planning

3.2.2.1 Non-Prioritisation of projects

Rule 5 (1) of CRF (State Roads) Rules, 2014 regarding "Identification and prioritisation of Schemes under State roads including roads of economic importance and inter-State Connectivity" stipulates that the Central Government shall identify and prioritise the projects for release of funds in consultation with the executing agencies (State/ Union Territory Governments). The executing agencies shall observe the criteria and furnish necessary details of the projects as specified under these Rules, to the Central Government to facilitate identification and prioritisation of the Schemes.

Further, Rule 3 of the CRF (State Roads) Rules, 2014 stipulates that the allocation of fund to the executive agencies shall be made on the basis of 30 *per cent* weightage to fuel consumption and 70 *per cent* weightage to the geographical area of the concerned States or Union Territories. Accordingly, there is a fixed allocation of funds for CRIF projects in a year. Besides, the CRIF projects were to be completed at the allotted cost within three years in J&K.

Audit examination disclosed that the prioritisation of projects for sanction under CRIF was not undertaken. No action plan for identifying and prioritising CRIF projects was prepared by the PW (R&B) Department for proposing works to GoI for sanction under CRIF.The DPRs of the projects were submitted to GoI for approval primarily based on the directions of public representatives.

The position of projects sanctioned under CRIF during 2001-17 and 2017-19[7] (period under audit) and projects completed as of March 2022 is given in **Table 3.2.1**.

Table 3.2.1: Projects sanctioned under CRIF during 2001-2017 and 2017-2019 and their completion status as of March 2022

(₹in crore)

Period	Projects sanctioned	Sanctioned cost	Projects completed	Projects incomplete (sanctioned cost)	Range of physical completion of incomplete projects *(Percentage)*: (Number of incomplete projects)	Expenditure incurred on incomplete projects	Funds required for incomplete projects
2000-01 to 2016-17	208	₹ 2,969.04	115	93 (₹1,961.72)	00 to 10: (06) 11 to 20: (03) 21 to 30: (11)	₹ 1,000.65	₹ 961.07

[7] Although SSCA covered the period up to 2021-22, the period of sanction of projects up to only 2018-19 was in sample because no CRIF projects were sanctioned after 2018-19 in J&K.

Period	Projects sanctioned	Sanctioned cost	Projects completed	Projects incomplete (sanctioned cost)	Range of physical completion of incomplete projects (*Percentage*): (Number of incomplete projects)	Expenditure incurred on incomplete projects	Funds required for incomplete projects
					31 to 40: (06) 41 to 50: (04) 51 to 60: (06) 61 to 70: (11) 71 to 80: (10) 81 to 90: (09) 91 to 97: (27)		
2017-18 to 2018-19 (period under audit)	84	₹ 1,332.12	02	82 (₹1,301.74)	00 to 10: (19) 11 to 20: (12) 21 to 30: (12) 31 to 40: (08) 41 to 50: (07) 51 to 60: (07) 61 to 70: (04) 71 to 80: (06) 81 to 90: (02) 91 to 99: (05)	₹ 228.36	₹ 1,073.38
Total	**292**	**4,301.16**	**117**	**175 (₹3,263.46)**		**1,229.01**	**2,034.45**

(Source: information compiled by audit from Departmental records)

It can be seen from the **Table 3.2.1** that:

- Out of 208 projects sanctioned under CRIF during 2000-2001 to 2016-2017, only 115 (55 *per cent*) projects were completed. These projects were scheduled for completion between 2003-04 and 2019-20. The remaining 93 projects remained incomplete as they were not prioritised for completion in accordance withRule 5 (1) of CRF (State Roads) Rules, 2014.
- Instead, 84[8] new projects were sanctioned during 2017-18 and 2018-19, for which ₹ 228.36 crore was utilised (2017-18 to 2021-22) for their execution. These funds ranged between 0 *per cent* and 73 *per cent*[9] of the sanctioned costs of projects. Since, there is a fixed allocation of funds for CRIF projects, as per Rule 3 of CRF (State Roads) Rules, 2014 in a year, the utilisation/ release of funds on 84 new projects had resulted in scarcity of funds for both

[8] 2017-18: 69 new projects and 2018-19: 15 new projects.

[9] Zero expenditure: 14 projects; 0.24 *per cent* to 20 *per cent* expenditure: 39 projects; 21 *per cent* to 30 *per cent* expenditure:10 projects; 31 *per cent* to 50 *per cent* expenditure: 12 projects and 51 *per cent* to 73.31 *per cent* expenditure: seven projects.

93 incomplete projects as well as 82 out of 84 newly sanctioned projects during 2017-19.

- As the amount of ₹ 228.36 crore released by GoI was not sufficient for completion of 84 newly sanctioned projects, this amount could have been utilised for execution and timely completion of 93 incomplete projects.

Thus, non-prioritisation of projects by the Department resulted in non-completion of both 93 ongoing projects as well as 82 new projects as of March 2022.

In reply, the Chief Engineer (CE), PW(R&B) Department Jammu stated (January 2023) that priority had been given to completion of projects sanctioned during 2001-17 as 54 projects of Jammu province sanctioned during 2001-17 and only one project sanctioned during 2017-19 were completed as of March 2022. It was further stated that projects sanctioned under CRIF were prioritised by field offices in consultation with public representatives depending on requirement.

Director Finance, PW (R&B) Department stated (November 2023) that new projects were undertaken to address the requirements and waiting for ongoing schemes to be completed before initiating new ones would not have been a prudent approach.

The reply is not justifiable as Rule 3 of Central Road Fund (State Roads) Rules, 2014 provides for a fixed allocation of funds for CRIF projects in a year. In this context, the Department should have proposed only those projects for approval that were likely to be fully completed in the stipulated timeline. Further, new projects should have been proposed only after achieving significant progress in completion of ongoing projects and availability of fund.

During the Exit Conference (17th October 2024), the Department accepted that completion of projects under CRIF was adversely affected due to fixed allocation of CRIF funds.It was added that ongoing CRIF projects were further affected due to bifurcation of erstwhile J&K State in two UTs (J&K and Ladakh) as large part of geographical area went under UT of Ladakh. Department also confirmed that the projects amounting to₹ 500 crore, which had been submitted to GoI for approval after 2018-19, were withdrawn to prioritise the completion of ongoing projects.

3.2.2.2 Misreporting for Sanction of Ineligible Roads

Rule 6 (3) of the CRF (State Roads) Rules, 2014 stipulates that in respect of roads proposed under CRIF, no improvement works[10] should have been carried out in the previous three years[11]. Audit examination disclosed contravention of the aforesaid Rule as discussed in the following paragraphs:

[10] Improvement' means laying of bitumen on existing surface.
[11] Preceding three years from the date of proposal of projects to GoI.

- In respect of old Samba-Kathua road, the Executive Engineer (EE), PW (R&B) Division, Kathua had allotted (October 2015) the work of laying Bituminous Macadam (BM)[12] and Semi Dense Bituminous Concrete (SDBC)[13] (km 9th to km 15th) at a cost of ₹ 1.78 crore under State sector. A payment of ₹ 1.78 crore was made (May 2016) to the contractor for laying of BM[14] and of SDBC[15].
- Similarly, EE, PW(R&B) Division, Kathua had allotted (September 2016) the work of laying BM[16] and SDBC[17] on Dayala chak Jandi road (km 1st RD 800 to km11th RD 500) at a cost of ₹ 2.40 crore under State Sector. A payment of ₹ 3.17 crore was made (May 2017) to the contractor for laying of BM[18] and SDBC[19].
- However, in violation of CRF Rule, EE, PW(R&B) Division, Kathua had wrongly certified (December 2016 and January 2017) in the Detailed Project Reports (DPRs) that no work had been executed on these two roads during the previous three years. On the basis of this wrong certification, GoI sanctioned (March 2017) 'Improvement/ widening of old Samba-Kathua road (Km 1st to Km 15th) and 'Improvement/ upgradation of Dayala chak-Hiranagar-Jandi road via Kattal Gujran' (km 1st to km 12th) at costs of ₹ 15 crore and ₹ 10 crore respectively under CRIF.

Thus, by wrongly certifying to GoI that no work had been executed on these two roads during previous three years, EE, PW(R&B) Division, Kathua had managed to get these two ineligible roads sanctioned by GoI.

During the Exit Conference (17th October 2024), it was stated that these road projects were inadvertently proposed for sanction and due care would be taken in future not to propose ineligible road projects.

3.2.2.3 Sanctioning of Projects in deviation from CRF Rules

(A) Rule 5 (3) of CRF (State Roads) Rules, 2007 and Rule 6 (2) of the CRF (State Roads) Rules, 2014 stipulate that roads proposed under CRIF should generally cover at least 10 km of length except in cases, such as construction of missing bridges, cross drainage works, rehabilitation of bridges, widening of two-lanes, strengthening of weak pavement sections etc.

Audit noted that 23 out of 139 road projects[20] did not include construction of missing bridges, cross drainage works, rehabilitation of bridges, widening of two-lanes,

12 50 millimeter (mm) thick.
13 25 mm thick.
14 1,074.46 cubic meter (cum).
15 21,946.07 square meters (sqm).
16 50 mm thick.
17 25 mm thick.
18 2,050.53 cum.
19 46,439 sqm.
20 Kashmir: 15 and Jammu: 08.

strengthening of weak pavement sections etc. but were proposed and sanctioned under CRIF at a cost of ₹ 315.87 crore[21] during 2013-14 to 2018-19, with length of the roads ranging between 3.2 km and 9.50 km.

During the Exit Conference (17th October 2024), it was stated that these road projects were inadvertently proposed for sanction and due care would be taken in future not to propose ineligible road projects.

3.2.3 Financial Management

Against a total receipt of ₹ 1,102.45 crore[22] under CRIF funds during 2017-18 to 2021-22, an expenditure of ₹ 1,329.60 crore was incurred, leading to an excess expenditure of ₹ 227.15 crore. However, the regularisation of this excess expenditure was not available on record. The position of funds released by GoI to GoJ&K, funds further released by GoJ&K to implementing agencies and expenditure incurred there against during 2017-18 to 2021-22 is given in **Table 3.2.2**.

Table 3.2.2: Details of funds received vis-a-vis expenditure incurred

(₹ in crore)

Year	Opening Balance (1)	Funds received from GoI (2)	Funds released by GoJ&K (3)	Total funds available (4) = (1) + (3)	Expenditure incurred (5)	Closing Balance (6) = (4) – (5)
2017-18	2.18	332.57	236.02	238.20	234.28	3.92
2018-19	3.92[23]	344.75	336.20	340.12	338.03	2.09
2019-20	2.09	103.48	208.58	210.67	207.00	3.67
2020-21	3.67	128.88	199.48[24]	203.15	192.77	Nil[25]
2021-22	Nil	320.78[26]	119.99[27]	119.99	357.52[28]	Nil[29]
Total		**1,230.46**	**1,100.27**		**1,329.60**	

(Source: information provided by Department)

Audit noted the following discrepancies regarding financial management of CRIF projects:

(A) GoJ&K had released ₹ 221.87 crore (₹ 70.60 crore + ₹ 151.27 crore) for CRIF projects in anticipation of receipt of funds from GoI (advance positioning) during 2020-21 to 2021-22 to expedite completion of ongoing projects. Further, 82 CRIF projects were sanctioned for funding under Languishing Projects Scheme through

21 Kashmir: ₹ 201.50 crore and Jammu: ₹ 114.37 crore.

22 Fund released by GoJ&K (₹ 1,100.27 crore) and opening balance of 2017-18 (₹ 2.18 Crore).

23 Entire funds of ₹ 3.92 crore revalidated and released to Chief Engineer PW (R&B) Jammu.

24 In addition to funds of ₹ 128.88 crore received from GoI during 2020-21, Finance Department had released funds of ₹ 70.60 crore as advance positioning.

25 Unspent balance of ₹ 10.38 crore during 2020-21 had lapsed as these funds pertain to advance positioning by the Finance Department.

26 Adjustment of ₹ 70.60 crore and ₹ 151.27 crore for advance positioning by the Finance Department respectively during 2020-21 and 2021-22.

27 ₹ 119.99 crore was released to implementing agencies out of advance positioning of ₹ 151.27 crore by the Finance Department.

28 Includes expenditure of ₹ 243.08 crore incurred on CRF projects under languishing projects.

29 Unspent balance of ₹ 5.55 crore during 2021-22 had lapsed as these funds were out of advance positioning by the Finance Department.

JKIDFC during January 2021. These funds were to be demanded from GoI and adjusted against future release of funds by GoI.

However, PW (R&B) Department had received only ₹ 400.18 crore from GoI against expenditure of ₹ 449.02 crore (erstwhile State/ UT Budget: ₹ 205.94 crore; Languishing projects: ₹ 243.08 crore) as of March 2022. Thus, expenditure of ₹ 48.84 crore incurred in advance had remained unadjusted as of March 2022.

In reply, the Director Finance, PW (R&B) Department stated (November 2023) that the expenditure incurred against the bridge loan received from JKIDFC would be adjusted.

(B) The total sanctioned cost of DPRs for five CRIF projects[30], executed by four works[31] Divisions, was ₹ 91.32 crore. However, the total advertised cost of these projects was only ₹ 83.39 crore, resulting in excess sanction of ₹ 7.93 crore. This discrepancy is indicative that the DPRs were prepared without proper surveys and inflated projects' costs were proposed to GoI for sanction. Further, the total allotted cost for execution of these projects was only ₹ 70.90 crore.

Audit further noted that instead of releasing the allotted cost of ₹ 70.90 crore for execution of these projects, CEs, PW (R&B) Department Kashmir and Jammu had released ₹ 86.08 crore. This resulted in excess release of ₹ 15.18 crore to these Divisions which was irregularly expended as discussed below:

- In respect of Samba-Mansar Road, ₹ 3.52 crore was released in excess of allotment. Out of ₹ 3.52 crore, ₹ 2.90 crore was diverted on works not related to the road project.
  In reply, the EE, PW(R&B) Division Samba stated (January 2023) that works on link roads were executed on the directions of Commissioner Secretary PW (R&B) Department, J&K and CE, PW(R&B) Department Jammu as per demand of local MLA and public.
  The fact remained that CRIF funds were diverted for construction of link road not connected with the sanctioned CRIF project (Samba-Mansar Road).
- In respect of Utterbani-Purmandal road, an amount of ₹ 3.50 crore was released in excess of allotment. The construction of retaining walls/ breast walls allotted to the contractor at zero allotted cost (contractor's bid for these items was zero) was not executed by the contractor. Instead, the EE, PW (R&B) Division Samba had got these components irregularly executed departmentally through the same contractor and made payment of ₹ 1.79 crore.

[30] (i) Improvement/ Upgradation of Samba-Mansar Road (ii) Improvement/widening of Utterbani-Purmandal Road via Mandal (iii) Restoration/ Upgradation of Sumbal-Bandipora road (iv) Construction/ Upgradation of Verinag-Kapran road, and (v) Construction of road from Warapora to Fruit Mandi via Saidpora.

[31] Samba, Bandipora, Qazigund and Sopore.

- In respect of Sumbal-Bandipora, Verinag-Kapran and Warapora to Fruit Mandi roads, ₹ 3.86 crore, ₹ 0.88 crore and ₹ 3.41 crore respectively were released in excess of allotment.

Furthermore, the inflated DPR costs were primarily because the quantities and rates for certain items of works were prepared by the executing Division on typical estimates[32] and typical rates respectively which were not based on any approved norms. These typical estimates and rates were higher than the applicable Schedule of Rates, resulting in over-projection of funds and their consequent excess sanction. However, in the Notice Inviting Tenders of these works, the rates were specified as per Schedule of Rates which were significantly less than the typical rates used in DPRs. As a result, the advertised costs were less than the DPR costs.

Regarding mis-utilisation of funds on Departmental execution of retaining wall/ breast wall on Utterbani-Purmandal road via Mandal, the EE, PW(R&B) Division Samba stated (January 2023) that works were undertaken in view of *Amvasya Mela* at Utterbani/ Purmandal.

The reply was not acceptable as execution of retaining wall/ breast wall was allotted in the original contract but was not executed by the contractor. Subsequently, the said work was irregularly executed by Department at higher rates than rates at which the work was originally allotted to the contractor.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that actual execution of project is influenced by various on-site factors, and it is inherent that there would be variations in quantities during execution.

The reply is generic in nature and fails to address the specific audit observation regarding the irregular expenditure of excess release of ₹ 15.18 crore.

During the Exit Conference (17th October 2024), it was stated that such cases would be examined and factual position would be furnished to Audit.

(C) Construction of 80m span pre-stressed concrete bridge over Sukh Tawinalla from Vedant Ashram to Military Engineering Services (MES) store with approach road was sanctioned (2015-16) at a cost of ₹ 6.62 crore under CRIF. The Jammu and Kashmir Project Constructions Corporation Limited (JKPCC) was to execute the work and funds for the project were to be provided by PW (R&B) Department.

The Board of Directors (BoD) of JKPCC decided (2007) to charge 15 *per cent* as overheads for preparing cost estimates of works. These rates were revised

[32] As the name indicates, the typical estimates for various items of work, prepared by the executing Divisions, are calculated based on discretionary assumptions of Assistant Executive Engineer and Executive Engineer regarding the expected deployment of labour, machinery, materials, carriage of material, contractor's profit, etc. The rates of these typical estimates are not based on any approved Guidelines/ Rules of either the State or the Central Government.

(August 2012) to 15, 10 and 7.5 *per cent* for projects costing up to ₹ 50 crore, ₹ 100 crore and over ₹ 100 crore respectively.

Records of EE, PW (R&B) Division, Rajouri showed that JKPCC had invited (January 2017) e-NIT for construction of bridge and allotted (May 2017) work to a contractor[33] at a cost of ₹ 4.89 crore. As such, ₹ 5.88 crore, including ₹ 0.99 crore (15 *per cent*) as overhead charges, were to be released to the JKPCC by the Department.

Audit noted that instead of releasing ₹ 5.88 crore, the EE, PW (R&B) Division Rajouri had released ₹ 6.62 crore to the JKPCC resulting in excess release of ₹ 0.74 crore.

Director Finance, PW (R&B) Department stated (November 2023) that the matter regarding releasing excess amount had been taken up with JKPCC in July 2023.

3.2.3.1 Submission of Higher Cost of Projects for Approval under Languishing Projects Scheme

The HPC in its 12th meeting (January 2021) had approved 82 CRIF projects under Languishing Projects Scheme. As per the decision of HPC, only the balance cost of projects was to be funded under Languishing Projects Scheme and the works were to be completed within allotted costs within two years. Further, the expenditure on CRIF works was to be reimbursed fully by GoI and would be taken as revenue accrual towards repayment of loan and interest taken from JKIDFC for debt servicing.

Records of CE, PW(R&B) Department, Jammu, CE, PW(R&B) Department, Kashmir and SEs of nine circles[34] revealed that contracts had been allotted (February 2015 to July 2022) to 82 contractors in respect of 82 CRIF projects[35]. Subsequently, these projects were proposed (January 2021) for funding under Languishing programme. As such, the Department had to submit the balance costs[36] of projects to HPC for approval of funds under Languishing programme. These projects were sanctioned by HPC in January 2021.

Audit noted that although the approved costs by HPC for 35 out of 82 projects were equal to balance costs, it was more than balance cost in respect of 47 projects. This had resulted in sanction of extra cost of ₹ 196 crore[37] in respect of these 47 projects. As of March 2023, an extra expenditure of ₹ 49.97 crore[38] over allotted cost was incurred on these projects.

34 (i) SE Jammu-Kathua Circle (ii) SE Udhampur-Reasi Circle (iii) SE Doda Circle (iv) SE Poonch-Rajouri Circle (v) SE Anantnag/ Kulgam (vi) SE Baramulla-Kupwara Circle (vii) SE Srinagar-Budgam Circle (viii) SE Bandipora-Ganderbal Circle, and (ix) SE Shopian-Pulwama Circle.

35 Jammu: 52, Kashmir: 30.

36 Allotted cost of project minus the expenditure incurred prior to Languishing programme.

37 Jammu: ₹ 191.74 crore, Kashmir: ₹ 4.26 crore.

38 Jammu: ₹ 41.44 crore, Kashmir: ₹ 8.53 crore.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that the costs of these projects were equal to or greater than initially allotted costs as costs of these projects were calculated based on prevailing Schedule of Rates and factors such as nature and extent of remaining work.

The reply is not acceptable as the decision of HPC clearly stipulated that only the balance cost of projects was to be funded under the programme for Languishing projects and the works were to be completed within allotted costs.

3.2.4 Contract Management

3.2.4.1 Unrealistically low-priced bids

(A) Sub-clause 26.4 of the Standard Bidding Document (SBD) of CRIF projects stipulates that if the bid of the successful bidder was seriously unbalanced (i.e. 15 *per cent* below advertised cost), the employer/ contract awarding authority may require the bidder to produce detailed price analysis for any or all items of the Bill of Quantities (BoQs) to demonstrate the internal consistency of those prices with the construction methods. After price analysis, the employer may require that the amount of the performance security set forth in clause 30 of SBD be increased at the expense of the successful bidder to a level sufficient to protect the employer against financial loss in the event of default by the successful bidder under the Contract.

Records of 31 works executing Divisions[39] revealed the following in this regard:

- Out of 101 successful bids[40] during October 2015 to March 2020, bids of 75 projects[41] sanctioned under CRIF were seriously unbalanced as they were below advertised cost of works ranging from 15 *per cent* to 42 *per cent.*
- The Departmental Contract Committee (DCC)[42]/ CEs, PW (R&B) Department Kashmir and Jammu had not obtained detailed price analysis for any items of the BoQs from successful bidders to determine internal consistency of prices with the construction methods in terms and conditions of SBD.

Thus, the contracts of 75 projects were allotted without evaluation of price analysis.

During the Exit Conference (17th October 2024), the Department stated that such issues have now been addressed by invitation of tenders on a percentage basis instead of the earlier item-wise rates.

---

39 Executive Engineers PW(R&B) Divisions (i) Bandipora, (ii) Basohli, (iii) Baramulla, (iv) Bhaderwah, (v) Budgam, (vi) Chadoora, (vii) Doda, (viii) Gandoh, (ix) Handwara, (x) Jammu Construction Division-I, (xi) Jammu Construction Division-II, (xii) Construction Division-III, (xiii) Kathua, (xiv) Khanabal, (xv) Kishtwar, (xvi) Kupwara, (xvii) Magam, (xviii) Nowshera, (xix) Poonch, (xx) Pulwama, (xxi) Qazigund, (xxii) Rajouri, (xxiii) Reasi, (xxiv) Samba, (xxv) Shopian, (xxvi) Sopore, (xxvii) Srinagar Division-I, (xxviii) Srinagar Division-II, (xxix) Udhampur, (xxx) Uri and (xxxi) Vailoo.

40 Jammu: 58 and Kashmir: 43

41 Jammu: 44 and Kashmir: 31

42 Development Commissioner (Works), Chief Engineer PW(R&B) Kashmir, Chief Engineer PW(R&B) Jammu, Chief Engineer Design Inspection and Quality Control (DIQC) J&K and Director Finance PW(R&B) Department.

(B) Sub-clause 26.5 of the SBD stipulates that bids which contain 50 *per cent* of items in the BoQs which are unrealistically priced low (25 *per cent* below) and cannot be substantiated satisfactorily by the bidder shall be rejected as non-responsive.

Records of CEs PW(R&B) Department Kashmir and Jammu and SEs, PW(R&B) Doda and Rajouri Circles revealed that lists of advertised/ estimated rate of components were not enclosed with the NIT in the contract files. Audit collected advertised/ estimated rates from 13 works executing Divisions and found that 24 projects[43] amounting to ₹ 214.83 crore out of 75 allotted projects were liable to be cancelled as the contractors had quoted 50 *per cent* of BoQs items below 25 *per cent* of advertised/ estimated costs. The prices quoted were below advertised costs in the range of 25 and 100 *per cent* as detailed in ***Appendix 3.2.1.*** As a result, these bids were liable for rejection as non-responsive in the light of terms and conditions of SBD.

Thus, DCC/ CEs, PW(R&B) Department Kashmir and Jammu SEs, PW(R&B) Doda and Rajouri Circles had allotted 75 projects without price analysis, out of which 24 contracts for ₹ 214.83 crore[44] were allotted to contractors whose bids were liable to be cancelled.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that establishing a fixed percentage below the estimated cost as a universal criterion for identifying an abnormally low bid is not advisable and each case had to be evaluated on a case-by-case basis.

The reply is not acceptable as the SBD formulated by the Department itself prescribes a fixed percentage below the advertised cost to identify the abnormally low bids. Further, the reply was silent regarding the audit observation that 24 contracts were liable to be cancelled.

During the Exit Conference (17th October 2024), the Department stated that such issues have now been addressed by invitation of tenders on a percentage basis instead of the earlier item-wise rates.

3.2.4.2 Performance Security

As per clause 30.1 of the SBD of CRIF projects, the successful bidder/ contractor shall deliver to the employer/ concerned authority, a Performance Security in any of the required forms for an amount equivalent to five *per cent* of contract price (plus additional performance security for unbalanced bid[45] in accordance with clause 26.4 of Instructions to Bidders) within 21 days after the date of receipt of the Letter of Acceptance.

---

43 Jammu: 19 and Kashmir: 05

44 Jammu: ₹ 162.16 crore; Kashmir: ₹ 52.67 crore

45 15 *per cent* below advertised cost.

The rates at which additional performance security for unbalanced bids, if any, were to be levied during the period 2017-18 to 2018-19 were not produced to Audit in the office of CE, PW (R&B) Department, Jammu. In supersession of all previous orders, the CEs, PW(R&B) Department Kashmir and Jammu issued (August 2018 and March 2019) circulars prescribing rates of additional performance security for unbalanced bids as detailed in **Table 3.2.3.**

Table 3.2.3: Rates of additional performance security for unbalanced bids

Percentage of unbalanced bids vis-a-vis advertised cost	Additional Performance Security
Up to and including 15 *per cent* below	Nil
Below 15 *per cent* up to and including 20 *per cent*	five *per cent* of advertised cost
Below 20 *per cent* up to and including 25 *per cent*	10 *per cent* of advertised cost
Below 25 *per cent* up to and including 30 *per cent*	15 *per cent* of advertised cost
Below 30 *per cent*	20 *per cent* of advertised cost

(Source: information provided by Department)

However, the CE, PW(R&B) Kashmir excluded CRIF projects from the rates prescribed in the above-mentioned circular of August 2018. The CE, PW(R&B) Jammu withdrew its circular (March 2019) and issued fresh circular (May 2019) prescribing revised rates of additional performance security for unbalanced bids, as detailed in **Table 3.2.4.** The reasons for exclusion of CRIF projects from purview of circular issued by the CE, PW(R&B) Kashmir and withdrawal of circular (March 2019) issued by the CE, PW(R&B) Jammu were not on record.

Table 3.2.4: Revised rates of additional performance security for unbalanced bids

Percentage of unbalanced bids vis-a-vis advertised cost	Additional Performance Security
Up to and including 15 *per cent*	Nil
Beyond 15 *per cent* and more	five *per cent* of advertised cost

(Source: information provided by Department)

Further, Audit reviewed 104 SBDs[46] of contracts entered into during April 2011 to April 2022 pertaining to CRIF projects in offices of the CEs, PW(R&B) Department Kashmir and Jammu and SEs, PW (R&B) Circles Doda and Jammu and noted the following shortcomings, as detailed in **Table 3.2.5.**

[46] Jammu: 61; Kashmir: 43

Table 3.2.5: Deficiencies in obtaining Additional Performance Security

No. of cases where additional Performance Security was not obtained at prescribed rate of five *per cent* from contractors	No. of cases where additional Performance Security was not obtained at prescribed rate of three/ five/ 20 *per cent* from contractors	No. of cases where clause of additional Performance Security was deleted in SBDs	No. of cases where it was mentioned in the SBDs that rate of additional Performance Security would be decided by the employer	No. of cases where SBDs were silent about obtaining additional Performance Security	No. of cases where Files/ SBDs were not on record
24	20	06	08	10	10

Consequently, against the Performance Security and Additional Performance Security of ₹ 73.87 crore[47] required to be obtained from the contractors for 70[48] out of 104 contracts, Performance Security and Additional Performance Security for an amount of only ₹ 51.91 crore[49] was obtained by CEs PW (R&B) Department.

Thus, the Department failed to collect Additional Performance Security at the rates stipulated in the contracts. This resulted in providing undue financial benefit of ₹ 21.96 crore[50] to the contractors, besides not safeguarding against financial loss to the Government in the event of default by the contractors.

During the Exit Conference (17th October 2024), the Department stated that the matter would be investigated and factual position would be intimated to Audit.

3.2.4.3 Bank Guarantees

The SBD of CRIF projects stipulates that Performance Security shall be valid up to 28 days after the expiry of Defect Liability Period (DLP)[51] after intended date of completion of work. Further, Additional Performance Security for unbalanced bid shall be valid for 45 days after intended date of completion of work.

As per Guidelines issued (December 2007) by the Central Vigilance Commission, one officer should be specifically designated for verification of genuineness, renewal and timely encashment of Bank Guarantees (BGs).

Audit examination of records of CEs, PW(R&B) Department Kashmir and Jammu and SEs, PW(R&B) Doda circle disclosed the following:

47 Jammu: ₹ 34.29 crore and Kashmir: ₹ 39.58 crore
48 Jammu: 27 and Kashmir: 43
49 Jammu: ₹ 18.63 crore and Kashmir: ₹ 33.28 crore
50 Jammu: ₹ 15.65 crore and Kashmir: ₹ 6.31 crore
51 One to three years.

- In contravention of the terms and conditions of SBD, 61[52] out of 102 test-checked[53] BGs had been obtained from contractors with validity period of only one year despite the fact that intended completion period of these projects ranged between two and three years. These BGs had also not been renewed after one year.
- Although, data of BGs obtained from contractors on account of Performance Security and Additional Performance Security was digitised, no mechanism was in place in the offices of the CEs, PW(R&B) Department Kashmir and Jammu to monitor expiry or renewal of BGs. As a result, 94 BGs[54] of the 64 ongoing CRIF projects[55] valuing ₹ 56.07 crore[56] (including the afore-mentioned 61 BGs obtained from contractors with validity period of only one year) had expired during January 2016 to October 2022 and these BGs were not got renewed. Non-renewal of BGs of these projects reflect that these projects were being implemented without any financial safeguard and entailed significant risk, if a contractor abandoned the work mid-way or failed to complete the work.
- The copies of 20[57] out of 102 BGs[58] valuing ₹ 7.87 crore[59] were not traceable in the records of the CEs, PWD (R&B) Jammu and Kashmir. Missing BGs were fraught with risk of release of BGs to contractors in an unauthorised manner.

Thus, the failure of the Department to obtain Bank Guarantees for prescribed time period of completion of work plus Defect Liability Period, rather than for only one year, as well as non-renewal of expired BGs had not only compromised the interest of Government but also provided undue benefit to contractors.

During the Exit Conference (17th October 2024), it was stated that SOP shall be issued regarding maintenance of Bank Guarantees and a copy of the same would be furnished to Audit.

3.2.5 Deficiencies in Execution of CRIF projects

3.2.5.1 Status of projects

The position of completed and incomplete projects as of March 2022 in 10 test-checked Districts is given in **Table 3.2.6**.

52 Jammu: 57 and Kashmir: 04
53 Jammu: 69 and Kashmir: 33
54 Jammu: 69 and Kashmir: 25
55 Jammu: 44 and Kashmir: 20
56 Jammu: ₹ 37.39 crore and Kashmir: ₹ 18.68 crore
57 Jammu: 15 and Kashmir: 05
58 Jammu: 69 and Kashmir: 33
59 Jammu: ₹ 5.55 crore and Kashmir: ₹ 2.32 crore

Table 3.2.6: Position of completed and incomplete projects as of March 2022

District	No. of Projects	Projects Sanctioned before 2009-10	Projects Completed	Projects Sanctioned during 2010-19	Projects Completed	Period of delay in respect of incomplete projects as of March 2022
Kathua	19	05	05	14	02	05 to 28 months
Samba	12	02	02	10	02	13 to 43 months
Udhampur	08	03	03	05	00	07 to 31 months
Doda	36	14	07	22	01	09 to 144 months
Rajouri	19	03	03	16	03	09 to 53 months
Srinagar	31	23	23	08	03	05 to 53 months
Baramulla	22	02	02	20	06	04 to 24 months
Anantnag	20	03	03	17	11	04 to 19 months
Kupwara	14	00	00	14	06	03 to 39 months
Bandipora	08	00	00	08	04	16 to 52 months
Total	**189**	**55**	**48**	**134**	**38**	

(Source: information compiled by audit from Departmental records)

It can be seen from the **Table 3.2.6** that out of 189 projects sanctioned as of March 2019, only 86 projects (46 *per cent*) were completed as of March 2022. These projects were scheduled to be completed between March 2004 and March 2022. However, 103 projects remained incomplete even after lapse of 3 to 144 months from the stipulated date of their completion. The reasons for non-completion of these projects included not completing land acquisition formalities before sanctioning of projects, non-provision of funds for shifting of utilities and not obtaining forest clearances prior to execution of works as detailed in the following paragraphs:

Paragraph 7 (8) of CRF (State Roads) Rules, 2007 and Paragraph 6 (2) of CRF (State Roads) Rule, 2014 stipulate that work executing agency should propose only those works where land is available without any encumbrance and paragraph 8 of CRF (State Roads) Rules, 2007 envisages that the executive agency need to render a certificate to the effect that land was available for road development and was in its possession and removing of utilities, if any, was completed. Further, as per Rule 7 (10) of the CRF(State Roads) Rules 2014 the period of completion of the projects shall not exceed 36 months in hilly and North-Eastern States and 24 months in other States unless permitted by GoI.

Audit noted the following violations of the ibid Rules:

(I) Not obtaining No Objection Certificate (NOC) from Forest Department

As per the Forest Conservation Act, 1980 and J&K Forest Conservation Act, 1997 prior approval of the Government of India/ erstwhile State Government for use of reserve forest land for non-forest purposes is necessary. The Rule inter-alia provides

that if the proposed work involves forest land in some stretches, the work on even non-forest land/ reaches should not commence till sanction for the use of forest land is obtained.

Audit noted that out of 139 selected projects, 24 CRIF road projects sanctioned (2005-06 to 2018-19) at a cost of ₹ 429.32 crore involved forest land. However, in violation of the provisions of the Forest Conservation Act, 1980, these road projects were started without obtaining the approval of Government of India/ erstwhile State Government. Additionally, it was found that the executing Divisions had incorrectly certified in the DPRs of these projects that encumbrance free land was available. Based on this incorrect reporting, these works were sanctioned by the GoI. Consequently, these projects were stopped mid-way, leading to significant delays ranging from 3 to 39 months and an expenditure of ₹ 80.11 crore was incurred on these projects as of March 2022 without achieving the intended objective.

During the Exit Conference (17th October 2024), it was stated that construction work had resumed in respect of all these 24 road projects and dates of accord of NOCs by the Forest Department will be furnished to Audit.

The reply should, however, be viewed in light of the fact that no documentary evidence to prove that these works were resumed was produced to Audit.

(II) Not ensuring encumbrance free site

Paragraph 7 (5) (x) of CRF (State Roads) Rules, 2014 stipulates that a certificate regarding availability of the entire unencumbered land needed for the project is to be submitted with project proposal for sanction.

Audit observed that 66 out of 139 selected road projects were submitted for sanction under CRIF to GoI, before ensuring encumbrance free land sites for execution of these projects. However, in the DPRs of these projects, the Department incorrectly certified that encumbrance free land was available. Based on the incorrect reporting, these works were sanctioned at a total cost of ₹ 1,143.31 crore by the GoI. However, these works either could not be started or were stopped mid-way due to land disputes and issues of shifting of utility services. Consequently, these projects were stopped mid-way, leading to significant delays ranging from 3 to 144 months and expenditure of ₹ 501.38 crore was incurred on these projects as of March 2022 without achieving the intended objective.

In reply, Director Finance, PW (R&B) Department stated (August 2023) that initially encumbrance free land was available as the land was voluntarily offered by inhabitants, however during the course of execution of work, the inhabitants refused to provide land free of cost and sought compensation which resulted in delays in completion of work.

The fact remained that 66 road projects were submitted for sanction under CRIF to GoI, before ensuring encumbrance free land sites for execution of these projects.

3.2.5.2 Execution of projects without obtaining Technical Sanction

Paragraph 7 (4) of CRF (State Roads) Rules, 2014 stipulates that the executive agency shall ensure that an individual project is technically approved, financially sanctioned and awarded within a period of four months from the date of Administrative Approval of work.

Audit, however, noted that in 155 (82 *per cent*) out of total 189 Administratively Approved projects between 2000-01 and 2018-19 in the selected 10 Districts, the work was started without obtaining the Technical Sanction. Although, for 83 projects, the Technical Sanction was accorded after delays ranging from 01 year to 12 years[60], in respect of72 projects, Technical Sanction had not been granted as of March 2022. In absence of Technical Sanction, Audit could not derive assurance whether estimates were accurately prepared based on survey and the works were structurally sound.

During the Exit Conference (17th October 2024), it was stated that this issue has been addressed after the introduction of JK- PWD Online Management System (JK-PW DOMS) in the year 2019-20. It was added that after implementation of this system, no project will be approved/ allotted without Technical Sanction.

The reply, however, was silent on the reasons for commencement of 155 projects without obtaining the required Technical Sanction.

3.2.5.3 Unrealistic preparation of Detailed Project Reports (DPRs)

Records of 12[61] out of 24 test-checked works executing Divisions revealed that quantities and rates of various items of works sanctioned in DPRs of 52 road/ bridge projects under CRIF were significantly reduced in the Bills of Quantities of Notice Inviting Tenders under CRIF as detailed below:

(i) The total advertised cost of these 52 projects[62] was ₹ 766.26 crore[63], which was 3 *per cent* to 36 *per cent* lower than the total sanctioned DPR cost of ₹ 860.51 crore[64].

(ii) The total allotted cost of these projects was ₹ 594.30 crore[65], ranging from 11 *per cent* to 61 *per cent* below the sanctioned DPR cost, as detailed in ***Appendix 3.2.2*.**

60 Calculated after the four months from the date of accord of Administrative Approval.

61 (i) Basohli, (ii) Doda, (iii) Gandoh, (iv) Khanbal, (v) Kupwara, (vi) Nowshera, (vii) Qazigund, (viii) Rajouri, (ix) Samba (x) Sopore (xi) Tangdar and (xii) Uri.

62 Jammu: 42 and Kashmir: 10

63 Jammu: ₹ 588.19 crore and Kashmir: ₹ 178.07 crore

64 Jammu: ₹ 651.21 crore; and Kashmir: ₹ 209.30 crore

65 Jammu: ₹ 434.70 crore and Kashmir: ₹ 159.60 crore

As such, there was an excess sanction of ₹ 94.25 crore over the advertised cost and ₹ 266.21 crore over the allotted cost. The reasons for this discrepancy can be attributed to not conducting of pre-DPR surveys, projection of excess quantities for various components in DPRs and application of higher rates of items of works in DPRs compared to those fixed in the NITs.

In reply, the EEs, PW (R&B) Divisions Doda, Gandoh, Rajouri and Samba accepted (October 2022 to January 2023) that DPRs were prepared on basis of typical estimates and no surveys were conducted for preparation of DPRs as no funds were provided for conduct of surveys by the Government. The EEs further stated that surveys were conducted before invitation of tenders as such there was variation between quantities of components projected in DPRs and quantities advertised in NITs.

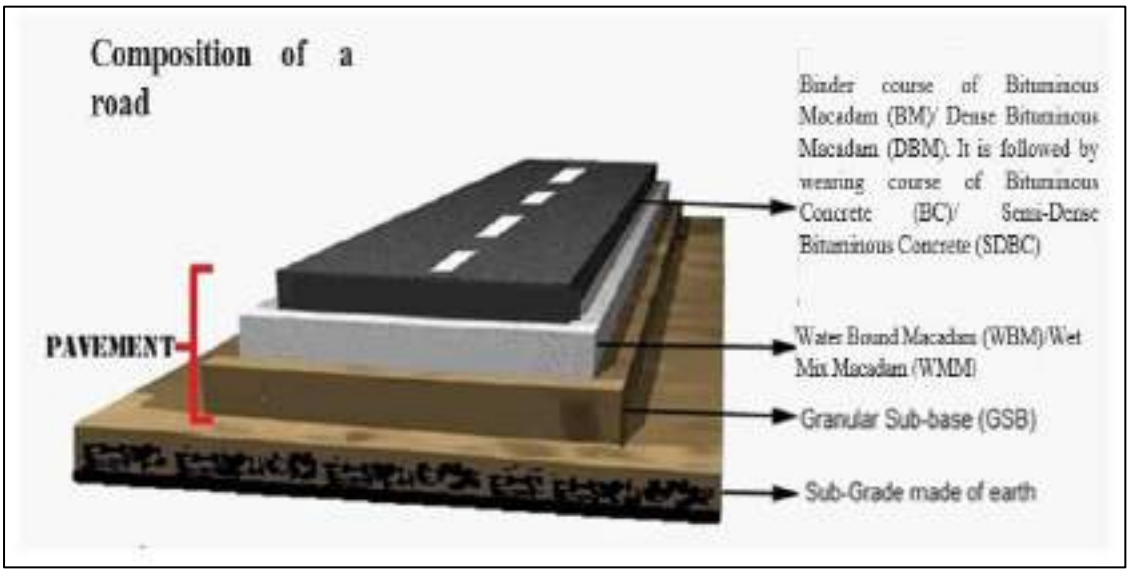
During the Exit Conference (17th October 2024), it was accepted that the cost of projects submitted to GoI was based on rough estimates and detailed estimates were prepared after sanction of projects by GoI. It was added that the tenders were advertised on detailed estimates.

Thus, projects sanctioned on the basis of unrealistic cost estimates indicated faulty planning in execution of CRIF projects.

3.2.5.4 Extra avoidable expenditure on laying of road construction material

A road is constructed in different layers with different kinds of materials. The various components and materials required to construct a road are shown in **Chart 3.2.2.**

Chart 3.2.2: Composition of a road (pavement)



In 11 out of 139 selected CRIF road projects sanctioned (2014-15 to 2017-2018) in eight test-checked Divisions[66], the width of existing pavement/ carriageway of roads was proposed to be increased[67]. As per DPRs, all these roads were black topped and Water Bound Macadam (WBM) Gr. II, WBM Gr. III/ Wet Mixed Macadam (WMM) were to be laid only on widened portion of roads.

Audit noted that the quantities of WBM-II/ WBM-III / WMM laid (60,228.99 cum)[68] were in significant excess by 22,070.49 cum[69] of quantities required (38,158.50 cum)[70] to be laid in respect of the widened portions of roads, as detailed in ***Appendix 3.2.3***. The excess quantities laid would have been sufficient to cover the entire existing carriageways[71] of three of the roads and portions/ parts of existing carriageways of eight other roads. Moreover, in order to lay these layers of components on existing carriageway of black topped roads, it would have been necessary to excavate/ stratify at least 22,070.49 cum[72] of existing carriageway. Further, the disposal of the excavated material at a designated place would have required more than 275 tractor trolleys[73]. However, payment bills of these road projects did not indicate that any work regarding excavation/ stratification of material from existing carriageway was either allotted or carried out by the test-checked Divisions. This is indicative of doubtful laying of these quantities. The extra avoidable expenditure amounted to ₹ 3.67 crore[74] in respect of 11 CRIF road projects.

In reply, the EE, PW (R&B) Division Kathua stated (October 2022) that excess quantity of works such as WBM Gr. II, WBM Gr. III, BM and SDBC was executed due to actual site conditions.

The reply is not acceptable as area of pavement of a road is always constant and the scope for laying excess quantities of road construction materials is quite limited, as these materials are laid over a specified rectangular pavement (covering the length and width of the road). Further, an additional provision of 05 *per cent* to 10 *per cent* of total calculated area of road is invariably provided to account for curves on roads.

In reply, the EE, PW(R&B) Division Doda stated (October 2022) that all pavements were got damaged during execution of works, as such GSB and WMM were laid on entire road length.

66 Anantnag, Handwara, Tangdar, Vailoo, Qazigund, Baramulla, Kathua and Doda.
67 from existing 3.00 meter (m) to 3.75 m/ 3.75 m to 7.50 m/ 3.65 m to 5.5 m/ 4 m to 7.50 m/ 5.5 m to 7.0 m.
68 WBM-II: 27,648.40 cum; WBM-III: 14,034.51 cum; WMM: 18,546.08 cum.
69 WBM-II: 7,355.655 cum; WBM-III: 7,275.13 cum; WMM: 7,439.70 cum.
70 WBM-II: 20,292.745 cum; WBM-III: 6,759.38 cum; WMM: 11,106.375 cum.
71 Part of the road designed for vehicular traffic.
72 For laying the WBM-II: 7,355.655 cum; WBM-III: 7,275.13 cum; WMM: 7,439.70 cum.
73 Keeping in view 80 cum capacity per tractor trolley.
74 WBM-II: ₹ 1.53 crore; WBM-III: ₹ 0.60 crore; WMM: ₹ 1.54 crore.

The reply is not acceptable as no report regarding damage to pavements was on record and approval of the higher authorities was not obtained for execution of GSB and WMM on entire road length.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that the existing surfaces of roads were not disturbed and treated as sub-grade to strengthen the up-gradation work/ crust which is a standard practice and is a cost effective/ cost saving method. It was further stated that the base material reinforces the pavement and is not required to be excavated.

The reply is generic in nature and does not address the specific audit observation. Further, laying of WBM Gr-II and WBM Gr-III on a black topped road is not possible without excavating/ stratifying the existing granular layers of the road.

During the Exit Conference (17th October 2024), it was assured that a detailed investigation would be conducted in such cases and based on the outcome of the investigation, appropriate action would be taken against the defaulting officials.

3.2.5.5 Execution of Projects in deviation of IRC norms

Rule 7 (10) of the CRF (State Roads) Rules, 2014 provides that design and specification of proposed works shall follow relevant Guidelines, Codes and Indian Road Congress (IRC) norms.

Audit noted that provisions of IRC relating to width of road formation and carriageway were not adhered to in respect of 20 projects executed under CRIF as width of carriageway proposed/ allotted/ executed was in excess of IRC norms which led to additional financial burden of ₹ 60.80 crore on Government exchequer as discussed below:

- As per paragraph 6.4 of IRC: 73-1980 geometric design for village non-urban highways, the standard width of single lane and double lane carriageway without kerbs shall be respectively 3.75 m and 5.5 m.

Audit, however, noted that seven single lane roads with a total length of 74.70 km sanctioned at a cost of ₹ 114.05 crore under CRIF had carriageway width of 5.50 m to 7.00 m. This had resulted in additional cost/ expenditure of ₹ 28.64 crore as detailed in **Table 3.2.7**.

Table 3.2.7: Details of additional expenditure on single lane roads

District/ Division	Number of roads/ bridges	Category of road	Carriageway width as per IRC norms	Carriageway width allotted/ executed	Additional cost/ expenditure (₹ in crore)
Kupwara/ Kupwara	03	village roads (single lane)	3.75 m	5.50 m	10.54
Kupwara/ Handwara	01	village roads (single lane)	3.75 m	5.50 m	3.02

District/ Division	Number of roads/ bridges	Category of road	Carriageway width as per IRC norms	Carriageway width allotted/ executed	Additional cost/ expenditure (₹ in crore)

Total	**07**				**28.64**

(Source: information compiled by Audit from Departmental records)

- Similarly, nine double lane roads with a total length of 97 km sanctioned at a cost of ₹ 174.65 crore had carriageway width of 7.00 m to 7.50 m. This had resulted in additional cost/ expenditure of ₹ 32.16 crore as detailed in **Table 3.2.8**.

Table 3.2.8: Details of additional expenditure on double lane roads

District/ Division	Number of roads/ bridges	Category of road	Carriageway width as per IRC norms	Carriageway width allotted/ executed	Additional cost/ expenditure (₹ in crore)
Kathua/ Kathua	02	village roads (double lane)	5.50 m	7.00 m to 7.50 m	11.63

Total	**09**				**32.16**

(Source: information compiled by audit from Departmental records)

In reply, the EEs of PW(R&B) Kathua, Doda and Samba Divisions stated (October 2022/ January 2023) that specification of 07 m to 7.50 m was proposed keeping in view the growth of traffic during next 15 years and IRC norms were not applicable to these roads.

Director Finance, PW (R&B) Department stated (November 2023) that as per note 2 of clause 6.4 of IRC, an intermediate carriageway width of 5.5 meters may be adopted, if considered advantageous and as per clause 7 of IRC Code 37-2018, the width of carriageway should be sufficient for traffic expected on road in the design year. It was further stated that as per clause 4.3.1 of IRC Code 37-2018, it is recommended that a design period of 20 years may be adopted for structural designs of pavements for National Highways, State Highways and Urban roads and for other roads a design period of 15 years is recommended. It was added that the proposed and sanctioned road projects did not fall under village roads category.

The reply is not based on facts as no survey or analysis regarding the estimated growth of traffic over the next 15 or 20 years was conducted by the Department. Further, the assertion that the said roads do not fall under village roads category is factually incorrect since these roads are classified as village roads in J&K Road Gazette of Department or in their respective DPRs. Besides, CRF Rules provide that IRC Guidelines shall be followed for design and specification of projects. However, carriageway width of roads in excess of specifications prescribed in IRC norms was allotted and executed.

3.2.5.6 Irregular Change in Scope of project

(A) GoI sanctioned (March 2017) the project "Improvement/ up-gradation of Ramnagar (Padarka) to Chatrari road (Dudu) Phase-I (km 1st to km 16th)" under CRIF at a cost of ₹ 10 crore.

Audit noted that the executing Division, Udhampur instead of allotting the approved length of the road (km 1st to km 16th), irregularly allotted work of construction of unapproved road length from km 16th to 20th to a contractor at a cost of ₹ 8.80 crore. The work was allotted (August 2019) without preparing DPR/ detailed estimates/ details of components in respect of project and also without getting the same approved from the competent authority.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that Improvement/ up-gradation of Ramnagar (Padarka) to Chatrari road (Dudu) Phase-I from km 15th to 30th (Intermediate Lane) stood sanctioned by MoRTH, GoI and accordingly tender was floated for km 16th to km 20th after framing detailed estimates which had been technically vetted by CE for ₹ 8.80 crore.

The fact remained that GoI had sanctioned (March 2017) 'Improvement/ up-gradation of Ramnagar (Padarka) to Chatrari road (Dudu) Phase-I (km 1st to km 16th) under CRIF at a cost of ₹ 10 crore. Further, the approval of GoI from km 15th to 30th (Intermediate Lane) at a cost of ₹ 8.80 crore was not available on records.

During the Exit Conference (17th October 2024), it was stated that the matter would be examined and factual position would be intimated to Audit.

(B) Rule 7 (8) of CRF Rules, 2014 stipulates that the revised estimates shall not be considered by Central Government.

The work of the project 'Improvement/ up-gradation of road from Zero Bridge to I.G. Road in Srinagar', was sanctioned (2015-16) under CRIF at a cost of ₹ 28.79 crore.

Although the construction of retaining walls was not provided in the approved DPR, the revised estimates of ₹ 6.61 crore had been prepared for construction of Retaining (R)-walls and the work was allotted (July 2019) to a contractor at a cost ₹ 4.81 crore without approval of MoRTH, GoI. As of November 2022, expenditure of

₹ three crore was incurred on construction of R-walls and staircases (km 1st and km 2nd of the project).

Thus, CRIF funds of ₹ three crore was diverted towards the works which were not included in the DPR of the project.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that as per clause 6 (6) of CRIF Rules, 2020, the revised estimates up to 10 *per cent* of administratively approved cost is permissible and construction of retaining wall was necessitated due to site conditions. It was added that the expenditure was within the administratively sanctioned cost.

The reply is not acceptable, as the work on separate estimates for the retaining wall were not part of the approved DPR and exceeded the administratively approved cost limit of 10 *per cent*. Further, any revision in the scope of work even if within the sanctioned cost was to be approved by MoRTH, GoI.

3.2.5.7 Four-Laning of Boulevard Road from Nehru Park to Kralsangri

For addressing the problem of traffic jams and saving travel time of inhabitants of Dal Lake area, PW (R&B) Department submitted (June 2014) the Detailed Project Report (DPR) for widening (two lanes to four lanes) of Boulevard road from Nehru Park to Kralsangri Running Distance 2000 m-7000 m, at a cost of ₹ 33.77 crore to GoI for approval under CRIF. In the DPR, it was certified (June 2014) by the Department that encumbrance free land was available for execution of project. The Administrative Approval (AA) of the road project was accorded by GoI in March 2015 at a cost of ₹ 33.77 crore with the condition that encumbrance free land was to be ensured for execution of project. The execution of project also required No Objection Certificate (NOC) from Lakes Conservation and Management Authority (LC&MA) as the widening of the road project was to be undertaken in the periphery[75] of the Dal Lake.

Audit noted the following discrepancies in execution of this project:

- Without obtaining NOC from LAWDA, the work was awarded (October 2015) to a contractor[76] at a cost of ₹ 27.52 crore. Further, the work was awarded without acquisition of land as against land compensation of ₹ 84 crore, only ₹ one crore had been provided to the Revenue Department as of December 2015.

- Despite unavailability of encumbrance free land, the Department had wrongly certified in the DPR that encumbrance free land was available.

[75] NOC from LC&MA is required for construction within 200 meters of Dal Lake.
[76] M/S Abdul Salam Mir Construction Company.

- In absence of encumbrance free corridor for widening of the road, an unauthorised expenditure of ₹ 1.67 crore was incurred (May 2022) on portion of road[77] which was outside the scope of approved project.

- Besides, unauthorised expenditure of ₹ 5.29 crore (May 2022) was incurred on various items[78] other than for road widening.

- After incurring expenditure of ₹ 6.96 crore on road project, the work was proposed for short-closure and the intended objective of widening of road could not be achieved as of October 2024.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that matter was referred to the Hon'ble High Court of J&K for grant of permission for construction of said road, which keeping in view the ecological impact of project directed the Lakes Conservation and Management Authority (LC&MA) to take up the matter with National Environmental Engineering Research Institute (NEERI) and the draft report prepared by NEERI was in favour of execution of project. It was further stated that in view of condition of road, LC&MA was requested for allowing macadamisation and tilling of footpaths of existing road and the same was executed in the interest of Public which was permissible as per clause 6 (6) of CRIF Rules, 2020 which states that revised/ excess cost up to 10 *per cent* of the administrative approved cost is permissible. It was added that in view of the complicacies the matter is being taken with MoRTH, GoI for short closure of project.

The fact remained that the Department did not ensure encumbrance free land and completion of other necessary formalities before taking up the project. Further, desired objective of widening of road could not be achieved despite incurring expenditure of ₹ 6.96 crore. Besides, the work of tiling of footpaths was not sanctioned under CRIF.

During the Exit Conference (17th October 2024), it was stated that the issue of decongestion of this road will be addressed by the development of a Ring Road and this project would be foreclosed.

3.2.5.8 Construction of Handwara-Bangus road

DPRs for construction of Handwara-Bangus road in two phases (Phase-I and Phase–II) were prepared (2017-18) by the EE, PW(R&B), Division, Handwara under CRIF.

In Phase-I, earthwork, cutting of trees and excavation of soil etc. were to be done, while in Phase-II the road was to be upgraded by laying of GSB, WBM GR-II, WMM and BM. The Administrative Approvals for said DPRs were accorded (January 2017 and March 2018) by GoI for ₹ 20 crore and ₹ 28.59 crore.

---

77 Kralsangri to Nishat.

78 Consolidation of sub-base, earthwork filling in embankment, providing/ fixing of RCC boundary pillars, dismantling of devri kerb stones, providing/ laying of sub-base coarse, rubble stone masonry, R/R stone masonry and on providing/ fixing of non-skid vitrified tiles, and rustic kota.

Audit noted the following discrepancies in the construction of Handwara-Bangus road:

- The work for Phase-I was allotted (August 2017) to a contractor[79] at a cost of ₹ 15.99 crore. As per the allotment order, the total allotted quantity of earth to be excavated was 0.92 lakh cum, while utilisation of only 0.77 lakh cum of excavated earth was specified in the allotment order.
- However, 3.55 lakh cum of earth was actually excavated during execution of work and contractor utilised 0.83 lakh cum of earth amounting to ₹ 1.33 crore[80] available at site. The utilisation/ disposal of remaining quantity of 2.72 lakh cum of earth amounting to ₹ 4.36 crore[81] was not available on records. Further, the disposal of excavated earth at a designated place would have required more than 3,400 tractor trolleys[82]. However, payment bills did not indicate any such payment to contractor.
- Similarly, during blasting, 0.90 lakh cum of stone of atleast ₹ 1.91 crore[83] was extracted at the work site but its utilisation was not on record. Further, the disposal of excavated stone at a designated place would have required more than 1,125 tractor trolleys[84]. However, payment bills did not indicate any such payment to contractor.
- The work of Phase-I was completed (24 July 2020) by the contractor and a payment of ₹ 14.92 crore was made to the contractor as of March 2024.
- The work of Phase-II was allotted (August 2018) to another contractor[85] at a cost of ₹ 25.74 crore. However, the contractor failed to start the work and reasons for non-start of work were not available on record. The work was re-tendered and allotted (October 2022) at a cost of ₹ 26.29 crore to the contractor[86] who had executed work of Phase-I.
- The work of levelling of sub-base of the road which had already been executed in Phase-I at a cost of ₹ 0.67 crore was again shown executed in Phase-II at a cost of ₹ 0.54 crore. This resulted in excess undue payment of ₹ 0.54 crore to the contractor.
- The physical progress of the work was 65 *per cent* as of April 2024 and a payment of ₹ 8.43 crore had been made (April 2024) to the contractor.

Thus, the Department failed to accurately estimate the quantities of earth expected to be excavated and did not specify the utilisation of entire excavated materials costing

79 M/s JK Constructions.
80 0.83 lakh cum of earth at the rate of ₹ 160.50 per cum (as per Schedule of Rates of 2012) = ₹ 1.33 crore.
81 2.72 lakh cum of earth at the rate of ₹ 160.50 per cum (as per Schedule of Rates of 2012) = ₹ 4.36 crore.
82 Keeping in view 80 cum capacity per tractor trolley.
83 0.90 lakh cum of stones at the rate of ₹ 212 per cum (minimum rate of stone as per SSR of 2012) = ₹ 1.91 crore.
84 Keeping in view 80 cum capacity per tractor trolley.
85 M/s Jhelum Construction.
86 M/s JK Constructions

₹ 6.27 crore at worksite in the allotment orders. Further, re-executing the same item of work twice resulted in excess undue payment of ₹ 0.54 crore to the contractor.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that excavated earth had been utilised for filling of road surface along the entire length of road resulting in significant savings for exchequer. It was further stated that up to 30 *per cent* of excavated or blasted material could be retained and reused and the material obtained from cutting process was utilised for patch filling of road, backfilling of protection walls, road filling of pipe cuts and approach filling of 36 number of culverts.

The reply should be viewed in light of the fact that no departmental records indicated the utilisation or disposal of excavated earth. Further, the fact remained that Department had failed to accurately estimate the quantities of earth expected to be excavated and did not specify the utilisation of entire excavated materials at worksite in work allotment orders. The reply was, however, silent regarding re-allotting the already executed item of work.

During the Exit Conference (17th October 2024), it was stated that the matter would be investigated and recovery would be initiated against the contractor, if required.

3.2.5.9 Undue benefits to contractors

(i) The work of Improvement/ upgradation of Old Samba-Kathua link road to a double lane road (km 1st to 15th) was sanctioned (March 2017) under CRIF at a cost of ₹ 15 crore. The work was allotted (November 2017) by works executing Division, Kathua to a contractor[87] at a cost of ₹ 11.18 crore. The work was to be completed within two years of allotment.

Audit noted that the contractor commenced the work in December 2017 and payment of ₹ 3.18 crore was made to the contractor till March 2019. Thereafter, the contractor stopped (June 2019) the work midway after executing approximately 36 *per cent* of the work. The Department had issued several notices (June 2019 to November 2019) to the contractor to resume the work. However, the contractor did not resume the work after which the executing Division re-allotted (April 2021) the balance work to another contractor[88] at a cost of ₹ 7.67 crore.

Despite non-fulfillment of contractual obligations by the contractor, the Department had neither forfeited the Bank Guarantee (BG) of ₹ 55.88 lakh of defaulting contractor nor imposed penalty of up to 10 *per cent* of cost of work on the contractor as per terms and conditions of allotment order. Instead, Department had released (October 2019) the full due payment of ₹ 80.12 lakh to the contractor, thereby giving him undue benefit. The work remained only 80 *per cent* complete as of March 2023 despite incurring a total expenditure of ₹ 9.97 crore (89 *per cent* of allotted cost) on the road project.

87 Ms A K Engineers.
88 Ms Satish Singh Jamwal.

The EE, PW(R&B) Division Kathua stated (October 2022) that the contract had been approved by the CE, PW(R&B) Department Jammu as such penal action against the contractor was to be taken by the CE. It was further stated that ₹ 80.12 lakh was released to the contractor in absence of any instruction from the CE to impose penalty on the contractor.

The reply is not acceptable as penalty was to be imposed at the time of making payments to the contractor which were made by EE, PW(R&B) Division Kathua who should have taken up the matter regarding imposition of penalty with the CE, PW(R&B) Department.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that the permission for setting up of Hot Mix Plant was not granted by Deputy Commissioner, Kathua as such the work was pre closed by Chief Engineer Jammu who found the contractors claims genuine and consequently penalty clause was waived off in favour of contractor.

The reply regarding contractor's claims being found genuine by Chief Engineer, Jammu, contradicts the earlier stance of the Department, whereby it had through several notices directed the contractor to resume the work, failing which necessary action would be taken against him.

During the Exit Conference (17th October 2024), it was stated that the matter would be examined and factual position would be intimated to Audit.

(ii) EE, PW(R&B) Division Doda allotted (July 2016) "Improvement/Up-gradation of Ghat via Nagri road to double lane status (km 1st to km 4th)" to a contractor[89] at a cost of ₹ 5.19 crore.

Records showed that 12 bills of the contractor amounting to ₹ 5.25 crore were paid during December 2016 to August 2021. The final bill of quantities of pavement executed by the contractor are detailed in **Table 3.2.9**.

Table 3.2.9: Statement showing less/ excess quantities executed

Components	Quantities to be executed	Quantities actually executed
WBM	1,200 cum	1,347.50 cum
WMM	1,200 cum	253.00 cum
BM	1,400 cum	168.13 cum
SDBC	28,000 sqm (700 cum)[90]	3,374.06 sqm (84.35 cum)

- It can be seen from the **Table 3.2.9** that the contractor had executed less than or in excess of allotted quantities of WMM, BM and SDBC.
- Audit also noted that work of laying of 2,640 cum of cement concrete of specified grade up to plinth level was allotted to the contractor, against which

89 M/s Gulam Qadir Nattoo.

90 28,000 sqm x 0.025 m = 700 cum and 3,374.06 sqm x 0.025 m = 84.35 cum.

5,326 cum was laid. Thus, there was excess execution of 2,686 cum which led to extra payment of ₹ 1.13 crore to contractor.

- The further execution of work was abandoned by the contractor. Reasons for abandoning of work were not on record. The executing Division Doda neither imposed penalty up to 10 *per cent* of contract value nor forfeited the BG of ₹ 0.52 crore as per terms and conditions of the contract.
- Despite this, the executing Division Doda had given undue benefit to the contractor by releasing (January 2020 to August 2021) payment of ₹ 58.14 lakh without imposing penalty as per terms of the contract including blacklisting of the contractor.
- Fresh tender for balance works at an estimated cost of ₹ 2.75 crore was invited and the SE, PW (R&B) Doda Circle allotted (October 2019) the balance work to another contractor[91] at a cost of ₹ 2.63 crore. It was observed that an extra expenditure of ₹ 0.50 crore was incurred on the road project due to non-completion of allotted work by the original contractor.

In reply, the EE, PW(R&B) Division Doda stated (October 2022) that the Division had no role in taking punitive action against the contractor as the action was to be taken by the CE, PW(R&B) Department Jammu.

The reply should be seen in light of the fact that the Division had not taken up the matter with CE regarding imposition of penalty on the contractor, as per terms of the contract, including the blacklisting of the contractor.

In reply, Director Finance, PW (R&B) Department attributed (November 2023) execution of some components in excess of allotted quantities to site conditions for achieving the required road width and stated that the contract was closed due to exhaustion of allotted funds. It was further stated that the balance work was executed through another contractor.

3.2.5.10 Excess/ un-allotted execution of quantities of works

Chapter 5.11 of the Book of Financial Powers issued (2002) by the Government of Jammu and Kashmir, Finance Department envisages that execution of work up to maximum of five *per cent* in excess of original estimates was to be allowed and approval of the Competent Financial Authority was to be obtained.

Audit noted in 17 out of selected 139 works pertaining to seven[92] test-checked Divisions that quantities of various works[93] were irregularly executed in significant excess of quantities allotted to contractors as approvals of Competent Financial

91 M/s Rajesh Kumar.

92 (i) Anantnag, (ii) Bandipora (iii) Baramulla, (iv) Handwara, (v) Kupwara (vi) Qazigund and (vii) Vailoo.

93 Such as earthwork, RBM filling for berms, hand packing of stones, cement concrete works, Granular sub-base, WBM, damp proof course with cement concrete, random rubble masonry with hard stone and laying of 450/ 900 mm dia RCC pipes.

Authority[94] were not obtained. The excess execution of works ranged between 15 and 1,993 *per cent*. This had resulted in extra irregular expenditure of ₹ 26.92 crore in respect of the 17 works. Of these 17, in 9 works various extra items of works[95] which were not advertised/ allotted to contractors were executed by utilising CRIF funds of ₹ 3.35 crore.

Thus, excess/ un-allotted execution of quantities of works in respect of various components was indicative of preparation of unrealistic estimates of works.

In reply, Director Finance, PW (R&B) Department stated (November 2023) that increase in quantities of earth work and RBM filing was due to poor crust of road and width of road up to 7.5 to 8 meters at curves.

The reply was not acceptable as test report of poor crust of road was not available with executing Divisions and contention regarding laying of extra quantities at curves was also not acceptable as additional five *per cent* of total calculated area of road was already included in the DPR to account for curves.

3.2.5.11 Completion certificate

As per Rule 11 of the CRF (State Roads) Rules 2007, the work executing agency shall send completion report or certificate duly verified by the Audit as soon as the works are completed. Further, Rule 10 (5) of the CRF (State Roads) Rules 2014 add that work executing agency shall fulfill this requirement positively within a period of three months from the date of completion of works.

Audit noted that 46 out of 139 selected projects[96] under CRIF were shown completed by PW (R&B) Department during 2017-18 to 2021-22. However, in deviation from CRIF Rules, the CEs, PW(R&B) Department Kashmir and Jammu had failed to obtain completion certificate in respect of these projects from the concerned executing Divisions. Even completion of these 46 projects was not confirmed by the CEs, PW(R&B) Kashmir and Jammu and completion certificates thereof were not submitted to the GoI.

Non-obtaining of completion certificates from executing Divisions by CEs PW (R&B) Department Jammu and Kashmir had resulted in misreporting of 10[97] incomplete projects by executing Divisions as completed by test-checked Divisions as detailed in ***Appendix 3.2.4.***

During the Exit Conference (17th October 2024), it was stated that completion certificates of all CRIF projects would be obtained and submitted to GoI in future.

---

94 Commissioner Secretary to Government of J&K, PW (R&B) Department.

95 Cement concrete works, WMM, P/L of RCC pipes, earthwork, supply and filling of RBM, P/L of GSB etc.

96 Jammu:14 and Kashmir: 32.

97 Jammu: 02 and Kashmir: 08

3.2.6 Quality Monitoring

Rule 9 (ii) of CRF (State Roads) Rules, 2014 stipulates that quality monitoring system should be in place at the State/ UT level, consisting of such experts and supporting staff as may be appointed by the State/ UT Government. In addition to quality monitoring system, the GoI shall depute an officer or agency as an independent quality monitor to inspect works every quarter and exercise such checks as may be necessary to ensure observance of time schedule in respect of works under execution.

Audit noted that as of March 2022, PW (R&B) Department had not put in place a quality monitoring system to inspect works executed under CRIF. GoI had also not deputed any officer or agency as independent quality monitor to inspect works every quarter during their execution. Absence of quality monitoring system may be one of the reasons for irregularities, such as extra avoidable expenditure of funds, excess expenditure, unauthorised expenditure etc. in execution of CRIF projects as discussed in preceding paragraphs.

During the Exit Conference (17th October 2024), it was stated that Design and Inspection Quality Control (DIQC) has been designated as the Nodal agency from February 2022 for quality monitoring of all R&B projects including CRIF projects.

The fact remained that until February 2022, no qualified agency had been designated for quality monitoring of works resulting in lack of oversight on the quality of projects executed under CRIF.

3.2.7 Conclusion

Projects were not prioritised by the Department which resulted in both ongoing as well as new projects remaining incomplete as of March 2022. Ineligible projects had been sanctioned under CRIF. In 31 works executing Divisions, out of 101 successful bids during October 2015 to March 2020, bids of 75 projects (74 *per cent*) were unbalanced as they were below the advertised cost of works in the range of 15 to 42 *per cent*. Of these, 24 projects amounting to ₹ 214.83 crore were allotted whose bids were liable to be cancelled. Performance security and additional performance security of only ₹ 51.91 crore were obtained against actual of ₹ 73.87 crore in respect of 70 out of 104 contracts executed during March 2012 to April 2022. 66 projects were sanctioned before completion of land acquisition and shifting of utility services and 24 projects were sanctioned without forest clearance. Execution of 72 projects was taken up without grant of Technical Sanction. Quantities of WBM-II, WBM-III/ excess of quantities required to be laid in respect of widened portions of roads resulting in extra avoidable expenditure of ₹ 3.67 crore in respect of 11 CRIF road projects. Provisions of IRC relating to width of road formation and carriageway were not adhered to in 17 projects which led to additional financial burden of ₹ 60.80 crore on Government exchequer. Scope of two projects were changed during execution without obtaining approval of the competent authorities of GoI/ GoJ&K. In absence of encumbrance free corridor for widening (two lanes to four lanes) of Boulevard

Road from Nehru Park to Kralsangri, an unauthorised expenditure of ₹ 1.67 crore was incurred (May 2022) on portion of road which was outside the scope of approved project. Besides, unauthorised expenditure of ₹ 5.29 crore (May 2022) was incurred on various items other than for road widening and the intended objective of widening of road was not achieved.

3.2.8 *Recommendations*

In light of the audit findings, GoJ&K may consider:

- ***Prioritising the completion of ongoing projects rather than proposing new ones, in view of the fixed allocation under CRIF.***
- ***Ensuring that only those projects with encumbrance-free sites are proposed for sanction under CRIF.***
- ***Assuring Technical Sanction before execution of projects.***
- ***Carrying out proper site surveys before preparation of DPRs to ensure that quantities in the DPR are based on actual site conditions and tender documents are prepared as per the current schedule of rates.***
- ***Putting in place a mechanism to monitor the expiry and renewal of Bank Guarantees (BGs) obtained from contractors on account of Performance Guarantee and Additional Performance Guarantee.***

Appendix 3.2.2

(Reference Paragraph No. 3.2.5.3)

Statement showing preparation of DPRs with inflated sanctioned cost

Sl. No.	District/ Divisions	Number of projects	Sanctioned cost of projects (₹ in crore)	Advertisement cost (₹ in crore)	Allotted cost (₹ in crore)	Percentage of advertised cost to sanctioned cost/ percentage of allotted cost to sanctioned cost	Reasons
1	Doda/ Doda, Gandoh	16	208.33	182.55	136.30	68 to 96 *per cent*/ 39 to 89 *per cent*	• Huge quantities of earthwork, random rubble masonry with cement concrete 1:6:12, dry random masonry in foundation and plinth, WBM Gr. II, III, bituminous macadam and SDBC reduced in NIT • Carriageway width of 7.50 mtr. was projected in the DPR against 7.00 mtr allotted to contractor • Inflated quantities of semi pucca R/wall (6 mtr height) was projected in the DPR • Incorporation of ₹ 7.25 lakh per mtr for construction of sub-structure and super-structure in DPR due to projection of carriageway width of 4.75 mtr against norms of 4.25 mtr. Allotted cost of bridge was ₹ 4.50 lakh per mtr.
2	Kathua/ Basohli	04	72.37	68.78	51.91	93 to 96 *per cent*/ 67 to 76 *per cent*	• Huge quantities of earthwork, WMM and BM reduced in NIT • Application of high rates of components in DPRs as compared to rates estimated in NIT.

Sl. No.	District/ Divisions	Number of projects	Sanctioned cost of projects (₹ in crore)	Advertisement cost (₹ in crore)	Allotted cost (₹ in crore)	Percentage of advertised cost to sanctioned cost/ percentage of allotted cost to sanctioned cost	Reasons
							• Component 'P/L WBM Gr.-I for ₹ 137.56 lakh was projected in the DPR against norms of IRC. Such component was also not advertised in the NIT.
3	Rajouri/ Rajouri and Nowshera	14	241.62	225.09	157.48	90 to 97 *per cent*/ 58 to 89 *per cent*	• High rates of earthwork adopted in DPR as compared to rates of Schedule. • Inflated works of X-Drainage projected in DPRs • Application of higher rates in the DPR in respect of Earthwork as compared to rates applied in the advertisement • P/L of RBM in sinking area, P/L of WMM was projected in the DPR whereas such component was not advertised in the NIT • Application of ₹ 8.70 lakh per rmt for 32 mtr. span bridge in the DPR whereas in the advertisement of NIT, rate of ₹ 5.50 lakh per rmt was estimated. • 20 mtr. span double lane bridge for ₹ 2.00 crore was projected in the DPR but it was not advertised in the NIT.
4	Samba/ Samba	08	128.89	111.77	89.01	64 to 96 *per cent*/ 50 to 81 *per cent*	• Huge quantities of earthwork reduced in NIT • Incorporation of

Sl. No.	District/ Divisions	Number of projects	Sanctioned cost of projects (₹ in crore)	Advertisement cost (₹ in crore)	Allotted cost (₹ in crore)	Percentage of advertised cost to sanctioned cost/ percentage of allotted cost to sanctioned cost	Reasons
							inflated quantities of RBM, WMM, bituminous macadam and SDBC • Components Hand packed stone filling including supply of stones Random Rubble masonry in foundation and plinth projected in the DPR was not advertised • Provision of 45 mtr. span RCC vented causeway made in the DPR, was not advertised in the NIT
	Total (J)	**42**	**651.21**	**588.19**	**434.7**	**64 to 96 *per cent*/ 39 to 89 *per cent***

Appendix 3.2.4

(Reference Paragraph No. 3.2.5.11)

Statement showing projects shown as completed but projects were not completed in actual

	Project	Division	Status as per progress report	Actual status as noticed by audit
1	Improvement/ Upgradation strengthening of Samba Mansar road (km 10th to km 19th)	Samba	Completed	• Drains were executed in the range of 18 *per cent* to 56 *per cent* of the total quantities allotted to the contractor. • Components such as hand packing stones in wire crates including cost of stones, providing and applying 2.5 mm thick road marking strips (retro-reflective) and providing and fixing of rectangular reflection traffic sign boards were not executed at all even though such components were allotted to the contractor at a cost of ₹ 30.02 lakh.
2	Widening/ Iimprovement Utterbehani Purmandal road via Mandal	Samba	Completed	• Safety components such as mandatory/ regulatory sign boards of 900 mm, cautionary/ warning sign boards of equilateral triangle and providing and applying 2.5 mm thick road marking strips (retro-reflective) were not installed/ executed on the road even though these items were allotted to contractor at a cost of ₹ 24.68 lakh.
3	Upgradation of Salkot Halmatpora Batergam Gushi including Marhana Daribal road via Ziyarat Sharif	Kupwara	Completed	• Quantity of 25 mm SDBC was laid to 50,662 sqm against allotment of 60,500 sqm to cover the 11 Kms. Thus, there was a short lay of 9,838 sqm which works out 1.79 Km. As sanctioned length of 11 Km was not covered with BT specification, project was actually incomplete. • Safety components such as mandatory/ regulatory sign boards circular of 600 mm, cautionary/ warning sign boards of equilateral triangle 900 mm were not installed/ executed on the road even though these items were allotted to contractor.
4	Construction of Khumriyal Shumriyal Gund Jahangir road including Doniwari Kantpora on Sewar Kawari road	Kupwara	Completed	• Quantity of 25mm SDBC was laid to 51,905 sqm against allotment of 63,750 sqm to cover the 17 Km. Thus, there was a short lay of 11,845 sqm which works out 2.45 Km. As sanctioned length of 17 Km was not covered with BT specification, project was actually incomplete. • Safety components such as mandatory/ regulatory sign boards circular of 600 mm, cautionary/ warning

	Project	Division	Status as per progress report	Actual status as noticed by audit
				sign boards of equilateral triangle 900 mm were not installed/ executed on the road even though these items were allotted to contractor
5	Improvement/ upgradation of Brakpora-Kanganhal-Chattergul road	Vailoo	Completed	• Quantity of 25 mm SDBC was laid to 67,838 Sqm against actual of 86,955 sqm to cover the 15.5 Km. Thus, there was a short lay of 19,117 sqm which works out 3.47 Km. As sanctioned length of 15.5 Km was not covered with BT specification, project was actually incomplete.
6	Construction of old Brengi road	Vailoo	Completed	• Quantity of 25 mm SDBC was laid to 39,611 sqm against actual of 43,312 sqm to cover the 11 Km. Thus, there was a short lay of 3,701 sqm which works out 900 mtr. As sanctioned length of 11 Km was not covered with BT specification, project was actually incomplete • Safety components such as mandatory/ regulatory sign boards circular of 600 mm, cautionary/ warning sign boards of equilateral triangle 900 mm were not installed/ executed on the road even though these items were allotted to contractor.
7	Upgradation of Mattan Achabal road	Vailoo	Completed	• Quantity of 25 mm SDBC was laid to 36,178 sqm against actual of 44,880 sqm to cover the 11 Km. Thus, there was a short lay of 8,702 Sqm which works out 1.5 km. As sanctioned length of 8 Km was not covered with BT specification, project was actually incomplete.
8	Widening/ upgradation of Ladoora Achabal road	Sopore	Completed	• Quantity of 25 mm SDBC was laid to 67,316 sqm against actual of 75,000 sqm to cover the 10 Km. Thus, there was a short lay of 7,684 Sqm which works out 1.0 km. As sanctioned length of 10 Km was not covered with BT specification, project was actually incomplete.
9	Construction/ upgradation of Hafrada Astan Wali Hatchimarg Tumina Marsarai including Bulnad road	Kupwara	Completed	• Quantity of 25 mm SDBC was laid to 73,118 sqm against actual of 82,500 sqm to cover the 15 Km. Thus, there was a short lay of 9,382 Sqm which works out 1.70 km. As sanctioned length of 15 Kms was not covered with BT specification, project was actually incomplete. • Safety components such as mandatory/ regulatory sign boards circular of 600 mm, cautionary/ warning sign boards of equilateral triangle 900

	Project	Division	Status as per progress report	Actual status as noticed by audit
				mm were not installed/ executed on the road even though these items were allotted to contractor.
10	Upgradation of Vilgam, Champora, Hafrad road including Dohama and Tarathpora road	Handwara	Completed	• Quantity of 25 mm SDBC was laid to 56,201 sqm against actual of 60,500 sqm to cover the 10 Km. Thus, there was a short lay of 4,299 Sqm which works out 0.75 km. As sanctioned length of 10 Km was not covered with BT specification, project was actually incomplete. • Safety components such as mandatory/ regulatory sign boards circular of 600 mm, cautionary/ warning sign boards of equilateral triangle 900 mm were not installed/ executed on the road even though these items were allotted to contractor.

PREFACE

This Report of Comptroller and Auditor General of India for the period ended March 2023 has been prepared for submission to Lieutenant Governor of Jammu and Kashmir under Section 72 of the Jammu and Kashmir Reorganisation Act, 2019 for laying in the Legislative Assembly.

This Report contains five Chapters. Chapter-I gives brief profile on receipts and expenditure of the Government of Union Territory of Jammu and Kashmir. Chapter-II to Chapter-V present significant audit findings noticed during compliance audit of various Government Departments.

The instances mentioned in this Report are those which came to the notice in the course of test audit of the period 2022-23 as well as those which came to notice in earlier years but could not be reported in the previous Audit Reports. Instances relating to the period subsequent to 2022-23 have also been included, wherever necessary.

The audit has been conducted in conformity with the Auditing Standards issued by the Comptroller and Auditor General of India.

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

About the Report

This Report covers matters arising out of Compliance Audit of the Departments of the Union Territory (UT) Government. The primary purpose of this Report is to bring to the notice of the Legislature the important results of audit.

The Report has been organised in five Chapters as under:

Chapter-I: Introduction

This Chapter contains brief profile of the UT Government with receipts/ expenditure for the year 2022-23, the authority for audit, audit jurisdiction, planning and conduct of audit, response of the Government to various audit products namely Inspection Reports, audit observations/ paragraphs and follow-up action on the Audit Reports.

Chapter-II: Subject Specific Compliance Audit pertaining to Planning, Development and Monitoring Department

This chapter covers Subject Specific Compliance Audit on 'Restoration of essential services and strengthening of disaster risk management system under World Bank aided Jhelum Tawi Flood Recovery Project'.

The Jhelum Tawi Flood Recovery Project (JTFRP) had been taken up to support the recovery process in project areas affected by 2014 floods. The project was funded through assistance from the World Bank (WB). The project also aimed to increase infrastructure for disaster resilience and capacity of the Project Implementing Units (PIUs) to respond promptly and effectively to a crisis or emergency. Out of a total of 213 sub-projects under JTFRP, 174 were completed as of December 2023. Out of these 213 sub-projects, 82 sub-projects were selected for detailed check in audit.

It was observed that damage and loss assessment reports were not prepared for selected projects before their commencement. Delays in tendering and changing of experts etc. were observed leading to delays in completion of the projects. Infrastructure projects not proposed by the Line Departments were sanctioned while some of the projects proposed by them were not included.

Activities like retrofitting of critical buildings and Hydro Metrological Action Plan intended for managing disaster risks, enhancing preparedness and achieving resilient recovery, although identified in the Project Appraisal Document (PAD), had not been executed. Hospital projects were executed in flood prone areas though prohibited by National Disaster Management Authority. Irregular and idle expenditure was incurred on upgradation of dewatering stations by Srinagar Municipal Corporation.

Deficiencies in purchase/ installation of machinery and equipment included excess payment on procurement of rescue equipment, avoidable expenditure on procurement of Fire & Emergency machinery/ Modular monitor. Idle investment in the purchase of Search & Rescue kits/ Hospital machinery/ Automated Embedding Systems was also noticed.

Monitoring of projects was not done in accordance with the World Bank guidelines as the periodical meetings of the Project Steering Committee were not held regularly and Operational Manual for execution of projects under JTFRP was not prepared.

Recommendations:

The Government should:

- ***Ensure the projects are taken up as per the Project Appraisal Document and after approval from the Project Steering Committee,***
- ***Ensure completion of projects in a time bound manner, and***
- ***Update the Management Information System and strictly monitor the implementation of the sub-projects.***

Chapter-III: Subject Specific Compliance Audit pertaining to Mining Department

This chapter includes Subject Specific Compliance Audit on 'Pradhan Mantri Khanij Kshetra Kalyan Yojana (PMKKKY)'. The Scheme was launched to ensure the welfare of people affected by mining related operations. In contravention to the PMKKKY guidelines, the areas and people affected due to mining were neither identified nor notified. Selection of projects under the Scheme was carried out at the discretion of the District Mineral Foundation Trusts (DMFTs) rather than based on the actual needs of mining-affected communities.

There was a delay of two years in framing of Jammu and Kashmir District Mineral Foundation Rules 2017 for Minor Minerals. These rules were not in consonance with the Mines and Minerals (Development and Regulation) Act 2015 (MMDR) and were subsequently amended (February 2023) after being pointed out by Audit in May 2022. Due to framing of these contradictory rules, the Department suffered revenue loss of ₹ 14.55 crore during 2017-18 to 2021-22. Due to not registering/ forming of the District Mineral Foundation Trusts in time, the contribution of ₹ 8.82 crore could not be demanded and collected.

The Department had not developed any mechanism for assessment, demand and collection of royalty along with DMF contributions. The consolidated position of physical progress of sanctioned, taken-up, completed and incomplete projects was not available with the Department at either Apex level or Divisional level. Out of 365 sanctioned projects in sampled eight Districts, 147 projects (40 *per cent*) were not taken up for execution primarily due to not according of Administrative Approval and

site disputes. The Governing body and Executive Committee had not been formed by the Trusts.

DMFT funds were advanced to various implementing agencies for execution of works without preparation of Annual Plans and Annual Budget. The available funds could not be spent and as against availability of ₹ 25.72 crore during 2017-18 to 2022-23, only ₹ 11.89 crore (46 *per cent*) was utilised. Unspent balances were not invested. Utilisation Certificates (UCs) were neither received nor demanded by some executing agencies of Kashmir Division. As 89 Mineral Check Posts were not completed and Mine Surveillance System was not installed despite creation of liability of ₹ 1.73 crore, the illegal mining, transportation and storage of minerals remained unmonitored/unchecked. Beneficiary survey showed unawareness about the Scheme in 96 *per cent* of the respondents and unawareness about DMFT activities in 100 *per cent* of respondents. There was violation of Scheme guidelines mandating electronic payment.

Recommendations:

The Government should:

- ***Identify and notify the areas and people affected due to mining,***
- ***Constitute the Governing Body and Executive Committee of the DMFTs and ensure execution of works are carried out after approval of Annual Plan and Annual Budget.***
- ***Strengthen the fund management system and monitoring mechanism.***

Chapter-IV: Subject Specific Compliance Audit pertaining to Rural Development Department

This chapter includes Subject Specific Compliance Audit on 'National Rural Livelihood Mission'.

To promote sustainable livelihoods for the rural poor, the Ministry of Rural Development (MoRD), Government of India (GoI) launched National Rural Livelihood Mission (NRLM) in the year 2010 (renamed as Deendayal Antyodaya Yojana-National Rural Livelihood Mission (DAY-NRLM) in March 2016). The Scheme aimed to reduce poverty by enabling poor households to access gainful self-employment and skilled wage opportunities. The State Mission Management Unit (SMMU) for J&K was registered (October 2011) as a society in the name of Jammu and Kashmir State Rural Livelihood Mission (JKRLM) for implementation of NRLM in J&K.

Audit observed that the overall coverage remained below the targets set by the Scheme and no well-defined approach in identification of beneficiaries was available. There were persistent shortfalls in the release of both Central and State shares against approved plans, mainly due to procedural delays. Financial management was deficient

as cases of unreconciled unspent funds, irregularities in loan repayments, and unauthorised deductions from community funds were observed.

The budgeting process lacked a bottom-up approach, processes such as registration of community organisations and approval of Annual Action Plans by the Executive Council, were not properly followed.

Human resource management was marked by critical staff shortage, absence of grievance redressal mechanism, and lack of insurance coverage for staff. Monitoring mechanism was weak due to infrequent meetings and vacant key monitoring positions.

Recommendations:

The Government should:

- ***Establish well defined criteria for identification of poor rural households and selection of beneficiaries under the Scheme.***
- ***Adopt bottom-up approach in preparation of Budget.***
- ***Ensure funds as per approved plans are released in time and are utilised for the implementation of Scheme during each year.***
- ***Strengthen the implementation of the Scheme through efficient monitoring.***

Chapter-V: Compliance Audit pertaining to Transport Department

The Government of Jammu and Kashmir (GoJ&K) launched (19 November 2019) the "Transport Subsidy Scheme" pursuant to the orders of High Court of Jammu and Kashmir (J&K) dated 18 May 2006 and National Green Tribunal (NGT), New Delhi, dated 08 October 2018, regarding control of air pollution, improvement of ambient air quality in non-attainment cities[1] as well as measures to control vehicular emissions.

The Transport Department failed to effectively implement the Scheme and could not ensure phasing out of old vehicles. Irregularities like purchase of new vehicles in different owner's name, not preparing Compliance Reports, and crediting of subsidy to beneficiaries' savings account instead of loan account were also observed.

[1] The cities which are exceeding the National Ambient Air Quality Standards (NAAQS) for five consecutive years. Jammu and Srinagar are the two non-attainment cities in J&K.

CHAPTER-I

INTRODUCTION

CHAPTER-I

INTRODUCTION

1.1 Budget Profile

There are 36 Departments and 111 Autonomous Bodies in the Union Territory (UT) of Jammu and Kashmir. The position of budget estimates, revised estimates and expenditure of the Union Territory of Jammu and Kashmir during 2022-23 is shown in **Table 1.1.**

Table 1.1: Budget and Expenditure of the UT of Jammu and Kashmir during the period 2022-23

(₹ in crore)

Particulars	2022-23		
	Budget Estimates	Revised Estimates	Actuals
Revenue expenditure			
General Services	31,696.94	36,771.77	31,162.12
Social Services	26,351.44	26,929.12	22,984.37
Economic Services	13,566.61	11,303.06	8,852.85
Grants-in-aid[1] and contributions	0.00	0.00	0.00
Total (1)	**71,614.99**	**75,003.95**	**62,999.34**
Capital expenditure			
Capital Outlay	37,656.35	26,585.67	37,713.39
Loans and advances disbursed	108.90	118.00	59.53
Repayment of Public Debt[2]	32,720.87	31,030.28	34,066.91
Contingency Fund	0.00	0.00	0.00
Public Accounts disbursements[3]	6,583.86	6,451.35	34,656.37
Closing Cash balance	0.00	0.00	1,448.31
Total (2)	**77,069.98**	**64,185.30**	**1,07,944.51**
Grand Total (1+2)	**1,48,684.97**	**1,39,189.25**	**1,70,943.85**

(Source: Annual Financial Statements and Finance Accounts of the Government of UT of Jammu and Kashmir)

1.2 Application of resources of the UT Government

The total expenditure of Union Territory of Jammu and Kashmir, which included Revenue expenditure, Capital Outlay and Loans and Advances disbursed during 2022-23 was ₹ 1,00,772.26 crore. During this period, the Capital Outlay of ₹ 37,713.39 crore constituted 37 *per cent* of total expenditure.

1 Grants-in-aid paid by the UT Government is included in the General, Social and Economic Services.

2 Includes transactions under ways and means advances.

3 Actuals exclude transactions of investment of cash balance and departmental cash balance.

1.3 Funds transferred directly to Government Departments of UT

During the period 2022-23, various Ministries/ Departments of the Central Government released ₹786.95 crore directly to various Government departments of the Union Territory of Jammu and Kashmir without routing these through UT Budget. Consequently, these amounts remained outside the Budgetary and Accounting system of the UT Government during the year.

1.4 Grants-in-aid from Government of India

The grants-in-aid received from Government of India during 2022-23 is depicted in **Table 1.2.**

Table 1.2: Grants-in-aid from GoI

(₹ in crore)

Particulars	2022-23 (UT of Jammu and Kashmir)
Grants for Centrally Sponsored Plan Schemes	6,029.68
Other transfers/ Grants to States/ Union Territories with Legislature	45,463.25
Total	**51,492.93**
Revenue Receipts	68,975.95
Percentage of total grants to Revenue Receipts	75

(Source: Finance Accounts of respective years)

During the period 2022-23, the Government of Union Territory of Jammu and Kashmir received ₹ 51,492.93 crore as Grants-in-aid from Government of India, which accounts for 75 *per cent* of Revenue receipts during the period.

1.5 Audit process

The audit process starts with the risk assessment of various Departments, Autonomous Bodies, Schemes/ Projects which takes into account the criticality/ complexity of activities, level of delegated financial powers, internal controls and concerns of stakeholders and previous audit findings. Based on this risk assessment, the frequency and extent of audit are decided, and an Annual Audit Plan is formulated.

After completion of audit, an Inspection Report containing the audit findings is issued to the Head of the Office with a request to furnish replies within one month. On receipt of replies, audit findings are either settled or further action for compliance is advised. Important audit observations pointed out in these Reports are processed for inclusion in the Audit Reports of the Comptroller and Auditor General of India (C&AG). The audit findings incorporated in the Audit Report are based only on test-check of the transactions of the Government of Jammu and Kashmir.

During 2022-23, out of 11,778 Drawing and Disbursing Officers (DDOs) in the UT of J&K, compliance audit of 1,065 was planned and audit of 1,057 DDOs was conducted by the Office of the Principal Accountant General (Audit), Jammu & Kashmir. Out of 111 Autonomous Bodies (ABs), audit of 15 ABs was planned and conducted.

1.6 Response of Government to Audit Report Paragraphs

Audit has reported on several significant deficiencies in implementation of various programmes/ activities as well as on the quality of internal controls in selected Departments which have a negative impact on the success of programmes and functioning of the Departments. The focus was on auditing specific programmes/ schemes in order to offer suitable recommendations to the Executive for taking corrective action and improving service delivery to the citizens.

The Subject Specific Compliance Audit (SSCA) paragraphs proposed for inclusion in the Report of the Comptroller and Auditor General of India are forwarded by the Principal Accountant General (Audit) to the Principal Secretaries/ Secretaries of the Department concerned drawing their attention to the audit findings and requesting them to send their response within six weeks. The fact of non-receipt of replies from the Departments/ Government as and where applicable is suitably incorporated in the Audit Report.

1.7 Response of Government to Compliance Audit Reports

The Handbook of instructions for speedy settlement of audit observations/ inspection reports (IRs) issued by the Government (Finance Department) provides for prompt response by the Executive to IRs issued by the Principal Accountant General (Audit) to ensure remedial/ rectification action in compliance with the prescribed rules and procedures. The heads of auditee offices and their controlling administrative Departments are required to comply with the observations contained in the IRs and rectify the defects and report their compliance to the Principal Accountant General (Audit).

Based on the results of test audit 38,138 audit observations contained in 9,700 IRs were outstanding for settlement as on 31 March 2023 as given in **Table 1.3**.

Table 1.3: Details showing the Audit observations outstanding as of 31 March 2023

Name of Sector	Opening Balance (01 April 2022)		Additions during the year 2022-23		Settled during the year 2022-23		Closing Balance (31 March 2023)	
	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs
Civil Departments	10,986	47,492	633	4,918	1,919	14,272	9,700	38,138

During 2022-23, 14 Audit Committee meetings were held in which 3,044 Audit paragraphs were settled.

1.8 Follow-up on Audit Reports

1.8.1 Non-submission of Action Taken Notes

To ensure accountability of the Executive to issues dealt with in various Audit Reports, the Government (Finance Department) issued instructions in June 1997 to the Administrative Departments to furnish Action Taken Notes (ATNs) to the Public Accounts Committee (PAC)/ Committee on Public Undertakings (COPU) on all the audit paragraphs featuring in the Audit Reports, irrespective of whether these are taken up for discussion by these Committees or not. These ATNs are to be submitted to these Committees duly vetted by the Principal Accountant General (Audit) within a period of three months from the date of presentation of Audit Reports in the Legislature.

It was, however, noticed that out of 836[4] audit paragraphs featuring in the Audit Reports from 2000-01 to 2020-21, *suo-motu* ATNs in respect of 472[5] audit paragraphs had not been received up to 31 May 2025.

1.8.2 Action taken on recommendations of the PAC

Action Taken Notes, duly vetted by the Principal Accountant General (Audit) on the observations/ recommendations made by the PAC/ COPU in respect of the audit paragraphs discussed by them are to be furnished to these Committees within six months from the date of such observations/ recommendations. Out of 836 Audit paragraphs featuring in the Audit Reports for the years from 2000-01 to 2020-21, only 329[6] audit paragraphs have been discussed by the PAC and COPU up to 31 May 2025. Recommendations in respect of 306[7] audit paragraphs have been made by the PAC/ COPU. However, ATNs on the recommendations of the PAC/COPU are pending from the Government in respect of 228[8] audit paragraphs.

4 Civil: 589; Revenue:143 PSUs: 104

CHAPTER-II

PLANNING DEVELOPMENT

AND

MONITORING DEPARTMENT

CHAPTER-II

PLANNING, DEVELOPMENT AND MONITORING DEPARTMENT

2. Restoration of essential services and strengthening of disaster risk management system under World Bank aided Jhelum Tawi Flood Recovery Project

2.1 Introduction

The erstwhile State of Jammu and Kashmir (J&K) was hit by devastating floods in September 2014, which caused damage to houses, livelihoods, roads and bridges. On the request (January 2015) of Government of India (GoI) a Rapid Damage and Needs Assessment (RDNA) Mission of the World Bank (WB) visited (February 2015) the flood affected Districts of J&K and accorded (August 2015) sanction to Relief and Rehabilitation Department (RRD) for availing WB assistance of ₹ 1,500 crore[1] (US $ 250 Million) under Jhelum Tawi Flood Recovery Project (JTFRP). The project was aimed to support the recovery process in project areas and increase disaster resilience and capacity of the Project Implementing Units (PIUs) to respond promptly and effectively to a crisis or emergency. Subsequent to GoJ&K sanction for availing WB assistance of ₹ 1,500 crore, Ministry of Finance, GoI included (November 2015) JTFRP in the Prime Minister's Reconstruction Plan (PMRP) for the State of J&K. For availing the WB assistance, GoI and International Development Association (IDA) entered into a financing agreement in January 2016. A subsidiary agreement was also executed (January 2016) by Ministry of Finance, GoI with the GoJ&K.

As per the Project Appraisal Document (PAD[2]), the WB assistance was to be utilised on the following seven components.

- Component 1: Reconstruction and strengthening of critical infrastructure (₹ 360 crore)
- Component 2: Reconstruction of Roads and Bridges (₹ 480 crore)
- Component 3: Restoration of Urban flood management infrastructure (₹ 300 crore)
- Component 4: Restoration and strengthening of livelihoods (₹ 90 crore)
- Component 5: Strengthening disaster risk management capacity (₹ 150 crore)
- Component 6: Contingent Emergency Response (₹ 0)[3] and
- Component 7: Implementation Support (₹ 120 crore).

The JTFRP was initially scheduled to close on 30 June 2020. However, WB extended

---

1 World Bank assistance: ₹ 1350 crore and State Share: ₹ 150 crore

2 A document (18 May 2015) of the World Bank on proposed credit of US$250 Million (₹ 1,500 crore) to India for JTFRP in which activities to be carried out under JTFRP were identified.

3 In view of Covid 19, Contingent Emergency Response component was activated in May 2020.

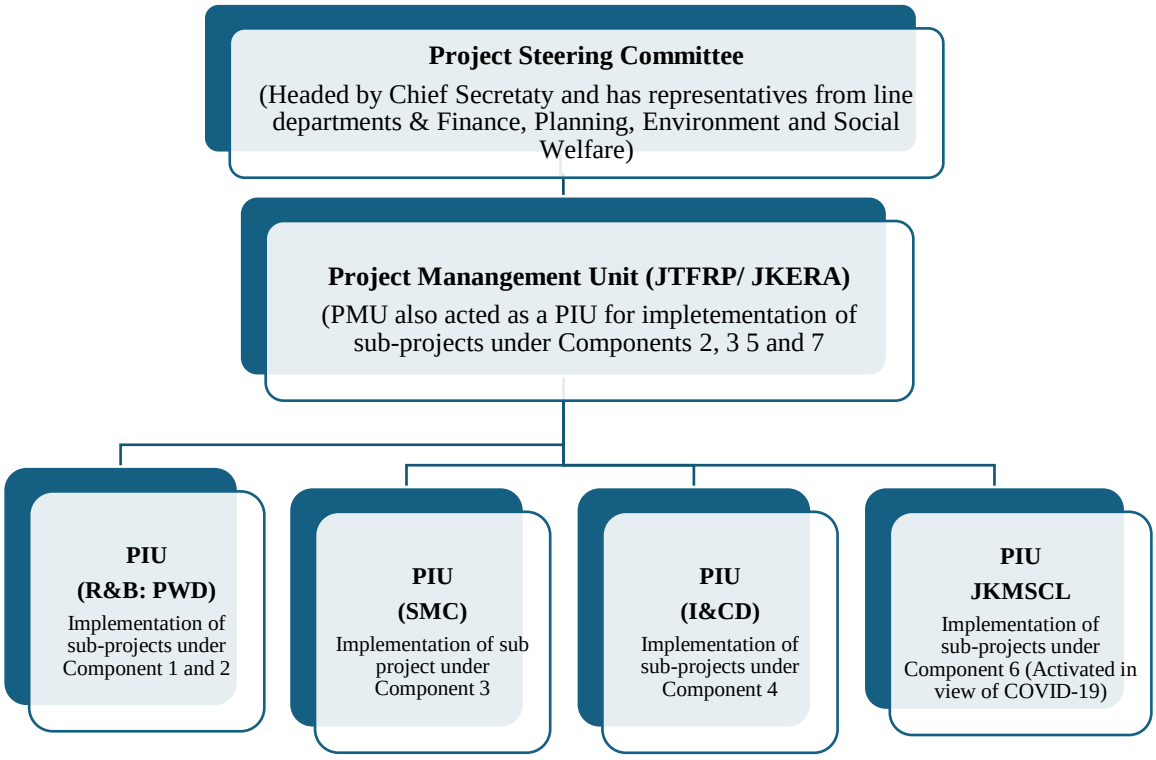
the project from time to time up to 31 December 2024 and finally extended up to August 2026.

2.2 Organisational Setup

Under RRD, office of JTFRP, was established in April 2016 as the Project Management Unit (PMU) for overall project management and coordination between PIUs and the WB. The PMU (including Jammu and Kashmir Economic Reconstruction Agency[4]) itself acted as the PIU for 71 sub projects[5] under JTFRP. Other PIUs included Public Works Department (PWD) executing 45 sub-projects, Industries and Commerce Department (I&CD) executing 26 sub-projects, Srinagar Municipal Corporation (SMC) executing 03 sub-projects and Jammu and Kashmir Medical Supplies Corporation Limited (JKMSCL) executing 68 sub-projects. From October 2018, office of PMU, JTFRP was merged with Jammu and Kashmir Economic Reconstruction Agency (JKERA) under the Planning Development and Monitoring Department (PD&MD).

The arrangement for project implementation is depicted in **Chart 2.1**:

Chart 2.1: Project Implementation Arrangement



[4] A society registered under the J&K Societies Act came into existence as a result of Cabinet decision (July 2004) to implement externally aided projects. Jhelum Tawi Flood Recover Project (JTFRP) was merged with JKERA in October 2018.

[5] PMU/ JTFRP: 39 sub projects, PMU/ JKERA: 19 and 13 sub projects allotted by the PMU to JKPCC under Force Account (When contractors/suppliers are unlikely to bid at reasonable prices because of location and risk involved, borrower may use their own Department for execution/ supply)

2.3 Audit Objectives

The objectives of the Audit were to examine whether:

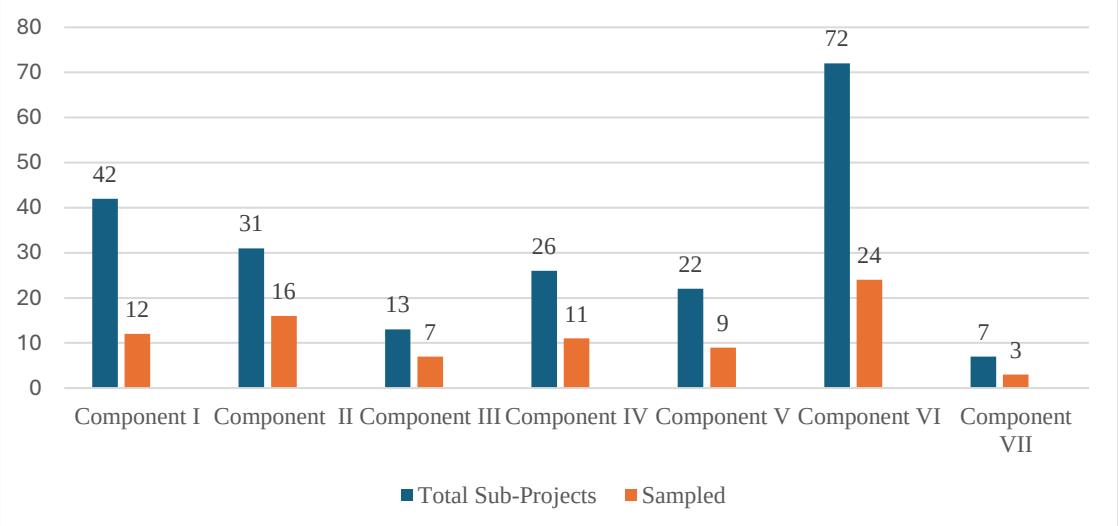
- The prescribed procedure for selection of projects for seeking approval of the WB was followed and funds received were utilised for the intended purpose;
- The projects were awarded and executed in accordance with the WB prescribed specifications or other guidelines notified by GoJ&K/ GoI in economical and efficient manner;
- The assets and infrastructure created under JTFRP were put to use and the intended benefits were derived; and
- The monitoring and quality control system were adequate and effective.

2.4 Audit Scope and Methodology

The Audit covered the period since inception of the project in 2016-17 to December 2023 and audit was conducted during July 2023 to February 2024. Entry conference was held on 30 August 2023 with Chief Executive Officer, JTFRP wherein audit objectives, audit criteria and audit methodology were discussed.

Audit Methodology entailed examination of records in the offices of Administrative Departments of PD&MD. Records were also test-checked in the offices of the PMU, Project Implementing Units (PIUs) viz. PMU (including JKERA), PWD, I&CD, SMC and JKMSCL. Out of a total of 213 sub-projects allotted at a cost of ₹ 1,737.44 crore under JTFRP, 82 sub-projects[6] **(Chart 2.2)** with allotted cost of ₹ 1375.61 crore[7] were selected for detailed check of records by judgmental sampling based on the awarded cost.

Chart 2.2: **Component-wise details of sampled sub-projects against total sub-projects under JTFRP**



6 PMU: 38, PWD: 12, J&KMSCL: 20, I&CD: 11 and SMC: 01

7 57 completed with allotted cost of ₹ 603.34 crore and 25 ongoing with allotted cost of ₹ 772.27 crore

Further, the date-wise list of sub-projects sanctioned by the PSC and World Bank was not furnished to Audit by the PMU. Audit findings were discussed in the Exit Conference held on 13 June 2025 with the Secretary, Planning Development and Monitoring Department. During the Exit Conference (June 2025) it was assured that detailed replies to the audit observations contained in the draft report would be submitted, however no replies have been received (August 2025). However, the responses submitted during the Exit Conference have been incorporated in the report.

2.5 Audit Criteria

Audit findings were benchmarked against the following criteria:

- Financing agreement entered into by GoI with WB and the subsidiary agreement between GoI and GoJ&K;
- Guidelines of the WB regarding procurement of goods, works and non-consulting services and the Project Appraisal Document (PAD) of the WB;
- Manuals, rules and regulations notified by GoJ&K/ GoI for construction of roads, bridges and buildings; and
- J&K Financial Code, General Financial Rules and guidelines of Central Vigilance Commission.

2.6 Status of Projects

Out of 213 sub-projects awarded (discussed in ***Paragraph 2.4***), 174 sub-projects[8] had been completed as of December 2023 and 39 sub-projects[9] were under progress after incurring an expenditure of ₹ 1,305.95 crore. Agency-wise and component-wise position of 213 sub-projects approved for funding under JTFRP as of December 2023 is indicated in ***Appendix-2.1***.

Table 2.1: Snapshot of Status of Projects as of December 2023

(₹ in crore)

Region/Agency	Works Awarded		Works Completed		Works In Progress	
	No.	Allotted	No.	Allotted	No.	Allotted
Kashmir	101	1,050.75	70	308.2	31	742.22
Jammu	79	495.56	75	438.22	04	57.34
PWD/ JKERA	33	191.43	29	108.03	04	83.40
Total	**213**	**737.74**	**174**	**854.45**	**39**	**882.96**

Out of 82 sampled sub-projects with allotted cost of ₹ 1,375.61 crore (agency-wise details shown in ***Appendix – 2.2***), 57 sub-projects with awarded cost of ₹ 603.34 crore were complete as of December 2023. 25 sub-projects with awarded cost of

[8] Allotted cost: ₹ 854.46 crore
[9] Allotted cost: ₹ 882.96 crore.

₹ 772.27 crore remained incomplete (with time overrun ranging between 10 months and 57 months). It was noticed that out of 57 completed sub-projects, only 20 sub-projects were completed within the scheduled date and there was delay in completion of 32 sub-projects with delays up to 44 months. The delayed works included installation of oxygen generation plants (delays ranging between 05 months and 22 months) awarded under Direct Contracting. The scheduled date of completion was not on record in respect of five sub-projects.

It was also noticed that 49 sub-projects were tendered with a delay ranging between 08 months and 57 months from the effective date of start (April 2016) of JTFRP. As a result, only 30 sub-projects could be taken up at a cost of ₹ 466.66 crore before the first closing date (June 2020) of the project. It was also found that seven sub-projects were put to tenders after initial closing date (June 2020) of the project. Four sub-projects (two schools and two roads) which were proposed for inclusion in JTFRP during February and September 2017, had not been tendered up to June 2020.

2.6.1 Delayed preparation of procurement plan

Section 1.18 of the WB "Guidelines for Procurement of Goods, Works, and non-Consulting Services" envisages GoJ&K (Borrower) to prepare a preliminary procurement plan. GoJ&K was also to prepare a detailed and comprehensive procurement plan including all contracts for which action was to be initiated in the first 18 months of start (April 2016) of project implementation i.e. by September 2017. Further, Ministry of Finance, GoI directed (April 2019) GoJ&K to finalise all the tenders by 30 September 2019.

Review of 49 sampled sub-projects[10] which were tendered revealed that 11 sub-projects (estimated cost: ₹ 193.81 crore) were put to tenders after the deadline (September 2019) fixed by the GoI for invitation of tenders. Seven sub-projects were put to tenders after the initial closing date (June 2020) of the Project. These seven projects included the sub-project, "Construction of Central Control Building for Housing Emergency Operation Center and SCADA System" which was incomplete as of December 2023 despite being accorded in-principle approval (May 2015) by the WB. Delay in formulation of procurement plans led to non-adherence to the timeline fixed by GoI.

Chief Executive Officer (CEO), JTFRP stated (August 2025) that despite the Financing Agreement being signed in January 2016, the project actually kickstarted in September 2017. The pace of the implementation picked up after the merger of JTFRP with JKERA in October 2018.

The PMU had to formulate a detailed and comprehensive procurement plan by September 2017 which was not prepared.

[10] Out of 82 sampled sub-projects, 49 sub-projects were awarded after tendering process and the remaining 33 sub-projects (JKMSCL: 20; JKERA: 4; I&CD: 1; PMU 1 and JKPCC: 7) were awarded through direct procurement method.

2.7 Planning

As per World Bank guidelines, construction and restoration of flood affected/ damaged infrastructure such as schools, roads, bridges and hospitals etc., were to be taken up under JTFRP. Proposals for such projects were to be obtained by the PMU, JTFRP from the Line Departments. Audit noticed that the projects which did not feature in the proposals submitted by the Line Departments were also sanctioned under JTFRP as illustrated under:

- The School Education Department (SED) of Jammu and Kashmir Division proposed (February 2017) restoration of 164 schools[11] (Jammu: 74 and Kashmir: 90) at an estimated cost of ₹ 52 crore[12]. Out of the proposed 164 schools by the two Directors, restoration of only 34 schools[13] (Jammu: 25 and Kashmir: 09) were sanctioned by the PMU from the WB. Audit noticed that 15 schools which did not feature in the list of 90 schools proposed (February 2017) by the Director School Education, Kashmir were also selected by the PMU for reconstruction under JTFRP. Reasons for getting these 15 schools sanctioned without any input from the Line Department were not on record. However, audit observed that no damage and loss assessment reports were prepared to verify the flood affected infrastructure for reconstruction under JTFRP.

During the Exit Conference, Secretary PDMD stated (June 2025) that the School Education Department submitted multiple lists for funding under the project and after a series of deliberations and discussions regarding the feasibility, site availability, DPR status etc., a preliminary list of schools was selected to start with. The list was not finalised in one go but in phases and all the projects were approved by the World Bank before being taken up for execution.

- The Joint Director (Planning), PWD submitted (September 2017) a proposal of 40 Road/ Bridge projects[14] at an estimated cost of ₹ 460 crore to be re-constructed under JTFRP against which PMU considered only 23 projects[15]. Audit noticed that in respect of Kashmir Division 13 works (estimated cost: ₹ 266.49 crore) were sanctioned (proposed by PMU and subsequently approved by WB) neither featured in the list of 40 Road/ Bridge projects submitted by PWD nor in the list of 17 bridges identified (February 2015) by the Design Inspection and Quality Control Department (DIQCD) during survey conducted for rehabilitation/ redesigning of bridges damaged in the floods of September 2014. Reasons for inclusion/ exclusion of projects for funding were not on record.

During the Exit Conference, Secretary PDMD stated (June 2025) that the selection of projects was done in phases and all the projects were approved by the World Bank.

---

11 With 632 damaged classrooms (Jammu: 186 and Kashmir: 446).
12 Jammu: ₹ 15.01 crore and Kashmir ₹ 36.99 crore.
13 with damaged 91 classrooms (Jammu: 65 and Kashmir: 26).
14 Jammu: 21 projects (₹ 160 crore); Kashmir: 19 projects (₹ 300 crore).
15 Jammu: 10; Kashmir: 13.

The reply may be viewed in the light of the fact that neither the projects were proposed by the line Departments nor damage and loss assessment reports were prepared for these projects.

2.7.1 Projects included in the Project Appraisal Document not executed

Project Steering Committee (PSC) in its 1st meeting (July 2017) directed PMU/ PIUs to carry out those tasks which were already identified in the Project Appraisal Document (PAD) of the WB.

Records of PMU revealed that activities intended for managing disaster risks like enhancing preparedness and achieving resilient recovery, although identified in the PAD, had not been executed under JTFRP as discussed in the succeeding paragraphs.

2.7.1.1 Retrofitting of critical buildings

Detailed Project Description (Clause 3 to 6) of PAD provided that under Component I[16], structural assessments and retrofitting/ reconstruction needs were required to be conducted of all hospital buildings that were impacted by the flood to make sure they are structurally safe against seismic risk. Similar assessments were to be carried out in relation to School Education Department buildings and Fire stations.

Further, a sub-project "**Consultancy services for upgrading design guidelines and building codes with material specification with respect to multiple disasters in J&K with specific reference to seismic zone IV and V**" in its report highlighted (June 2021) the need for retrofitting of essential facilities[17] in Srinagar as they were not seismic resistant.

Audit noticed (October 2023) that the PMU had not carried out assessment of structural integrity and retrofitting needs of existing buildings before taking up works under JTFRP. Out of the total 213 sub-projects taken up under JTFRP, 42 sub-projects (estimated cost ₹ 320.70 crore) of Component 1 did not include any sub-project related to 'assessment of need for retrofitting of damaged building' as envisaged in the PAD. Although Home Department, GoJ&K had proposed (January 2017) restoration of five flood damaged buildings at an estimated cost of ₹ 7.57 crore[18], PMU did not get these works sanctioned from the WB under JTFRP. As a result, the existing hospitals/ schools/ higher education institutions requiring retrofitting could not be identified or taken up. Buildings already identified by the Fire and Emergency Services remained prone to damage in the event of a disaster, leaving the patients and students at risk.

---

16 Reconstruction and Strengthening of Critical Infrastructure.

17 SMHS Hospital, Super specialty Hospital, Sri Pratap College and Fire and Emergency Station, Batmaloo

18 Fire and Emergency Services Headquarters, Batmaloo Srinagar (₹ 3.09 crore); Fire and Emergency Station, Gowkadal, Red Cross Road, Srinagar (₹ 1.66 crore); Fire and Emergency Station Baba Demb, Srinagar (₹ 1.12 crore); Fire and Emergency Station Syed Hamidpora (₹ 1.42 crore) and Fire and Emergency Station Veer Chattbal (₹ 0.28 crore).

During Exit Conference, Secretary PDMD stated (June 2025) that the process of retrofitting was taken up for Fire and Emergency buildings and Expression of Interest (EOI) for engagement of a consultancy firm was floated. However, due to poor response, the activity could not be finalised and in view of the limited time period of the project, it was decided that the new constructions taken up should incorporate the state of the art techniques for durability and disaster resilience which *inter-alia* included the Base Isolators in Lalla Ded (LD) hospital, Dampeners in Bone & Joint Hospital, rigid pavements instead of flexible pavements etc.

The reply is not tenable as the existing vulnerable structures are currently in use and carry the risk of damage in event of a calamity.

2.7.1.2 Hydro Metrological Action Plan

WB accorded (May 2015) in-principle approval to Hydro-meteorological Resilience Action Plan (HMAP). This sub-project was envisaged to finance the review of existing Early Warning Systems (EWS), identification of gaps and establishment of a robust, fail-safe EWS in the region.

In July 2019, the Irrigation and Flood Control Department (I&FCD) proposed setting up of real time hydro-meteorological database systems and assessment of surface water/ groundwater resources at an estimated cost of ₹ 51.67 crore. As per the proposal, 13 rain gauges and snow gauges each, 59 Automatic Water Level Radars (AWLR) and 04 Acoustic Doppler Current Profilers (ADCP)[19] connected with V-SAT were to be installed. It was also proposed that 68 Water Velocity Radar Sensors (WVRS) which detect the flow velocity and flow direction shall be installed along with sediment analysis equipment and current meters on different locations on the Jhelum River Basin. The PMU forwarded the proposal to WB and received (October 2019) the 'No Objection Certificate' (NOC) to float the tenders. However, the tender could not be finalised. The WB shelved (July 2021) the project as the deadline for procurement had already passed.

Meanwhile, PMU developed (January 2022) a Decision Support System (DSS) which aimed to provide for remotely administering the ground situation in emergencies and help in allocation of resources and enhanced co-ordination between various line Departments during emergencies.

It was noticed that DSS relies upon the inputs from Digital Risk Database (DRDB)[20] and Integrated Operational Forecasting system (IOFS)[21], developed under JTFRP, for

[19] ADCP is used for recording cross sectional profile, water current (velocity), water depth (sounding), flow of water (discharge) and can also be used for monitoring dredging of various water bodies in Kashmir.

[20] DRDB (a Geographic Information System based application) is a centralized repository of hazard, exposure and risk information that can be used for mitigation and developmental planning as well as for risk communication

[21] Designed as an automated tool, it uses weather and hydrological information of IMD and runs the model at predefined time to generate weather warnings and forecasts and disseminates this information in the form of SMS and bulletins.

hydro-meteorological hazards such as floods, flashfloods, avalanches and droughts. The level of accuracy of IOFS and Emergency Operation Centre (EOC)[22], also developed under the JTFRP, is dependent upon the accuracy of the IMD forecasts and inputs from I&FC. However, I&FC has limited installed infrastructure comprising only 13 functional AWLR/ Automatic Rain Gauges (ARG), 66 functional manual gauges and discharge stations and no functional rain or snow gauges in the Jhelum Basin. Therefore, the full potential of these platforms in the absence of HMAP and the objective of enhancing the capabilities in managing disaster risks, enhancing preparedness, and achieving robust recovery remained unfulfilled.

During the Exit Conference, Secretary PDMD stated (June 2025) that the tenders for upgradation of instrumentation of rivers were issued twice but the bids were non-responsive. The funds for instrumentation component of HMAP were then reappropriated by Government of India to Component 6 (Contingent Emergency Response) which was activated during COVID-19 pandemic.

The reply does not address lack of timely action by PMU over a period of three years (2016-17 to 2018-19). The proposal of I&FC was received (July 2019) and had time only up to June 2020 to implement the HMAP, when Component 6 was activated in view of COVID-19.

2.7.2 Execution of projects in flood prone areas

Hospital safety guidelines issued (February 2016) by the National Disaster Management Authority (NDMA) provide that building a new hospital in a flood prone area is prohibited and when existing hospitals are in vulnerable locations[23], no future expansions shall be permitted in the hospital campuses.

Scrutiny of records of PMU revealed (November 2023) that 11 out of 213 sub-projects taken up for execution under JTFRP in J&K sanctioned at a cost of ₹ 307.82 crore were located in the flood prone areas. These 11 sub-projects included two Hospital buildings and nine other sub-projects which included Fire & Emergency buildings, school buildings, college and factory buildings constructed in flood prone areas. Details of major works are given in **Table 2.2.**

Table 2.2: Execution of sub-projects in flood prone areas in Srinagar

(₹ in crore)

Sl. No.	Name of the sub project	Sanctioned Cost	Expenditure as on December 2023
1	Construction of 120 Bedded Specialised Orthopedic Unit including 06 Bedded ICU in Bone and Joint Hospital, Barzulla, Srinagar)	107.50	59.36
2	Construction of Extension block at Lalla Ded hospital Srinagar for infertility /gynae/ oncology/ ward block	132.55	32.75

[22] The command-and-control system for disaster management in J&K.

[23] Liquefiable ground, hill slopes, flood/ tsunami prone areas, adjoining unsafe buildings and poor accessibility in post-disaster situations.

Sl. No.	Name of the sub project	Sanctioned Cost	Expenditure as on December 2023
3	Administrative Block and Central Store building at Fire and Emergency Services at Headquarters, Batmaloo, Srinagar	9.89	9.58
4	Govt. Boys Higher Secondary School, Jawahar Nagar	4.17	2.82
5	Humanities block and Staff room at GDC, Bemina	9.45	7.06
6	Science Block at Amar Singh College, Srinagar	9.19	9.19
7	Additional classroom block at Government College for Women, M.A Road, Srinagar	14.65	14.16
8	Interior works for showroom cum interpretation centre for Government Woollen Mills, Bemina, Srinagar, J&K	2.25	2.18
9	Factory Building at Woolen Mills, Bemina, Srinagar	1.63	1.54
10	Construction of 2 classrooms at Middle School, Shivpora and 2 classrooms at Batwara, Srinagar	1.63	1.53
11	Silk factory building at Rajbagh, Srinagar	14.91	13.52
Total		**307.82**	**153.69**

As of December 2023, an expenditure of ₹ 153.69 crore was incurred on the construction of these projects. The PSC which was set up for overall strategy guidance and monitoring of the project had also failed to ensure compliance of NDMA guidelines (2016) regarding construction of buildings in flood prone areas.

During Exit Conference, Secretary PDMD stated (June 2025) that two hospital projects were intended for upgradation of the existing facilities of the Government of Jammu and Kashmir and the mandate of shifting the site was not in the scope of the project. Besides, no official categorisation of these areas as flood prone is available on records.

The reply is not acceptable as the Department had not considered the Hospital Safety guidelines issued by NDMA while planning these projects. Moreover, the areas have been categorised as flood prone areas in the District Disaster Management Plan (2020-21).

2.7.3 Execution of new projects while ignoring damaged projects in contravention of the World Bank Guidelines

Component 2 of Project Appraisal Document (PAD), World Bank (WB) was to finance the reconstruction of damaged roads, bridges and associated drainage and slope stabilisation works, retaining walls, protection walls. The PMU proposed funding of five new bridges[24] under Component 2 of JTFRP. In DPRs of these five bridges, it was mentioned that these bridges which connected vast areas were damaged due to washing away of causeway by flash floods of September 2014 and the locals especially school going children were facing severe hardships.

[24] 1. Bridge at Shrakwara Baramulla (Estimated cost: ₹ 6.69 crore) 2. Bridge at Wagila Wagoora Baramulla (Estimated cost: ₹ 8.66 crore) 3. Bridge over nallah Sheeshrie on Wahdina, Bandi payeen (Estimated cost: ₹ 5.33 crore) 4. Bridge at Waza Mohalla Kreeri (Estimated cost: ₹ 7.40 crore) and 5. Bridge at Gogji Daji (Estimated cost: ₹ 6.27 crore)

Audit noticed that these five bridges did not feature in the list of damaged bridges prepared by DIQCD/ PWD. Further, no Damage and Loss Assessment (DaLA) of bridges was done by the PMU before sanctioning them.

During Joint Physical Inspection with JKPCC authorities, it was noticed that three[25] out of five bridges had already existing alternative operational bridges and villages were found well connected through already existing bridges.

Already existing bridge at Sharakwara	**Under construction new bridge at Sharakwara**
Already existing Bridge at Wagila Wagoora	**Under construction new bridge Wagila Wagoora**
Already existing bridge at Gogji Daji	**Under construction new bridge at Gogji Daji**

[25] (1). Bridge at Shrakwara Baramulla (2). Bridge at Wagila Wagoora Baramulla (3). Bridge at Gogji Daji

It was also seen during Joint Physical Inspection that no bridge existed at other two[26] sub-project sites, as such the issue of reconstructing bridges damaged during the September 2014 floods did not arise.

(Bridge at Waz Mohalla, Kreeri over Frestahar Nallah to which approach roads were yet to be constructed)

(Bridge at Wahidina Bandi Payeen over Khrus Nallah to which approach roads were yet to be constructed)

Deputy General Manager JKPCC Baramulla admitted (October 2023) that these were new bridge projects and not repair/ reconstruction projects. During the Exit Conference, it was stated (June 2025) that the projects were taken up keeping in view the overall Project Development Objective which not only involves reconstruction but also allows for building resilient infrastructure for future. Further, the areas connected by these bridges did not have any prior connectivity.

[26] (1) Bridge over nallah Sheeshrie on Wahdina, Bandi payeen and (2) Bridge over nallah Sheeshrie at Waz Mohalla Kreeri.

The reply is not tenable as only 23 out of 40 Road/ Bridge Projects proposed for reconstruction by the Public Works Department were considered. Further, construction of bridges for areas already connected (as evident during the physical verification) while not repairing damaged bridges was not justified.

2.7.4 Award of projects without approval of Project Steering Committee

Project Steering Committee (PSC) in its fourth meeting (March 2019) directed that prior approval of PSC shall be sought for any award of work after 31 December 2019. Out of 82 sampled projects, 52 projects[27] were taken up (between January 2020 and October 2021) at a cost of ₹ 770.13 crore for execution without the approval of the PSC.

During the Exit Conference (June 2025) the observation was accepted and stated that due to the political situation post August 2019 and subsequent pandemic situation, the meetings of the Steering Committee were not held. It was further stated (August 2025) that the meeting of the PSC was held on 15 November 2023 and only 74 projects were awarded after activation of Component 6 (Contingency Emergency Response) by the WB.

The reply is not acceptable as it was noticed in audit that 11 sampled works which were not under Component 6 were awarded by PMU without seeking the prior approval of PSC.

2.8 Financial Management

2.8.1 Flow of funds

GoJ&K, Finance Department releases the funds to PMU through PD&MD. Funds from PMU then flow to the PIUs through their Administrative Departments. The position of funds received by the PMU for 213 projects sanctioned under JTFRP, expenditure incurred during 2016-17 to 2022-23 is given in **Table 2.3.**

Table 2.3: Year-wise funds received and expenditure incurred under JTFRP

(₹ in crore)

Year	Opening Balance	Funds released	Total funds available	Funds utilized	Funds lapsed	Closing balance
2016-17	0	3.75	3.75	1.60	2.15	0
2017-18	0	18.35	18.35	16.47	0.91	0.97
2018-19	0.97	56.47	57.44	46.39	4.15	6.90
2019-20	6.90	195.31	202.21	84.92	109.71	7.57
2020-21	7.57	475.68	483.25	338.21[28]	28.01	119.68
2021-22	119.68	468.54	588.22	540.50	34.51	13.21
2022-23	13.21	299.27	312.48	237.09	74.98	0.41
Total		**1,517.37**		**1,265.18**	**254.42**	

(***Source: Records of PMU***)

[27] PMU: 22, JKMSCL; 20, I&CD:6 and PWD:4

[28] Includes ₹ 2.64 crore utilised by PIU PW(R&B) during 2019-20 out of lapsable budget and accounted for during 2020-21.

- As per the Draft Financial Manual of JTFRP, interest earned on deposits and other miscellaneous receipts shall be transferred to JTFRP. However, it was seen that the PMU/ JKERA had not transferred the encashed bid security of ₹ 0.37 crore withheld (October 2020) from a contractor in respect of test-checked sub-project "*Tutan Di Khuie to Khada Madana road*" to JTFRP (as discussed in ***Paragraph 2.9.1*)**.

- JKMSCL working as a PIU under JTFRP, had received (June 2021 to March 2022) ₹ 289 crore for procurement of medical equipment under 68 sub-projects out of 213 sub-projects of JTFRP and earned an interest of ₹ 30.66 lakh in a separate bank account opened for these funds. However, the amount was not transferred to JTFRP.

- JKMSCL had recovered (April 2021 to April 2023) liquidated damages amounting to ₹ 1.15 crore in respect of 12 sampled sub-projects. However, the amount had not been adjusted while submitting reimbursement claim to the PMU, JTFRP.

CEO, JTFRP stated (August 2025) that an internal committee had conducted reconciliation with JKMSCL and an interest of ₹ 1.17 crore earned on JTFRP funds was adjusted towards the liabilities of JKMSCL. It was also stated that ₹ 1.14 crore available with JKMSCL on account of imposition of liquidated damages is adjusted towards eligible liabilities and asked to provide Utilisation Certificate.

2.8.2 Undue favour to the contractors

General Conditions of Contract (GCC) clause 49.1 of the Contract Agreements entered into under JTFRP envisaged that the Moblisation Advance (MA) shall be recovered with percentage deductions from the interim payments. Deductions shall commence in the next Interim Payment Certificate (IPC) following that in which the total of all such payments to the contractor has reached not less than 15 *per cent* of the contract price or three months from the date of payment of first installment of advance, which ever period concludes earlier, and the advance shall be completely recovered prior to the expiry of the original time for completion of the sub-project. The CVC instructions also provide that MA should not be paid in less than two instalments except in special circumstances for the reasons to be recorded and the bank guarantee should be atleast 110 *per cent* of the MA.

In respect of 16 sub-projects awarded by PMU, MA of ₹ 42.19 crore was paid to the contractors during February 2018 to August 2021 in a single instalment. Grant of interest free MA was not stipulated in the tender documents. It was noticed that in respect of 15 sub-projects, the first IPC was received with delays ranging between 04 days and 367 days after three months from the date of payment of first installment of MA. As such, the recovery of MA from the contractors' bills was delayed to that extent. MA of ₹ 28.33 crore remained with the contractors after the expiry of the stipulated date of completion of works.

MA of ₹ 9.43 crore was recoverable (July 2023) in respect of seven sub-projects which included ₹ 7.28 crore in respect of four sub-projects which were either halted or abandoned for over two years.

It was also noticed that Bank guarantees at 100 *per cent* of MA had been accepted against the prescribed norm of 110 *per cent*.

CEO, JTFRP stated (August 2025) that the contractors were eligible for payment of both the instalments of mobilisation advance, accordingly the mobilisation advance was paid. It was further stated that the mobilisation advance was fully recovered in June 2021.

The reply is factually incorrect as the mobilisation advance was paid to the contractors in single instalment and the mobilisation advance of ₹ 9.43 crore was still recoverable (July 2023) in respect of seven sub-projects.

2.9. Programme implementation

2.9.1 Award of contracts

(I) Contract awarded to a technically unqualified consultancy firm

To carry out the "supervision and monitoring of various drainage, road and bridge sub-projects" PMU/ JKERA invited (September 2020) Expression of Interest (EoI) and in response 18 firms participated. After evaluation, Request For Proposal (RFP) was issued (January 2021) to six shortlisted firms.

During technical/ financial evaluation (Quality and Cost Based Selection) of the shortlisted firms, two firms were given combined technical/ financial score of 89.20 and 83.17 at the bid amount of ₹ 9.32 crore[29] and ₹ 8.20 crore[30] respectively. The contract was finally awarded (September 2021) to the firm with technical/ financial score of 89.20 at the quoted rate of ₹ 9.32 crore.

Records of PMU revealed that at the time of opening of bids (02 March 2021) of six shortlisted firms, an ex-employee of JKERA was working as Sr. Drainage Engineer since December 2018 in a firm which was already providing Technical Assistance and Quality Audit Consultancy (TAQAC) services under JTFRP. However, the same official was projected as Team Leader by the two out of six shortlisted firms including the firm to whom the contract was awarded. Further, just one day after opening of bids, the already engaged consultancy firm (TAQAC) had proposed (03 March 2021) to replace the employee with another employee.

The action of the PMU to technically qualify and award contract to the firm was not in accordance with the provisions of section 2.28 of WB guidelines (Selection and

[29] Bid amount - ₹ 7.73 crore + GST@ 18% - ₹ 1.39 crore + Provisional Sum - ₹ 0.20 crore.
[30] Bid amount - ₹ 6.78 crore + GST@ 18% - ₹ 1.22 crore + Provisional Sum - ₹ 0.20 crore.

Employment of Consultant) which provides that if it is established that key experts were included in the proposal without confirming their availability, the firm may be disqualified, and the process continued with the next ranked firm. The next ranked firm had quoted ₹ 8.20 crore and it would have led to saving of ₹ 1.12 crore had the management initiated the process with him.

It was also noticed in audit that from the date of signing of the contract agreement, the consultancy was carried out without the team leader for six months when PMU accepted (16 March 2022) the replacement of the Team Leader. However, the technical/ financial score of the replaced expert was less than the original expert, which was also a deviation from the WB Guidelines.

CEO, JTFRP stated (August 2025) that it was not established that key expert was proposed without confirming his availability.

The reply is not acceptable as the key expert never joined the said consultancy firm and was eventually replaced in March 2022.

(II) Contract awarded at higher rates

Clause 37.4 (Qualification of the bidder) of the Standard Bid Document (SBD) envisages that a negative determination[31] shall result in disqualification of the bid, in which event the employer shall proceed to the next lowest evaluated bid to make a similar determination of that Bidder's qualifications to perform satisfactorily.

PMU invited (September 2019) tenders for execution of sub-project "*Up-gradation of Tutan Di Khuie to Khada-Madana Road*". After evaluation of the four received bids, two bidders were found technically qualified. The Letter of Acceptance was issued (30 December 2019) to a contractor for execution of the sub-project at a cost of ₹ 13.75 crore. However, the selected contractor approached (10 January 2020) the PMU to cancel the Letter of Acceptance (LoA) citing that the rates of vented causeways were quoted mistakenly. The PMU cancelled the LoA and forfeited (March 2020) the bid security of ₹ 0.37 crore of the contractor.

As there was negative determination of selected contractor to execute the work, instead of approaching the second technically qualified bidder (L2) who had quoted a price of ₹ 23.45 crore, the PMU re-invited (June 2020) tenders after the expiry (April 2020)[32] of bid validity period. The work was awarded at a higher cost of ₹ 26.12 crore to the same firm, which had featured as L2 in the initial tendering.

Thus, not finalising the tender within the bid validity period and award of work at a higher rate on re-tendering resulted in avoidable extra financial burden of ₹ 2.67 crore.

---

31 Any information that makes the bidder ineligible for the bid/ when a bidder shows inability to execute awarded work

32 120 days after the bid submission deadline date.

CEO, JTFRP stated (August 2025) that the second and third lowest bidders were found technically non-responsive and the fourth lowest bidder had quoted 70 *per cent* higher rates than that of the first lowest bidder. It was then decided that it was administratively and financially prudent to retender the sub-project instead of going ahead with the fourth lowest bidder.

2.9.2 Sub-projects executed by Project Management Unit

The PMU including JKERA was PIU for execution of 71 sub-projects out of 213 sub-projects under JTFRP with the allotted cost of ₹ 903.34 crore. Out of these 71 sub-projects, 38 sampled[33] sub-projects were allotted at a cost of ₹ 800.68 crore.

As of December 2023, out of 38 sampled sub-projects implemented by PMU, five sub-projects were completed within time and 14 projects were completed with delays ranging between 05 months and 44 months. The completion date of one project[34] was not furnished. The balance 18 projects awarded at a cost of ₹ 560.93 crore were incomplete as of December 2023. Out of these 18 projects there was delay in respect of 17 projects[35] ranging from 14 months to 57 months from the stipulated date of completion.

2.9.2.1 Allotment of sub-projects of Consultancy Services

Consultancy services for Jhelum: PMU entered into (July 2018) an agreement with a consultancy firm for providing "Consultancy services to conduct feasibility studies and to prepare DPR for comprehensive flood mitigation in Jhelum River basin", at the quoted price of ₹ 17.19 crore. The sub-project was to be completed in 24 months (June 2020). It was noticed that as against 10 tasks to be completed by June 2020, only two tasks had been completed (September 2023). There was a delay of 54 months in accomplishment of Task-1 of the project which led to delay in completion of subsequent tasks of the sub-project and eight deliverables (September 2023). The main reasons for delay were frequent replacement of key experts, as against permissible replacement up to 40 *per cent* of experts, the Department allowed the consultancy firm to replace 80 *per cent* of the experts which was against the decisions of Contract Negotiation committee.

CEO, JTFRP accepted (August 2025) that the project is delayed and is scheduled to be completed by 30 November 2025.

Consultancy services for Tawi: For "Preparing feasibility and DPR for flood mitigation and comprehensive river management measures for Tawi Basin", the PMU entered into (June 2018) an agreement with the Disaster Management, Relief, Rehabilitation and Reconstruction Department, GoJ&K and a contractor (a Joint

[33] Only 38 sub-projects implemented by the PIU were part of total audit sample of 82 sub-projects.
[34] Const. of 165 M (3x55m) span bridge double lane bridge over Betarnallah at village Dhallan Poonch.
[35] Envisaged completion date of one project was May 2028.

Venture). The contractor had quoted lowest bid of ₹ 12.49 crore. The project was to be completed by 26 June 2020.

Audit noticed delay in execution of the consultancy project as against 10 tasks to be completed by June 2020, only seven had been completed (September 2023). There was a delay of 6 to 34 months in 5 tasks of the sub-project and three deliverables[36] were not accomplished (September 2023).

CEO, JTFRP accepted (August 2025) that the project was delayed and the final DPR was submitted by the consultant in April 2025.

2.9.2.2 Discharge of wastewater into Jhelum

Construction of Storm water Drainage Scheme, Nadroo, Hyderpora was taken up under Component 3 "Restoration of urban flood management infrastructure" of JTFRP. The report on Environmental Impact Assessment (EIA) conducted (October 2019) for the sub-project stated that no household connections should be linked with the proposed storm water drainage network and the Consent to Establish (CTE) and Consent to Operate (CTO) the dewatering station should be obtained from the Jammu and Kashmir Pollution Control Board (JKPCB).

The PMU awarded (October 2019) the contract to the successful bidder for construction of Storm Water Drainage Scheme Nadroo, Hyderpora at a cost of ₹ 12.80 crore. The scope of works of the project *inter-alia* included laying of 5.80 km of drains in the catchment area and construction of a dewatering station to pump out the water into flood spill channel. A consultant[37] was also engaged (July 2018) by the PMU to monitor the compliance of EIA report on the sub-project. The sub-project was completed in November 2021 and handed over to SMC in April 2023.

Audit noticed that dewatering station was established without obtaining the CTE and CTO from JKPCB. It was further found that the drain pipes that were laid in the catchment areas were designed (non-pressure NP3 class R.C.C) to handle both storm water and sewage water. Wastewater from households was continuously flowing into the sumps of the dewatering station in violation of the Water (prevention and control of pollution) Act, 1974 which was evident from the fact that during the period 20 October 2023 to 30 October 2023, the dewatering station had discharged 1.72 crore litre of waste into the flood channel despite no rainfall[38] in Srinagar city during the period. Urban Environment and Engineering Department, J&K also confirmed (November 2023) that Nadroo locality does not have separate sewage network.

During the Exit Conference, it was stated (June 2025) no households have been given access to the drainage network as the drainage network is strictly for stormwater.

[36] Tasks 8: Draft DPR; Task 9: Final DPR; Task-10: Tender document.
[37] Technical Assistant and Quality Audit Consultant (TAQAC)
[38] As per information obtained from Indian Meteorological Centre, Srinagar.

The reply is not correct as the dewatering station was pumping out wastewater for the period without any recorded rainfall.

CEO, JTFRP accepted (August 2025) that household drains have been connected with the storm water drainage network to cater only the rainfall water, however it is not possible to locate if any household allows sewage in the drain.

2.9.2.3 Extra financial burden due to transfer of sub-projects from PWD/ SMC to PMU/ JKERA

The PMU proposed (March 2019) to PSC that as JKERA had vast experience in implementing externally funded projects, the sub-projects being implemented by PWD and SMC may be handed over to JKERA for timely execution. The PSC approved (March 2019) shifting of sub-projects of Component II and III of JTFRP with estimated cost of ₹ 580.54 crore from PWD and SMC to JKERA.

Audit observed that without the approval of PSC, the PMU entered into (September 2021) agreement with the consultancy firm M/s Intercontinental Consultants and Technocrats Private Limited (ICT) for execution of one test checked sub project for supervision and monitoring of 23 Drainage, Road and Bridge sub-projects taken over from PWD and SMC, at a cost of ₹ 9.12 crore[39].

Out of these 23 sub-projects, 14 sub-projects with awarded cost of ₹ 367.35 crore were included in the test-checked 82 sub-projects. By the time the consultancy firm (ICT) started (March 2022)[40] work, expenditure of ₹ 189.71 crore (52 *per cent*) had been incurred on these works by JKERA. It was further noticed that JKERA could not complete these 14 works in time. As of December 2023, six works were completed at a cost of ₹ 93.12 crore with a delay ranging between 7 months and 20 months from the scheduled date of completion and there was delay ranging between 15 months and 26 months in respect of 8 incomplete works with allotted cost of ₹ 270.49 crore.

Thus, the purpose of fast-tracking execution of works for which works were shifted to JKERA could not be achieved. Moreover, on account of delay in completion of these works, PMU was liable to also pay GST at the higher rate which would cause a burden of ₹ 9.71 crore on the WB assisted JTFRP.

CEO, JTFRP stated (August 2025) that the hiring of supervision consultant was approved by the WB after CERC component was activated and new projects including OGPs were executed by JKERA. OGPs were located in remote areas in Jammu Division, which required additional supervision staff.

[39] Excluding provisional sum of ₹ 0.20 crore.
[40] When the Team Leader was appointed by the consultancy firm.

The reply is not acceptable as the supervision consultant was hired without the approval of PSC and the OGPs were also completed with delays ranging from 05 months to 22 months. The supervision consultants were paid ₹ 3.84 crore as of December 2023.

2.9.2.4 Purchase/ installation of Machinery and equipment

(a) Excess payment of ₹ 0.82 crore on procurement of rescue equipment

On the request of the Additional Director General of Police, J&K Srinagar the PMU approved (August 2017) procurement of 10 Fiber Motorboats (FMB) and 20 Inflatable Rubber Boat (IRB) in the first phase on emergency basis to M/s Gee Pee Reinforced Products Pvt. Limited (firm) at per unit rate of ₹ 20,21,600 and ₹ 9,20,000 for FMB and IRB respectively. As per Clause 5 of the agreement (September 2017), in case after e-tendering of balance 28 boats (FMB: 14 and IRB: 14) the approved tendered rates happen to be lower than the allotted rates, the firm was to refund the excess amount to the Department and if the tendered rates happen to be more than the allotted rates, the firm had to make supply on the already allotted rates as per supply order and no extra claim was to be entertained on this behalf.

The PMU invited (August 2018) tenders for supply of 28 boats (FMB: 14 and IRB: 14), the same firm qualified technically as the L1 among three bidders who had participated in the tendering process and the contract was awarded (December 2018) to the firm at a cost of ₹ 3.53 crore. Audit noticed that the rates offered by the firm in the e-bid were lower than the rates at which contract for procurement of boats was awarded to it in the first phase as detailed in **Table 2.4**.

Table 2.4: Excess payment on purchase of rescue equipment

(₹in lakh)

Particulars	Purchase of boats in phase-I without inviting tenders as per contract of September 2017		Purchase of boats in phase-II after inviting tenders as per contract of December 2018		Difference in rates	Excess amount paid
	Quantity	Rate	Quantity	Rate	Rate	
FMBs	10	20.21	14	17.76	2.45	24.50
IRBs	20	9.20	14	6.32	2.88	57.60
Total	**30**		**28**			**82.10**

(Source: Records of PMU)

Accordingly, an amount of ₹ 82.10 lakh was to be recovered from the contractor which was not done. The reply was silent on the observation.

CEO, JTFRP stated (August 2025) that the contract conditions of the first contract remained valid during the currency of the contract and the earlier contract had expired at the time of signing of second contract. As such, the contract conditions of the two contracts could not be corelated.

The reply is not acceptable as contract conditions of the first contract did not stipulate the validity of the contract and the firm was to refund the excess amount, in case the approved tendered rates after e-tendering of balance items happened to be lower than the allotted rates.

(b) Idle investment of ₹ 2.35 crore on purchase of Search and Rescue kits

PSC decided (March 2019) to provide basic search and rescue equipment kit to Panchayati Raj Institutions (PRIs) in J&K under Component 5. Accordingly, the PMU entered into (November 2020) a contract with M/s Medihelp Healthcare Private Limited (supplier) for procurement of 4000 Search-and-Rescue kits at a cost of ₹ 18.61 crore (₹ 39,428 per kit plus GST of ₹ 2.84 crore) for 22 Districts[41] of J&K.

Audit conducted joint physical inspection of supply of Search and Rescue kits received in six Districts and noticed that in two Districts (Kathua and Anantnag) 530 Search and Rescue kits (Kathua: 230 kits and Anantnag: 300 kits) valuing ₹ 2.47 crore (Kathua: ₹ 1.07 crore and Anantnag: ₹ 1.40 crore) were supplied (Kathua: October 2021 and Anantnag: June 2022) by the contractor to 592 Panchayats (Kathua: 257 and Anantnag: 335). Out of 530 kits, 505 kits (Kathua: 230 and Anantnag: 275) purchased for ₹ 2.35 crore (Kathua: ₹ 1.07 crore; Anantnag: ₹ 1.28 crore) were not distributed to the PRIs but were lying idle for over two years in the stores of Block Development Officers, Barnoti and Shangus respectively resulting in not-fulfilling of the objective for which these kits were purchased.

Records of the PMU further revealed that one item (Karabiner) each in the 230 kits supplied to Kathua District was required to be replaced by the contractor (due to it not having the required Major Axis Strength) but the item was not replaced as of January 2024. It was also seen that no provision was made in the contract for replenishment of perishable items in the kits, viz. safety helmet with torch, LED torch, solar lights etc.

Assistant Commissioner Development, Kathua stated (January 2024) that the equipment could not be distributed to the end users due to non-imparting of training by SDRF for handling of these equipment.

Director Finance, JTFRP stated (May 2024) that the matter had been taken up (March 2024) with the District Development Commissioner, Kathua to distribute the kits immediately. The reply was silent about idle kits in Shangus, Anantnag.

(c) Idle investment of ₹ 35.95 crore on Oxygen Generator Plants (OGPs)

To ensure that the UT of J&K has a sufficient oxygen generation facility available in hospitals in view of the surging cases of Covid-19 in the country, 30 Oxygen Generator Plants (OGPs) were proposed (April 2021) for installation in the State/ UT under Component 6. Accordingly, ₹ 47.87 crore (Jammu: ₹ 23.63 crore; Kashmir:

[41] Including Leh and Kargil in the erstwhile State of Jammu and Kashmir.

₹ 24.24 crore) and ₹ 15.40 crore (Jammu: ₹ 9.19; Kashmir: ₹ 6.21 crore) were respectively paid for installation of OGPs/ MGPS and electric items/ construction of rooms by PMU/ JKERA. After commissioning, the OGPs during the Defect Liability Period (DLP), were under Operation and Maintenance (O&M) of the contractors up to February 2023. Departmental technicians/ helpers were to be trained by the contractors during O&M period of one year.

Audit conducted (January 2024) Joint Physical Inspection with departmental officers of 16 out of 30 constructed OGPs and found the following:

- The OGPs were non-functional since March 2023. The PMU had taken up (February 2022), the matter of providing manpower for operating the OGPs with the Director, Health Services and even Primary Health Centers (PHC)/ Community Health Centers (CHC) had taken up the matter with the concerned quarters, however, no manpower was provided by the Health Department for operating the OGPs.

- In CHC Akhnoor, the OGP was handed over to Hospital authorities in April 2023 after the DLP. However, the OGP could not be put to use as by that time the manpower had been withdrawn by the contractor and no manpower had been provided by the Health Department.

- In CHC Hiranagar, OGP had remained non-functional since April 2023 (just two months after the end of DLP) as MCCB of Air compressor and LV meter had got burnt, Solenoid Auto releasing valve was not working and there was leakage in the digital medical gas alarm box which had not been rectified as of January 2024.

- As of March 2024, the OGP plant could not be handed over to PHC Zakura as the complex in which it was installed, was under the occupation of security forces.

The Department had made no budgetary provision for periodic upkeep of these plants and there was likelihood that these plants might need repair and maintenance before making them functional.

CEO, JTFRP stated (August 2025) that the matter shall be taken up with the Health authorities to ensure that sufficient staff is deployed for optimum utilisation of OGPs.

2.9.2.5 Works allotted by the PMU to Jammu and Kashmir Projects Construction Corporation Limited (JKPCC)

To carry out civil works of roads, bridges and buildings, GoJ&K nominated Jammu and Kashmir Projects Construction Corporation Limited (JKPCC) for executing works under Force Account. JKPCC took up (between November 2017 and May 2019) 13 sub-projects in J&K under JTFRP for execution at a cost of ₹ 248.53 crore which was revised to ₹ 266.49 crore. These works were to be completed between March 2019 and May 2021.

As of December 2023, out of 13 sub-projects, three were completed with delays ranging between 12 months and 44 months. The remaining 10 works with physical progress ranging between 30 *per cent* and 69 *per cent* were incomplete, with delays of 31 months to 57 months. Out of the 10 incomplete works, 7 works were abandoned by the JKPCC since 2020-21, resulting in unfruitful expenditure of ₹ 50.52 crore incurred on these abandoned works.

None of these sub-projects were completed within scheduled date of completion between March 2019 and May 2021. As of 18 July 2022, against the allotted cost of ₹ 248.53 crore (revised to ₹ 266.49 crore), only ₹ 79.27 crore was paid to JKPCC.

(a) Construction of extension block at Lalla Ded Hospital, Srinagar

Lalla Ded hospital (Gynecology and Obstetrics), Srinagar suffered huge loss to infrastructure during the flood of 2014 as such a new building/ block was proposed to be constructed under WB aided JTFRP. The Construction of the extension block at Lalla Ded hospital Srinagar to be completed by May 2021 was entrusted (May 2019) to JKPCC at an estimated cost of ₹ 132.55 crore. As of December 2023, the financial progress was only 25 *per cent* and the value of work done was only ₹ 32.75 crore despite lapse of over two and half years from the envisaged date of completion of the project.

Audit noted that for making the building earthquake resistant, the JKPCC issued (January 2021) Letter of Intent (LoI) for installation of base isolator system to M/s Robinson Seismic Limited. However, due to change in design of isolator system, the cost of the work increased by 19 *per cent*[42] which required approval of WB. However, PMU did not agree to the proposal of JKPCC (December 2022) for seeking NOC from WB. The JKPCC subsequently cancelled (May 2023) the LoI issued (January 2021) to M/s Robinson Seismic Limited and the project remained incomplete as of December 2023. Audit further noticed that the PMU, JTFRP had paid corporation overheads to JKPCC at the rate of 15 *per cent* instead of 7.5 *per cent* applicable to projects of over ₹ 100 crore. Up to 4th bill submitted by the JKPCC for ₹ 23.60 crore, company overheads of ₹ 3.54 crore was paid at the rate of 15 *per cent* resulting in excess payment of ₹ 1.77 crore.

Incomplete works of extension Block of Lalla Ded Hospital, Srinagar

[42] By ₹ 0.84 crore from ₹ 4.46 crore to ₹ 5.30 crore

CEO JTFRP accepted (August 2025) the delay and stated that only piling work was completed. It was further stated that JKPCC has been subsumed with PW (R&B) Department in December 2023. The work was retendered by R&B in January 2025 and allotted in June 2025.

(b) Unfruitful expenditure on construction of three bridges

Test check of three sampled bridge projects allotted to JKPCC revealed that despite time over run of over four years as of December 2023, JKPCC had not completed these projects depriving the people of the concerned areas with road connectivity. The details are as given in **Table 2.5.**

Table 2.5: Time over run in completion of three bridge projects

Particulars	Allotted cost (₹ in crore)	Date of agreement	Scheduled completion date	Extended date	Status as of December 2023
Wagoora Wagila over Ningli Nallah	8.66	09.03.2018	March 2019	Five times up to June 2023	Financial progress: 48 *per cent* and the value of work done: ₹ 4.12 crore.
Trenz Sheikhpora over Rambiara	34.50	24.10.2017	May 2019	Six times up to December 2023	Physical progress: 40 *per cent*, Value of work done: ₹ 12.07 crore (35 *per cent*)
Rohmoo Pulwama over Rumshi Nallah	21.25	24.10.2017	May 2019	Six times up to December 2023	Physical progress: 54 *per cent*, Value of work done: ₹ 9.17 crore (43 *per cent*)

(*Source: Records of PMU*)

In its requests for extension of time to execute the projects, JKPCC attributed delay in completion of works to COVID-19/ abrogation of Article 370, harsh winter etc. However, these reasons were not valid after December 2021. Audit analysis revealed the following:

(i) Sub-project Wagoora Wagila bridge over Ningli Nallah: JKPCC awarded the work thrice between March 2019 and May 2021, however the work remained incomplete due to:

Work awarded/ allotted (March 2019): Contractor did not execute the work citing item of work to be executed not provided in NIT followed by lockdown due to Covid-19. JKPCC cancelled (July 2020) the allotment order.

Work awarded/ allotted (August 2020): Contractor refused to work due to unavailability of basic amenities at the work site and requested for material at factory site of the contractor which was acceded by JKPCC. However, the work was not executed and the contract was cancelled (September 2020).

Work awarded/ allotted (May 2021): Contractor could not commence the work initially as JKPCC did not provide technically vetted approved drawings. Further, the contractor did not procure required quantity of steel for the work and stopped the work demanding cost escalation. Further, the work had to be withheld (September 2021) due to not using the grade of steel approved by WB for the project (E-250 used instead of E-350 approved). However, the PMU got the use of E-250 grade steel approved (July 2022) by the WB.

(ii) Sub-project Trenz Sheikhpora bridge over Rambiara Nallah and Rohmoo Pulwama bridge over Romshi Nallah: JKPCC sub-contracted (July 2023) the projects at a cost of ₹ 34.06 crore[43] which was 61 *per cent* of the project cost of ₹ 55.75 crore[44] in contravention of contract agreement which envisaged a ceiling of 25 *per cent* for sub-contracting the specialised works. Further, the approved/ vetted drawings were submitted (November 2021) by JKPCC after a lapse of 33 months from the envisaged date of completion of the two bridges.

(Under-construction bridge site of Rohmoo bridge over Roomshi Nallah-Physical verification conducted in October 2023)

CEO, JTFRP stated (August 2025) that the JKPCC has been merged with PW (R&B) Department and these sub-projects have been taken over by PW (R&B) Department.

2.9.3 Procurement of machinery and equipment by JKMSCL

To respond the COVID-19 pandemic, MoF, GoI requested (May 2020), WB for activation of "Contingency Emergency Response Component (CERC)" in Disaster Risk Management Projects. In response, the WB allocated (June 2020), $50 million for implementation of Component 6: CERC under JTFRP. Accordingly, GoJ&K, Health and Medical Education Department (H&ME) accorded (October 2020) sanction for strengthening of Health Care Institutions under JTFRP. Against the approved outlay of

[43] Trenz Sheikhpora bridge over Rambiara Nallah: ₹ 20.73 crore and Rohmoo Pulwama bridge over Romshi Nallah: ₹ 13.33 crore

[44] Trenz Sheikhpora bridge over Rambiara Nallah: ₹ 34.50 crore and Rohmoo Pulwama bridge over Romshi Nallah: ₹ 21.25 crore

₹ 367.48 crore for total 72 sub-projects in J&K under the component, JKMSCL received (2020-21 to 2021-22), ₹ 289 crore for 68[45] sub-projects against which it incurred an expenditure of ₹ 288.59 crore as of December 2023. Procurement of 65 types of machineries/ equipment was made (January 2021 to September 2021) and distributed to 36 health institutions in J&K under the component.

Out of 82 sampled sub-projects, CERC comprised 20 sub-projects with allotted cost of ₹ 236.36 crore executed by JKMSCL and 4 sub-projects of Oxygen Generation Plants with allotted cost of ₹ 67.61 crore implemented by PMU/ JKERA.

2.9.3.1 Avoidable expenditure on procurement of Modular Monitors

For finalisation of rate contract for supply of Modular Monitors, JKMSCL invited (November 2017) bids from suppliers. To arrive at the total cost of equipment, the cost of main item, accessories, and Comprehensive Maintenance Contract (CMC) were to be added. On financial evaluation of the bids, a firm (M/s SR Technomed) was arrived as L1 at with quoted rates of ₹ 4,52,111 (Main item ₹ 3,90,642; Taxes: ₹ 53,269 and CMC for five years: ₹ 8,200) and rate contract was finalised (December 2018) with the supplier. The rates offered by the L2 firm (M/s L.M Agencies) were 4,96,434 (Main item ₹ 3,84,999; Taxes: ₹ 46,200 and CMC for five years: ₹ 65,235). Without CMC the quotation of L2 was less than that of L1.

For procurement of 500 Modular Monitors under JTFRP, JKMSCL entered into a contract (November 2020) with the supplier already identified[46] as L1 (December 2018) by it at a unit cost of ₹ 4,37,519 amounting to ₹ 21.88 crore without CMC. Audit noticed that by excluding the CMC, per unit rate of Modular Monitor procured by JKMSCL from the L1 bidder was ₹ 4,43,911 as compared to ₹ 4,31,199 quoted by L2 i.e. higher by ₹ 12,712.

Thus, action of the JKMSCL to procure Modular Monitors under JTFRP from a higher placed bidder at per unit price of ₹ 4,37,519 (inclusive of taxes) instead of the actual L1 who had quoted per unit rates of ₹ 4,31,199 (inclusive of taxes) resulted in extra avoidable expenditure of ₹ 31.60 lakh[47].

CEO, JTFRP stated (August 2025) that the procurement of Modular Monitors was made as per the valid rate contract of JKMSCL which was finalised after observing all codal formalities.

The reply is not acceptable as the rate contract had been made by JKMSCL by including the CMC in the rates for the equipment whereas the Contract for Modular Monitors under JTFRP did not include CMC.

---

45 Excluding 4 sub-projects of Oxygen Generation Plants with allotted cost of ₹ 67.61 crore implemented by PMU/ JKERA.

46 Under Direct Contracting.

47 ₹ 4,37,519 – ₹ 4,31,199 = ₹ 6,320; For 500 modular monitors : ₹ 6,320 x 500 = ₹ 31,60,000.

2.9.3.2 Idle machinery/ equipment valuing ₹ 5.39 crore

Test check of records of JKMSCL revealed that 5,868 items of 65 types of machinery/ equipment were purchased under JTFRP and supplied to various hospitals in 20 Districts of Jammu and Kashmir. Audit conducted (January 2024) physical inspection of the machinery/ equipment in five districts (Poonch, Samba, Srinagar, Baramulla and Anantnag) where 1,611 items[48] were supplied to various hospitals. It was noticed that machinery valuing ₹ 5.39 crore was lying idle as detailed in **Table 2.6.**

Table 2.6: Idle machinery/ equipment lying in hospitals

Sl. No.	Name of the Hospital	No. of machinery/ equipment lying idle	Date of receipt	Value (₹ in crore)
1	District Hospital, Samba	29	January 2021 to May 2022	2.44
2	District Hospital, Poonch	24	February 2021 to January 2022	0.59
3	District Hospital, Baramulla	38	February 2021 to September 2021	0.21
4	Government Medical College and Associated Hospital, Anantnag	06	September 2021 to December 2021	0.54
5	Jawahar Lal Nehru Memorial Hospital, Srinagar	22	February 2021 to February 2022	0.82
6	Trauma Hospital, Bijbehara	33	February 2021 to April 2022	0.79
	Total	**152**		**5.39**

(*Source: Physical Inspection of machinery/ equipment conducted by Audit*)

Audit noticed that requisitions for machinery/ equipment required by these hospitals were not obtained by JKMSCL before supplying the machinery/ equipment to these hospitals. The blood bank equipment viz. refrigerators/ deep freezer, platelet thawing machine and platelet agitators valuing ₹ 0.55 crore were supplied (February 2020 to July 2021) to District Hospital (DH) Samba and DH Poonch despite the fact that there was no blood testing laboratory in these hospitals.

Blood Bank refrigerators with bio-safety cabinet and Deep freezer lying unutilised in District Hospital Poonch

[48] Poonch- 268, Samba– 232, Srinagar – 470, Baramulla– 322 and Anantnag– 319.

Plasma Steriliser and Hot Air Oven lying unutilised in DH Samba

During Exit Conference, Secretary PDMD stated (June 2025) JKMSCL and Health Department would be directed to furnish the latest status report on utilisation of the machinery procured under JTFRP. Further CEO, JTFRP stated (August 2025) that JKMSCL has released the payment only after receipt of successful installation report from the concerned healthcare institutions stating that the equipment is functional.

The reply is factually incorrect as the equipment valuing ₹ 5.39 crore were lying idle and uninstalled in various healthcare institutions of the UT as noticed during the physical verification.

2.9.3.3 Idle investment on purchase of Automated Embedding Systems

JKMSCL purchased five type of equipment required for Surgical Pathology Report[49]. To generate the report, five interdependent equipment viz. Automated Tissue Processor, Automated Embedding System, Rotary Microtome, Automated Rotary Microtome and Automated Slide Stainer are required. As, these equipment were interdependent, these were to be purchased and supplied in combination to each hospital.

Audit noticed that although JKMSCL purchased 40 Automated Tissue Processors (2 each for 20 Districts), the other allied equipment viz Automated Tissue processors, rotary microtomes, and automated slide stainers were not purchased for 10 District hospitals[50]. As a result, the Automated Tissue Processors valuing ₹ 1.13 crore[51] supplied in these 10 District Hospitals were lying idle.

On Joint Physical Inspection (January and March 2024) of four District Hospitals in Samba, Poonch, Ganderbal and Budgam it was found that all the embedding systems valuing ₹ 0.45 crore supplied to these District Hospitals were lying idle since January

[49] A medical report that describes the characteristics of a tissue specimen that is taken from a patient.
[50] Samba,Reasi, Poonch, Kishtwar, Ramban, Pulwama, Budgam, Ganderbal, Kulgam and Bandipora
[51] Cost of automated embedding system for one district (11.32 lakh) * 10 number of districts wherein these systems were supplied.

2022 as the allied machinery/ equipment to Automated Embedding System were not supplied.

(Auto embedding system lying unutilized in DH Poonch and DH Samba)

(Auto embedding stations lying unutilized in DH Budgam and DH Ganderbal)

During Exit Conference, Secretary PDMD stated (June 2025) JKMSCL and Health Department would be directed to furnish the latest status report on utilisation of the machinery procured under JTFRP. CEO, JTFRP stated (August 2025) that due to paucity of funds, the number of equipment was reduced from 20 to 10 which resulted in non-providing of equipment to various District Hospitals of J&K.

The reply is not acceptable, as the Department could not ensure supply of one complete set of equipment of Surgical Pathology Report for each District instead it had procured/ supplied two Automated embedded system without allied equipment.

2.9.4 Works executed by Srinagar Municipal Corporation (SMC)

Irregular expenditure on upgradation of dewatering stations under JTFRP

Eighty dewatering stations of SMC were designed prior to floods of 2014. These dewatering stations were submerged during the floods. Hence, it was planned to install submersible pumping units one meter above established highest flood level of 2014

instead of horizontal shaft pumping units to make the flood infrastructure more resilient. 28 of these dewatering stations were upgraded by JKERA under Asian Development Bank (ADB) funding and three stations were upgraded by Drainage Circle of SMC under Atal Mission for Rejuvenation and Urban Transformation (AMRUT). The remaining 49 dewatering stations were taken up for upgradation by SMC under the sub-project "up-gradation of 49 dewatering stations in and around Srinagar City" under Component 3: Restoration of urban flood management infrastructure of JTFRP at a cost of ₹ 102.89 crore.

Scrutiny of records of Superintending Engineer, Drainage Circle, SMC revealed that there were no separate networks for drainage and sewage flow in Srinagar city. Further, WB mission during their visit (May/ June 2016) to Srinagar had directed that in cases where the dewatering stations were pumping mixed sewage and drainage water, the dewatering stations may not be upgraded/ restored.

However, SMC took up (January 2019) upgradation of 49 dewatering stations which were pumping mixed sewage and drainage water in and around Srinagar City. Records of three dewatering stations[52] revealed that the stations had discharged 7.47 crore litres[53] of water during the period from 20 October 2023 to 30 October 2023 though there had been no rainfall as per information obtained from Indian Meteorological Department, Srinagar during the same period. This indicates that the water discharged by the dewatering stations was household wastewater. Further, the Urban Environment and Engineering Department, Jammu and Kashmir had confirmed (November 2023) that the localities of Lal Mandi and Bulbul Bagh did not have separate sewage network. Thus, the dewatering stations being operated by SMC had been discharging sewage water into the Jhelum and Dhoodh Ganga rivers.

It is also pertinent to mention that GoJK was penalised (October 2022) by National Green Tribunal (NGT) for an amount of ₹ 35 crore for discharge of untreated sewage into river Dhoodh Ganga and Mamath Kull and for inability to process solid waste in violation of provisions of Water (Prevention and Control of Pollution) Act, 1974.

(Untreated sewage water from dewatering station Lal Mandi and dewatering station Bulbul Bagh being drained to River Jhelum and Dhood Ganga respectively)

[52] Lal Mandi, Bulbul Bagh, Shaheen colony

[53] Lal Mandi: 4.39 crore litres, Bulbul Bagh: 0.27 crore litres, Shaheen colony: 2.81 crore litres

(Untreated sewage water from dewatering station Channapora being drained to Dhoodh Ganga)

In reply, the Executive Engineer, City Drainage Division, SMC stated (January 2024) that upgradations were carried out after obtaining clearance from the WB and necessary precautions were taken to ensure that the dewatering stations align with international standards. The reply is not acceptable as nothing on record suggested that SMC had obtained CTO and CTE from JKPCB for operating mix dewatering stations.

CEO, JTFRP accepted (August 2025) that the storm water system is currently handling mixed discharge. It was also stated that the proposals have been submitted to connect existing dewatering stations with the sewage treatment plant along Doodh Ganga Nallah with similar initiatives planned at other key discharge point.

2.9.5 Projects executed by the Industries and Commerce Department (I&CD)

Out of a total of 213 sub-projects of J&K sanctioned under JTFRP, 26 projects valuing ₹ 50.22 crore were executed by I&CD under Component 4: Restoration and Strengthening of Livelihoods. Out of 11 sampled sub-projects with estimated cost of ₹ 36.56 crore, only one sub-project was completed in time, seven projects were completed with a delay ranging between 5 months and 21 months and two projects were incomplete as of December 2023. In respect of two incomplete sub-projects there was delay of 17 months and 19 months. One sub-project, "Consultancy services for adaptive reuse of Solina Filatures as Arts, Culture and Crafts Centre" was shelved by the WB.

2.9.5.1 Non-achievement of targets by Silk Factory, Rajbagh

For construction of Composite market centre building for whole chain of silk activity at Government Silk Factory (GSF) Rajbagh, Jammu & Kashmir Industries Limited (JKIL) entered into (March 2018) contract with M/s M. M. Shawl Engineering & Contractors Pvt. Ltd., Srinagar at a cost of ₹ 14.91 crore.

The contractor completed (May 2022) the construction of the building and as of March 2024, payment of ₹ 13.52 crore had been made to the contractor. Further, ₹ 8.94 crore was also spent under JTFRP on purchase of machinery. After construction of the

new building and installation of machinery, annual production and sales of silk were estimated at five lakh meter and ₹ 34.08 crore respectively. Details of production and sale of silk at the GSF, Rajbagh during 2019-24 are given in **Table 2.7.**

Table 2.7: **Production and sale of silk at Government Silk Factory, Rajbagh, Srinagar during 2019-24**

Year	Production		Sales	
	Quantity (Mtrs)	Value (₹ in crore)	Quantity (Mtrs)	Value (₹ in crore)
2019-20	19,824.85	0.99	10,900.00	0.43
2020-21	17,030.00	0.85	7,256.00	0.50
2021-22	20,898.35	1.15	21,077.70	1.38
2022-23	16,841.30	0.70	23,426.95	2.14
2023-24	9,865.10	0.49	23,024.60	2.16
Total	**84,459.60**		**85,685.25**	

(Source: Records of PIU I&CD)

It may be seen from the above table that despite incurring expenditure of ₹ 22.46 crore, JKIL could not achieve the envisaged production and sales of silk in the GSF. Although the sales increased from ₹ 1.38 crore in 2021-22 to ₹ 2.16 crore in 2023-24, the production of the factory decreased from 17,030 m in 2020-21 to 9,865 m in 2023-24.

On being pointed out, Chief Accounts Officer, JKIL stated (January 2024) that production of GSF Jammu was transferred to GSF, Rajbagh Srinagar for sale due to market potential of the latter. It was further stated that due to transfer of produce, the stock of silk at GSF Rajbagh amassed as such it was decided to limit the production to only newer varieties of silk.

Instead of utilising the increased capacity of the GSF, Rajbagh, GoJK decided to reduce its generation rendering the decision to upgrade the facility and incurring expenditure of ₹ 22.06 crore on construction of new building and purchase of machinery questionable.

Further, for the existing facility, the work of "Consultancy Services for preparation of conservation/ restoration and adaptive reuse plan for Government Silk Factory, Rajbagh Srinagar" JKIL entered into (June 2020) contract with Joint Venture of CRCI (India) Pvt. Ltd and Black Design Studio at a cost of ₹ 87.32 lakh. The work was to be completed in six months.

Though the Consultant submitted (December 2021) all its deliverables along with structural drawings and payment of ₹ 81.11 lakh was made to the consultant, JKIL had not taken up the conservation/ restoration work of the factory as of December 2023.

CEO, JTFRP stated (August 2025) that in respect of Silk Factory, Rajbagh, primary focus is on producing fabric of different varieties as from the initial eight varieties of silk fabric, the factory is now able to manufacture 24 varieties of silk with blends. Resultantly, the sales have improved significantly from ₹ 0.43 crores in 2019 to ₹ 2.14 crores in 2023. It was further stated that under JTFRP only the funding of the

consultancy was covered and the implementation of the various activities suggested by the consultant was to be taken by the various stakeholders.

2.9.5.2 Consultancy services for branding and communication Campaign

For "consultancy services to develop and launch branding and communication Campaign for J&K products", I&CD entered into (July 2020) contract (with a contract period of 24 months) with M/s Price Waterhouse Coopers Pvt. Ltd (PwC) at a cost of ₹ 2.29 crore. Under the contract, the consultancy work involved submission of:

- comprehensive branding strategy and roadmap
- final comprehensive branding strategy and roadmap based on feedback from client and
- deliverables based on agreed comprehensive branding strategy.

Test-check of the records of I&CD revealed that a payment of ₹ 1.33 crore was made to the consultant for submission of "comprehensive branding strategy and roadmap" and "final comprehensive branding strategy and roadmap based on feedback from client". After finalisation of brand strategy document, the consultant submitted communication plan, media plan and content bank as per the implementation plan laid down in the finalised brand strategy. Two payment claims[54] submitted by the consultant were not paid. As of December 2023, the work in respect of implementation plan had not commenced resulting in unfruitful expenditure of ₹ 1.33 crore. Further, the intended benefits of branding the products of J&K could not be achieved.

CEO, JTFRP stated (August 2025) that the funds for running the promotional campaigns was to be provided by the WB, which was not released by the WB. However, Industries and Commerce Department had been directed to explore the possibility of running the campaign from the resources of J&K Government.

2.10 Monitoring

WB guidelines prescribe monitoring and evaluation mechanism for projects funded by it. Audit examination of monitoring/ evaluation mechanism in place for WB funded JTFRP disclosed the following deficiencies.

2.10.1 Monitoring by the Project Steering Committee

PAD (Sl. No. 38: Institutional and Implementation Arrangements) of JTFRP envisaged that a Project Steering Committee (PSC) shall be set up for the overall strategy guidance and monitoring of the project. Accordingly, GoJ&K set up PSC in August 2015. The PSC was to formally approve the project investments and help in coordinating the activities of various Departments and in obtaining required approvals/ clearances for the project. This was to be done through semi-annual review meetings,

[54] ₹ 21.65 lakh (December 2021) and ₹ 20.72 lakh (March 2022)

where the PSC was to review the budgets, progress against the defined milestones, critical findings of the audit and evaluation reports, and provide such guidelines, as it may deem necessary for the project.

Records of the PMU revealed that against the prescribed 16 meetings to be held during 2016-17 to 2023-24, only four meetings were held (one in 2017-18 and three meetings in 2018-19) indicating shortfall of 12 meetings. As of December 2023, no meeting of the PSC was conducted since March 2019.

In absence of PSC meetings proper selection and monitoring of the sub-projects could not be ascertained in audit.

During Exit Conference, Secretary PDMD stated (June 2025) that due to the political situation post August 2019 and subsequent pandemic situation post COVID-19, the meetings of the Steering Committee were not held. It was further stated (August 2025) that the Project Steering Committee meeting was held on November 15, 2023 and thereafter the Chief Secretary UT of J&K has periodically reviewed the Project with the last review meeting held on 27 June 2025.

The reply is not acceptable as the Project was implemented during April 2019 to October 2023 without the guidance and monitoring of Project Steering Committee which also included the respective line Departments.

2.10.2 Operational Manual not prepared

As per Schedule 4, Section II (B) of the Financing Agreement entered into (January 2016) by GoI with the International Development Association, the GoJ&K was to prepare and adopt, and thereafter carry out the Project in accordance with, an Operations Manual (OM) for the Project. The OM was to set forth the plan for implementation, institutional arrangement, monitoring and supervision of Project activities, including all technical, environmental and social aspects in relation hereto.

Audit noticed that the PMU had not prepared the OM. Resultantly, discrepancies were observed in planning and execution of projects as discussed in the Report ***(Paragraphs 2.7.1.1, 2.7.1.2, 2.7.2, 2.7.3, 2.9.1, 2.9.2 and 2.9.4).***

During Exit Conference, Secretary PDMD stated (June 2025) that though OM as per the agreement was not prepared, however, all the projects have been executed by following due procedures and protocols.

CEO, JTFRP stated (August 2025) that the draft version of the Operation Manual was compiled in 2020, however due to Covid-19, the finalisation could not be done and all the project activities were carried out following due codal formalities with strict adherence to the World Bank guidelines.

The reply is not acceptable as the JTFRP was effective from April 2016 and Covid-19 lockdown was imposed in March 2020. The Department did not take action on operational manual for four years.

2.10.3 Creation of District Level Grievance Redressal Mechanism (GRM)

Section 3.12 of subsidiary agreement (January 2016) between MoF, GoI and GoJ&K envisages that the PMU shall strengthen, maintain and operate a District level Grievance Redressal Mechanism (GRM) throughout the period of the project implementation for handling any stakeholder complaints arising out of the implementation of the projects under JTFRP.

Records of the PMU revealed that PMU had not established GRM at the District level with the result no mechanism was in place to handle any stakeholder complaints regarding project implementation under JTFRP.

CEO, JTFRP stated (August 2025) that grievance redressal mechanism of the UT of J&K has been adopted which is a unified portal for all grievances pertaining to the UT of J&K. The reply is not acceptable as in absence of District level grievance redressal mechanism the grievances/ feedback of stakeholders can not be effectively addressed.

2.10.4 Management Information System

Audit scrutiny of the Management Information System (MIS) portal of JTFRP revealed that the MIS was not being used efficiently for regular reporting/ internal monitoring of the project as updated information regarding progress of sub-projects was not available on the MIS.

- Test check of six sub-projects revealed that although they were shown completed in the MIS, dates of their completion and handing over were not mentioned. Joint Physical Inspection (February 2024) of one of the sub-projects viz. Construction of Government Middle School, Jarain Wali Gali in Poonch District revealed that the school was not handed over to the SED but in the MIS, only fact of its completion in March 2022 was depicted.
- Although some works[55] were at halt, reasons for halt and the dates from which they were at halt were not mentioned in the MIS.
- MIS portal did not show the date of sanction of each sub-project by the WB.
- Although there were delays ranging from 08 days to 570 days in supply of equipment by the vendors under Component 6 CER, MIS portal did not depict any such delay.

[55] 1. Construction of gynae block at LD Hospital, Srinagar; 2. Construction of bridges at Wagila Wagoora, 3. Construction of bridge at Gogji Daji 4. Construction of bridge at Trenz Shopian and 5. Construction of road from Tutian di Khui to Khada Madana

CEO, JTFRP stated (August 2025) that in many cases the sub-projects were located in remote areas and the concerned engineering teams had no access to internet due to which there was delay in update of progress of these sub-projects on MIS.

The reply is not acceptable as the discrepancies in reporting of projects mostly included projects situated near capital cities of Jammu and Srinagar.

2.10.5 Internal Control Mechanism

(a) Preparation of Accounts

As per the Draft Financial Manual, PMU has to prepare Income and Expenditure Account, Receipt and Payment Account and Balance Sheet. However, PMU had prepared only Statement of Expenditure (SOE) in the name of Project Financial Statement. Income and Expenditure Account, Receipt and Payment Account and Balance Sheet were not prepared during the period.

(b) Improper maintenance of Cash book

Test-check of records revealed that Bank Reconciliation Statements were not prepared for tallying the entries in the Cash Book/ Bank Book. Entries reflected in the Bank Statement were not recorded in the Cash Book. Reasons for not recording all the transactions were not produced to audit.

Further, the PMU had neither maintained a Fixed Assets Register (FAR) nor carried out Physical Verification of fixed assets created by PIUs.

Thus, PMU could not ensure transparent and accurate accounting system and standard internal control mechanism.

CEO, JTFRP stated (August 2025) that though the draft financial manual prepared could not be approved by the Project Steering Committee (due to not holding of meetings). However, the record of fund flow for the project funds is being maintained by each PIU and PMU. Besides, the WB had graded the financial management of project from moderately unsatisfactory to moderately satisfactory in the aide-memoire during November 2024. It was also stated that the internal auditor appointed for the project has been instructed to prepare the income and expenditure account, receipt and payment account and balance sheet.

2.11 Conclusion

To support the recovery process in areas affected by 2014 floods and increase disaster resilience and capacity, Jhelum Tawi Flood Recovery Project (JTFRP) was taken up in year 2015 for the erstwhile State of J&K. Under the seven components of the Project, 213 sub-projects were awarded of which 174 were completed as of December 2023. Delays in completion of works due to delays in tendering, changing of experts, change in material etc. were observed. Damage and loss assessment reports were not prepared

for the selected projects. Infrastructure projects not proposed by the Line Departments were sanctioned under JTFRP while some which were proposed by them were not included. Activities like retrofitting of critical buildings and Hydro Metrological Action Plan intended for managing disaster risks, enhancing preparedness and achieving resilient recovery, although identified in the Project Appraisal Document (PAD), had not been executed under JTFRP. Hospital projects were executed in flood prone areas. Projects were taken up for execution without the approval of the Project Steering Committee (PSC). Instances of Irregular expenditure on construction of storm water drainage system by JKERA and dewatering stations by SMC were also observed.

Deficiencies in Purchase/ installation of Machinery and equipment included excess payment on procurement of rescue equipment, idle investment on purchase of Search & Rescue kits/ Hospital machinery/ Automated Embedding Systems and procurement of Modular monitors without tendering.

Monitoring of projects was not done in accordance with the WB guidelines as the periodic meetings of the Project Steering Committee were not held regularly. Operational Manual for execution of projects under JTFRP was not prepared. The District Level Grievance Redressal Mechanism was not set up and Management Information System was not updated.

2.12 *Recommendations*

The Government should:

- ***Ensure that the projects for managing disaster risks, enhancing preparedness and achieving resilient recovery are executed as per Project Appraisal Document (PAD) and approval of Project Steering Committee;***
- ***Ensure sound contract management by adhering to prescribed guidelines;***
- ***Take necessary steps for completion of all the incomplete projects in a time bound manner. Further, the infrastructure created should be utilised for intended purposes for which it was created; and***
- ***Update the Management Information System and strictly monitor the implementation of sub-projects so as to avoid idle, unfruitful and irregular expenditure.***

CHAPTER-III

MINING DEPARTMENT

CHAPTER-III

MINING DEPARTMENT

3.1 Pradhan Mantri Khanij Kshetra Kalyan Yojana (PMKKKY)

The Central Government launched Pradhan Mantri Khanij Kshetra Kalyan Yojana (PMKKKY) Scheme in September 2015 to ensure the welfare of areas and people affected by mining related operations by implementing various developmental and welfare projects/ programs in mining-affected areas. The Scheme also intends to minimise/ mitigate the adverse impacts during and after mining on the environment, health and socio-economic conditions of people in mining Districts, and ensure long term sustainable livelihoods for the affected people.

The District Mineral Foundations (DMFs) established (September 2015) in each district are responsible for implementation of PMKKKY using the funds accruing to the DMF.

The PMKKKY Scheme is implemented in Jammu and Kashmir by the Mining Department headed by Commissioner Secretary, who is assisted by the Director Geology and Mining. At District Level, the respective District Mineral Officers (DMOs) are responsible for implementation of the Scheme.

3.1.1 Audit Objectives

The SSCA was carried out to assess (i) whether proper system of assessment, demand and collection of funds under District Mineral Foundation Trusts (DMFTs) in place (ii) whether the Scheme was implemented in the mining affected areas and (iii) whether monitoring and evaluation of the implementation of the Scheme was as per prescribed guidelines.

3.1.2 Audit Criteria

The Audit objectives were benchmarked against the following sources of criteria:

- Mines and Minerals (Development and Regulation) Act, 1957.
- Mines and Minerals (Development and Regulation) Amendment Act, 2015.
- Scheme guidelines of PMKKKY, 2015.
- J&K Minor Mineral Concession, Storage, Transportation of Minerals and Prevention of Illegal Mining Rules, 2016.
- Minerals (Other than Atomic and Hydrocarbons Energy Minerals) Concession Rules, 2016.
- J&K District Mineral Foundation (Composition, Contribution, Functioning, Funding and Trust) Rules 2017.
- Mineral Conservation Development Rules 2017 and Mineral Conservation and Development (Amendment) Rules, 2021.
- J&K Financial Code, 2006 and General Financial Rules, 2017.

3.1.3 Audit scope and methodology

The SSCA covered the period from launch of the PMKKKY Scheme in 2015 up to March 2023. The Audit Methodology entailed examination of records at Directorate of Mines, Joint Director of Mines (JDMs) and Mining Officer (MOs). Further, audit of records at selected District Mineral Foundation Trusts (DMFTs) were also carried out. The audit methodology also included joint inspection along with Departmental authorities of the projects executed out of the DMFT funds. A beneficiary survey to assess the outcome of Scheme's implementation was also carried out. Entry conference was held with the Secretary of Mining Department on 31 August 2023, where audit objectives, scope, criteria and methodology of audit were discussed. Exit conference was held on 24 February 2025 during which the audit findings were discussed. The Department's responses to the draft report, as well as those provided during the exit conference, have been suitably incorporated into the report.

3.1.4 Audit Sampling

Audit sampling included multi-stage sampling at District, Block and Gram panchayat levels. Eight Districts including four each from Jammu Division (Kathua, Poonch, Jammu, Reasi) and Kashmir Division (Anantnag, Budgam, Pulwama, Kupwara) were selected based on weightage of DMFT Fund collection (40 *per cent*), DMFT Expenditure (40 *per cent*), and Tribal Population (20 *per cent*). From the weighted scores, four Districts were selected from high scoring, one from medium scoring and three from low scoring. Further, minimum three Blocks/ Municipalities in each District were selected (two from having largest number of projects and one from random sampling) thereby 23 Blocks were selected. Three to five Gram Panchayats from each block totalling 50 Gram Panchayats were selected through random sampling.

Part A: Audit Findings related to Legal framework

3.1.5 Legal framework in the State/ UT to implement PMKKKY

The Central Government issued directions (16 September 2015) to all the States to lay down guidelines for implementation of Pradhan Mantri Khanij Kshetra Kalyan Yojana (PMKKKY) and to incorporate these guidelines in the rules framed by them for the District Mineral Foundations. The rates of contribution to DMFs on account of mining of major minerals[1] were notified by Central Government on 17 September 2015. The rates notified were as follows:

a) 10 *per cent* of royalty for mining leases granted on or after 12 January 2015.
b) 30 *per cent* of royalty for mining leases granted before 12 January 2015.

Audit noticed that although the contribution towards DMFT fund for mining of minor minerals was to be collected from 17 September 2015[2], the GoJ&K framed J&K

[1] Major minerals include Coal, Limestone, Lignite, Limestone Kankar, Bauxite, Copper ore, Iron ore and Gold etc.
[2] Ministry of Mines, Government of India notified rates of contribution payable by miners to DMFs

District Mineral Foundation (Composition, Contribution, Functioning and Trust) Rules 2017 (JKDMF Rules) in January 2017 i.e. after a delay of 17 months. In the JKDMF rules, the rate of DMF contribution was prescribed as 10 *per cent* of royalty on account of mining of minor minerals. Further there was no distinction between DMF contributions for lease granted through auction and lease granted without auction, as prescribed in the Section 9B (5&6) of MMDR Act, 2015 for major minerals. Therefore, the JKDMF Rules notified (January 2017) were not in consonance with the MMDR Act, 2015. After audit highlighted this discrepancy in May 2022, the GoJ&K amended the DMFT rules, 2017 and notified (08 February 2023)[3] the rates of contribution towards DMFT as per GoI directions.

It was further noticed that the GoJ&K has not fully implemented all the provisions of J&K District Mineral Foundation (Composition, Contribution, Functioning, Funding, and Trust) Rules, 2017, which are discussed in the succeeding **Paragraphs No. 3.1.5.1, 3.1.5.2, 3.1.5.3, 3.1.5.4 and 3.1.5.5.**

3.1.5.1 Delay in formation of District Mineral Foundation Trusts

Section 9B (1) of the Mines and Minerals (Development and Regulation) Amendment Act, 2015, which came into effect on 12 January 2015, mandates that the State Government, by notification, establish a District Mineral Foundation Trust (DMFT) in each District affected by mining related operations.

Audit, however, observed a significant time lapse in this process. The notification for establishment of the District Mineral Foundation Trusts (DMFTs) in J&K was issued in February 2017, two years after the Act came into effect. Further, the registrations (formations) of DMFTs were made between October 2018 and December 2019 in eight selected Districts. These delays in registration of the Trusts, ranged from around four to five years from the date the MM (D&R) Act, 2015 came into effect, as detailed in **Table 3.1.1.**

Table 3.1.1: Delay in registration (formation) of DMFTs

District	Prescribed date of establishment of DMFT	Date of registration (establishment) of Trust Deed	Date of opening of DMF ACCOUNT	Period during which DMFT amount was not recovered	Amount of loss to DMFT (from January 2015)
Kathua	12.01.2015	07.12.2019	23.05.2017	01/2015 to 04/2017	2.37
Poonch	12.01.2015	01.02.2019	29.05.2017	01/2015 to 04/2017	0.13
Jammu	12.01.2015	08.12.2018	26.05.2017	01/2015 to 05/2017	2.08
Reasi	12.01.2015	04.10.2018	18.05.2017	01/2015 to 05/2017	0.57
Kupwara	12.01.2015	15.07.2019	06.11.2017	01/2015 to 06/2017	0.24
Anantnag	12.01.2015	11.02.2020	28.07.2017	01/2015 to 03/2017	2.30
Budgam	12.01.2015	18.12.2018	09.06.2017	01/2015 to 05/2017	0.63
Pulwama	12.01.2015	19.11.2018			0.50
Total					**8.82**

(Source: Bank statements and trust deeds provided by the concerned District Mineral Officers)

[3] Vide S.O. 69 dated 08.02.2023.

Due to not framing DMFTs in time, DMF contributions amounting to ₹ 8.82 crore could not be claimed and realised during January 2015 to December 2019.

In reply, Director Finance, Mining Department stated (November 2024) that the GoJ&K framed and notified the DMFT rules within 09 months from the notification of J&K Minor Mineral Concession, Storage, Transportation, and Prevention of Illegal Mining Rules 2016, notified vide SRO-105, dated 31 March 2016. It was further stated the said rules had been implemented retrospectively with effect from October 2015 in accordance with Hon'ble Supreme Court order in case of major mineral leases and all arrears accrued afterwards have been recovered. In case of minor mineral leases, it was stated that the delay for formation of DMFT was due to not forming of trust deeds involving 11 different stake holders and its subsequent registrations at the District Administration Level.

The reply should be seen in view of the fact that arrears in respect of Minor Minerals were not recovered as of March 2024.

3.1.5.2 Composition of District Mineral Foundation

Rule 3(k) of J&K District Mineral Foundation (Composition, Contribution, Functioning, Funding, and Trust) Rules, 2017 prescribes that two representatives of the mineral concession holders be included in the Trust for a term not exceeding two years at a time, but not more than twice.

Audit, however, noted that in the eight selected Districts as of March 2023, DMFTs Trusts had not been framed according to the aforesaid rules, as representatives of the mineral concession holders were not incorporated in the list of the trustees. Although, in District Anantnag, two representatives of mineral concession holders were shown as present in the formation of Works Plan under the Scheme for the years 2019-20, 2020-21 and 2022-23, their particulars were not recorded in the Works Plan. As such, neither their term periods nor their genuineness could be verified in audit. Not including representatives from the mineral concession holders in DMF Trusts led to non-involvement of the stakeholders in the decision making of the trust.

In reply, Director Finance, Mining Department stated (November 2024) that directions would be given to the Chairman of the Trust to incorporate two representatives of Mineral Concessioner holder by name while formulating the Works Plan for respective Districts.

3.1.5.3 Receipt and Expenditure of DMFT

Assessment, Demand and Collection of DMF contribution

Rule 71 of J&K Minor Mineral Concession, Storage, Transportation of Minerals and Prevention of Illegal Mining Rules, 2016 stipulates that the assessment and determination of royalty due from an assessee for a given assessment year shall be

conducted by an assessing authority authorised by the Government. However, it was noticed that the Department had not developed any mechanism for assessment, demand and collection of royalty and DMF contributions as of February 2025.

Framing of Rules not in conformity with the Act

Section 9 (B) (5) of the Mines and Minerals (Development and Regulation) Act, 1957 (MMDR Act, 1957) Act provides that holder of a mining lease or a prospecting licence-cum-mining lease granted on or after the date of commencement of the M&M (D&R) Amendment Act, 2015, shall, in addition to the royalty payable to the government, pay to the DMF of the District in which the mining operations are carried out, an amount which is equivalent to such percentage of the royalty paid in terms of the Second Schedule, not exceeding one-third of such royalty, as may be prescribed by the Central Government.

Audit examination disclosed that Rule 11 of JKDMF Rules 2017 prescribed that 10 *per cent* of royalty collected from lease holders was to be credited to the DMFT. As such, Mining Department had formulated JKDMF Rules, 2017 in contravention to MMDR Act 1957 and Jammu and Kashmir Minor Mineral Concession, Storage, Transportation of minerals and Prevention of Illegal Mining Rules 2016, as the said Act and Rules stipulated contribution of ten *per cent* of royalty to DMF by lease holders in addition to the prescribed royalty whereas DMF rules prescribed contribution of 10 *per cent* out of royalty to DMF, in respect of minor minerals.

As a result, Department suffered a revenue loss of royalty of ₹ 14.55 crore[4] during 2017-18 to 2021-22 and consequent undue benefit to the respective mining lease holders.

After this was pointed out by audit, Director, Geology and Mining Department stated (March 2023) that the said rules have been amended (8 February 2023) to make it compatible with MMDR Act.

3.1.5.4 Accounting Treatment in DMFTs

(I) Form, Mode and Manner of maintenance of DMFT Accounts

Rule 25 of Jammu and Kashmir District Mineral Foundation (Composition, Contribution, Functioning, Funding, and Trust) Rules, 2017 stipulates that the accounts of the Trust shall be maintained in the form, mode and manner as may be decided by the State Government. Further, Rule 25 (2) of the same rules stipulates that the accounts of the Trust shall be audited in such manner as may be decided by the Government.

Audit examination revealed that no guidelines or instructions relating to form, mode and manner of maintenance of DMFT Accounts had been issued by the GoJ&K as of

[4] Against the prescribed collection of ₹ 110 (including ₹ 10 DMF) for every ₹ 100 of royalty, the Department collected only ₹ 100, resulting in a revenue loss of ₹ 10 per ₹ 100 during 2017-18 to 2021-22.

February 2025. In absence of these guidelines, the consolidated position of the receipt and utilisation of DMFT funds was not available at both Apex and Division levels.

Also, audit of accounts of the DMFTs had not been conducted since formation of Trusts. Due to not conducting of Audit of DMFT accounts, the financial position of DMFTs in the shape of Annual Reports could not be submitted to the Governing Body for its approval.

The manner of audit of accounts of the DMF Trust was not decided by the GoJ&K as of February 2025, however four[5] of the DMOs had got the accounts of the Trust audited by CAs.

In reply, the Director Geology and Mining J&K UT Government stated (September 2023) that guidelines for maintenance of accounts shall be circulated to the DMFs in consultation with the Finance Department.

Director Finance, Mining Department stated (November 2024) that the subject matter has been duly noted, and amendment has been proposed in Rule-25 of SRO-03, dated 11 January 2017, thereby providing sub-rule of auditing of accounts by Comptroller and Auditor General of India.

3.1.5.5 Accountability and Transparency Mechanism

(I) Status of formation of Governing body, Executive Committee and Sub-Committees

The provisions of the Jammu and Kashmir District Mineral Foundation Rules (JKDMF), 2017 provide for framing of the Governing Body and Committees/ Sub-committees to lay down the broad policies of the trust, manage, administer and supervise the trust.

As per Rule 4 of JKDMF Rules 2017, a Governing Body was to be constituted as per the composition given in the rules for laying down the broad policy framework for the functioning of the Trust and shall review its working. The Governing Body was to approve the annual plan and annual budget of the trust upon the recommendations of the Executive Committee and meet at least twice in a year.

Further, Rule 14 of the JKDMF rules 2017 stipulates that the Executive Committee shall constitute committees or sub-committees to undertake such tasks that may be assigned or delegated by the Executive Committee to such committee or sub-committee.

[5] The audit of accounts of DMOs Jammu, Pulwama, Budgam and Kupwara had been audited by the Chartered accountants. The audit of accounts of DMO Reasi and DMO Poonch was conducted by the committee constituted by Divisional Commissioner. The audit of accounts of DMO Kathua and Anantnag had not been conducted since inception.

Audit examination disclosed that no Governing Body (GB) had been constituted and approved by the State/ UT Government as of February 2025. Besides disregard of the aforesaid rule, this reflected the lack of a broad policy framework for the Trust's functioning and review. Since GB was to approve the annual plan and annual budget of the Trusts based on the recommendations of the Executive Committee, the absence of GB resulted in no annual plans and annual budgets being prepared and approved. No Executive Committee and sub-committee had been formed as of March 2023, further impeding the Trust's operations.

In absence of the aforesaid committees, the crucial aspects related to the implementation of PMKKKY including the budget preparation, selection of projects, its approval and utilisation of funds were not smoothly carried out, as discussed in **Part B** of the Report. Further, in absence of GB, the implementation targets could not be set and no monitoring thereof was undertaken.

In response to the Agenda Points of Entry Conference held with the Department on 31 August 2023, the Department accepted (September 2023) that no Governing Body and Executive Committee has been constituted so far.

In reply, Director Finance, Mining Department stated (November 2024) that the Government of Jammu and Kashmir has made an amendment[6] in Rule 4 and 5 of J&K DMFT Rules, 2017 by incorporating the members in the composition in Governing Council and Managing Committee.

The reply was, however, silent regarding absence of annual plans and budget and not forming of Executive Committee or sub-committee.

Part B: Audit Findings related to Project Management

3.1.6 Execution of Projects

3.1.6.1 Physical Progress of Projects

The consolidated position of physical progress of sanctioned, taken-up, completed and incomplete projects was not available with the Department either at Apex level or at Division level.

Hence, audit collected and compiled the data from all the selected eight DMOs. The details of sanctioned, taken up, completed and incomplete projects in the eight-selected Districts as on 31 March 2023 are given in **Table 3.1.2**:

[6] Vide Notification No. S.O. 06 dated 03 January 2024.

Table 3.1.2: Physical progress of the projects in selected Districts

Year	Opening balance of Incomplete Projects	Projects sanctioned during the year by DMFT	Projects not taken up for execution	Projects taken up for execution during the year	Projects completed during the year	Closing balance of Incomplete Projects
	A	B	C	D= A+B-C	E	F=D-E
2017-18	0	0	0	0	0	0
2018-19	0	16	4	12	11	1
2019-20	01	136	37	100	71	29
2020-21	29	69	0	115[7]	88	27
2021-22	27	36	15	48	38	10
2022-23	10	108	91	27	13	14
Total		**365**	**147**		**221**	

(Source: Physical progress statements furnished by the eight selected DMOs)

It can be seen from the above table that during 2017-18 to 2022-23, out of total 365 sanctioned projects, 147 projects constituting 40 *per cent* of the total sanctioned projects were not taken up for execution primarily due to not according of Administrative Approval by Administrative Departments and site disputes as of March 2023. Besides, during the year 2020-21, although 17 projects were not sanctioned by DMFT, these were irregularly taken up for execution.

Audit analysis of a sample of 106 projects (Completed: 99 and Incomplete: 7) in the selected eight Districts disclosed delay in commissioning of projects due to delay in procurement, non-installation, land dispute at site, disregard of tender rules etc. as detailed in ***Appendix-3.1.***

Further, as per the PMKKKY guidelines, the DMF funds were to be utilised to complement the existing ongoing Schemes or projects of the State/ UT or Central Government. Audit noticed that only six ongoing projects amounting to ₹ 0.96 crore (constituting eight *per cent* of released funds of ₹ 11.30 crore) in three (Reasi, Anantnag and Pulwama) out of eight selected Districts had been complemented with the existing Schemes as of March 2023. Thus, 216 projects for which ₹ 10.36 crore of DMF funds were released were taken up as individual projects without complimenting with the ongoing State/ UT or Central Schemes or Programmes.

In reply, Director Finance, Mining Department stated (November 2024) that funds were utilised after approval of the competent authority both in the directly and indirectly affected areas. It was added that project executing Departments had been asked to complete the work in time bound manner to achieve the objectives of the Scheme in the targeted area.

[7] 115 projects included 17 projects which were not sanctioned during 2020-21, but were irregularly taken up for execution during the year.

3.1.7 Financial Management

3.1.7.1 Fund Position

The year-wise fund position viz. receipt of DMF contributions, advances to project implementing agencies and administrative expenses of DMFTs in the selected eight Districts as of 31 March 2023 is given in **Table 3.1.3.**

Table 3.1.3: Year-wise fund position of DMFTs in selected DMOs

(₹in crore)

Year	Opening balance (A)	Receipts (B)	Interest earned (C)	Total Availability (D)= (A) + (B) + (C)	Expenditure			Unspent Amount (H) = (D)-(G)	Percentage of unspent to the availability (I)
					Amount Advance (E)	Administrative expenses (F)	Total (G) = (E) + (F)		
2017-18	0.00	2.06	0.02	2.08	0.00	0.02	0.02	2.06	99
2018-19	2.06	5.73	0.10	7.89	0.39	0.08	0.47	7.42	94
2019-20	7.42	3.73	0.21	11.36	5.36	0.12	5.48	5.88	52
2020-21	5.88	2.21	0.07	8.16	2.52	0.12	2.64	5.52	68
2021-22	5.52	5.11	0.09	10.72	2.15	0.17	2.32	8.40	78
2022-23	8.40	6.23	0.16	14.79	0.90	0.06	0.96	13.83	94
Total		**25.07**	**0.65**		**11.32**	**0.57**	**11.89**		

(Source: Information furnished DMFTs in selected districts)

It may be seen from **Table 3.1.3** that out of total available funds of ₹ 25.72 crore (₹ 25.07 crore + ₹ 0.65 crore**)** during 2017-18 to 2022-23, the DMFs could spend only ₹ 11.89 crore (46 *per cent*) as of 31 March 2023. The primary reason for low utilisation of funds can be attributed to non-constitution of the Governing Body and the Executive Committee for laying down the broad policy framework for functioning of the Trust.

Audit examination further disclosed the following deficiencies regarding financial management of DMFT:

- **Non-reconciliation of DMF contribution with banks:** For mining of major minerals[8], the DMF contributions were being credited directly into the DMF Trust bank accounts by the mining lease holders at their own level without routing through the Trusts and notifying the DMOs.
  This entailed that regular bank reconciliation was essential for monitoring the actual DMF receipts and to ascertain the actual financial position of the Trusts. However, it was observed that DMOs had never conducted such reconciliation with the concerned banks as of November 2024 to ascertain the actual financial position of the Trusts. In absence of such reconciliation, the possibility of Non/ short recovery of DMFT contributions cannot be ruled out.

[8] Limestone

- **Non-requisition of UCs/ Detailed accounts**: A total amount of ₹ 11.33 crore was advanced (2018-19 to 2022-23) by eight selected DMOs to various executing agencies for execution of the DMF projects. In accordance with the General Financial Rule no. 87 (6), 2017, the executing agencies were required to furnish the Detailed Accounts or Utilisation Certificates (UCs) to the concerned DMOs in support of the expenditure incurred on execution of these projects.

  However, the UCs amounting to ₹ 9.46 crore were neither demanded by nor furnished to DMOs of four selected Districts[9] of Kashmir Division. While the UCs by the various executing agencies were submitted to DMOs of four selected Districts of Jammu Province[10]. The status of advances, their utilisation and UCs in the selected eight Districts, as of 31 March 2023, is given in **Table 3.1.4:**

Table 3.1.4: Details of advances, their utilisation and UCs

(₹ in crore)

District	Amount advanced	Expenditure incurred	Utilisation Certificate received	Amount of pending UCs	Amount of inflated UC's
	A	B	C	D=A-C	E
Kathua	0.66	0.58	0.66	0.005	0.08
Poonch	0.14	0.07	0.14	0	0.07
Reasi	0.28	0.22	0.23	0.05	0
Jammu	0.80	0.71	0.71	0.09	0
Kupwara	0.15	0.15	0	0.15	0
Anantnag	3.22	3.22	0	3.22	0
Pulwama	5.76	5.76	0	5.76	0
Budgam	0.29	0.29	0	0.29	0
Total	**11.30**	**11**	**1.74**	**9.56**	**0.15**

(Source: - Information provided by DMOs of the concerned Districts)

It may be seen from the **Table 3.1.4** that against the advance of ₹ 11.30 crore, the expenditure incurred by the executing agencies was ₹ 11 crore. However, the UCs of only ₹ 1.74 crore were furnished by the implementing agencies. The UCs for an amount of ₹ 9.56 crore was pending as of 31 March 2023. The actual expenditure incurred in two Districts (Kathua and Poonch) was less than the amount shown in UCs submitted, as such the UCs were inflated by an amount ₹ 0.15 crore.

In reply, Director Finance, Mining Department assured (November 2024) that concerned DMF districts will ensure receipt of Utilisation Certificates.

3.1.7.2 Investment of DMF in Fixed Deposits

Rule 10 (3) of J&K DMFT Rules, 2017 stipulates that the amount not required for immediate disbursement were to be deposited in Fixed Deposits (FDs) or flexi-deposits,

[9] Anantnag, Budgam, Pulwama and Kupwara.
[10] Kathua, Poonch, Reasi and Jammu.

following a transparent and competitive invitation of offers from eligible scheduled banks.

Audit observed that no such steps were taken by seven out of eight selected DMFTs and the unspent balances ranging from ₹ 2.05 crore to ₹ 13.68 crore[11] were lying in the bank accounts of the Trusts at the close of each financial years during 2017-18 to 2022-23 as shown in **Table 3.1.5 and Chart 3.1.1.**

Table 3.1.5: Unspent balances in seven out of eight sampled DMFTS at the end of each financial year

(₹ in crore)

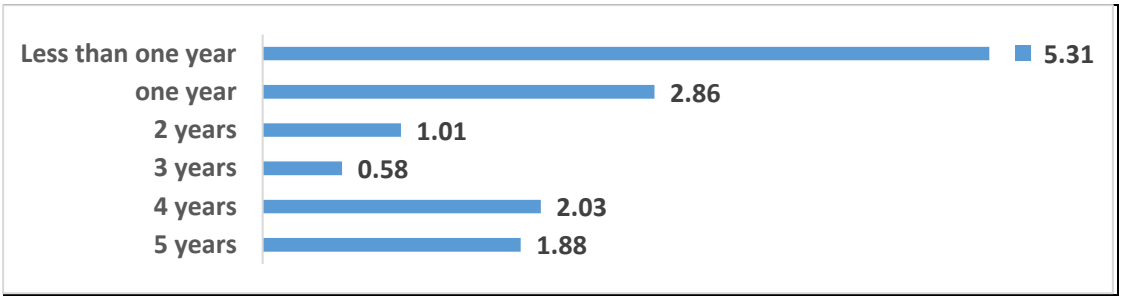
District	Unspent Amount at the end of Financial Year					
	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23
Kathua	0.68	1.25	1.25	1.67	1.69	2.23
Poonch	0.06	0.09	0.09	0.05	0.07	0.13
Jammu	0.27	0.50	0.50	0.91	0.99	1.85
Reasi	0.16	0.41	0.41	0.62	0.66	0.98
Anantnag	0.39	2.57	2.57	1.22	2.34	2.46
Budgam	0.09	0.26	0.26	0.24	0.76	1.69
Pulwama	0.4	2.31	2.31	0.8	1.86	4.33
Total	**2.05**	**7.39**	**7.39**	**5.51**	**8.37**	**13.67**

(Source: financial statements furnished by DMOs)

The age-wise analysis of the unspent balances in DMFT accounts in selected eight districts as of 31 March 2023 is illustrated in **Chart 3.1.1:**

Chart 3.1.1: Age-wise analysis of the unspent balances in DMFT accounts

(₹ in crore)



As these significant unspent balances were not invested in FDs, the Trusts were deprived of interest on these balances.

The Director Finance, Mining Department stated (November 2024) that DMOs had been advised to take up the matter with Chairman of the DMFT.

[11] The unspent amount of DMO Kupwara is not included in this figure as he had kept its unspent amount in Flexi-Deposits.

3.1.7.3 Loss of Interest on DMFT Funds

Rule 10 of J&K District Mineral Foundation (Composition, Contribution, Functioning, Funding, and Trust) Rules, 2017 provides that the bank account(s) of the Trust shall be opened in its own name at Jammu and Kashmir Bank and operated jointly by the chairperson and the member Secretary or any other member of the Executive Committee or any Officer as may be authorised by the Executive Committee.

Audit examination disclosed that the eight selected DMOs had initially opened savings bank accounts for DMF Trusts, the savings accounts of four DMOs of Jammu Division[12] were subsequently converted (March 2018) into current accounts. The reason for such conversion as attributed by the Department was the unilateral action by the Bank. The interest accrued for 2017-18 was also debited by the bank after the conversion. Despite this, the DMOs had not taken up this matter with bank authorities for five years, as of March 2023. As a result, the Trusts suffered loss of interest of ₹ 0.43 crore from April 2018 to March 2023,

In reply, Director Finance, Mining Department stated (November 2024) that the matter had been taken up with the bank authorities.

3.1.7.4 Deposition of DMF funds

As per Rule-9 (4&5) of J&K District Mineral Foundation (Composition, Contribution, Functioning, Funding, and Trust) Rules, 2017 the State/ UT Government shall deposit the amount of DMF collected from royalty into the bank accounts of the Trust as soon as possible but, not later than 20th day of succeeding month in respect of the amount collected in any particular month. It was noticed that DMO Anantnag deposited DMF funds of ₹ 1.30 lakh to the Government account[13]**,** instead of the bank account of Trust. Further, no collection of DMF funds from the arrear claims of royalty for the period August 2018 to September 2022 was carried out. This resulted in non-realisation of DMF contribution of ₹ 60.88 lakh. The audit observations were accepted by DMO, Anantnag with an assurance to do the needful.

The Director Finance, Mining Department in its reply stated (November 2024) that with effect from 24 August 2022, the royalty claims and DMF claims are deposited in online mode by Mineral concessioner, leaving no scope for such irregularities in future.

3.1.7.5 Not realising DMF contribution and penalty on illegal mining

Rule 66 of J&K Minor Mineral Concession, Storage, Transportation of Minerals and Prevention of Illegal Mining Rules, 2016 provides that wherever a carrier/ machine is found to be transporting/ excavating any mineral in any form, without a proper challan as required under the rules, the said mineral may be seized along with the vehicle and will be released only upon realisation of payment for price of material and applicable royalty for the mineral being transported and a fine not less than ₹ 10,000.

---

12 Kathua, Poonch, Jammu and Reasi districts.

13 Major Head: 0853, (Receipt Head of the UT). April 2017: ₹ 33,562; April 2017: ₹ 32,118; May 2017: ₹ 64,603.

Audit examination revealed the following:

The DMOs of five[14] out of eight selected Districts collected (May 2017 to March 2023) penalties totalling ₹ 4.66 crore on illegal mining. However, these penalties were collected as lumpsum without recording their component-wise details such as price of the illegally excavated minerals, the royalty due and the fines imposed. In absence of such details, audit could not determine whether the actual royalties and DMF contributions due on illegally extracted minerals were collected by DMOs.

On the other hand, the DMOs of four Districts[15] in Kashmir province, had maintained the component-wise details of penalties. DMO Pulwama started maintaining the component-wise details of penalty from April 2021 onwards. These four DMOs collected (June 2016 to March 2023) royalties amounting to ₹ 3.47 crore from illegal miners. Consequently, ₹ 1.04 crore[16] was also to be collected as DMF charges from illegal miners. However, as of March 2023, no such DMF contributions were collected by these four DMOs resulting in non-recovery of ₹ 1.04 crore of DMF contribution, as per details given in **Table 3.1.6**:

Table 3.1.6: Non-realisation of DMF funds on penalties

(₹ in crore)

District	Period	Royalty amount collected from illegal Minors	DMF amount due
Kupwara	June 2016 to March 2023	0.19	0.06
Anantnag	June 2017 to March 2023	2.81	0.84
Budgam	August 2018 to July 2020	0.35	0.11
Pulwama	April 2021 to February 2023	0.12	0.03
Total		**3.47**	**1.04**

(Source: Revenue statements of DMOs)

In reply, the DMOs stated (August 2023 to December 2023) that the matter would be looked into and action as warranted under rules would be taken under intimation to audit.

3.1.7.6 Outstanding amount of DMF from Major Minerals

The sub-rule 10 of Rule 12 of the Minerals (Other than Atomic and Hydrocarbons Energy Minerals) Concession Rules, 2016 provides that if a lessee defaults in the payment of royalty, dead rent, or any other required payments, or breaches specified conditions, the State Government shall issue a notice to the lessee. The lessee is required to remedy the default within 60 days from the receipt of the notice. Failure to comply may result in the termination of the lease and forfeiture of the performance security.

[14] Jammu, Poonch, Reasi, Kathua and Pulwama.
[15] Kupwara, Anantnag, Budgam and Pulwama.
[16] DMF contribution at the rate of 30 *per cent* of royalty of ₹ 3.47 crore

Audit observed that ₹ 5.20 crore[17] of DMFT contributions were lying outstanding against 21 Major mineral miners as of March 2023. However, no action according to the aforesaid provisions was taken to terminate the mining lease of the Miners and forfeit their performance security.

In reply the DMOs stated (December 2023) that the matter has already been taken up with the concerned miners and action as warranted under rules would be taken.

In reply, Director Finance, Mining Department stated (November 2024) that in the recent meeting the Administrative Department had been instructed to give final notice to miners before declaring them as lapses or defaulters.

3.1.7.7 Evasion of royalty and DMFT Contribution

Rule 45(1) of Mineral Conservation Development Rules, 2017 prescribes that the holder of a mining lease, or any person or company engaged in trading or storage or end-use or export of minerals mined in the country, shall cause himself to be registered online with the Indian Bureau of Mines. The holder of a mining lease shall submit online returns in respect of each mine to the Regional Controller or any other authorised official of the Indian Bureau of Mines (IBM).

Although the figures of mineral extraction in monthly returns submitted by the lessees to IBM and to the Department should not vary, there were significant mismatches between the data of mineral extraction submitted to IBM and to DMOs of Anantnag and Pulwama. The instance of significant variation between the data submitted to IBM and to DMOs during 2019-20 to 2021-22 are shown in the **Table 3.1.7**:

Table 3.1.7: Instance of significant variation between the data submitted to IBM and DMOs

District	Quantity as per IBM (Mts)	Quantity as per DMO (Mts)	Difference in quantity (Mts)	Short realisation (₹ in lakh)	
				Royalty[18]	DMF (30 *per cent* of royalty)
Anantnag	7,000	0	7,000	5.60	1.68
Pulwama	11,90,145	11,41,907	48,238	38.59	11.58
Total	**11,97,145**	**11,41,907**	**55,238**	**44.19**	**13.26**

(Source: records of DMFTs and records of IBM)

It may be seen from the **Table 3.1.7** that excess quantities of 55,238 tons of excavated minerals was intimated to IBM, while short quantities to that extent were reported to DMOs. This entailed the possibility of evasion of royalty of ₹ 44.19 lakh and DMFT contribution of ₹ 13.26 lakh.

In reply, the DMOs stated (December 2023) the matter will be looked into and action will be taken as per audit instructions. Director Finance, Mining Department stated (November 2024) that matter would be looked into and appropriate action would be taken.

[17] DMFT Anantnag: ₹ 1.29 crore and DMFT Pulwama: ₹ 3.91 crore.

[18] Royalty ₹ 80 (Rate of per metric tonne of extraction of limestone)

3.1.8 Planning

3.1.8.1 Formation of Governing body and Executive Committee

The Governing body and Executive Committee had not been formed by the Trusts as of 31 March 2023, as discussed in previous **Paragraph 3.1.5.5 (I).** As a result, the DMFTs could not devise their procedures for implementation of Scheme and due deliberations on the projects to be implemented could not be made. This resulted in sanction of projects at the discretion of DMFTs instead of by Governing body and Executive Committee in the selected Districts. Further, no Annual Plan and Annual Budget of DMFTs were prepared.

In reply, Director Finance, Mining Department stated (November 2024) that the UT administration[19] had constituted (January 2024) Governing Council and Managing Committee by amending the Rule 4 and 5 of SRO 03 of 2017 and before that District Development Commissioners of respective Districts were vested powers to exercise administrative and financial powers of the projects.

3.1.8.2 Identification of affected areas and people to be covered under PMKKKY

As per PMKKKY guidelines, identification of affected areas and people both directly and indirectly due to mining was to be done by the District Mineral Foundation Trust (DMFT).

Audit noticed that the eight selected DMFTs had not identified or notified the mining-affected areas or the people in their respective Districts as of November 2024. In absence of formally identified mining-affected areas or people, the project selection was carried out at the discretion of the DMFT rather than being based on actual needs of the mining-affected communities.

Director Finance, Mining Department stated (November 2024) that subject matter pertains to Deputy Commissioner, being Chairman of DMFT.

3.1.8.3 Expenditure on high priority and other priority areas

As per PMKKKY guidelines, at least 60 *per cent* of PMKKKY funds were to be utilised under **High Priority areas**[20] and 40 *per cent* of the expenditure was to be incurred in **Other Priority activities**[21].

---

19 Vide S.O. 06 dated 6th January 2024.

20 For Drinking water Supply**,** Environment preservation and pollution control measure, health care, education, welfare of woman and children, Welfare of aged and disabled people, Special program for welfare of aged and disabled people, Skill development, sanitation.

21 Physical Infrastructure (road, bridges, railways and waterways projects), Irrigation, Energy and Watershed Development (alternate source of energy (including micro-hydel) and rainwater harvesting system, development of orchards, integrated farming and economic forestry and restoration of catchments, afforestation and any other measures for enhancing environmental quality in mining district where mining operations are carried on

Audit noticed that out of the eight selected DMOs, the DMOs of only five Districts[22] had adhered to the prescribed criteria of at least 60 *per cent* PMKKKY funds utilisation under High Priority areas. While the DMOs of remaining three Districts of Pulwama, Anantnag and Budgam had utilised only 57, 44 and 53 *per cent* of funds of PMKKKY under High Priority areas. On the other hand, no expenditure was incurred by DMOs of three Districts of Kathua, Poonch and Reasi on other priority areas. Details of utilisation of DMF funds on high priority and other priority areas are given in **Table 3.1.8**:

Table 3.1.8: Allotment of DMF on high priority and other priority areas

	Allocation	DMFT (Amount ₹ in crore)							
		Kathua	**Poonch**	**Jammu**	**Reasi**	**Kupwara**	**Anantnag**	**Pulwama**	**Budgam**
High Priority	Amount	0.66	0.14	0.73	0.24	0.15	1.66	3.38	0.21
	Percentage of total	*(100)*	*(100)*	*(91)*	*(100)*	*(81)*	*(44)*	*(57)*	*(53)*
Other priority areas	Amount	0	0	0.07	0	0.03	2.13	2.55	0.19
	Percentage of total	*(0)*	*(0)*	*(9)*	*(0)*	*(19)*	*(56)*	*(43)*	*(47)*
	Total	**0.66**	**0.14**	**0.80**	**0.24**	**0.18**	**3.79**	**5.93**	**0.40**

(Source: - Allotment of funds for execution of works by DMFT's of selected districts)

In reply, Director Finance, Mining Department stated (November 2024) that subject matter pertains to Deputy Commissioner, being Chairman of DMFT.

Chairman of DMFT does not absolve key officials of Mining Department of their duties. The DMOs of concerned Districts as well as Director Geology and Mining, both of whom are members of Governing Council and Managing Committee of DMFT, were equally responsible for ensuring compliance with these guidelines.

3.1.8.4 Allotment of funds without preparation of Annual Plan and Annual Budget

Paragraphs 21 and 22 of J&K District Mineral Foundation (Composition, Contribution, Functioning, Funding and Trust) Rules 2017 provide that the Member Secretary of the Executive Committee shall, at the beginning of each financial year, cause preparation of plans for short-term projects and long-term projects proposed to be undertaken by the Trust in the relevant financial year, to be referred as the Annual Plan, together with details of the activities to be undertaken or completed by the Trust during such time and the expected time for completion of the projects and cost for such projects.

The Annual Plan shall contain all projects, programs, and activities proposed to be undertaken by the Trust for achieving its objective and shall have clearly demarcated milestones. The Member Secretary of the Executive Committee shall at the beginning of each financial year, cause preparation of an Annual Budget containing the details of the proposed income and expenditure on activities covered in the Annual Plan for that

[22] Kathua, Poonch, Jammu, Reasi and Kupwara.

particular financial year, including the legal, administrative and other costs and expenditure proposed to be incurred by the Trust together with details of the funding requirements in this regard, to be referred as the Annual Budget.

Records of the eight-selected DMFTs revealed that neither the Annual Budget nor the Annual Action Plans were prepared from the launch of the Scheme to the end of March 2023 in all selected DMFTs. An amount of ₹ 11.45 crore was allocated during 2017-18 to 2022-23 to the various implementing agencies such as Roads and Buildings, Jal Shakti Department, Youth Services and Sports etc. for execution of the works without preparation of Annual Plans and Annual Budget in disregard to the aforesaid provisions.

In reply, the DMOs stated (June 2023 to April 2024) that the audit instructions had been noted for future and matter will be taken up with Chairman of the Trust and higher authorities of the Department. The Director Finance, Mining Department stated (November 2024) that subject matter pertains to Deputy Commissioner, being Chairman of DMFT.

The reply is not acceptable as shifting the entire responsibility for the irregularity to the Chairman of DMFT does not absolve key officials of Mining Department including Director Geology and Mining Department for ensuring compliance with these guidelines.

3.1.8.5 Savings not surrendered to DMF

The implementing agencies were required to surrender the savings after completion of the project to the respective DMFTs accounts. However, the implementing agencies in three (Jammu, Kathua and Pulwama) out of eight selected Districts did not return the unspent funds of ₹ 9.94 lakh[23] pertaining to 18 projects to the DMF accounts as of March 2023. This resulted in parking of ₹ 9.94 lakh outside the DMF account.

While accepting the audit observation, Director Finance, Mining Department stated (November 2024) that the matter would be taken up with concerned Departments and the unspent amount would be recovered.

3.1.8.6 Mineral check posts

To check illegal mining in J&K, the Director Geology and Mining Department J&K had entrusted (2017-18) construction of 111 Mineral Check Posts (MCPs) to Jammu and Kashmir Small Industries Development Corporation (J&K SIDCO) at a cost of ₹ 10.88 crore. While an amount of ₹ 1.52 crore was released under CAPEX budget for the purpose, the remaining amount of ₹ 9.36 crore was to be released under the Scheme for Languishing Projects. However, no funds were released under this Scheme. The project was scheduled for completion by 31 March 2020.

[23] Jammu (12): ₹ 5.36 lakh; Kathua (1): ₹ 1.86 lakh and Pulwama (5): ₹ 2.72 lakh.

Audit examination revealed the following shortcomings:

- Only 22 out of 111 MCPs were completed as of 31 June 2023, leaving 89 MCPs (80 *per cent*) incomplete, despite a delay of over three years beyond the target date.
- Reason for non-completion of 89 MCPs can be attributed to:
- Unavailability of land in respect of 29 MCPs.
- 26 MCPs: Although land was available, no construction was undertaken by SIDCO due to not completing of technical formalities and not according of Administrative Approval by Mining Department. Since, accord of AA was a pre-requisite for release of funds under Languishing projects Scheme, non-accord of AA led to not releasing of funds as of March 2023.
- Not completing of remaining 34 MCPs was attributed to budget constraints by the Department.
- As of March 2024, out of the 22 completed MCPs, only 16 MCPs had been handed over to the Department, while six MCPs although completed had not been handed over.

In reply, Director Finance, Mining Department stated (November 2024) that the proposal for construction of MCPs would be revisited considering the manpower available with the Districts for manning the check posts.

The fact remained that Mineral Check Posts meant for checking illegal mining in J&K could not be completed as of November 2024 despite a delay of over four years since the target date of completion in March 2020.

3.1.8.7 Mining Surveillance system

Rule 9.3 of the J&K Financial Code stipulates that no work should be commenced, or any liability incurred until Administrative Approval (AA) and Technical Sanction (TS) is accorded by the competent authority.

To monitor illegal Mining through Satellite Imagery System, the Geology and Mining Department proposed installation of Mine Surveillance System. The work of preparation of Detailed Project Report (DPR) for the project was entrusted (2018) to J&K Small Scale Industries Development Corporation (SICOP). SICOP prepared (2018) the DPR at an estimated cost of ₹ 3.46 crore and submitted (2018) it to the Administrative Department of Geology and Mining for accord of Administrative Approval (AA). The work was to be completed by January 2019.

Audit examination disclosed the following deficiencies:

- Funds of ₹ 0.57 crore released under CAPEX budget during 2018-19 for the project could not be utilised and got lapsed due to not according of Administrative Approval and not selecting of the contractor.

- In October 2018, the project was included under the Scheme for Languishing Projects to be funded by Jammu Kashmir Infrastructure Development Finance Corporation (JKIDFC) at a balance cost of ₹ 2.89 crore.
- Accordingly, SICOP allotted (January 2020) the work to M/s Sakura Pvt. Solutions. However, without accord of AA and TS, the work was started by the contractor and work done claim bills of ₹ 1.73 crore were submitted to JKIDFC for payment. However, no payments were made by JKIDFC due to not according of AA.
- The contractor after completion of 80 *per cent* of the project stopped (December 2020) the work for want of requisite funds for the project. To make the project functional, SICOP demanded (December 2021) a minimum of ₹ 0.20 crore for purchase of required Satellite Imagery System but no funds were released by the Department.

Thus, even after lapse of over five years since the stipulated date of completion of project and creation of liability of ₹ 1.73 crore, the Mine Surveillance System has not been installed as of November 2024 and illegal mining, transportation and storage of minerals remains un-monitored.

In reply, Director Finance, Mining Department stated (November 2024) that the contract with SICOP was terminated (14 August 2024) due to not commissioning of project by the vendor and presently the matter has been taken up with Bhaskaracharya National Institute for Space Applications and Geo-Informatics for providing solution for mining surveillance.

The fact remained that even lapse of about five years from the stipulated completion date of Mine Surveillance System in January 2019, the work remains incomplete as of November 2024.

3.1.9 Beneficiary Survey

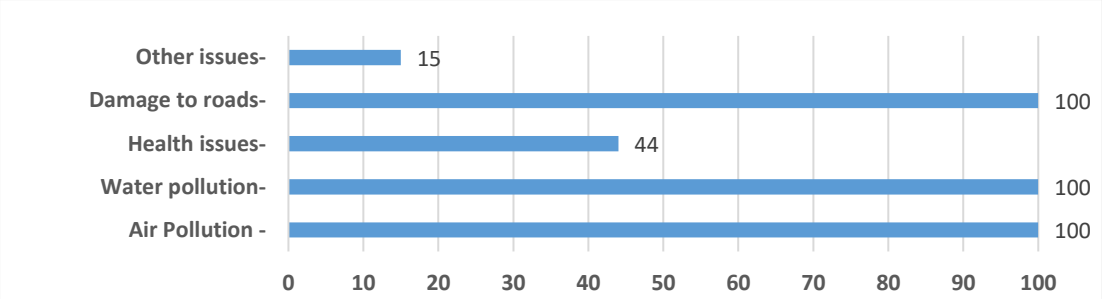
Out of the 221 completed projects during 2017-18 to 2022-23, asset verification was carried out in 106 sampled projects. However, out of these 106 projects the beneficiary survey for 80 projects could not be conducted as the project implementing agencies in their DPRs/ estimates had not identified the intended beneficiaries. Hence, beneficiary survey was conducted in remaining 26 projects. Further, during a beneficiary survey of 12 (out of remaining 26) projects involving 192 beneficiaries, it was noted that these 12 projects were executed at places which were not affected by mining. Consequently, audit team conducted survey along with Departmental officials in respect of remaining 14 projects involving 98 beneficiaries which were executed in the mining affected areas. The results of the survey are illustrated below:

3.1.9.1 Outcome of beneficiary survey in project implemented areas

A. Adverse effects due to mining

All the respondents (100 *per cent*) opined that mining led to damages to roads, water and air pollution. The respondents opined that mining also led to health issues (44 *per cent*) and other issues[24] (15 *per cent*) as depicted in **Chart 3.1.2:**

Chart 3.1.2: Adverse effects due to mining



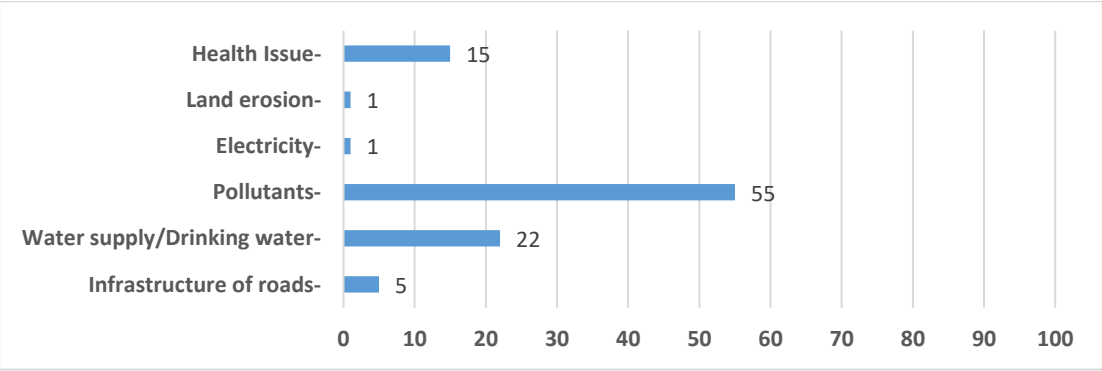
B. Awareness about the Scheme and DMFT activities:

Only four *per cent* of the respondents were aware of the Scheme and all respondents (100 *per cent)* stated that they were unaware of the DMFT activities.

C. Major Problems:

The respondents (55 *per cent*) opined that mining led pollutants resulted in water problem (22 *per cent*), health issues (15 *per cent*). Insignificant respondents opined that major issues are relating to Infrastructure of roads (05 *per cent*), Electricity (01 *per cent*) and Land erosion (01 *per cent*) as depicted in **Chart 3.1.3**:

Chart 3.1.3: Major Problems

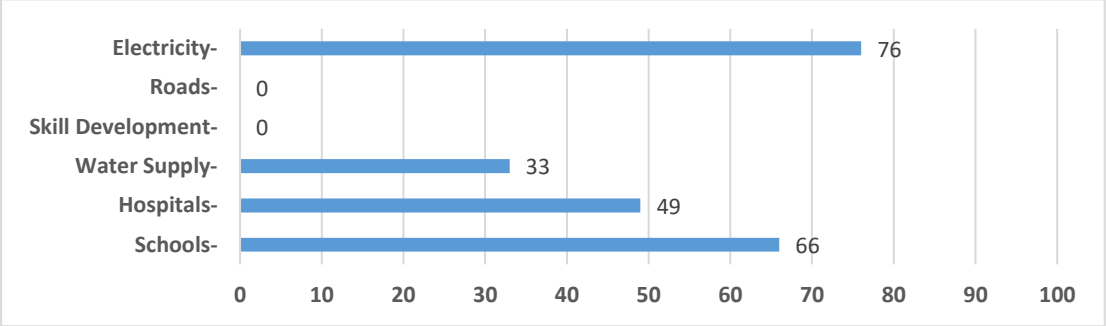


D. Satisfaction about Infrastructure availability in the area

The respondents opined that they were satisfied with availability of water supply (33 *per cent)*, hospitals (49 *per cent*), Schools (66 *per cent*) and electricity (76 *per cent*) as depicted in **Chart 3.1.4**:

[24] Other issues include land erosion, depletion of ground water table, damage to agriculture land etc.

Chart 3.1.4: Satisfaction about Infrastructure availability in the area



E. Awareness about PMKKKY Scheme (Project implementation)

Only two *per cent* respondents stated that they were aware about the project implementation in the area.

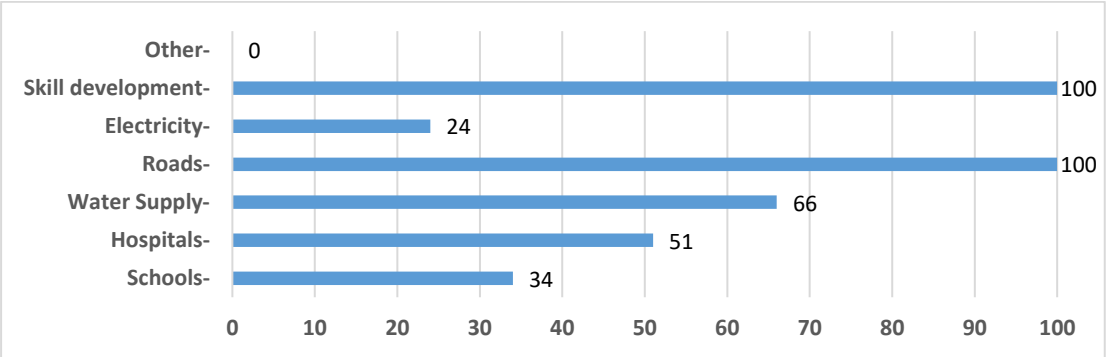
F. Benefits from assets of Scheme

Respondents in 54 *per cent* cases mentioned that the assets created were not fruitful while 46 *per cent* respondents opined that the assets created were fruitful to people.

G. Projects needed to be taken up

All respondents (100 *per cent*) opined that projects relating to construction of roads and skill development needed to be taken in the mining area. Significant percentage of respondents opined that infrastructure relating to water supply (66 *per cent)*, hospital (51 *per cent)*, schools (34 *per cent)* and electricity (24 *per cent)* needed to be taken in the area, as depicted in **Chart 3.1.5**:

Chart 3.1.5: Projects needed to be taken up



H. Approval of projects and beneficiaries from Palli Sabha/ Gram Sabha:

All the respondents (100 *per cent)* opined that the Palli Sabha/ Gram Sabha were not consulted before execution of the project and selection of the beneficiaries under the Scheme.

I. Consultation of Sarpanch in assessment of basic needs of area to be taken up under Scheme.

All the Sarpanchs (100 *per cent)* opined that they were not consulted in assessment of the basic needs to be taken up under the Scheme.

Director Finance, Mining Department stated (November 2024) that Chairman of DMFT would look into survey report and fill up the gaps as pointed out by Audit.

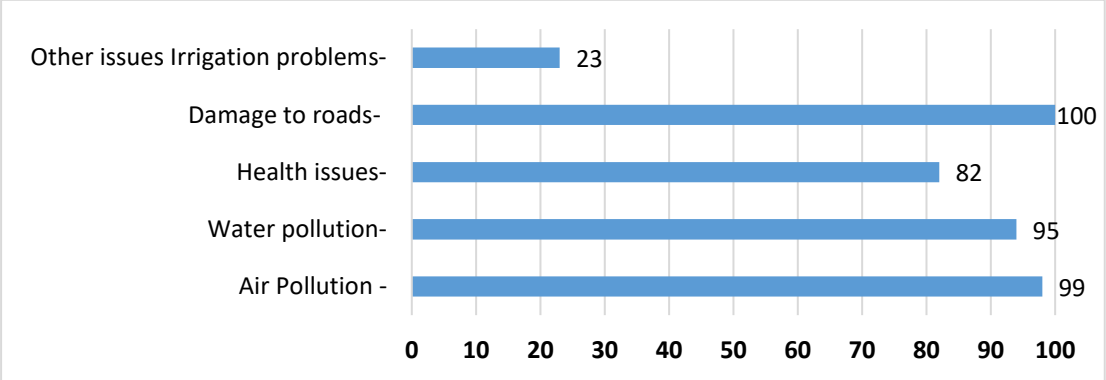
3.1.9.2 Outcome of beneficiary survey in the mining areas where no projects were executed

Audit had conducted a beneficiary survey along with Department official covering 422 people involving 27 Gram Panchayats (GPs) of 19 Blocks in eight selected Districts. These 27 GPs were located within a two km radial distance from the mining sites, however, no PMKKKY projects were executed in these areas. The survey findings based on the responses of 422 people are summarised as under:

A. Adverse effects due to mining:

All respondents (100 *per cent*) opined that mining led to damages to roads. Significant respondents opined effects of the mining resulted in air pollution (99 *per cent*), water pollution (95 *per cent),* health issues *(82 per cent).* 23 *per cent* respondents attributed effects of mining to other issues as shown in **Chart 3.1.6**:

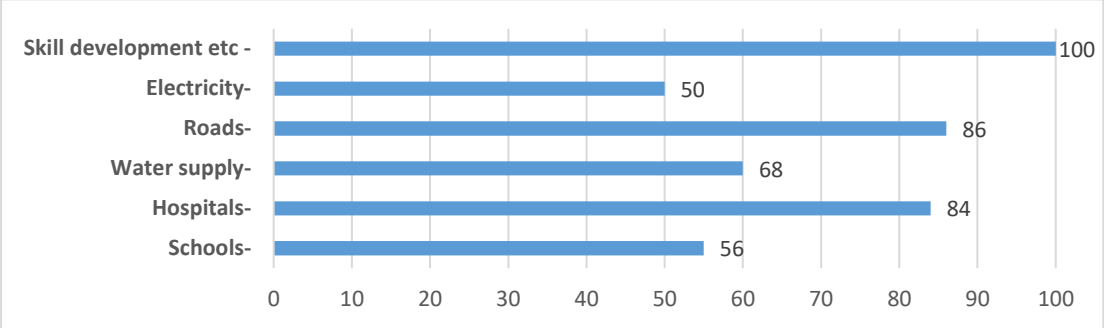
Chart 3.1.6: Adverse effects due to mining



B. Projects needed to be taken up

All respondents (100 *per cent*) opined that projects relating to Skill development were needed to be taken in the mining area. Significant respondents opined that infrastructure relating to roads *(*86 *per cent),* hospital (84 *per cent),* water supply (68 *per cent),* schools (56 *per cent)* and electricity (50 *per cent)* needed to be taken in the area as depicted in **Chart 3.1.7**:

Chart 3.1.7: Projects needed to be taken up



3.1.10 Other Miscellaneous Issues

3.1.10.1 Annual Report

Paragraph 24 of J&K DMF Rules 2017 provided that the Member Secretary of the Executive Committee shall, within 90 days of the end of each financial year, submit an Annual Report. The Annual Report shall be approved by the Executive Committee and shall contain details, *inter-alia*, of the activities completed by the District Mineral Foundation during the financial year-Income, Expenditure statement, Audited Accounts, Vision document etc. A copy of the Annual Report shall be sent to the Government within a period of 30 days from the date of its approval by the Executive Committee.

Review of the records of eight-selected DMOs revealed that no Executive Committees had been constituted in any of Districts as of March 2023. Consequently, no Annual Reports were prepared and submitted to the Government.

In reply, Director Finance, Mining Department stated (November 2024) that Managing committee had been constituted as per the rules and Annual Report would be submitted.

3.1.10.2 Not maintaining issue and accountal of Challan (Form A) Books

As per J&K Minor Mineral Concession, Storage, Transportation of Minerals and Prevention of Illegal Mining Rules, 2016, the lessee shall not remove or dispatch the minor mineral from the lease hold without proper challan in Form-A.

Audit noted the following irregularities:

- Before August 2022, six out of eight selected DMOs (Anantnag, Kupwara, Budgam, Pulwama, Kathua and Poonch) had not maintained proper record of the Challan Books (Form-A) issued to lessees for transportation of minor minerals.
- Further, after switching over (August 2022) from manual Forms A to e-passes system, the lessees were required to surrender the Form-A books to the

concerned DMOs. However, it was observed that these Form-A books were partially surrendered by the lessees. The block-wise position of outstanding Form A books against the DMOs is shown in **Table 3.1.9**.

- In respect of Anantnag, Kupwara, Budgam and Pulwama Districts, no stock account of Form-A was found to be maintained by respective DMOs. As such, the position of outstanding Forms could not be verified in audit.

Table-3.1.9: Block-wise position of outstanding Form-A Books

District	No. of Challan books issued	No. of challan books returned	Pending challan books with Lessees	No. of outstanding form-A
Kathua	218	148	70	6,950
Poonch	143	17	126	15,700
Total	**361**	**165**	**196**	**22,650**

(Source: Stock register of challan books)

Due to not surrendering of Form-A books, the possibility of misutilisation of these forms for transporting minerals without reflecting in the monthly returns before September 2022 by the lease holders cannot be ruled out.

In reply the DMO Poonch and Kathua stated (February 2024 and April 2024) that the matter regarding surrender of pending Challan books would be taken up with the lessees and crusher unit holders.

In reply, Director Finance, Mining Department stated (November 2024) that all the DMOs have been instructed to look into the matter of non-maintenance and issuance of Challan Books. It was further stated that all the Form-A had been submitted by the lessee of Kathua District. It was added that DMO, Poonch had initiated (17 October 2024) penalty proceeding against the lessees who had not returned the Challan books.

3.1.10.3 Suspected embezzlement in procurement

As per Rule 10 (2) of J&K DMF (Composition, Contribution, Functioning, Funding and Trust) Rules, 2017, all payments of the Trust, except contingent expenditure not exceeding ₹ 50,000 and such statutory dues or utility charges for which e-payment facility is not available, shall only be made electronically to the bank account of the recipient.

Scrutiny of records of DMO Anantnag revealed the following irregularities:

- DMO office had released payment of ₹ 6.00 lakh via cheque dated 26 September 2020 in favour of a sports item supplier (Khan International Sports) for procurement of sports items in violation of Scheme guidelines that mandate electronic payments over ₹ 50,000.
- Further, no records relating to bidding in accordance with the General Financial Rules 2017, placement of a supply order to the supplier, bills/ vouchers and relevant entries in Stock register were available on record.

Thus, release of payment of ₹ six lakh to a sports agency without procurement records, supply order and proof of receipt of material raises doubt of embezzlement of released funds.

In reply the DMO Anantnag stated (December 2023) that the matter would be looked into and action would be taken according to the prescribed rules.

Director Finance, Mining Department stated (November 2024) that Joint Director, Kashmir had been directed to look into the matter and submit report to initiate recovery proceedings in case of establishment of embezzlement in procurement. Further, the disciplinary action as warranted against the rules would be initiated against the erring officer.

3.1.10.4 Not furnishing of monthly returns by minor-mineral lease holders

As per the J&K Minor Mineral Concession, Storage, Transportation of Minerals and Prevention of Illegal Mining Rules, 2016, if a lessee fails to submit monthly and annual returns within the specified timeframe and there are reasons to suspect royalty evasion, the assessing authority can assess the royalty owed after providing a reasonable opportunity for the lessee to be heard, with a notice period not exceeding 30 days. Following an inquiry, the assessed amount must be paid promptly, and failure to do so will result in recovery as arrears of Land Revenue under the Jammu and Kashmir Land Revenue Act and its related rules.

Scrutiny of records of eight selected DMO offices revealed that 16 minor mineral lease holders had not submitted monthly returns to four DMO offices for varying periods, as per details given in **Table 3.1.10**.

Table-3.1.10: District wise outstanding mineral extraction returns by lessees

District	No of Lessees	No of Lease block	Period for which returns not submitted
Kathua	05	04	01/2022 to 06/2022
Poonch	05	05	4/2022, 5/2022 & 7/2022 to 3/2023 for one Block, 7/2022 to 3/2023 for four blocks
Budgam	03	03	10/2021 onwards
Anantnag	03	03	10/2022 onwards
Total:	**16**	**15**	

(Source: Monthly returns files)

Due to non-submission of these returns, the royalty collected during the specified periods could not be verified during audit. Further, despite the statutory provisions, no action was taken by the concerned DMOs against the defaulting lessees as per relevant provisions of J&K Minor Mineral Concession, Storage, Transportation of Minerals and Prevention of Illegal Mining Rules, 2016 and J&K Land Revenue Act, 1966.

In reply, the DMOs stated (December 2023 to April 2024) that the matter regarding furnishing of pending monthly returns would be taken up with the lessees.

Director Finance, Mining Department stated (November 2024) that the pending monthly return had been submitted (18 September 2024) by the lessee.

The reply should be seen in light of the fact that monthly returns in respect of lessees were provided to audit only for DMO Kathua.

3.1.10.5 Non-maintenance of Records

Rule 208 of General Financial Rules, 2017 prescribes that while receiving goods from a supplier, the officer-in-charge of stores should refer to the relevant contract terms for receiving the materials and all materials should be counted, measured, and entered in the stock register.

It was observed that DMFT Jammu had sanctioned (2020-21) projects for drilling 12 hand pumps at a cost of ₹ 30.02 lakh from DMFT funds. Accordingly, funds amounting to ₹ 30.02 lakh were released to the implementing agency [Mechanical Ground Water Drilling Division Jammu (MGWDDJ)] between March 2021 and July 2021 for execution of these projects. Out of the released amount, ₹ 6.25 lakh were utilised for purchase of stores such as MS casing pipes, hand pipes, riser pipes and connecting rods by the MGWDDJ.

However, since the store/ stock accounts of the purchased materials were not maintained, as such the actual receipt and utilisation of stock could not be verified in audit.

Director Finance, Mining Department stated (November 2024) that the matter had been looked into and all the DMOs had been sensitised about maintaining the records.

3.1.10.6 Preparation and Maintenance of website

Paragraph No 5 of PMKKKY guidelines provides for maintaining website and the information like Composition of DMFT/ Bodies, details of contribution received, list of area and people affected by mining, meeting agendas, minutes and action taken reports, Annual Plans and budget, Annual Reports, status of ongoing works with details of beneficiaries under welfare programmes was to be hosted.

Audit noted that although the J&K Mining Department has created its website, none of the details as above, were displayed by the Department on its website till March 2023, resulting in non-display of activities of DMFT in public domain.

Director Finance, Mining Department stated (November 2024) that Government of India had launched DMFT portal to upload the data related to DMF and PMKKKY.

The reply was not acceptable as the Department had not uploaded details such as contribution received, list of area and people affected by mining, meeting agendas, minutes and Action Taken Reports, Annual Plans and budget, Annual Reports, status of

ongoing works with details of beneficiaries under welfare programmes in the website maintained by Government of India.

3.1.11 Conclusion

The PMKKKY Scheme was launched to ensure the welfare of areas and people affected by mining related operations. In contravention to the PMKKKY guidelines, the areas and people affected due to mining were neither identified nor notified. As a result, the selection of projects under the Scheme was carried out at the discretion of the DMFTs rather than based on the actual needs of mining-affected communities. There was a delay of two years in framing of J&K District Mineral Foundation Rules 2017 for Minor Minerals. These rules were not in consonance with the MMDR Act 2015 and were subsequently amended (February 2023) after being pointed out in audit in May 2022. Due to framing of these contradictory rules, the Department suffered revenue loss of ₹ 14.55 crore during 2017-18 to 2021-22. Due to not registering/ forming of the District Mineral Foundation Trusts in time, the contribution of ₹ 8.82 crore could not be demanded and collected. Consequently, the funds to that extent were not available for implementation of the PMKKKY Scheme. The Department had not developed any mechanism for assessment, demand and collection of royalty and DMF contributions. The consolidated position of physical progress of sanctioned, taken-up, completed and incomplete projects was not available with the Department at either Apex level or Divisional level. Out of 365 sanctioned projects in sampled eight Districts, 147 projects (40 *per cent*) were not taken up for execution primarily due to not according of administrative approval and site disputes. DMFT Funds were advanced to various implementing agencies for execution of works without preparation of Annual Plans and Annual Budget. Projects were found executed in areas not affected by mining. The Governing Body and Executive Committee had not been formed by the Trusts, as a result, the DMFTs could not devise their procedure for implementation of Scheme. Besides, the available funds could not be spent and as against the DMFT fund availability of ₹ 25.72 crore during 2017-18 to 2022-23, only ₹ 11.89 crore (46 *per cent*) was utilised. Unspent balances were not found invested. Reconciliation of DMF contributions was not done with Banks. UCs were neither received nor demanded by some executing agencies of Kashmir Division. As 89 Mineral Check Posts were not completed and Mine Surveillance System was not installed despite creation of liability of ₹ 1.73 crore, the illegal mining, transportation and storage of minerals remained unmonitored. Beneficiary survey showed unawareness about the Scheme in 96 *per cent* of the respondents and unawareness about DMFT activities in 100 *per cent* of respondents. Suspected embezzlement could not be ruled out due to non-maintenance of records as was shown in a test-checked case. There was violation of Scheme guidelines mandating electronic payment. Monthly returns for varying periods were found not submitted and were unchecked.

3.1.12 *Recommendations*

In light of the audit findings, the Government should:

- ***Identify and notify the areas and people affected due to mining and ensuring that the selection of projects under the Scheme is based on the actual needs of mining affected communities;***
- ***Constitute the Governing Body and Executive Committee of the DMFTs and ensure that the execution of works under the Scheme is carried out only after preparation and approval of Annual Plans and Annual Budget;***
- ***Strengthen the fund management system ensuring prompt investment of unspent balances and periodic reconciliation with Banks; and***
- ***Strengthen the monitoring mechanism by expediting the completion of pending Mineral Check posts, among other measures, to prevent illegal mining and to ensure timely completion of projects undertaken under the Scheme.***

CHAPTER-IV

RURAL DEVELOPMENT DEPARTMENT

CHAPTER-IV

RURAL DEVELOPMENT DEPARTMENT

4. National Rural Livelihood Mission

4.1 Introduction

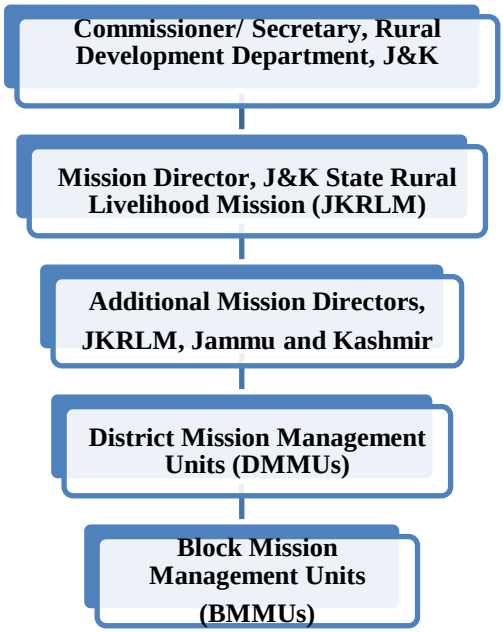
To promote sustainable livelihoods for the rural poor, the Ministry of Rural Development (MoRD), Government of India (GoI) launched National Rural Livelihood Mission (NRLM) in the year 2010 which was renamed as Deendayal Antyodaya Yojana-National Rural Livelihood Mission (DAY-NRLM) in March 2016. The Scheme aimed to reduce poverty by enabling poor household to access gainful self-employment and skilled wage opportunities. It envisaged building strong grassroot institutions of the poor such as Self Help Groups (SHGs) and facilitating access to financial, technical and marketing services.

It is a Centrally Sponsored Scheme i.e. the Central and the State Governments jointly fund the projects. The Joint Secretary/ Additional Secretary, DAY-NRLM, GoI leads as Mission Director and head of its National Mission Management Unit (NMMU). The State Mission Management Unit (SMMU) implements the DAY-NRLM activities in the State/ UT headed by Mission Director. The SMMU for J&K was registered (October 2011) as a society in the name of Jammu and Kashmir State Rural Livelihood Mission (JKRLM) for implementation of NRLM in J&K. In J&K, NRLM Scheme is popularly known as "**UMEED**".

4.1.1 Organisational Setup

The Organisational setup for implementation of DAY-NRLM in J&K is given in **Chart 4.1:**

Chart 4.1: Organisational setup of DAY-NRLM



4.2 Audit Objectives

The objectives of audit of DAY-NRLM were to assess whether:

- The planning process was carried out as per the Scheme guidelines.
- The allotment of funds was adequate and funds were spent and human resources provided as per the Scheme guidelines.
- Programme implementation was in accordance with Scheme guidelines.
- Monitoring Mechanism was effective.

4.3 Audit criteria

The Audit was benchmarked against the following sources of criteria:

- Guidelines for implementation of National Rural Livelihood mission
- State Perspective and Implementation Plan
- Annual action plans prepared by the Department/ society
- Notices, circulars issued by GoI and Government of J&K (GoJ&K) for implementation of this programme.

4.4 Audit Scope, Sampling and Methodology

As audit of the Scheme had not been conducted since its launch in 2011-12, audit scope included the implementation of NRLM component of DAY-NRLM Scheme from 2011-12 to 2022-23, with special focus on the last five-year period from 2018-19 to 2022-23.

Six[1] District Mission Management Units (DMMUs) were selected for audit using random sampling method and 18[2] out of 20 blocks under their jurisdictional control were selected for detailed check using random sampling method. The remaining two[3] blocks, which came under the control of another DMMU were selected for audit. The audit methodology entailed test-check of records during May 2023 to January 2024 in the offices of Mission Director (MD) JKRLM, J&K; Additional Mission Directors (AMDs), JKRLM, Kashmir and Jammu; six out of 20 DMMUs, and 20 out of 125 BMMUs. Joint Physical Verification (JPV) and Beneficiary Survey was carried out with staff of JKRLM to assess the outcome of the implementation of the Scheme.

An Entry Conference was conducted with Mission Director, JKRLM on 29 May 2023 during which audit objectives, criteria, scope and methodology were discussed. This was followed by an Exit Conference on 04 April 2025 during which the audit findings were discussed. The replies from the Department have been suitably incorporated in the report.

---

1 Jammu Division: Jammu, Rajouri and Kathua and Kashmir Division: Anantnag, Ganderbal and Kupwara.

2 Jammu Province: Marh, Khour, R. S. Pura, Sunderbani, Nowshera, Kalakot, Barnoti, Kathua, Basohli and Kashmir Province: Kupwara, Sogam, Kalaroose, Lar, Kangan, Ganderbal, Dooru/ Shahabad, Achabal ansd Qazigund.

3 Ghagwal and Khansahib.

Audit Findings

4.5 Planning for NRLM

4.5.1 Not collecting data of actual rural poor households

The Scheme guidelines of NRLM envisage that at least one member from each identified rural poor household, preferably a woman, is brought under the Self-Help Group (SHG) network in a time-bound manner. This necessitated identification and collection of data of all rural poor households of the State/ UT. Further, in the first Annual Action Plan (AAP) of the NRLM, it was emphasised that the Scheme will not succeed in its objectives if at least two-thirds (67 *per cent*) of rural families of J&K are not covered under this Scheme. It was also stipulated that as part of implementation strategy, the identification of the poor families and Households (HHs) had to be undertaken by taking up participatory identification[4] of the poor (PIP).

However, it was noted that no criteria such as income, condition of house, livelihood, basic amenities etc. was fixed by JKRLM for participatory identification of poor. In absence of such criteria, new HHs were mobilised/ brought under the Scheme merely on the recommendations of internal mobilisation teams (Cluster Coordinators, Community Mobilisers, Community Trainers etc.) from the blocks. As a result, it could not be determined whether 100 *per cent* of rural poor HHs were identified for coverage under the Scheme. It was also noticed that JKRLM had not collected Division-wise, District-wise and Block-wise data in respect of such vulnerable sections of society for inclusion under the Scheme.

In the Exit Conference, it was stated (April 2025) that DAY-NRLM Scheme for J&K has been de-linked from the poverty ratio in J&K. It was further stated that JKRLM has to federate 67 *per cen*t of the rural households or cover nine lakh rural households of J&K and the benchmark for coverage of rural households is the Census 2011. It was added that as on date, the Mission does not have any other authentic reference other than the Census 2011, on the basis of which targets are set and rural women from willing households are organised into Self-Help Groups (SHGs). Additionally, households identified under the Socio-Economic Caste Census (SECC) are given priority when federating rural households into SHGs.

The reply should be seen in view of the fact that even if the programme was delinked from the poverty ratio in the State/ UT, the JKRLM should have covered all the rural poor households within the 67 *per cent* of rural households as the basic aim of the programme is poverty alleviation. Further, the reply is silent regarding the criteria adopted for enrolling 67 *per cent* HHs and leaving out 33 *per cent* HHs.

[4] It is a process where community assesses the status of poverty and vulnerability indicators of the households.

4.6 Implementation of the Scheme

4.6.1 Coverage under NRLM (UMEED)

The Government of India (GoI) sanctioned the Scheme initially during 2013-14 to 2018-19 which was further extended for another five years (2019-20 to 2023-24). As per the guidelines, a phased implementation approach was to be followed for covering all 143 blocks by March 2019.

Audit noted that during the first five years of implementation i.e. until 2018-19, JKRLM could cover only 100 out of 143 blocks[5]. After the bifurcation (October 2019) of erstwhile State of J&K into UTs of J&K and Ladakh, the UT of J&K consisted of 125 blocks**.** Out of these 125 blocks, only 96 were covered as of March 2020. All the blocks were stated to be covered by 2025.

JKRLM in its first Annual Action Plan prepared for the period 2013-15 decided to cover two-thirds of the rural women population in J&K to achieve scheme objectives. The MoRD, GoI (February 2023) revised the target of covering 9,50,000 HHs (from previous target of 9,00,000 HHs) in J&K by 2023-24.

It was found that to meet the targets, instead of increasing coverage in areas with shortfalls, JKRLM decided (February 2023) to cover more beneficiaries in those blocks where the target of covering two-thirds of rural women had already been achieved or exceeded as of March 2023. The blocks[6] which were lagging behind were not prioritised. As a result, the uniformity in coverage of 67 *per cent* rural women in all the blocks could not be achieved as detailed in ***Appendix 4.1***.

In reply, it was stated (April 2025) that JKRLM will issue circular for equitable coverage of rural households in the blocks.

4.6.2 Achievement of targets

(I) Coverage of beneficiaries under the programme

The Capitalisation Support (loans) from the Mission is provided to SHGs in the shape of Revolving Fund (RF) and Community Investment Fund (CIF). This support is given as loans to SHG members to enhance their livelihoods. The repayments are re-invested by the community among members to further improve members' livelihoods.

Targets and Achievements Overview (2018-23):

Against the target of covering 9,00,000 rural HHs, forming 90,000 SHGs, the position of achievements during 2018-23 is given in **Table 4.1**.

[5] UT of J&K: 125, UT of Ladakh: 18

[6] Sundebani, R S Pura, Nowshera, Khour, Kathua, Kalroosa, Sogam, Ganderbal and Kangan

Table 4.1: Cumulative coverage of rural households at the end of years 2018-23

Sl. No.	Particulars	Achievement ending						
		March 2019	March 2020	March 2021	March 2022	March 2023	Target to be covered ending March 2023	Percentage of shortfall in achievement
1	Total HHs covered	3,45,535	3,97,923	4,22,183	5,34,256	6,95,488	9,00,000	23
2	No. of SHGs formed	38,013	43,831	47,589	61,397	80,649	90,000	10
3	No. of SHGs provided startup cost	24,795	25,598	25,688	26,972	31,912	80,649	60
4	No. of SHGs provided books of accounts	20,159	36,384	38,524	49,610	65,510	80,649	19
5	No. of SHGs provided capacity building training	20,159	39,274	42,371	53,278	66,999	80,649	17
6	Total no. of SHG members	3,43,714	3,92,366	4,23,096	5,22,634	6,66,184	No targets were fixed	Not Applicable
7	Individual SHG members bank accounts opened	2,21,845	2,91,838	3,04,935	4,26,004	5,51,543	6,66,184	17
8	No. of SHGs eligible for Revolving fund	28,404	36,624	40,632	51,332	64,920	No targets were fixed	Not Applicable
9	No. of SHGs availed RF	26,772	34,039	38,640	46,823	59,817	64,920	8
10	No. of SHGs eligible for CIF-I	22,976	27,978	34,382	41,836	50,561	No targets were fixed	Not Applicable
11	No. of SHGs availed CIF-I	21,107	21,273	27,366	36,169	47,266	50,561	7
12	No. of SHGs eligible for CIF-II	10,678	13,176	13,304	31,726	35,510	No targets were fixed	Not Applicable
13	No. of SHGs availed CIF-II	5,587	6,286	6,310	24,197	24,345	35,510	31
14	No. of defunct SHGs	1,414	2,112	2,476	3,636	3,862	No targets were fixed	Not Applicable

(Source: Information provided by AMDs Kashmir and Jammu)

It may be seen from **Table 4.1** that despite the Scheme being in implementation for over 12 years in J&K, there were significant shortfalls in Scheme coverage. One of the reasons for short coverage of 23 *per cent* households was due to completely leaving out 29 blocks from coverage under the Scheme till March 2020. Further, shortfall in receipt of funds against approved plan (**Paragraph 4.7)** and lack of adequate monitoring (**Paragraph 4.10)** also contributed to shortfall in achieving targets.

It was also noticed that despite the availability of funds with JKRLM during the years 2018-19 to 2022-23, as detailed in **Table 4.3**, the Mission failed to provide start-up cost to 60 *per cent* of total SHGs and RF, CIF to all eligible SHGs.

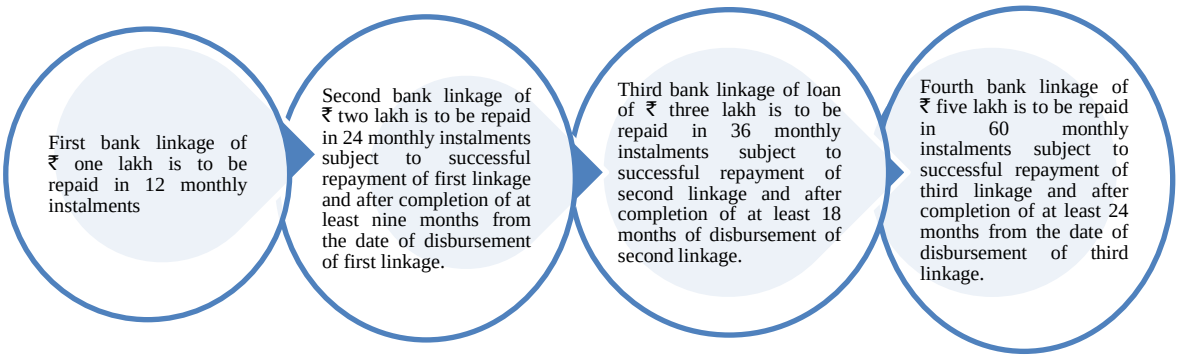
In the Exit Conference, it was stated (April 2025) that in view of curtailment of budget, the actual required funds under capitalisation could not be disbursed, as allotted funds have to be equitably allotted for other activities. It was added that the current status[7] of various parameters has changed.

(II) Bank-linkage of Self-Help Groups

As per Handbook on SHG-Bank Linkage notified (September 2017) by GoI, the Mission funds in the form of RF and CIF to the SHGs are intended to provide initial capitalisation support required by them. Further, Mission aim was to ensure that each SHG mobilises ₹ 10 lakh in repeat doses over a period of 5-8 years, as detailed in ***Appendix-4.2*** so that the members undertake sustainable livelihoods. The SHGs which have which have fulfilled criteria (1) to (7) were eligible for loan through first bank linkage. Those SHGs which have repaid the loan for first linkage and have completed nine months from disbursement of first linkage were eligible for loan under second linkage.

To ensure that SHGs receive hassle-free loans and repeat loans from banks with zero Non-Performing Assets (NPAs), the JKRLM issued circular (September 2019) prescribing the following as depicted in **Chart 4.2**:

Chart 4.2: Conditions for Bank-linkage



[7] SHGs formed till 31st March 2025: 93,716; Households Covered: 7,51,910; Revolving Fund disbursed to SHGs: 76,292: Community Investment Fund Disbursed to SHGs: 60,340.

As of March 2023, JKRLM had formed 80,649 SHGs and position of their bank linkage is given in **Table 4.2**.

Table 4.2: Position of bank linkage of Self-Help Groups as of March 2023

Sl. No.	Particulars	Achievement ending				
		March 2019	March 2020	March 2021	March 2022	March 2023
1.	No. of SHGs formed	38,013	43,831	47,589	61,397	80,649
2.	No. of SHG eligible for bank linkage I	13,447	19,092	27,330	35,859	44,251
3.	No. of SHGs disbursed bank linkage I	12,739	16,627	23,506	31,789	41,007
4.	No. of SHG eligible for bank linkage II	8,080	10,588	14,668	18,395	23,811
5.	No. of SHGs disbursed bank linkage II	7,664	9,728	11,858	17,008	22,440
6.	No. of SHG eligible for bank linkage III	3,437	4,725	5,923	7,835	10,532
7.	No. of SHGs disbursed bank linkage III	3,267	4,573	5,692	7,489	9,956
8.	No. of SHG eligible for bank linkage IV	305	971	1,604	2,535	3,813
9.	No. of SHGs disbursed bank linkage IV	270	937	1,563	2,430	3,673
10.	No. of SHG eligible for bank linkage V	0	1	33	217	565
11.	No. of SHGs disbursed bank linkage V	0	1	33	217	555

(Source: Information provided by AMDs Kashmir and Jammu)

It may be seen from **Table 4.2** that out of the 80,649 SHGs formed as of March 2023, only 44,251 SHGs (55 *per cent*) were eligible for bank-linkage I. This indicates inadequacy of JKRLM in awareness and capacity building among SHG members to avail bank credit and start meaningful livelihood. Further, out of 38,013 SHGs formed up to March 2019, only 555 SHGs (less than one *per cent*) could avail bank-linkage V as of March 2023 indicating non-achievement of the JKRLM in facilitating SHGs to avail more bank loans and enhance their livelihoods.

In the Exit Conference, it was stated (April 2025) that members of SHG cannot be forced to avail the higher doses since the banks have the autonomy to determine interest rate for loans exceeding ₹ five lakh with no prescribed rebates or concessional rates for SHGs. Therefore, SHGs are reluctant to avail the higher doses from the banks and they prefer to avail the loan from the funds available with Community Based Organisations (CBOs). Besides, the Mission has to keep in check the NPA which should be less than one *per cent*.

The reply should be viewed in context of the fact that JKRLM has to facilitate the SHG members to avail bank credit to start meaningful livelihood through capacity building and financial literacy programmes. Further, the Mission was to ensure that each SHG mobilises ₹ 10 lakh in repeat doses over a period of 5-8 years, so that the members undertake sustainable livelihoods. Besides, RBI in its latest circular (April 2025) emphasized that in order to facilitate women SHG members to become entrepreneurs, banks may consider extending loans up to ₹ 10 lakh to individual members of select matured well performing SHGs as per their lending policy.

4.6.3 Marketing support to Self-Help Group Members

(I) Remote location of District Rural *Haats* and low footfall

NRLM guidelines recognised that SHG members usually need the support from line Departments to enhance their livelihoods, market their products and to reduce their dependence on the intermediaries for greater benefits. To achieve the same, District Rural Haats/ DR *HaaTs* (DRHs) were encouraged to be created to directly link producer groups (SHGs) and individual producers with urban and peri-urban markets through a well-developed system of continuous identification and rotation of beneficiaries. The Hon'ble Lieutenant Governor of UT of J&K e-inaugurated the DR *Haats* on 29th of June 2022 from Srinagar.

During Joint Physical Verification (October 2023) of four (Jammu, Rajouri, Kupwara and Ganderbal) out of 22 DRHs created by JKRLM as of March 2023, it was observed that these were located in remote areas with very low footfall.

In the Exit Conference, it was stated (April 2025) that JKRLM is dependent on the District Administration for getting space/ vacant building etc., which can be converted in Rural Haats. It was added that the spaces allotted under DRH are at off-route place because of which there is low footfall of potential customers. It was further stated that an effort was made through the office of Commissioner Secretary, who instructed (October 2022) all the Deputy Commissioners to coordinate with major line Departments of their respective Districts to run the DRH effectively.

(II) Minimal enrolment of Self Help Groups on GeM portal

To provide SHGs/ small businesses with an opportunity to sell to Government buyers, GoI launched (May 2020) "Saras Gallery", an exclusive marketplace for SHG products in the Government e-Marketplace (GeM) portal. The SHGs were to register on GeM portal using a simplified process, allowing JKRLM to on-board sellers with minimum documentation.

The SHGs were given special exemptions from various compliances like GST and caution money while registering on GeM. JKRLM on-boarded 17 SHGs on the GeM portal. However, it was stated that the SHGs were unable to upload the products manufactured by them as Ministry of Commerce, GoI later made compliances to earlier exemptions mandatory. No further progress was made in this regard as of December 2024. As a result, the SHG members were not able to leverage the GeM portal to expand their market reach for their economic empowerment.

In reply, it was stated (April 2025) that Mission cannot force the SHGs for online sale where GST registration is mandatory.

The JKRLM should have taken up the matter with GoI to ensure certain exemptions to the SHGs so that they could increase their outreach to Government buyers.

4.6.4 Poor Performance in achievement of *Lakhpati* initiative

As per MoRD, GoI circular (October 2021), one of the key milestones in household livelihood development is when a woman reaches the aspirational goal of earning ₹ one lakh as annual income. In the same circular, the "Promotion of Sustainable Livelihood" of SHG members was advised so that they could become '*Lakhpati*' in a three-year period. Accordingly, JKRLM was advised to prepare three-year plan so that all the SHG members aspire to become '*Lakhpati*.'

Audit noted that JKRLM did not formulate any such plans as of March 2023. Consequently, out of the 3,43,714 SHG members enrolled under the Scheme by March 2019, only 46,881 members (14 *per cent*) could achieve an annual income of ₹ one lakh or more by March 2023.

In the Exit Conference, it was stated (April 2025) that the initial target of 2.33 lakh potential '*Lakhpati Didis'* was fixed for a period of two years and the process involved the identification of Potential *Lakhpati Didis* which have been completed. It was added that till date, 42,000 Potential *Lakhpati Didis* have been transformed into *Lakhpati Didi*.

4.6.5 Issues relating to financial inclusion of SHG members

As per Scheme guidelines, NRLM works towards achieving universal financial inclusion of all the poor HHs which are organised into SHGs. NRLM works on both demand and supply sides of financial inclusion. On the demand side, it promotes financial literacy among the poor and provides catalytic capital to the SHGs and their federations. On the supply side, NRLM coordinates with the financial sector to deliver credit and related services to SHGs. It also works towards universal coverage of rural poor against loss of life, health and assets.

Audit observed following issues relating to financial inclusion of SHG members:

- **State Annual Financial Inclusion Plan (SAFIP) and Perspective Plan (PP) for SHG-Bank Linkage not formulated:**

As per financial inclusion guidelines of NRLM, the primary role of SMMU is to facilitate, enhance, monitor and evaluate the SHG credit (bank loan) linkage in the State. For this purpose, it should prepare State Annual Financial Inclusion Plan (SAFIP) and Perspective Plan (PP) for SHG-Bank Linkage. However, as of January 2024, the JKRLM had not formulated any SAFIP and PP for bank linkage of the SHGs. As a result, there were inadequacies in bank linkages as discussed in **Paragraph 4.6.2.**

In reply, it was stated (April 2025) that the SAFIP, also referred as Annual Action Plan, is drafted for each financial year and submitted to National Mission Management Unit for review. Following review, detailed discussions are being conducted with MoRD, GoI to finalise the plan. Subsequently, MoRD assigns the final target for the financial year.

The reply is to be viewed in context of the fact that SAFIP and AAP are separate plans as SAFIP is exclusively related to SHG-Bank linkage for financial inclusion under the Scheme and AAP is the complete Action Plan of the Scheme. Further, as per Scheme

guidelines, a separate SAFIP and PP for SHG-Bank linkage is required to be formulated for smooth facilitation of credit to SHG members.

➢ **DAY-NLRM Cells not constituted:**

As per Master circular issued (July 2017) by RBI, Banks may set up DAY-NRLM cells at Regional and Zonal offices. These cells should periodically monitor and review the flow of credit to the SHGs, ensure the implementation of the guidelines of the Scheme, collect data from the branches and make available consolidated data to the Head office and the DAY-NRLM units at the Districts and Blocks.

Audit, however, noted that no such cells had been constituted in J&K as of January 2024. Without dedicated DAY-NRLM cells, the monitoring and review of credit flow to SHGs were ineffective as discussed in **Paragraph 4.6.2**.

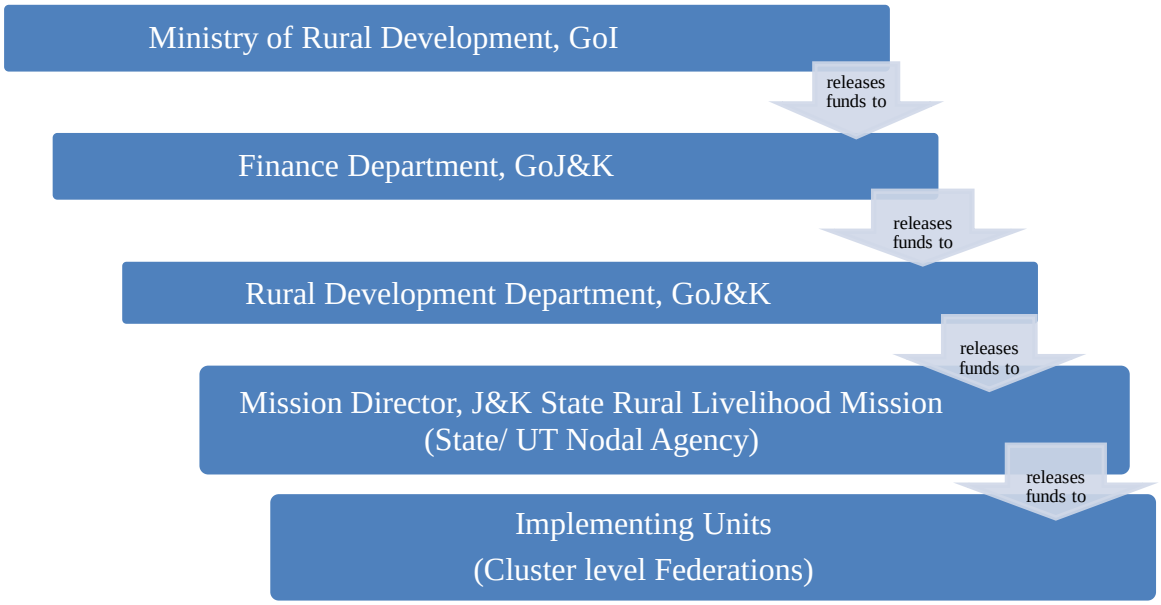
In the Exit Conference, it was accepted (April 2025) that there are no exclusive dedicated DAY-NRLM Cells set up by the banks at Block or District level. However, the progress at Block level is being discussed at Block Level Bankers Committee (BLBC) meetings and at District level the progress is being discussed at District Level Review Committee (DLRC) meetings.

The above deficiencies indicate that comprehensive financial inclusion of SHGs could not be achieved thereby limiting the success of the Scheme.

4.7 Financial Management

The funds for implementation of NRLM are transferred by MoRD, GoI to the Finance Department of Government of J&K (GoJ&K). The Finance Department then transfers these funds to J&KRDD for onward transfer to the Mission Director, JKRLM which has been designated (November 2021) as UT Nodal Agency. The fund flow mechanism for implementation of NRLM is depicted in the **Chart 4.3**:

Chart 4.3: Fund flow mechanism for implementation of NRLM



The details of funds received and utilised during 2018-19 to 2022-23 by JKRLM are given in **Table 4.3**.

Table 4.3: Funds received and utilised by JKRLM during 2018-23

(₹in crore)

Year	Opening Balance	Funds Received		Other Receipts	Total Availability	Expenditure (*per cent*)	Amount refunded to MoRD, GoI	Amount pertaining to UT of Ladakh	Balance
		Central Share	State Share						
	(A)	(B)	(C)	(D)	(E)=[A+B+C+D]	(F)	(G)	(H)	(I) = [E-F-G-H]
2018-19	20.43	58.55	6.66	0.64	86.28	79.10 (92)	-	-	7.18
2019-20	7.18	22.99	4.46	0.27	34.90	32.76 (94)	-	-	2.14
2020-21	2.14	67.61	4.68	0.31	74.74	67.57 (90)	-	-	7.17
2021-22	7.17	121.00	16.86	0.64	145.67	136.95 (94)	0.28	0.13	8.31
2022-23	8.31	126.76	14.08	0.58	149.73	140.80 (94)	0.73	-	8.20
Total		**396.91**	**46.74**	**2.44**	**--**	**457.18**	**1.01**	**0.13**	**--**

(Source: information furnished by JKRLM)

It can be seen from **Table 4.3** that out of total available funds of ₹ 466.52 crore during 2018-19 to 2022-23, JKRLM utilised ₹ 457.18 crore. The expenditure of funds was significant and ranged between 90 to 94 *per cent* during 2018-19 to 2022-23.

The funds received by GoJ&K against approved plan during 2018-19 to 2022-23 are detailed in **Table 4.4**.

Table 4.4: Funds received by JKRLM against approved plan

(₹in crore)

Year	Approved Plan		Funds Received		Shortfall		Percentage Shortfall	
	CS	SS	CS	SS	CS	SS	CS	SS
2018-19	128.73	14.30	58.55	6.66	70.18	7.64	55	53
2019-20	35.39	3.93	22.99	4.46	12.40	-0.53	35	-
2020-21	115.27	12.81	67.61	4.68	47.66	8.13	41	63

(Source: information furnished by JKRLM) CS – Central Share, SS – State Share

It may be seen from the **Table 4.4** that there was a shortfall in receipt of Central Share (CS) of funds ranging from 18 *per cent* to 55 *per cent* of the approved plan during 2018-19 to 2022-23. As regards the State/ UT Share (SS), the shortfall in three out of five years covered in audit ranged between 30 *per cent* to 63 *per cent* of the approved plan. In the remaining two years, there was no shortfall.

In the Exit Conference, the Department attributed (April 2025) the shortfall in receipt of funds to procedural delays in release of matching State/ UT share by the GoJ&K, due to which the subsequent Central Share was not released. It was added that in some

instances, though third or fourth instalments were disbursed by GoI in the same financial year but they were released by UT Government in next financial year.

The following observations were further noted regarding financial management:

(A) After termination of *Swarnjayanti Gram Swarozgar Yojana* (SGSY) in December 2013, the unspent balances under SGSY were to be transferred from District Rural Development Agencies (DRDAs) to SRLM bank accounts. An order was issued (February 2014) by GoJ&K to all the DRDAs for transfer and deposition of unspent balance under SGSY in the official account of MD, JKRLM.

Audit examination of records of MD, JKRLM disclosed the following deficiencies:

- During the years 2013-14 to 2014-15, ₹ 12.93 crore of unspent SGSY funds were transferred to the account of MD, JKRLM.
- However, it was observed that the Department had neither conducted reconciliation regarding unspent SGSY funds lying with all the DRDAs of the State/ UT nor received latest audit reports of the SGSY Scheme implemented by the DRDAs to ascertain the actual quantum of balance funds available with them. As a result, SGSY closure report was not submitted to MoRD, GoI as of January 2024.
- It was also noted that an amount of ₹ 47.98 lakh of SGSY funds were transferred in January 2022 by one of the DRDAs, which was indicative of the fact that unspent funds were still lying with DRDAs.
- Further, DRDAs were discontinued and closed in April 2022, as such the amount lying with the DRDAs can neither be evacuated nor reconciled.

In reply, MD JKRLM stated (July 2023) that the matter was taken up with the J&KRDD/ DRDAs for transfer of unutilised funds of SGSY but due to closure of DRDAs in April 2022, the reconciliation could not be done. In the Exit Conference, it was stated (April 2025) that the matter has already been taken up with the Administrative Department.

The fact remained that due to inaction of the Department from December 2013 to April 2022 to reconcile and deposit SGSY funds into JKRLM bank account, the amount lying with the DRDAs can neither be evacuated nor reconciled.

(B) Records of Block Basohli revealed that in one of the clusters (Cluster F[8]), 93 members of SHGs and Village Organizations (VOs) deposited ₹ 0.23 crore of loan repayments in cash through a Banking Correspondence Agent in J&K Grameen Bank, Bhoond. The said agent recorded the entries in the pass books of the members but did not deposit the loan amount in the Bank, resulting in embezzlement of ₹ 0.23 crore. Consequently, this amount was shown outstanding by the Bank against the loan

[8] A, B, C, D, E, F etc. are the names of the clusters assigned by JKRLM

accounts of members and the bank demanded to pay the loan amount again till the matter was resolved. A First Information Report in this case was lodged (January 2021) and charge-sheet was filed in July 2023. Pending a final decision in this regard, the SHG members continue to suffer as of January 2024.

(C) In accordance with the decision of the Empowered Committee, GoI, to strengthen the Community Based Organisations (CBOs), the JKRLM directed (July 2019) the CBOs to charge a service fee at the rate of 0.25 *per cent* while making disbursement of bank loans to the members of SHGs. The service fee was to be deducted at source and remitted to the CBO's account immediately.

Records of 20 test-checked Blocks revealed that instead of deducting the service charges at source, they were collected in cash from the SHG members. It was also observed that the service charges were not properly accounted for, making it impossible to ascertain whether the due amounts were received and deposited in the banks. For instance, in Cluster A of block Ghagwal, against due bank linkage service charges of ₹ 73,200 collected during 2022-23, only ₹ 41,000 were remitted to the bank. Similarly, in Cluster-E of block Kalakote, against the due amount of ₹ 40,000 collected during 2021-22 and 2022-23, only ₹ 12,250 was deposited into the bank account of the cluster.

In the Exit Conference, it was stated (April 2025) that all BMMUs will be instructed to work out the service charges collected and deposit in the banks. It was added that in future the matter will be taken up with the banks to collect the service charges at source and transfer them into the accounts of CLF[9]s.

(D) One of the objectives of the Scheme is to facilitate hassle free loans and repeat loans to SHGs from the banks with zero Non-Performing Assets (NPAs). Audit, however, noted that 640 accounts of SHG members with outstanding amount of ₹ 5.31 crore had turned into NPAs as of March 2023.

In reply, it was stated (April 2025) that the NPA figure is subject to fluctuations, and all necessary measures are being taken to maintain it below the mandated two *per cent* threshold set by banks and MoRD, GoI. It was added that the proactive involvement of Community Based Repayment Mechanism (CBRM) committees has contributed significantly to reducing the NPA percentage and as of January 31, 2025, the NPA stands at an impressive 0.77 *per cent*. It was further stated that JKRLM ranks among the top States/ UTs in India with the lowest NPA percentage and continuous support is being extended to banks to achieve the goal of zero NPA.

The reply should be seen in light of the fact that low percentage of NPAs is primarily attributable to unauthorised deduction of Capitalization funds (Revolving Fund/ Community Investment Fund) by banks towards repayment of instalments in NPA accounts as discussed in the subsequent paragraph.

[9] Cluster Level Federation

(E) In 15 (out of 20) test-checked blocks[10], Capitalisation funds (RF/ CIF)[11] amounting to ₹ 0.78 crore were debited from 114 bank accounts of CLFs/ Village Organisations (VOs) by the bank authorities without obtaining their consent, for liquidation of bank credits of NPAs of SHG members during 2018-19 to 2022-23. It was observed that JKRLM did not take up the matter with the bank authorities regarding the unauthorised debit of Capitalisation funds (RF/ CIF) amounting to ₹ 0.78 crore as of March 2024.

In reply, the JKRLM stated (April 2025) that the matter has been discussed during the Steering Sub-Committee meeting of JK UT Level Bankers Committee (JKUTLBC) on SHGs held on 3 August 2024 wherein instructions were issued to all banks to desist from practice of deducting money the capitalisation funds from CBO accounts.

(F) In five[12] out of 20 test-checked blocks, 94 VOs having 873 SHGs had closed their activities after receipt of Start-Up Cost, RF and CIF amounting to ₹ 4.67 crore as of March 2023. Besides, 48 SHGs of 14 VOs of three[13] test-checked blocks were also found to have closed their activities after receipt of RF and CIF amounting to ₹ 0.08 crore.

In reply, JKRLM stated (March 2024) that RF and CIF were released to SHGs after fulfilling all eligibility criteria but due to various issues, the SHGs could not pay the RF and CIF and became non-functional. It was further stated that attempts are being made out to revive the defunct SHGs/ VOs. The Mission Director, JKRLM stated (February 2025) that if CBO remains inactive or fails to serve its intended purpose, the concerned Block Programme Manager can take corrective action such as reorganising the group, providing additional capacity building support or dissolving the CBO, if necessary. It was added that CLFs play a key role in managing funds related to CBOs and if there are inactive CBOs that are not utilising or managing the allocated funds properly, the CLFs have the authority and mandate to retrieve the funds.

The reply did not mention the exact reasons for the SHGs and VOs becoming non-functional. Further, adequate corrective measures to revive the defunct CBOs were not found to be taken by JKRLM as of February 2025.

4.7.1 Preparation of budget without following bottom-up approach

According to Paragraph 5.3.1 of the JKRLM Financial Manual, the Block Mission Management Units (BMMUs) and District Mission Management Units (DMMUs) were required to prepare the Annual budget by 1st of December and 1st of January every previous financial year respectively. Additionally, the DMMUs/ State Mission

[10] Drugmulla, Kalaroose, Sogam, Dooru, Qazigund, Ganderbal, Kangan, Lar, Khansahib, Marh, Kalakot, Barnoti, Basohli, Ghagwal and Khour.

[11] Revolving Fund (RF): ₹ 15,000; Community Investment Fund (CIF): ₹ 65,000

[12] Lar, Khansahib, Kupwara, Dooru and Qazigund.

[13] Sogam, Kalaroose and Kangan.

Management Unit (SMMU) were required to consolidate the annual budget at District level by 31st of January every previous year.

Audit noted that bottom-up approach was not adopted in preparation of the budget during 2018-9 to 2022-23. The budgets were prepared by SMMU without considering the requirements at Block and District levels and were finalised without obtaining budget requirements from all the DMMUs. Instead, an indicative figure of budget was being communicated by GoI, based on which the Annual Action Plan (AAP) of the Scheme was finalised. Thus, the AAPs were formulated without taking into consideration the grassroot level requirements because of which exclusion of priority areas and genuine beneficiaries at grassroot level cannot be ruled out defeating the programme's objective of poverty alleviation through community participation.

In reply, MD JKRLM stated (January 2024) that decentralisation was attempted by preparation of budget at the Division level but it caused exceptional delays. As such, preparation of budget at the State Mission Management Unit level was continued.

In the Exit Conference, it was stated (April 2025) that the programme is being implemented uniformly across all blocks, with no specific grassroots level requirements mandated under the general DAY-NRLM framework. However, inputs received from the blocks are duly incorporated into the Annual Action Plans.

The reply should be viewed in light of the fact that no inputs/ Action Plan from BMMU/ DMMUs were found in records.

4.7.2 Non-registration of community-based organisations

As per the NRLM's Scheme guidelines, SHGs are to be federated in Community Based Organisations (CBOs) like Village Organizations (VOs) and Cluster Level Federations (CLFs). These CBOs receive funds from JKRLM and they further distribute them to the SHGs. As per NRLM guidelines, the CBOs are required to be registered under Cooperative Societies Act to transform the existing non-formal institutions into registered societies with established norms and bye-laws, thereby acquiring legal status. Also, as per Capitalisation Management Guidelines framed by JKRLM, funds cannot be released to CBOs unless they have established bye-laws and norms.

Audit examination disclosed that as of January 2024, none of the 509 CLFs and CBOs were registered under Cooperative Societies Act even after lapse of 13 years since launch of the Scheme. Despite their non-registration under Cooperative Societies Act, funds continue to be released by JKRLM to CLFs/ CBOs for implementation of Scheme, in violation of Capitalisation Management Guidelines of JKRLM.

It was also noticed that the Mission Director, JKRLM had taken up the matter with Cooperative Department, J&K in August 2022, for simplification and relaxation of legal compliances for registration of CBOs. However, no follow-up action was taken as of January 2024.

In reply, MD, JKRLM stated (February 2025) that efforts are being made to ensure the registration of CLFs under Cooperative Act 1989.

4.7.3 Finalisation of Annual Action Plans without approval of Executive Council

As per Paragraph 6 of Chapter 5 of JKRLM Financial Manual, AAPs prepared by the Mission were to be approved by Executive Council headed by Chief Secretary of State/ UT.

Audit, however, observed that no Executive Council[14] (EC) meeting was held after September 2020. As such, AAPs from 2021-2023 were finalised without the approval of EC.

In the Exit Conference (April 2025), JKRLM accepted the audit observation.

4.8 Procurement of materials

(A) Procurement of Books:

As per UMEED's Financial & Procurement Manual adopted by JKRLM in March 2014, there shall be a State Procurement Committee[15] for smooth financial procurement. The State Level Procurement Committee (SLPC) is responsible for examining the procurement plans at Block, District and State levels.

Audit examination of procurement records during 2021-22 to 2022-23 revealed that the SLPC had not been constituted as of October 2023. In absence of the SLPC, the purchase (printing and supply) of identical books of accounts during 2021-22 to 2022-23, were made separately through GeM portal by AMDs, JKRLM Jammu and Kashmir at different rates. This resulted in AMD, JKRLM Jammu paying ₹ 1.24 crore more than AMD, JKRLM Kashmir for procuring the same set of books of accounts.

After being pointed out by Audit in July 2023, the SLPC was constituted in November 2023. In reply, it was stated (April 2025) that the Additional Mission Directors did the procurement in the absence of constitution of the SLPC. However, with the formation of SLPC the issue of rate variation etc., stands resolved.

4.9 Human Resource management

The position of staff posted in different offices of the JKRLM as of March 2023 and post fresh recruitments in December 2023 by the Mission is given in ***Appendix 4.3.***

- **Shortage of staff**: Audit noticed that despite fresh recruitments made in 2023-24, there was a shortage of staff across all levels ranging from 02 *per cent* to

[14] Chief Secretary is the chairman of EC and there are 13 members including Administrative secretaries of various Departments.

[15] State Mission Director, JKRLM as Chairman, State Project Manager (Financial Management and Procurement), JKRLM as Member Secretary, Additional Mission Director, JKRLM and Concerned Sector Specialist or any expert from the outside organisation as approved by the Chairman.

100 *per cent*. This shortage was particularly acute in the DMMUs and BMMUs, which are primarily responsible for programme implementation and are required to have adequate staff in-position. Specifically, in DMMUs and BMMUs, 41 posts of District Programme Managers[16] and 97 posts of Coordinators respectively were lying vacant as of December 2023. The shortage of critical staff at grassroots level was also commented upon by the Empowered Committee during its meeting to finalise AAP 2020-21.

- **Lack of Grievance Redressal Mechanism:** As per the Scheme guidelines, a 3 to 5 member committee at SMMU, DMMU and BMMU levels for redressal of grievances of staff, had not been constituted (December 2024). This has also been emphasised in the Empowered committee meetings held for finalisation of AAP.
- **Absence of Insurance Cover:** No insurance cover for life, accident and health risks was provided to the staff of JKRLM contrary to Scheme guidelines.

In reply, the MD, JKRLM stated (January 2024) that audit observations have been noted and would be duly addressed.

4.10 Monitoring

The following observations regarding monitoring of programme implementation were noted:

- As per the JKRLM bye-laws, the General Body (GB) was required to meet at least once every year and Executive Council (EC) meetings were to be held at least once every quarter. Audit observed that only one General Body meeting was held in December 2016 and only seven Executive council meetings (latest in September 2020) were held since start (2011-12) of the programme in J&K as of January 2024 resulting in shortfall of 08 GB meetings and 29 EC meetings.
- The post of State Project Manager (Monitoring) had not been filled as of January 2024. Consequently, there was no dedicated setup for monitoring of the programme.
- There was no system in place to facilitate social audits as part of self-monitoring systems.

4.11 Conclusion

The audit of the JKRLM programme revealed several key issues affecting its effective implementation. While there was progress in forming Self-Help Groups (SHGs) and covering households (HHs), the overall coverage remained below the targets set by the Scheme. This limited the reach and impact of the programme in empowering rural communities. There was no well-defined approach in identification of beneficiaries.

Despite the Scheme being in implementation for over 12 years in J&K, there were significant shortfalls in Scheme coverage. One of the reasons for short coverage of

[16] District Programme Managers (Institute Building and Capacity Building): 10 posts; District Programme Managers (Financial Inclusion): 14 posts; District Programme Managers (Livelihood):17 posts

23 *per cent* households was due to completely leaving out 29 blocks from coverage under the Scheme till March 2020. Further, shortfall in receipt of funds against approved plan and lack of adequate monitoring also contributed to shortfall in achieving targets.

Despite significant funds being received and largely utilised, there were persistent shortfalls in the release of both Central and State shares against approved plans, mainly due to procedural delays. Financial management showed gaps, including unreconciled unspent funds, irregularities in loan repayments, and unauthorised deductions from community funds. Out of 80,649 SHGs, 74 *per cent* availed RF, 59 *per cent* availed CIF-I and 30 *per cent* availed CIF-II. Similarly, only 51 *per cent* availed bank linkage- I, 28 *per cent* bank linkage II, 12 *per cent* bank linkage III, 4 *per cent* bank linkage IV and 0.69 *per cent* bank linkage V respectively.

The budgeting process lacked a bottom-up approach, resulting in plans that did not reflect grassroot needs. Important governance processes, such as registration of community organisations and approval of Annual Action Plans by the Executive Council, were not properly followed. Procurement procedures were weakened by the absence of a State Level Procurement Committee for an extended period, causing unnecessary extra expenditure.

Human resource management was marked by critical staff shortages, absence of grievance redressal mechanisms, and lack of insurance coverage for staff. Monitoring mechanisms were weak due to infrequent meetings and vacant key monitoring positions, leading to insufficient oversight.

4.12 *Recommendations*

In light of the audit findings, GoJ&K should:

- ***Establish well defined criteria for identification of poor rural households and selection of beneficiaries under the Scheme;***
- ***Adopt bottom-up approach in preparation of Budget to better reflect grassroot level requirements in implementation of the Scheme;***
- ***Ensure funds as per approved plans are released in time and are utilised for the implementation of Scheme during each year;***
- ***Increase coverage of beneficiaries in the Blocks that were left out in the initial five year of implementation of Scheme;***
- ***Strengthen and revamp the District Rural Haats to enhance their accessibility and utility for general public;***
- ***Conduct awareness programmes among rural poor for availing the benefits of the Scheme along with capacity building initiatives for SHG members to maximise access to available credit facilities under the Scheme; and***
- ***Strengthen the implementation of the Scheme through efficient monitoring.***

CHAPTER-V

TRANSPORT DEPARTMENT

CHAPTER-V

TRANSPORT DEPARTMENT

5 Jammu and Kashmir Transport Subsidy Scheme

The Government of Jammu and Kashmir (GoJ&K) launched (19 November 2019) the "Transport Subsidy Scheme" pursuant to the orders of High Court of Jammu and Kashmir (J&K) dated 18 May 2006 and National Green Tribunal (NGT), New Delhi, dated 08 October 2018, regarding control of air pollution, improvement of ambient air quality in non-attainment cities as well as measures to control vehicular emissions.

The Scheme aimed to replace old buses, matadors and mini-buses aged between 15 and 20 years in J&K. The Scheme guidelines *inter-alia* stipulated that all public service vehicles (passenger), operated by private transporters, above 15-year-old would be eligible for availing subsidy of ₹ five lakh per vehicle in case of replacement, subject to fulfilment of certain terms and conditions. The Scheme was re-notified on 05 December 2022 with some additional conditions including the requirement of non-transfer of newly purchased (subsidised) vehicles under the Scheme for five years.

The objective of the Scheme is thus, to provide impetus to the public transport by providing subsidy to the transporters for adopting new eco-friendly and fuel-efficient buses compliant to BS-IV and above norms. The Scheme also aims to ensure optimum usage of available road space by transporting maximum number of people per unit of road space which would obviate the problem of congestion, traffic jams and pollution.

To assess the effectiveness of "J&K Transport Subsidy Scheme", records of all the 22 offices of the Transport Department of GoJ&K were checked in audit. Transport subsidy cases/ applications were reviewed in Regional Transport Office (RTO), Jammu and RTO Kathua offices, as these were the only two offices in Jammu Division designated to receive such cases. RTO Srinagar was designated to receive the cases pertaining to Kashmir Division. However, no vehicle owner from Kashmir Division applied for Transport Subsidy Scheme as of February 2025.

Audit findings

5.1 Limited outreach of Scheme

The Department published advertisement notices on 23 November 2019 and 29 June 2022, inviting eligible vehicle owners to avail the benefit of the Scheme.

Audit examination revealed that despite the poor response (0.56 *per cent*) from bus owners, the Department did not expand the scope of the Scheme to include mini-buses and matadors, missing an opportunity to enhance participation. The reasons for excluding mini-buses and matadors were neither on record nor provided to audit despite persistent requests.

While accepting the audit observation, the Department stated (December 2023) that the progress of the Scheme was not up to the mark owing to the fact that the transporters having such buses are not interested to purchase fresh buses in view of huge financial implications involved in the purchase of new buses. However, Department did not furnish any specific reply regarding its failure to expand the scope of the Scheme to mini-buses and matadors.

5.2 Not complying with the terms and conditions of the Scheme

The Technical Committee (Sub-committee), while approving the application of beneficiary, had to ensure that the following conditions, among others, were fulfilled: (a) An affidavit duly attested by the First-Class Magistrate to the effect that he has scrapped/ sold the vehicle to the scrapper, (b) The vehicle operators availing the benefits of the Scheme must ply these vehicles on identified route for five years and the concerned RTO has to file a six-monthly compliance report regarding plying of vehicles on identified routes for five years and (c) The concerned RTO/ ARTO has certified that Registration of Certificate of the vehicle has been cancelled on the recommendation of the Board of Inspection (BOI) and receipt from the registered scrap dealer about payment made by him to the owner of the vehicle. BOI shall certify that the chassis number of the proposed scrapped vehicles has been cut in their presence and will be retained in RTO/ ARTO office. Subsequently, the concerned RTO/ ARTO shall issue the condemnation certificate regarding the vehicle to be replaced along-with the Letter of Authority in favour of eligible applicant/s for availing the benefit under the Scheme.

Audit examination of records of RTO Jammu disclosed the following:

- ***Improper attestation of Affidavits:***
  In respect of all the 45 beneficiaries, the affidavits placed in the beneficiaries' files were got attested by the notaries instead of a First-Class Magistrate, in disregard of condition stipulated by the Sub-Committee prior to recommending the cases for approval.
- ***Absence of Compliance Reports:***
  The RTO Jammu had scrapped/ replaced 45 vehicles and released subsidies of ₹ 2.25 crore as of March 2023. However, no six-monthly compliance report regarding plying of vehicles on identified routes for five years was prepared by RTO Jammu.
- ***Absence of Board of Inspection Certificate:***
  Board of Inspection (BoI) is to ensure that the chassis number of the proposed scrapped vehicles is destroyed (cut into pieces) in their presence. Only after completing this process is the vehicle considered scrapped, to ensure that these vehicles do not ply on road.
  However, in case of seven vehicles, the certificate/ inspection report of BoI was not available in the respective files. Despite this, payments of transport subsidy of ₹ 35.00 lakh (₹ five lakh each) were released in favour of these vehicle owners.

- ***Irregular purchase in the name of person other than the beneficiary:*** Three beneficiaries had irregularly purchased the new vehicles in the name of person other than the designated beneficiary, as detailed in **Table 5.1**.

Table 5.1: Details of irregular purchase of new vehicles in the name of the person other than the designated beneficiary

Sl. No	Name of the beneficiary	Old registration number of the vehicle	New registration number	Purchased in the name of
01	P***i Gupta W/O P****p Gupta	JK02R-8943	JK02CV-4995	M/s P*****p Transport Company
02	V***y K***r S/o D**a N**h	JK02K-3157	JK02CN-8477	P***n K****r S/o A**r S***h K***a
03	J****h C*****r V**d S/o C***i L*l V**d	JK02U-1141	JK02CN-7849	H****l S/o B**i R*m R.S Pura

The Department should take steps to monitor and address cases of non-compliance.

5.3 Crediting of subsidy amount of ₹ 40.00 lakh to the saving accounts of the beneficiaries instead of loan accounts

As per the terms and conditions of the Transport Subsidy Scheme order, the applicant after approval of the case under the Scheme shall be allowed a three months' time to purchase the new vehicle after entering into loan agreement with the concerned bank. The subsidy component shall be transferred to the bank on capital investment for subsequent payment to Original Equipment Manufacturers (OEM).

Audit observed that in respect of eight out of 45 beneficiaries, the subsidy amount of ₹ five lakh each was credited to their savings bank accounts instead of their loan accounts. This was in contravention of the Scheme guidelines and entailed the risk of mis-utilisation of funds to that extent.

In reply, RTO Jammu stated (May 2024) that verifying this information from the bank branches would have taken a long time, potentially leading to surrender of funds. It was further stated that there was significant pressure from transporters for the immediate release of the subsidy. Due to these constraints, the department was unable to ensure that all beneficiaries' accounts were loan accounts, as required by the subsidy Scheme guidelines.

However, the fact remains that the Department did not exercise due diligence before releasing the subsidy amounts.

5.4 Monitoring

(A) A Policy Review Committee[1] comprising the following members was to periodically review the working of the Scheme and direct the corrective steps wherever necessary.

Audit noted the following shortcomings:

- Neither any specific date was prescribed in the Scheme guidelines for constitution of the Policy Review Committee, nor had the Committee been constituted as of March 2023. As a result, the implementation of the Scheme was never monitored and mid-course corrections for deficiencies, as discussed in **previous Paragraphs** could not be recommended.
- Further, the Scheme guidelines did not specify the frequency of committee meetings, preventing periodic reviews of the Scheme.

(B) The **Technical Committee**[2] was responsible for identifying and finalising beneficiaries for the subsidy scheme. The Technical committee was also to ensure that existing 15 plus years public service vehicles (passengers) are not used and allowed plying in the UT of J&K and are scrapped by the transporter as per the provisions of Motor Vehicles Act, 1988 and Central Motor Vehicles Rules, 1989 within stipulated time.

Audit noted the following:

- Although four[3] Technical committee meetings were held from launch of the Scheme on 19 November 2019 to March 2023, the frequency for convening these meetings was not prescribed in the Scheme guidelines.
- The Technical Committee could not pro-actively enforce the phasing out of vehicles older than 15 years despite:
    - State Pollution Control Board recommendations (January 2019).
    - Department's own proposal (March 2019) to ban vehicles older than 15 years in J&K, formulated in compliance with NGT's directives.
    - Instead, the Department issued a contradictory order (February 2022) allowing registration of 15 to 20 years old vehicles, further undermining the Scheme's objectives.
- The Department relied solely on applicants to voluntarily avail the Scheme's benefits.

---

1 Comprising the Principal Secretary (Administrative Secretary) of the Transport Department, GoJ&K, as Chairman, the Transport Commissioner, J&K, as a Member and the Regional Transport Officers of Jammu and Kashmir as Member Secretaries for their respective divisions.

2 Comprising the Transport Commissioner, J&K, as Chairman, the Director of Motor Garages, J&K, the General Manager Mechanical, Jammu/ Srinagar/ JKSRTC and All Regional Transport Officers as Members, the RTO of the concerned division as Member Secretary and an Automobile Engineer as a Co-opted Member.

3 18 January 2020, 09 December 2021, 24 January 2023 and 13 February 2023.

5.5 Conclusion

The Transport Department could not efficiently implement the Scheme and ensure phasing out of old vehicles. Irregularities like purchase of new vehicles in different owner's name, not preparing Compliance Reports, and crediting of subsidy to beneficiaries' savings account instead of loan account were also observed.

Appendix-3.1

(Reference Paragraph No. 3.1.6.1)

Delay in commissioning of projects due to delay in procurement, non-installation, land dispute at site, disregard of tender rules etc

- In contravention of the conditions stipulated by J&K Environment Impact Assessment Authority, Ministry of Environment, Forest and Climate Change while granting environmental clearance for mining lease, 71 works at an estimated cost of ₹ 3.84 crore were executed in non-mining areas (beyond 2 kms of radial distance from the mining site). An expenditure of ₹ 3.33 crore was incurred for execution of these projects ending March 2023. As a result, the actual mining affected people were deprived of project benefits to the extent of ₹ 3.33 crore.

  In reply, the DMOs stated (June 2023 to April 2024) that these Schemes were taken up and the funds were utilised as per approval of the Chairman of the Trust.

  The fact remained that these 71 works amounting to ₹ 3.33 crore were executed in non-mining areas defeating the objective of Scheme.

- In Pulwama District, two works were sanctioned (2019-20) for individual families to set up florist shops and a Lavender Growers Society on which an expenditure of ₹ 4.50 lakh was incurred. These projects were of an individual nature and were executed for the benefit of non-mining affected people in violation of Scheme guidelines.

  In reply, the DMOs stated (December 2023) that these Schemes were taken up and the funds were utilised as per approval of the Chairman of the Trust.

- In Anantnag district, ₹ nine lakh was incurred (September 2021) on training provided to the trainees for Kani-shawl weaving and after training, a cooperative society was to be formed by the trainees.

  However, as of August 2023, no cooperative society had been formed by the trainees resulting in non-achievement of intended objective despite incurring expenditure of ₹ nine lakh.

  In reply, the DMO stated (December 2023) that the Scheme was taken up and funds utilised as per approval of the Chairman of DMFT, but due to shortage of staff, Scheme could not be monitored.

  The fact remained that despite incurring expenditure of ₹ nine lakh, the Cooperative society could not be formed as of December 2023.

- Five works were sanctioned (2018-22) at an estimated cost of ₹ 85.12 lakh in five[1] out of eight selected Districts for providing drinking water, erection of electric poles and allied infrastructure, bottle crusher machine and freezers etc.

[1] Anantnag, Jammu, Kathua, Poonch and Pulwama

However, an amount of only ₹ 26.62 lakh was utilised on these components. These Schemes could not provide the intended benefits to the population/ areas due to non-commissioning of Schemes, excess purchase of material, non-laying of rising main pipeline under the Scheme and non-installation of bottle crusher machines and freezers. As a result, expenditure of ₹ 26.62 lakh was rendered unfruitful.

In reply, DMO Kathua stated (April 2024) that the matter would be taken up with the concerned executing agency for laying of rising main in the bore wells and audit will be intimated accordingly. The DMO Anantnag stated (December 2023) that the Schemes were taken up and funds were utilised as per approval of the Chairman of DMFT, but due to shortage of staff, Scheme could not be monitored. The DMO Pulwama stated (December 2023) that the matter would be taken up with the concerned Department and action as warranted under rules would be taken.

- An amount of ₹ 1.23 lakh was incurred on providing Petrol Oil and Lubricants (POL), flexi banners and constructing paths in two selected Districts (Reasi and Poonch). These components were not included in the approved estimates, resulting in irregular expenditure of ₹ 1.23 lakh.

- Two projects were sanctioned (2019-22) in two Districts (Jammu and Reasi) at an estimated cost of ₹ 12.68 lakh for which an amount of ₹ 8.90 lakh was released by the DMFTs. However, the projects could not be taken up due to non-transfer of funds to the implementing agencies by the DMOs.

  DMO Reasi did not provide a reply to the audit observation. However, DMO Jammu stated (January 2024) that the concerned executing agency had been instructed to execute the pending work.

- One project on construction of Foot Bridge in Reasi District was sanctioned (2020-21) at an estimated cost of ₹ five lakh for which an amount of ₹ five lakh was released in July 2021. However, the work could not be commenced as of March 2023 due to a land dispute at site and the amount of ₹ five lakh was surrendered in September 2022.

- An amount of ₹ nine lakh was approved (2019-20) for repair and renovation of Nari Niketan building in Poonch. The Chairman DMFT Poonch released (February 2020) a payment of ₹ 6 lakh out of which ₹ 0.85 lakh was utilised for purchase of material. The executing agency (BDO Poonch) carried out this work Departmentally without following tendering procedure. Further, no muster rolls were maintained by the implementing agency for labour payment. In absence of muster rolls, expenditure of ₹ 3.52 lakh paid to Departmental Labour could not be verified in audit. Furthermore, the unutilised amount of ₹ 1.62 lakh remained blocked with the executing agency.

  In reply, DMO Poonch stated (February 2024) that matter has been taken up with the BDO Poonch to furnish the reasons in the next meeting of DMFT.

- In Pulwama District, five projects at an estimate cost of ₹ 22.21 lakh were sanctioned (2019-23) for purchase of accessories for the Fisheries Department, a drone for aerial monitoring of Mineral Blocks, providing vegetation cover in mining area, providing apple (high density) plants and providing training and equipment for mushroom cultivation. An amount of ₹ 22.20 lakh was released and utilised by the executing agencies. As per the terms and conditions of the supply orders, the suppliers were responsible for supplying the fish tank without any breakages or shortages, supply goods in working conditions and specifications ordered by the concerned Department.

  Audit, however, during physical verification of assets noted the following deficiencies:

  - A damaged Fish Tank was supplied.
  - The drone supplied was defective and the High-Density Apple plants were substandard.
  - Further, the vegetation in the mining area was damaged due to absence of watch and ward and
  - The mushroom beneficiaries failed to adopt the trade for earning livelihood.

  Thus, the amount of ₹ 22.20 lakh was rendered wasteful and the beneficiaries were deprived of the intended benefits.

  In reply, the DMO stated (December 2023) that the matter would be taken up with the concerned Departments and action as warranted under rules would be taken.

- As per the PMKKKY guidelines, the DMF funds were to be utilised to complement the existing ongoing Schemes or projects of the State/ UT or Central Government.

  Audit noted that in the selected eight districts, 235 projects for which a total of ₹ 11.30 crore DMF funds were released were taken up for execution during 2017-18 to 2022-23.

  Audit, however, noted that only six ongoing projects amounting to ₹ 0.96 crore (constituting 8 *per cent* of released funds of ₹ 11.30 crore) in three (Reasi, Anantnag and Pulwama) out of eight selected Districts had been complemented with the existing Schemes as of March 2023. Thus, 216 projects for which ₹ 10.36 crore of DMF funds were released were taken up as individual projects without complimenting with the ongoing State/ UT or Central Schemes or Programmes.

  In reply, Director Finance, Mining Department stated (November 2024) that funds were utilised after approval of the competent authority both in the directly and indirectly affected areas. It was added that project executing Departments had been asked to complete the work in time bound manner to achieve the objectives of the Scheme in the targeted area.

Appendix 4.2

(Reference Paragraph No: 4.6.2(II))

SHG- Credits linkage in respect of 1st, 2nd, 3rd and 4th doses for smooth implementation of the programme

1. SHG should be in active existence at least since the last 6 months as per the books of accounts of SHGs.
2. SHG should be practicing "*Panchasutras*" i.e. regular meetings regular savings; regular inter-loaning: timely repayment and up-to- date books of accounts;
3. SHG should be 'A' grade as per grading report.
4. Audit of the SHG should have been done on quarterly basis and it should be up to the mark.
5. Proper Micro Credit Plan (MCP) has been drawn for creating livelihoods by the members of the SHGs.
6. SHG should have availed Revolving Fund of ₹ 15,000/-and due instalments have been repaid on regular basis.
7. Members of the SHGs should have paid due instalments regularly in respect of loans availed out of internal savings.
8. 1st dose of loan to the tune of ₹ 1,00,000/- (Rupees One Lakh only) to be repaid in 12 equal monthly instalments.
9. 2nd dose of loan @₹ 2,00,000/- (Rupees two Lakhs only) to be repaid in 24 equal monthly instalments subject to successful repayment of 1st dose only and after completion of at least 9 months from the date of disbursement of 1st dose
10. 3rd dose of loan @₹ 3,00,000/- (Rupees three Lakhs only) to be repaid in 36 equal monthly instalments subject to successful repayment of 2nd dose only and after completion of at least 18 months from the date of disbursement of 2nd dose.
11. 4th dose of loan @₹ 5,00,000/- (Rupees Five Lakhs only) to be repaid in 60 equal monthly instalments subject to successful repayment of 3rd dose only and after completion of at least 24 months from the date of disbursement of 3rd dose.
12. While linking SHGs for 1st and 2nd dose VO shall be sponsoring authority and for 3rd dose and above CLF shall be the sponsoring authority.
13. SHGs shall ensure disbursement of first dose of loan to at least two members, 2nd dose of loan is to minimum three members, 3rd dose of loan to minimum four members and 4th dose of loan to minimum five members of the SIIGS.
14. While disbursing 3rd and 4th dose of loan, SHGs shall ensure coverage of all members with Bank Loan.
15. Loan from VO/ CLF should not be given to any member in case she is defaulter in bank or any other loan.

Appendix 3.1.34	Suppression of taxable turnover due to less disclosure of unbilled revenue in Table 5 of GSTR-9C	140
Appendix 3.1.35	Mismatch/ suppression of turnover between GSTR-9/ 9C and Financial Statements	141

PREFACE

This Report of Comptroller and Auditor General of India for the period ended March 2023 has been prepared for submission to Lieutenant Governor of Jammu and Kashmir under Section 72 of the Jammu and Kashmir Reorganisation Act, 2019 for laying in the Legislative Assembly.

This Report contains Three Chapters. Chapter-I gives brief information regarding revenue receipts of the Government of Union Territory of Jammu and Kashmir. Chapter-II contains the significant audit findings noticed during Performance Audit on E-way bills system under Goods and Service Tax. Chapter-III present significant audit findings noticed during compliance audit on revenue receipts.

The instances mentioned in this Report are those which came to the notice in the course of test audit of the period 2022-23 as well as those which came to notice in earlier years but could not be reported in the previous Audit Reports. Instances relating to the period subsequent to 2022-23 have also been included, wherever necessary.

The audit has been conducted in conformity with the Auditing Standards issued by the Comptroller and Auditor General of India.

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

About the Report

This Report covers matters arising out of the Performance Audit on E-way Bills system under Goods and Service Tax and Subject Specific Compliance Audit on 'Department's Oversight on GST Payments and Returns Filing-Phase II'. The primary purpose of this Report is to bring to the notice of the Legislature the important results of audit.

The Report has been organised in three chapters as under:

Chapter-I: Introduction

This Chapter contains brief profile of the Union Territory (UT) Government with receipts/ expenditure for the year 2022-23, the authority for audit, audit jurisdiction, planning and conduct of audit, response of the Government to various audit products namely Inspection Reports, audit observations/ paragraphs and follow up action on the Audit Reports.

Chapter-II: Performance Audit on E-way Bills System under Goods and Service Tax

E-way Bill (EWB) is a document required for movement of goods and is designed to capture details of goods before being moved. The EWB was introduced with effect from 01 April 2018 for all inter-State movement of goods having value exceeding ₹ 50,000. For the intra-State movements in Jammu and Kashmir, EWB was made mandatory, in phases, for the consignment value of ₹ 50,000 as the threshold limit. The Performance Audit of E-way Bills System under Goods and Service Tax was conducted to ascertain whether EWB mechanism was effective in protecting revenue interest of the Government and whether the preventive/ enforcement activities of the Department in enforcing EWB provisions were efficient and effective.

Audit noticed systemic lapses on examining the EWB system such as ineligible taxpayers continuing under Composition Levy Scheme, and taxpayers filing 'nil' returns or not filing returns though they had generated EWBs. These cases involved tax implication of ₹ 2.29 crore. During 2018-22, three taxpayers registered within two assessment circles generated 5,739 EWBs having a tax effect of ₹ 67.99 crore, against which only ₹ 64.24 crore was discharged through GSTR-3B, the remaining ₹ 3.75 crore was not reported in GSTR-3B. Specific invoices pertaining to the unpaid tax liability could not be ascertained in audit due to absence of a detailed reconciliation between GSTR-1 and GSTR-3B.

Audit examination also revealed compliance deviations. EWBs were generated by the cancelled taxpayer. EWBs contained vehicle numbers that were scrapped, two

wheelers, vehicles whose registration was cancelled and suspended vehicles. Further, multiple EWBs were generated on the same invoices.

Instances of mis-match in Input Tax Credit (ITC) availment between GSTR-2A and GSTR-3B were also detected, leading to excess availment of ITC amounting to ₹22.29 crore during the period 2018-19 to 2021-22.

Deployment of staff under different cadres of the Enforcement Wings remained well below the sanctioned strength during 2018-22. The deficiency in the actual staff strength ranged from 29 *per cent* to 55 *per cent* in respect of State Tax officers, 43 *per cent* to 72 *per cent* in respect of Inspectors, 54 *per cent* to 71 *per cent* in respect of Sub-Inspectors, 36 *per cent* to 92 *per cent* in respect of Head Guards, 77 *per cent* to 86 *per cent* in respect of Guards and 71 *per cent* to 83 *per cent* in respect of drivers. The reduced staff strength likely impacted the efficient performance of the enforcement activities of the Department.

No specific targets for conducting verification of EWBs were fixed by the Department during 2018 to 2022. The Department did not prepare physical verification reports in Form MOV-04 in 47 booked cases, and consequently, the correctness of the assessment of goods could not be verified. Further, the Department had not assigned a Grievance Redressal Officer to address grievances filed in Form GST (EWB-04) during the audit period 2018–22

There were gaps in the usage of MIS reports and the information available in EWB system to ensure compliance by the taxpayers. Audit also noticed deficiencies in the operational preparedness of the Department with respect to preventive and enforcement activity done by enforcement wings. These included non-renewal/ non-encashment of Bank Guarantees of ₹ 28.32 lakh, and short Levy of tax of ₹ 24.29 lakh on account of Compensation Cess.

Recommendations:

To strengthen the EWB System, the Department may:

- ***Put in place adequate controls into the EWB system to alert the CLS taxpayer as well as the Departmental officers while generating EWB for inter-state supply.***

- ***Consider including suitable validation control in the EWB System to prevent use of same invoice in generation of multiple EWBs.***

- ***Consider incorporating suitable validation controls in the EWB system to prevent use of suspicious vehicles for generation of EWBs and transportation of goods***.

Chapter-III: Compliance audit (Revenue Receipts)

This Chapter covers Subject Specific Compliance Audit on 'Department's Oversight on GST Payments and Returns Filing-Phase II'. The key findings are as follows:

Audit observed inconsistencies in filing of returns and deviations from rules. There were cases of non-levy of late fee on delayed filing of returns, non-levy of interest on late payment of tax, delay in cancellation of registration and non-filing of GSTR-10 returns and cases in which action was initiated but not completed were noticed. Deficiencies in short/ non-payment of interest, undischarged tax liability, Input Tax Credit (ITC) availing after limitation period, mismatch of ITC availed between GSTR-3B and GSTR-2A, availing ITC without supplier remitting tax, mismatch of ITC between annual return and financial statements Table 14T of GSTR-9C, non-filing of GSTR-3B, irregular availing of ITC on Input Service Distributor (ISD) credit, mismatch of taxable turnover in Table 7G of GSTR-9C and short payment of tax were also noticed. These compliance deviations involved tax implication of ₹ 439.36 crore.

Further, detailed audit of GST returns filed by the taxpayers for the years 2018-21 revealed significant mismatch in discharge of tax liability and turnover on comparing the tax liability and turnover furnished in the financial statements and GST returns.

Recommendations:

The Department may:

- ***Consider introducing validation controls in GST Returns to enhance taxpayer compliance and facilitate better scrutiny.***
- ***Initiate remedial action for all the compliance deviations pointed out by Audit before they get time barred.***

CHAPTER- I

OVERVIEW

Chapter-I

OVERVIEW

1.1 Introduction

This Report covers matters arising out of the Performance Audit on E-way Bills system under Goods and Service Tax and Compliance Audit on the Revenue Receipts of the Union Territory (UT) Government of Jammu and Kashmir. The primary purpose of this Report is to bring to the notice of the Legislature the important results of audit. Findings of audit are expected to enable the Executive to take corrective action as also to frame policies and directives that will lead to improved financial management of the organisations contributing to better governance.

The Report has been organised in three chapters as under:

- **Chapter I** contains a brief profile of the UT Government with the receipt/ expenditure for the year 2022-23, the authority for audit, audit jurisdiction, planning and conduct of audit, response of the Government to various audit products namely Inspection Reports, audit observations/ paragraphs and follow up action on audit reports.
- **Chapter II** contains observations of the Performance Audit on 'E-way Bills under Goods and Service Tax'.
- **Chapter III** contains observations of the Subject Specific Compliance Audit on 'Department's Oversight on GST Payments and Returns Filing-Phase II'

1.2 Profile of the Union Territory of Jammu and Kashmir

The Union Territory of Jammu and Kashmir is constituted of 20 districts. The projected population of the Union Territory of Jammu and Kashmir for the year 2023 was 1.36 crore. Kashmiri, Dogri, Hindi, Urdu and English are major languages of UT. GSDP of UT of Jammu and Kashmir during 2022-23 was ₹ 2,27,927 crore.

The overall position of receipts and expenditure of the UT Government during the year 2022-23 is given below in **Table 1.1**.

Table 1.1: Overall receipts and expenditure during the year 2022-23

Sl. No	Components	Amounts (₹ in crore)
1	Own Tax Revenue	12,335.47
2	Own Non-Tax Revenue	5,147.55
3	Share of Union taxes/ duties	0
4	Grants-in-aid and Contributions	51,492.93
5	Additional Resource Mobilisation	0
6	**Revenue Receipts (1+2+3+4+5)**	**68,975.95**
7	Recovery of Loans and Advances	1.33
8	Other Receipts	0
9	Borrowings and other Liabilities#	4,855.37
10	**Capital Receipts (7+8+9)**	**4,856.70**

Sl. No	Components	Amounts (₹ in crore)
11	**Total Receipts (6+10)**	**73,832.65**
12	**Revenue Expenditure,** of which	**62,999.34**
13	Interest payments	8,493.82
14	**Capital Expenditure**	**10,833.31**
15	Capital outlay	10,773.78
16	Loan and advances	59.53
17	Appropriation to Contingency Fund	0
18	**Total Expenditure (12+14+17)**	**73,832.65**

(Source: Budget 2022-23 and Finance Accounts 2022-23.)
 # Borrowings and other Liabilities: Net (Receipts-Disbursements) of Public Debt + Net of Contingency Fund + Net (Receipts - Disbursements) of Public Account + Net of Opening and Closing Cash Balance.

The break-up of the various components of tax and non-tax revenues raised by the Union Territory (UT) of Jammu and Kashmir during the year 2022-23, the UT share of net proceeds of divisible Union taxes and duties assigned to the UT and Grant-in-aid received from the Government of India during the year are depicted in **Table 1.2**

Table 1.2: Components of revenue receipts

(₹ in crore)

Sl. No.	Particulars	2022-23
1.	**Revenue raised by the UT Government**	
	• **Tax revenue,** of which	**12,335.47**
	Taxes on Sales, Trade etc. including GST	8,766.30
	Taxes on Goods and Passengers	23.75
	State Excise	1,793.74
	Taxes and Duties on Electricity	340.00
	Stamps Duty and Registration Fees	556.66
	Taxes on Vehicles	723.42
	Land Revenue	131.60
	• **Non-tax revenue,** of which	**5,147.55**
	Power	3,307.54
	Forestry and Wildlife	214.49
	Police	89.89
	Non-ferrous, Mining and Metallurgical Industries	101.17
	Water Supply and Sanitation	110.16
	Public Works	55.19
	Medical and Public Health	33.76
	Interest Receipts	18.79
	Other Non-tax Receipts	1,216.56
	Total	**17,483.02**
2.	**Receipts from the Government of India**	
	• Share of net proceeds of divisible Union taxes and duties	-
	• Grants-in-aid	51,492.93
	Total	**51,492.93**
3.	**Total revenue receipts of the State/ UT Government (Total of 1 and 2)**	**68,975.95**
4.	**Revenue raised by UT Government as a percentage of total**	**25.35** ***per cent***

(Source: UT's Finance Accounts 2022-23)

During the year 2022-23, the revenue raised by the UT Government (₹ 17,483.02 crore) was 25.35 *per cent* of the total revenue receipts. The balance

(₹ 51,492.93 crore) 74.65 *per cent* was received from the Government of India (GoI) as Grants-in-aid.

Goods and Services Tax (GST) Compensation is the revenue of the UT Government under GST (Compensation to States) Act, 2017. During the year 2022-23, the UT Government received GST compensation of ₹ 418.12 crore as revenue receipts.

During the year 2022-23, the share of Capital Expenditure was 14.59 *per cent,* Revenue Expenditure was 85.33 *per cent* and Loans and Advances was 0.08 *per cent* of total expenditure. The combined share of Social Services (₹ 25,697.79 crore) and Economic Services (₹ 15,814.83 crore) which represented Development Expenditure was 56.23 *per cent* of total expenditure during 2022-23, and 43.69 *per cent* of total expenditure was incurred on General Services (₹ 32,260.50 crore).

1.3 Authority for audit

Authority for audit by the CAG is derived from Articles 149 and 151 of the Constitution of India and the CAG's (Duties, Powers & Conditions of Service) Act, 1971 (DPC Act). CAG conducts audit of expenditure of State Government Departments under Section[1] 13 of the DPC Act. In addition, CAG also conducts an audit of other Autonomous Bodies which are substantially financed by the Government under Section[2] 14 of DPC Act. Section 16 of the DPC Act authorises CAG to audit all receipts (both revenue and capital) of Union Territory having a Legislative Assembly. Principles and methodologies for various audits are prescribed in the Regulations on Audit and Accounts (Amendments), 2020 and Auditing Standards issued by the Indian Audit and Accounts Department.

1.4 Planning and conduct of Audit

Compliance Audits are conducted as per the Annual Audit Plan (AAP). Units for Compliance Audit are selected on the basis of risk assessment of the Apex units, Audit Units and Implementing Agencies.

In Revenue sector, the auditable entities under various Departments are categorised into high, medium and low risk units according to their revenue position, past trends of the audit observations and other parameters. During the year 2022-23, there were 257 auditable units (State Taxes: 86; State Excise: 40; Motor Vehicles: 22; Law and Registration[3]:109) out of which 51 were audited.

---

1 Audit of (i) all expenditure from the Consolidated Fund of State, (ii) all transactions relating to Contingency Funds and Public Accounts and (iii) all trading, manufacturing, profit & loss accounts, balance-sheets and other subsidiary accounts.

2 Several non-Commercial Autonomous/ Semi-Autonomous Bodies, established to implement Schemes for employment generation, poverty alleviation, spread of literacy, health for all and prevention of diseases, environment, etc., and substantially financed by the Government, are audited under Section 14.

3 In Jammu and Kashmir registration of documents and properties was done by the Judicial Officers under the Jammu and Kashmir Registration Act 1977 BK. Upon reorganisation of the erstwhile State of Jammu and Kashmir into two Union Territories in terms of the Jammu and Kashmir Reorganization Act, 2019, Jammu and Kashmir Registration Act 1977 BK was repealed and the Registration Act, 1908 made applicable for registration of immovable properties and various types of deeds and documents. Department of Registration under the administrative control of Revenue Department was created as an independent and exclusive Department vide Government order No: 117-Rev (S) of 2019, dated 24th of October 2019

Inspection Reports are issued to the heads of auditee units after completion of audit. Based on replies received, audit observations are either settled or further action for compliance is advised. Important audit findings are processed further as individual observations/ paragraphs for inclusion in the Audit Report. Detailed Compliance Audit paragraphs are prepared on issues of significance, selection of issues is done following the analogy explained above.

Formal replies furnished by Departments are carefully considered while finalising the materials for inclusion in the Audit Report.

1.5 Lack of response of Government to Audit

Principal Accountant General (Audit), Jammu and Kashmir, conducts audit of Government Departments to check for compliance to rules and regulations in transactions and to verify the regularity in maintenance of important accounting and other records as per the prescribed rules and procedures. After these audits, Inspection Reports (IRs) are issued to the Heads of Offices inspected with copies to the next higher authorities. Important irregularities and other points detected during inspection, which are not settled on the spot, are included in IRs.

As per the Regulations on Audit and Accounts (Amendments), 2020, the Officer in charge of the auditee entity shall send the reply to an Inspection Report (IR) within four weeks of its receipt. On intimation of any major irregularity[4] by the PAG, the Government shall undertake *prima facie* verification of facts and send a preliminary Report to the PAG confirming or denying facts within three weeks of receipt of intimation. Where the fact of major irregularity is not denied by the Government in the preliminary report, the Government shall further send a detailed report to PAG within two months of preliminary report indicating the remedial action taken to prevent recurrence and action taken against those responsible for the lapse.

For speedy settlement of audit observations/ Inspection Reports (IRs), the Jammu and Kashmir Budget Manual provides for prompt response by the Executive to IRs issued by the Principal Accountant General (Audit) to ensure remedial/ rectification action. The auditee offices and their controlling Administrative Departments are required to comply with the observations contained in the IRs and rectify the defects and report their compliance to the Principal Accountant General (Audit).

The summarised position of the Inspection Reports of various departments as on 31st March 2023 is given in **Table 1.3**.

[4] Major irregularity means (a) an instance of suspected material fraud or collusion or corruption coming to notice in audit, or (b) an irregularity of serious nature involving public funds, particularly that relating to mismanagement, loss, waste, nugatory expenditure or loss of revenue, serious breakdown/violation of internal controls, etc.

Table 1.3: Position of outstanding IRs and paragraphs as on 31 March 2023

Name of Sector	Opening Balance[5] (01 April 2022)		Additions during the year 2022-23		Settled during the year 2022-23		Closing Balance (31 March 2023)	
	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs	No. of Inspection Reports	No. of Paragraphs
Revenue Sector	1,068	5,009	35	163	32	109	1,071	5,063

The pendency of large number of paragraphs indicates lack of adequate response of the Government Departments to Audit. The Government may look into this matter and revamp the system to ensure proper response to the audit observations from the Departments in a time-bound manner.

No Audit Committee Meeting (ACM) was held in the Revenue Sector during the year 2022-23.

It is recommended that Government should ensure that a procedure is put in place for (i) action against officials failing to send replies to IRs/ Paragraphs as per the prescribed time schedule and (iii) holding at least one meeting of each Audit Committee every quarter.

1.6 Response of Departments to Performance Audit Paragraphs and Compliance Audit Paragraphs

Regulations on Audit and Accounts (Amendments), 2020 stipulate that responses to Draft Audit Paragraphs proposed for inclusion in the Report of the Comptroller and Auditor General of India should be sent within six weeks[6].

In the last few years, Audit has reported on several significant deficiencies in the implementation of various programmes/ activities as well as on the quality of internal controls in selected Departments adversely impacting the success of programmes and functioning of the Departments. The focus was on auditing specific programmes/ schemes in order to offer suitable recommendations to the Executive for taking corrective action and improving service delivery to the citizens.

The draft audit paragraphs proposed for inclusion in the Report of the Comptroller and Auditor General of India are forwarded by the Principal Accountant General (Audit) to the Principal Secretaries/ Secretaries of the Department concerned drawing their attention to the audit findings and requesting them to send their response within six weeks. The fact of non-receipt of replies from the Departments/ Government is invariably indicated at the end of such paragraphs included in the Audit Report. Performance Audit on e-way Bills on Goods and Service Tax and one Compliance

[5] Opening balance figure are updated and will not matching with the closing balance of the year 2021-22, due to subsequent reconciliation of data.

[6] Erstwhile State Government's Finance (Budget) Department, in its order dated June 1982, however, directed all the Departments to submit their responses to proposed Draft Paragraphs within one month.

Paragraph (Revenue Sector) to be included in the Report of the Comptroller and Auditor General of India on UT Revenue for the period ended March 2023 were sent to the Principal Secretaries/ Secretaries of the respective Departments. However, the replies of Government in respect of both the Performance Audit and Compliance Audit Paragraphs were awaited (August 2025).

1.7 Follow-up on Audit Reports

The follow-up on Audit Reports have been found to be inadequate as given below:

A. Non-Submission of *suo-moto* Action Taken Notes

The State Government (Finance Department) has issued instructions in June 1997 to all the Administrative Departments to furnish Suo-moto Action Taken Notes (ATNs) on all the audit paragraphs featuring in the Audit Reports to the Public Accounts Committee (PAC) irrespective of whether they were taken up for discussion by the committee or not. These ATNs are to be submitted to the committee duly vetted by the Principal Accountant General (Audit) within a period of three months from the date of the presentation of Audit Reports in the State Legislature.

It was, however, noticed that out of 143 audit paragraphs related to Revenue Sector included in Audit Reports from 2000-01 to 2020-21, Suo-moto ATNs in respect of 126 audit paragraphs had not been received up to 31 March 2025.

B. Action taken on recommendations of the PAC

Action Taken Notes, duly vetted by the Principal Accountant General (Audit) on the observations/ recommendations made by the PAC in respect of the audit paragraphs discussed by them are to be furnished to the committee within six months from the date of such observations/ recommendations.

Out of 143 audit paragraphs featuring in the Revenue Sector of Audit Reports for the years from 2000-01 to 2020-21, only 17 audit paragraphs have been discussed by the PAC up to 31 March 2025. Recommendations in respect of 17 audit paragraphs were made by the PAC, however, ATNs on the recommendations of the Committee were pending from the UT Government in respect of 13 paragraphs.

CHAPTER- II

PERFORMANCE AUDIT

(E-WAY BILLS)

Chapter-II

PERFORMANCE AUDIT

Finance Department
(State Taxes Department)

Performance Audit on E-Way Bills System under Goods and Services Tax

2.1 Introduction

2.1.1 Introduction to E-Way Bills

Goods and Services Tax (GST) has been introduced with effect from 01 July 2017 (In J&K with effect from 08 July 2017), subsuming a wide range of Indirect taxes based on the paradigm of 'One Nation One Tax'. One of the intended objectives of GST regime was to improve efficiency in movement of goods and services by reducing process related time delays.

Way bill was a feature present even in pre-GST regimes wherein movement of goods was administered through manually governed (revenue) check posts. Goods entering a particular State were levied an 'Entry Tax', which has since been subsumed under GST. Electronic-Way Bill (EWB) is conceived as a shift from Government-monitored tax administration model to a self-reporting model by the taxpayer.

The Government's key objective behind introduction of EWB is to safeguard revenue. EWB is a document required for movement of goods and is designed to capture details of goods before being moved. Automation and standardisation of the entire process was intended to help check on tax evasion and shore up GST collections. EWB is also designed to dissolve the non-trade barriers, so that transit time is reduced, and supply chain efficiency is improved.

EWB was introduced with effect from 01 April 2018 for all inter-State movement of goods having value exceeding ₹ 50,000. For the intra-State movements, EWB was made mandatory, in phases, with the threshold limit[1] as may be prescribed by the concerned State Governments.

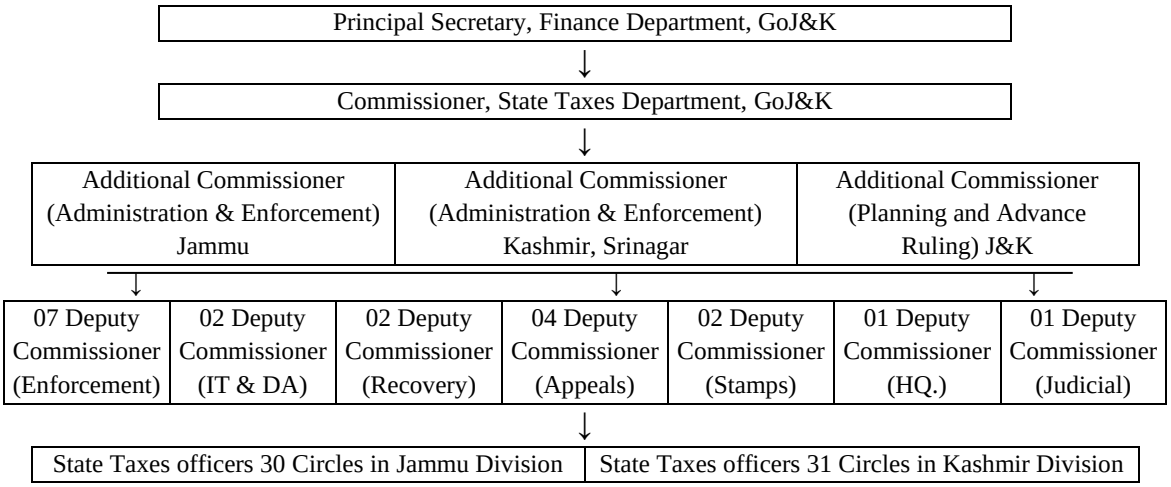
Rule 138 of Jammu and Kashmir Goods and Services Tax Rules (J&KGST Rules), 2017 (amended from time to time) provides for the EWB mechanism. The information on the consignment is to be furnished prior to movement of goods and it is to be issued irrespective of whether the movement is in relation to supply or for reasons other than supply.

2.1.2 Organisational Structure of the Department

The organisational structure of Government of Jammu and Kashmir (GoJ&K) Taxes Department is shown in the **Chart 2.1**. The Department works under administrative control of the Finance Department and is headed by Commissioner, State Taxes.

[1] The threshold (for intra-State/ UT movement) for the consignment value is ₹ 50,000 in Jammu and Kashmir.

Chart 2.1: Organisational structure of State Tax Department



2.1.3 Information Systems used for EWBs

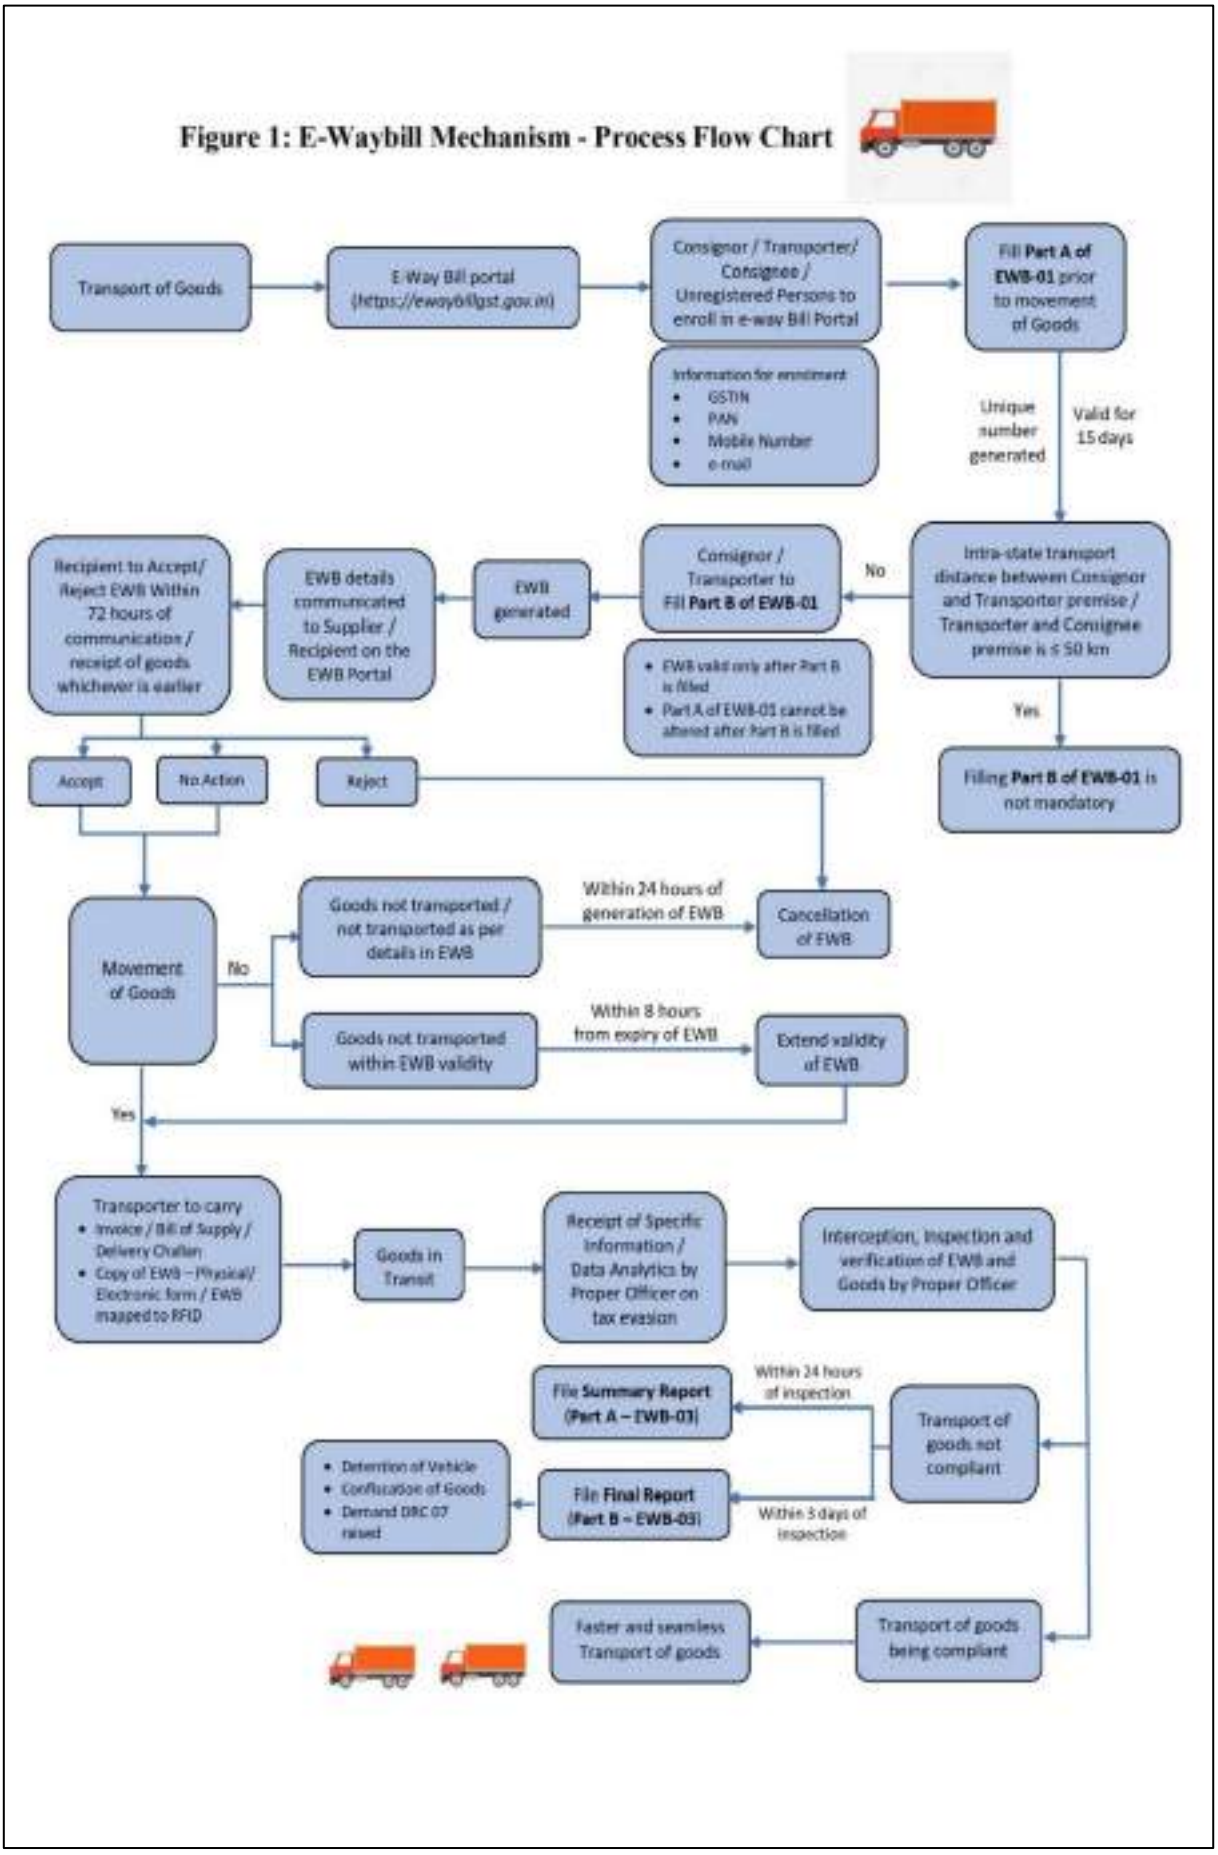
The EWB Common Portal is managed by the National Informatics Centre (NIC) from its office in Karnataka. In February 2020, EWB portal was integrated with the VAHAN system of the Ministry of Road Transport and Highways, so that vehicle registration number could be validated at the time of generating EWB. Moreover, the FASTag system was integrated with EWB system from 1 January 2021. On the EWB Common Portal, one-time registration of the taxpayer is required for generation, extension, cancellation and rejection of EWBs.

The Proper Officers (both Centre and State/ Union Territory) can access the EWB Portal through two means: (i) Logging into EWB Common Portal through a web browser using the login credentials provided or (ii) Logging into the GST EWB System Mobile Application. The functions performed by the Proper Officer are verification of EWBs, unblocking of EWBs, viewing and accessing MIS reports, interception of vehicles, imposing penalties as administered under the relevant provisions of the Jammu and Kashmir Goods and Service Tax Act, 2017 (J&KGST Act) and Jammu and Kashmir Goods and Service Tax Rules, 2017 (J&KGST Rules), and confiscation/ releasing of goods.

2.1.4 Processes involved in the EWB System

The EWB system includes various processes such as the enrolment of the required persons in the portal, Generation of EWBs, Extension, Cancellation, and Rejection of the EWBs generated, etc. The entire process flow of the EWB system under GST is depicted in ***Figure 1***. The list of forms involved in the EWB system is provided in ***Appendix-2.1.1*** of this report.

Figure 1: E-Waybill Mechanism - Process Flow Chart



2.2 Audit Objectives, Criteria, Scope and Sampling Methodology

This section covers audit objectives, criteria against which the Performance Audit (PA) was evaluated, scope and the sampling methodology used for conducting the audit.

2.2.1 Audit Objectives

The audit objectives of the Performance Audit were to examine:

- Whether EWB mechanism was effective in protecting revenue interest of the Government; and
- Whether the Preventive/ Enforcement activities of the Department in enforcing EWB provisions were efficient and effective.

2.2.2 Audit Criteria

The source of audit criteria comprised the provisions contained in the J&KGST Act 2017 and J&KGST Rules 2017 made thereunder. In addition, the notifications, circulars, advisories and Standard Operating Procedures (SOP) issued by the State Taxes Department, GoJ&K, GST Council, NIC, Central Board of Indirect Taxes and Customs (CBIC) from time to time also formed part of the audit criteria. The significant provisions are given in ***Appendix-2.1.2*** of this report.

2.2.3 Audit Scope

EWB transactions of the persons registered in the EWB portal pertaining to the period between 1 April 2018 and 31 March 2022 were covered in the PA. EWB data for the audit period was extracted from GSTN[2] and was analysed. Movement of conveyances by roadways alone was considered for this audit and Railway/ Airway/ Seaway EWBs have been excluded from the scope of this audit.

The scope of audit also involved evaluation of the preventive functions of the Department with reference to EWBs, viz., interception of vehicles, verification of documents, inspection of goods and action taken thereof.

2.2.4 Audit Sampling Methodology

During the period of audit (2018-19 to 2021-22), total 51,01,848 outward and 77,470 inward EWBs were generated. The number of extended EWBs were 3,56,785, cancelled EWBs were 99,045 and rejected EWBs were 819 during the same period. Audit also noticed that in over 95 *per cent* of EWBs, goods movement had taken place through road and less than five *per cent* through other modes. The details are given in ***Appendix-2.1.3***.

[2] Goods and Service Tax Network.

A problem-centric approach was attempted as EWB generation under GST is a necessary condition to precede any movement of goods subject to the threshold limit. Samples for Audit Objective-1 evolved based on the identified Key Problem Areas (KPAs). The KPAs that constrain revenue realisation for the Government are provided in ***Appendix-2.1.4***. For Audit Objective-1, total 131 EWBs [05 cases for cross PAN analysis, 06 cases of high money value of Un-registered person (URP) and 120 cases of 52 taxpayers] were taken as sample. The details are provided in ***Appendix-2.1.5***. Further, where discrepancies in sample of EWBs against a taxpayer were noticed, all EWBs generated by the taxpayer were examined to review compliance.

Audit Objective-2 evaluated the problems associated with enforcement/ preventive activities viz. Operational preparedness, Effectiveness of anti-evasion measures and Intra-department and Inter-department coordination. For Audit Objective-2, four enforcement wings[3] were selected out of seven enforcement wings on the basis of stratified sampling. Further, 50 cases verified by the Department were selected from each enforcement wing included in sample randomly i.e. 200 cases were selected as sample.

Entry Conference of this Performance Audit was held on 24 March 2023 with the Commissioner, State Taxes Department, GoJ&K in which the audit objectives, sample selection, audit scope and methodology were discussed. The field audit was conducted from May 2023 to January 2024 and audit observations issued to the Department.

Exit conference of this Performance Audit was held on 13 August 2024 with the Secretary, Finance Department, GoJ&K along with Commissioner State Taxes Department, GoJ&K.

2.2.5 Acknowledgement

Audit is thankful for the cooperation and support extended by State Tax Department in providing records, information, and clarifications from time to time for the smooth conduct of audit.

2.3 EWB mechanism in protecting revenue interest of the Government

Sample EWBs were selected based on Key Problem Areas (KPAs) identified during data analysis, and detailed verification of related records were conducted at field formations of the Department. During the field visit, taxpayers' records, *viz.*, purchase/ sales registers, stock accounts, etc. were called for and examined.

[3] (1) Deputy Commissioner Enforcement – South (Samba) Jammu (2) North (Udhampur) Jammu (3) Kathua- Lakhanpur and (4) South Kashmir.

2.3.1 Substantive audit findings

The systemic and compliance issues noticed during substantive audit[4] are discussed under each KPA to provide the impacts of the risks identified.

2.3.1.1 Ineligible taxpayers continuing under Composition Levy Scheme

In terms of Section 10(1) of the J&KGST Act 2017, a registered person whose aggregate turnover in the preceding financial year did not exceed the threshold limit[5] may opt to pay tax under Composition Levy Scheme (CLS). Section 10(2)(b) provides that he shall not be eligible to opt CLS, if engaged in making any inter-State outwards supply of goods.

During the substantive audit, 120 EWBs pertaining to 52 taxpayers, falling under J&K GST Commissionerate were test-checked and it was observed that three taxpayers being registered under CLS, had generated inter-state EWBs having an assessable value of ₹ 9.40 lakh with a tax effect of ₹ 1.23 lakh during 2019-20 to 2020-21 (***Appendix-2.1.6***), in contravention of the above-mentioned rule.

On being pointed out (July 2023 and March 2024), the Department replied (September 2024) that Summary of the Order in form DRC-07 amounting to ₹ 0.85 lakh in one case had been issued, Show Cause Notice (SCN) in form DRC-01 for an amount of ₹ 4.17 lakh had been issued in other case and Notice intimating discrepancy in form ASMT-10 in the remaining case had been issued.

A case is illustrated below:

Illustrative Case

A taxpayer 01XXXXX4007X1XX registered in State Taxes Circle 'R' Jammu, had opted for a CLS and had generated an EWB on 04 October 2019 for making an inter-state outward supply of ₹ 6.26 lakh during 2019-20. Thus, as per the Rule 6 of the J&KGST Rules, the taxpayer had ceased to satisfy the condition mentioned to remain in the CLS and was required to pay tax at normal rates.

On being pointed out (December 2023), the Department replied (September 2024) that DRC-01 for an amount of ₹ 4.17 lakh including tax and penalty had been issued.

Recommendation 1: Department may incorporate validation control in EWB system to alert the CLS taxpayer as well as the Departmental officers while generating EWB for inter-state supply.

[4] Substantive Audit- detailed examination of transactions that includes field visit and scrutiny of taxpayers records at Departmental premises.

[5] Threshold limit per year for becoming eligible for CLS was rupees one crore for the period between 1 April 2018 and 31 January 2019 and ₹ 1.5 crore thereafter. In respect of Special Category States, it is ₹ 75 lakh.

2.3.1.2 Generation of EWBs by the taxpayers who had filed 'Nil' Returns

As per Section 37 of the J&KGST Act 2017, every registered person other than CLS taxpayer shall furnish the details of outward supplies of goods or services or both, effected during a tax period, in GSTR-1 return and discharge tax liability thereon in GSTR-3B return. In case of CLS taxpayers, the tax liability is to be discharged in GSTR-4/ GST-CMP-08 returns. Further, Section 61 of the Act provides that various returns filed by the taxpayers may be scrutinised by the Proper Officer to verify the correctness of the returns, and suitable action is to be taken on discrepancies or inconsistencies reflected in the returns.

It was observed that six taxpayers out of the 52 taxpayers, who had generated 2,212 EWBs did not discharge tax liabilities of ₹ 2.08 crore against outward supplies of ₹ 16.70 crore involved in these EWBs during 2018-19 to 2021-22 (***Appendix-2.1.7***) as examination of data on GSTN portal for the corresponding months revealed that the taxpayers had filed nil GSTR-3B returns.

On being pointed out (August 2023 to February 2024), Department replied (September 2024) that in three cases DRC-07 had been issued, in one case the taxpayer had made a voluntary tax payment or against the SCN or Statement in Form DRC-03, in one case DRC-01 had been issued and in remaining case the taxpayer was declared as insolvent in National Company Law Tribunal (NCLT).

A case is illustrated below:

Illustrative Case

A taxpayer (GSTIN: 01XXXXX1895X2XX) registered under State Taxes Circle 'L' Jammu, made outward supplies of goods valued at ₹ 15.48 crore, with a corresponding tax liability of ₹ 1.85 crore, during the period from April 2018 to October 2018. However, the taxpayer filed NIL returns for the said period, resulting in non-payment of the tax liability.

On being pointed out (February 2024) the Department replied (September 2024) that an audit under Section 65 of the J&K GST Act, 2017, had been carried out for the financial years 2017-18 and 2018-19. Consequently, DRC 07 for the financial year 2018-19 was issued.

2.3.1.3 Generation of EWBs by non-filers of GST returns

As per Section 37 of the J&KGST Act 2017, every registered person other than CLS taxpayers shall furnish the details of outward supplies of goods or services or both, effected during a tax period, in GSTR-1 return and discharge tax liability thereon in GSTR-3B return. Further, Section 62 of the Act provides that where a registered person fails to furnish the returns even after the service of a notice, the Proper Officer may proceed to assess the tax liability of the said person to the best of his judgement taking

into account all the relevant material, which is available or which he has gathered and issue an assessment order. In cases, where a taxable person whose registration has been cancelled but who was liable to pay tax, the Proper Officer may proceed to assess the tax liability of such taxable person to the best of his judgement as per provisions of Section 63 of the Act.

Audit observed that seven taxpayers out of the 52 taxpayers **(*Appendix-2.1.8*)** generated 104 EWBs during the period 2018-19 to 2021-22, had assessable value of ₹ 1.32 crore and tax of ₹ 20.08 lakh but did not file GSTR-3B returns in the corresponding months, hence no tax liability was discharged.

Due to non-filing of returns, the Department cancelled the registration of six taxpayers under Section 29 of the J&KGST Act. However, no action was initiated to assess the tax liability as specified under Sections 62 and 63 of the J&KGST Act. Further, it was observed from the GSTN portal that these cancelled taxpayers did not file GSTR-10.

On this being pointed out (August 2023 to November 2023), the Department replied (September 2024) that in six cases DRC-07 had been issued, while DRC-01 was issued in the remaining case.

A case is illustrated below:

Illustrative Case

A taxpayer having GSTIN-01XXXXX3920X1XX, under the jurisdiction of Circle Kathua-I generated 15 EWBs in January 2021 for assessable value of ₹ 53.03 lakh, with a tax liability of ₹ 9.55 lakh. However, due to non-filing of returns, the taxpayer's registration was cancelled by Department on *suo-moto* basis without assessing the tax liability due. Further, the taxpayer had also not filed GSTR-10 resulted in non-discharging of tax liability.

On being pointed out (October 2023), the Department replied (September 2024) that DRC-07 of amount ₹ 16.08 lakh including interest and penalty had been issued (April 2024)

The findings indicated that the Department could better utilize the information related to EWBs available to them while calculating/ determining the tax liabilities of the cancelled taxpayers.

2.3.1.4 Non-follow up of cancelled taxpayer for outstanding tax liability

As per Section 45 of J&KGST Act 2017, it is binding upon the cancelled taxpayer to file a final return in form GSTR-10 within a period of three months from the date of cancellation or date of order of cancellation, whichever is later and discharge his due tax liabilities. In case the cancelled taxpayer fails to furnish final return GSTR-10

within prescribed period, a notice shall be issued by Proper Officer under Section 46 of the Act asking cancelled taxpayer to furnish his GSTR-10 return within 15 days. If cancelled taxpayer fails to file his GSTR-10 return, even after service of a notice, then Proper Officer is empowered under Section 62 of the Act to proceed to assess the tax liability of the said person to the best of his judgement taking into account all the relevant material which is available or which he has gathered and issue an assessment order within a period of five years from the due date of furnishing annual return for the financial year to which the tax not paid relates. In case the cancelled taxpayer does not discharge his tax liabilities within three months of passing of an assessment order under Section 62 of the Act, then Proper Officer shall initiate recovery proceedings under Section 78 of the Act and recover pending tax dues by one or more of the modes prescribed under Section 79 of the Act.

Audit observed that registration of one taxpayer **(*Appendix-2.1.9*)** was cancelled on 01 May 2018 but the taxpayer generated six EWBs involving assessable value of ₹ 5.38 lakh after effective date of cancellation with tax implication of ₹ 0.97 lakh as seen from EWBs MIS report on GSTN Portal and was required to discharge final tax liabilities by filing GSTR-10 return. However, the taxpayer had not filed GSTR-10 return after cancellation of registration and the Department also had not initiated action to assess taxpayer's pending tax liabilities.

On being pointed out (August 2023 and November 2023), the Department replied (September 2024) that DRC-07 had been issued to the taxpayer.

Recommendation 2: Department may consider issuing suitable instructions to the Proper Officers for considering EWBs generated by the taxpayer before cancellation of registration retrospectively and taking action for recovery of tax wherever applicable.

2.3.1.5 Generation of multiple EWBs on same invoices

As per Rule 46(b) of J&KGST Rules, a tax invoice shall be issued by the registered person containing consecutive serial number, not exceeding sixteen characters, unique for a financial year.

As per Para 5(1) of the user manual issued by the NIC, the taxpayer while generating EWB is required to enter the unique document number relating to the consignment. Invoice number is the document number in respect of consignments relating to supplies. Hence, only one EWB is required to be generated based on each invoice.

It was observed that 13 taxpayers generated 33 EWBs involving assessable value of ₹ 10.25 crore and tax of ₹ 1.83 crore **(*Appendix-2.1.10*)** on the strength of 15 invoices. Each invoice number was used for generating two to five EWBs. As the taxpayers had generated multiple EWBs using same invoice, there was a potential risk of

under-reporting of outward supplies by the taxpayers in their GSTR-1 returns. It was further noticed that the respective taxpayers either did not report any consignments or reported only one consignment in their GSTR-1 returns.

This indicates lack of validation controls in the EWB Common Portal to restrict generation of multiple EWBs using same/ similar invoices.

On being pointed out (June 2023 to January 2024), the Department replied (September 2024) that in three cases DRC-07 had been issued and in one case the taxpayer had made a voluntary tax payment through DRC-03. Further, the Department stated that in four cases, EWBs were generated due to technical glitch and in one case taxpayer had gone under insolvency in NCLT. The Department further stated that in two cases, second EWB was wrongly generated and in remaining two cases no reply was furnished.

A case is illustrated below:

Illustrative Case

A taxpayer 01XXXXX9019X1XX registered in STO Circle Kathua-I had generated two EWBs in August 2018 with the same invoice having an assessable value of ₹ 5.28 lakh, involving a tax liability of ₹ 0.63 lakh. However, the taxpayer did not report these sales in GSTR-1 and failed to discharge the corresponding tax liability in GSTR-3B for the same period.

On being pointed out in audit (October 2023), the Department replied (September 2024) that DRC-07/08 dated 18 April 2024 for demand of ₹ 1.40 lakh inclusive of penalty and interest had been issued.

Recommendation 3: Department may consider including suitable validation control in the EWB System to prevent use of same invoice in generation of multiple EWBs.

2.3.1.6 Generation of EWBs for transactions using suspicious vehicles

As per Rule 138(2) of the J&KGST Rules, 2017, where goods are transported by the registered person as a consignor, whether in his own conveyance or through a hired one or a public conveyance, by road, the said person shall generate the EWB in form GST-EWB-01 electronically on the common portal after furnishing information in Part-B of the form. Where goods are handed over to a transporter for transportation by road, the registered person shall furnish the information relating to the transporter on the common portal and the EWB shall be generated by the transporter on the said portal on the basis of the information furnished by the registered person in Part-A of form GST-EWB-01. Vehicle number is required to be provided in Part-B of the form.

Audit analysed vehicles involved in 131 sampled EWBs with e-vahan data to identify cases that involved use of theft vehicles, scrapped, surrendered, cancelled and suspended vehicles, two wheelers, same vehicle used for multiple EWBs across States on the same day etc.

Audit analysis revealed that eight EWBs pertaining to seven taxpayers, having an assessable value of ₹ 1.33 crore, contained vehicle numbers that were scrapped, two wheelers, vehicles whose registration was cancelled and suspended vehicles as detailed in ***Appendix-2.1.11,*** suggesting that these transactions were suspicious.

On being pointed out (August 2023 to February 2024), the Department acknowledged (September 2024) the findings in four cases and attributed the error to various reasons i.e. no facility available in the portal to check vehicle numbers, due to data entry error and the taxpayer having no information regarding vehicle used by transporter, etc. The reply of the Department was not received in remaining three cases (July 2025).

However, the systematic issue remains that the EWB portal allows the generation of EWB using incorrect vehicle numbers.

Recommendation 4: Department may consider incorporating suitable validation controls in the EWB system to prevent use of suspicious vehicles for generation of EWBs and transportation of goods.

2.3.1.7 EWBs generated but invoices not reported in GSTR-3B

Section 37 of the CGST Act, 2017, read with Rule 59(1) of the J&K GST rules 2017, specifies that all outward supplies shall be reported in form GSTR-01. As per Rule 138 of the J&K GST Rules, 2017, every registered person who causes movement of goods of consignment value exceeding ₹ 50,000 in relation to supply; or for reasons other than supply; or due to inward supply from unregistered person, shall, before the commencement of such movement, furnish information relating to said goods as specified in Part A of FORM GST EWB-01 electronically on the common portal along with such other information as may be required, on the common portal.

Three taxpayers registered within two assessment circles generated 5,739 EWBs during 2018-22 for the assessable value of ₹ 521.56 crore having a tax effect of ₹ 67.99 crore.

However, out of the total tax liability, ₹ 64.24 crore was duly discharged through GSTR-3B, whereas the remaining liability of ₹ 3.75 crore was not reported in GSTR-3B by the taxpayers. Audit was unable to ascertain the specific invoices pertaining to the unpaid tax liability due to the absence of a detailed reconciliation between GSTR-1 and GSTR-3B. Details are given in ***Appendix-2.1.12*.**

On being pointed out (October 2023 to February 2024), the Department replied (September 2024) that in one case, DRC-01 had been issued, while in another case, the

dealer was declared insolvent under NCLT and was unable to furnish the required records and in the remaining case, no reply was furnished.

A case is illustrated below:

Illustrative Case

A taxpayer GSTIN: 01XXXXX0109X3XX, registered with Circle-G, Jammu, generated 69 EWBs in November 2021 for an assessable value of ₹ 81.62 lakh, with corresponding tax liabilities of ₹ 14.40 lakh. However, the taxpayer failed to report these 69 invoices in their GSTR-1 return, thereby not discharging the associated tax liabilities.

On being pointed out (February 2024), the Department replied (September 2024) that a consolidated DRC-01 had been issued for ₹ 5.93 crore including interest and penalty, for the tax period 2021-22.

2.3.1.8 Mis-match in Input Tax Credit (ITC) availment between GSTR-2A and GSTR-3B

As per Section 16 of the J&K GST Act, every registered person shall be entitled to take credit of input tax (ITC) charged on any supply of goods or services or both to him which are used or intended to be used in the course or furtherance of his business and the said amount shall be credited to the electronic credit ledger of such person. Further, in terms of Sub-Section 2(e) of the said Section, the claim of ITC is subject to the condition, *inter-alia*, that the tax charged in respect of such supply has been actually paid to the Government.

Audit analysis revealed that three taxpayers (***Appendix-2.1.13***) pertaining to three circles had availed ITC of ₹ 282.46 crore in GSTR-3B for the period from 2018-19 to 2021-22 against the inward supplies. However, ITC available for them as per the GSTR-2A was only ₹ 281.39 crore. Hence, the excess availing of ITC amounting to ₹ 1.07 crore was not in order and the Department did not verify the same.

On being pointed out (June 2023 and December 2023), the Department replied (September 2024) that in one case, the taxpayer had made a voluntary tax payment through DRC-03 and in remaining two cases, the dealer was declared as insolvent under NCLT and were unable to furnish the required records.

A case is illustrated below:

Illustrative Case

Audit scrutiny of GSTR-2A, GSTR-3Band the comparison sheet available on the GST portal for taxpayer 01XXXXX0402X1XX, under the jurisdiction of Circle 'Q' Jammu, for the period 2018-19, revealed that the taxpayer had availed excess Input Tax Credit (ITC) of ₹ 1.04 lakh.

On being pointed out (March 2024), the Department replied (September 2024) that a voluntary tax payment through DRC-03 had been made for ₹ 1.99 lakh, including interest and penalty, for the tax period 2018-19.

2.3.1.9 Cross-PAN analysis

A Cross-PAN analysis was conducted on a sample of five taxpayers involving the movement of goods between GSTINs registered under the same PAN. The objective was to verify the accuracy of ITC claims and tax liability discharged by reconciling data from GSTR-2A, GSTR-3B, and EWB portal for the financial years 2018-19 to 2021-22. The analysis revealed the following:-

i. During the financial years 2018-19 to 2021-22, three taxpayers out of five taxpayers claimed ITC amounting to ₹ 148.41 crore in their GSTR-3B returns, whereas the available ITC reflected in their GSTR-2A was ₹ 127.87 crore. This resulted in an excess ITC availment of ₹ 20.54 crore. [***Appendix-2.1.14 (a)]***

ii. During the financial years 2019-20 and 2021-22, a discrepancy was observed between the tax liability recorded on the EWBs and the tax discharged in GSTR-3B returns. Out of five taxpayers, two taxpayers discharged only ₹ 18.08 lakh in GSTR-3B against a total liability of ₹ 86.45 lakh reflected on the EWB portal, resulting in a shortfall of ₹ 68.37 lakh. [***Appendix-2.1.14 (b)***].

On being pointed out (April 2024), no reply was furnished by the Department (February 2025).

2.3.2 Observations detected in analysis of data of EWBs (Totality Observations)

A total of 2,860 Risk-based Sample taxpayers falling under the jurisdiction of the J&K Commissionerate were selected from the database relating to EWBs. Audit analysed data on EWBs generated during the period from April 2018 to March 2022 based on KPAs and observed that possible discrepancies in tax compliance by the taxpayers could be ascertained directly from KPAs. The data extracted under these KPAs and audit observations were forwarded (July 2023) to the Commissioner of State Taxes as Totality Observations for taking remedial action and a summary report on action taken was called for from the Department. The summary of the observations shared (July 2023) with the Department are brought out in **Table 2.1**.

Table 2.1: Summary of totality observations

Sl. No.	Nature of totality observations	No. of Taxpayers (TPs)	Assessable value involved (₹ in crore)
1	Generation of Inter-State EWBs by CLS Taxpayers	40	0.92
2	Generation of EWBs by Non-filers of GST Returns	332	93.68
3	Generation of EWBs by Cancelled taxpayers	37	4.52
4	Generation of duplicate EWBs using the same Invoice	655	85.99
5	Generation of E-way bills by Nil filers of GST returns	1,796	394.33
Total		**2,860**	**579.44**

On being pointed out (July 2023), the Department had raised the demand for tax, penalty and interest to the extent of ₹ 3.23 crore in 156 cases and recovered the amount of ₹ 1.49 lakh out of ₹ 3.23 crore as of May 2024.

2.4 Preventive function of the Department

The Goods and Services Tax (GST), effective from 1st July 2017 (In J&K with effect from 8th July 2017), aims to streamline the movement of goods and services by reducing procedural delays. The EWB system marks a transition to a self-reporting model for taxpayers, intended to safeguard revenue and remove barriers like check posts. One of the key preventive measures is the strategic interception of conveyances transporting goods. Authorised GST officials are empowered to intercept and verify E-way bills during regular routine inspections. This process helps identify and address discrepancies such as mismatches between the EWB details and the goods being transported. By conducting such checks, the GST Department can detect and deter potential tax evasion, unauthorised movement of goods, and other non-compliance issues.

2.4.1 Efficiency and effectiveness in enforcing EWB provisions by the Department

Audit studied EWB related functions of the Enforcement wings of the J&K State Taxes Department with specific focus on:

(i) Operational preparedness

(ii) Effectiveness of Anti-Evasion measures and

(iii) Intra-Departmental Co-ordination in monitoring EWB related transactions.

The State Tax Department had established seven enforcement wings headed by Deputy Commissioners for interceptions of vehicles and verification of EWBs and follow-up action to be taken on any discrepancies noticed in such verifications. Four enforcement

wings[6] out of the seven wings were selected and 50 cases each verified by them were selected for review. Deficiencies and shortcomings noticed in the activities undertaken by the Enforcement Wings are detailed in the following paragraphs.

2.4.2 Operational Preparedness of the Department

2.4.2.1 Establishment of dedicated Setup/ unit

Department had established/ created seven Enforcement wings in J&K for carrying out enforcement activities like verification of EWBs during interception of vehicles and follow up action wherever required. Out of these seven Enforcement wings, five enforcement wings had formed dedicated field Inspection teams, remaining two enforcement wings did not provide this information (February 2025).

2.4.2.2 Adequacy of Manpower and Patrol Vehicles

Deployment of staff under different cadres of the enforcement wings remained well below the sanctioned strength during 2018-19 to 2021-22. The deficiency in the actual staff strength ranged from 29 *per cent* to 55 *per cent* in respect of State Tax officers, 43 *per cent* to 72 *per cent* in respect of Inspectors, 54 *per cent* to 71 *per cent* in respect of Sub-Inspectors, 36 *per cent* to 92 *per cent* in respect of Head Guards, 77 *per cent* to 86 *per cent* in respect of Guards and 71 *per cent* to 83 *per cent* in respect of drivers (***Appendix-2.1.15***). The reduced staff strength likely affected the efficient performance of the enforcement activities of the Department.

The availability of vehicles in selected enforcement wings of the Department was as per sanctioned strength except North Kashmir enforcement wing which had no vehicle for conducting verification of conveyances and goods in transit during the aforementioned period.

On being pointed out in audit (January 2024), the Department replied (September 2024) that it has already referred the vacancies to the recruitment agencies regarding shortage of staff and regarding patrol vehicles, requisitions were sought from all the enforcement wings.

2.4.2.3 Targets and achievements

No specific targets for conducting verification of EWBs were fixed by the Department during 2018 to 2022. The Department stated that the enforcement teams were verifying EWBs at random places and action was taken wherever discrepancy was noticed.

[6] (1) Deputy Commissioner Enforcement – South (Samba) Jammu, (2) North (Udhampur) Jammu, (3) Kathua- Lakhanpur and (4) South Kashmir.

2.4.2.4 Notification for embedding RFID on vehicles

As per Rule 138A (4) of the J&K GST Rules, 2017, the Commissioner may, by notification, require a class of transporters to obtain a unique 'Radio Frequency Identification Device' (RFID) and get it embedded on to the conveyance and map the EWB to the RFID prior to the movement of goods. Through this, the transaction genuinely covered by EWB is duly recorded/ mapped to RFID and could be verified without loss of time and avoiding the possibility of harassment.

The Department had not notified the class of transporters for obtaining RFID in the J&K to embed RFID tag on the wind screen of the conveyance carrying the goods and getting it mapped to the EWB covering the transaction of supply of goods till November 2023.

On being pointed out (November 2023), the Department informed (December 2023) that the notification had been issued (December 2023) requiring every vehicle with EWB to get the RFID embedded/ affixed on wind screen on the conveyance carrying goods for mapping with the EWB system before transportation of goods within the territory of J&K.

2.4.3 Effectiveness of Anti-Evasion Measures

2.4.3.1 Deviations from guidelines for interception of vehicles

Circular No. 41/15/2018-GST dated 13 April 2018 illustrates procedure for interception of conveyances for inspection of goods in movement, and detention, release and confiscation of such goods. Out of 11,088 booked cases, 200 booked cases were selected for detailed checks, 50 each, from the four selected enforcement wings. The deviations noticed under each category are as under:

- The Department had not prepared physical verification reports in Form MOV-04 in 47 booked cases and as such correctness of assessment of goods could not be verified.

- Opportunity of being heard was not given to the taxpayers in 19 booked cases.

- The Department had not assigned post for Grievance Redressal Officer to attend grievances in Form GST (EWB-04) during audit period 2018-22.

On being pointed out (June 2023 to September 2023), the Department replied (September 2024) that the period was the evolutionary phase of implementation of GST and over the time infrastructure, familiarity with online systems, standardisation of procedures has improved and these gaps have been rectified. Further the Grievance Redressal Officer has been appointed in September 2023.

2.4.4 Usage of MIS reports

NIC generates various Analytical Reports viz. 'B1', 'B4', 'B5' and 'H5'[7] etc. on EWB transactions and share these reports with the GST Departments under Centre and State formations. Audit studied the extent to which these reports were utilised by Preventive Formations for planning the verifications of EWBs. The results are given below:

2.4.4.1 Monitoring movement of goods by unregistered taxpayers

Analytical report named "EWBs generated by Citizens (H5 Report), prepared by NIC, provides details of EWBs generated by the unregistered persons. As per the details of Inter-state and Intra-state purchases made by the unregistered persons (URPs) during the period 2018-19 to 2021-22, made available by the Department, 12.66 lakh EWBs were generated against URPs of J&K as detailed in **Table 2.2**.

Table 2.2: Monitoring movement of goods by unregistered taxpayers

	Inter-state		Intra-state	
Year	**Number of EWB generated on URP**	**Assessable Value (₹ in crore)**	**Number of EWB generated on URP**	**Assessable Value (₹ in crore)**
2018-19	87,850	2,527.89	1,40,342	1,864.40
2019-20	1,01,307	2,598.84	1,51,832	1,754.78
2020-21	1,32,104	2,341.07	1,94,789	1,926.10
2021-22	1,64,142	2,719.01	2,93,643	2,899.76
Total	**4,85,403**	**10,186.81**	**7,80,606**	**8,445.04**

NIC data on EWBs relating to URPs for the year 2021-22 only was made available to Audit. Analysis of the NIC data revealed as under:

Supplies made to and from Un-registered Persons (URPs)

Audit noticed that two taxpayers had purchased goods amounting to ₹ 2.62 crore in FY 2021-22 through 39 EWBs from URPs (***Appendix-2.1.16***) and 15 taxpayers had made supplies ranging between ₹ one crore to ₹ seven crore through 4,781 EWBs to URPs (***Appendix-2.1.17***). The average amount in these cases was approximately ₹ 6.50 lakh for individual EWB.

On being pointed out (June 2024), the Department replied (September 2024) that URPs have the facility to generate EWBs at their level and Department has no prerogative to ensure generation of EWB by taxpayer. Further, the Department has directed all the enforcement wings to keep proper track of transactions made by URPs.

The Department should use this information to verify transactions of these URPs to ascertain whether they need to get registered.

[7] B1: No vehicle movement report, B4: Report on multiple movement of same vehicles, B5: Report on multiple movements in other vehicles and H5: EWBs generated by Citizens (EWB generated by unregistered persons)

2.4.5 Result of analysis of records related to Sampled Cases

On scrutiny of selected cases, Audit found various discrepancies in imposition of tax, penalty, fine etc. on the goods confiscated by the enforcement wings. There was no consistency in the imposition of penalty under various sections. Details are given in the subsequent paragraphs.

2.4.5.1 Non-safeguarding revenue of ₹ 28.32 lakh due to non-renewal/ non-encashment of Bank Guarantees

Section 129(1)(c) of the J&K GST Act, 2017 envisages that where any person transports any goods or stores any goods while they are in transit in contravention of the provisions of the Act or the Rules made there under, all such goods and conveyance used as a means of transport for carrying the said goods and documents relating to such goods and conveyance shall be liable to detention or seizure, shall be released upon furnishing a security equivalent to the amount payable under clause (a) or clause (b) in such form and manner as may be prescribed.

Rule 140(2) of the J&K GST Rules provides that in case the person to whom goods were released provisionally fails to produce the goods at the appointed date and place indicated by the Proper Officer, the security shall be enchased and adjusted against the tax, interest and penalty and fine, if any, payable in respect of such goods. Audit noticed that no such action had been taken by the Department from the date of release of goods as of January 2024.

Out of 200 sample selected cases, in three cases falling under Deputy Commissioner Enforcement, Lakhanpur, the Proper Officer had raised[8] demand of ₹ 28.32 lakh on account of tax and penalty against three taxpayers during the period 2018-19 to 2021-22. The taxpayers/ person in-charge of these conveyance(s) furnished a bond in Form GST MOV-08 along with bank guarantees[9] of J&K Bank Limited for ₹ 28.32 lakh equivalent to the amount of tax and penalty and thereafter conveyance(s) and goods were released (***Appendix-2.1.18***).

Audit, however, noticed that the Department had not approached the Jammu and Kashmir Bank Limited for renewal of these bank guarantees or for their encashment within the validity periods ranging from 6 to 12 months resulting in non-safeguarding of revenue of ₹ 28.32 lakh.

On being pointed out in audit (August 2023 and September 2023), the Department replied (September 2024) that an enquiry regarding the same shall be conducted by the Department. Further, directions have been imparted to the concerned enforcement wings of the Department to proceed the cases strictly under rules.

8 June 2021, November 2018 and July 2019

9 Bank guarantees valid up to December 2021, May 2019 and July 2020

2.4.5.2 Short Levy of tax of ₹ 24.29 lakh on account of Compensation Cess

Section 8(1) and 8(2) of the Goods and Service Tax (Compensation Act), 2017 read along with Section 11(1) and 11(2) provides provisions of the Central Goods and Services Tax Act, and the rules made there under, including those relating to assessment, input tax credit, non-levy, short-levy, interest, appeals, offences and penalties, shall, as far as may be, mutatis mutandis, apply, in relation to the levy and collection of the cess leviable under Section 8 on the intra-State/ Inter-State supply of goods and services, as they apply in relation to the levy and collection of central tax on such intra-State supplies under the said Act or the Rules made there under.

Analysis of records of Deputy Commissioner (enforcement), Lakhanpur revealed that in two booked cases[10], the Proper Officer released[11] conveyance and goods after levying the tax and penalty for the offences. It was noticed that while levying the tax, the Proper Officer had included the cess payable on the goods whereas while levying the penalty, the cess amount was ignored. This had resulted in short levy of penalty of ₹ 24.29 lakh (***Appendix-2.1.19***).

On being pointed out (August 2023), the Department replied (September 2024) that directions have been imparted to the enforcement wings to proceed the case under relevant section of the J&KGST Act.

2.4.5.3 Short levy of tax and penalty of ₹ 10.74 lakh

(i) Section 5 of the IGST Act stipulates that Integrated Goods and Services Tax shall be levied on all inter-state supplies of goods or services or both. Further, Section 17 of IGST Act provides the manner of apportionment of tax and settlement of funds.

Audit noticed that in DC Lakhanpur, Proper Officer had booked an inter-state supply case and collected SGST and CGST amounting to ₹ 9.80 lakh instead of IGST, treating supply of goods as intra-state supply. This was in contravention of the provision of the IGST Act, 2017 and resulted in classification of tax ₹ 4.90 lakh and penalty ₹ 4.90 lakh under incorrect head of account.

On being pointed out (August 2023), the Department replied (September 2024) that due to oversight, CGST and SGST was levied instead of IGST but there is no revenue loss. Officers have been directed to remain extra vigilant to ensure such misclassification is avoided in future.

(ii) GST Notification 39/2021 dated 21st December 2021 provides that penalty of 200 *per cent* of tax shall be payable instead of 100 *per cent* in case of section 129 of

[10] JK04F-3700, and PB32C-7295
[11] March 2019 and June 2021

the CGST act relating to detention, seizure and release of goods and conveyances in transit with effect from 1st January 2022.

Audit noticed that in DC Samba, Proper Officer released goods and conveyance on 29th January 2022 after raising demand for tax and penalty of ₹ 1.88 lakh at rate of 100 *per cent* each instead of levying 200 *per cent* penalty as per amended provision effective from 1st January 2022. This resulted in short levy of tax and penalty of ₹ 0.94 lakh as tax**.**

On being pointed out (June 2023), no reply was furnished by the Department (February 2025)

2.5 Conclusion and Recommendations

2.5.1 Conclusion

EWB is a document required for movement of goods and is designed to capture details of goods before being moved. Automation and standardisation of the entire process was intended to help check tax evasion and shore up GST collections. The EWB was introduced with effect from 01 April 2018 for all inter-State movement of goods having value exceeding ₹ 50,000. For the intra-State movements in Jammu and Kashmir, EWB was made mandatory for the consignment value of ₹ 50,000 as the threshold limit.

Audit selected 120 EWBs of 52 Taxpayers, six EWBs of high money value/ URPs and five other EWBs were selected for Cross PAN analysis, for the period 2018-19 to 2021-2022 for examination of EWB mechanism and its effectiveness in protecting revenue. Audit also selected four enforcement wings and examined 200 booked cases from these selected enforcement wings for ensuring efficiency and effectiveness of the enforcement activities related to EWBs.

Audit observed systemic lapses on examining the EWB system such as ‘ineligible taxpayers continuing under CLS; and ‘taxpayers filing nil returns or not filing returns though they had generated EWBs’. Audit examination also revealed compliance deviations as EWBs were generated by the cancelled taxpayer; and multiple EWBs were generated on the same invoices. Audit findings also highlight the gaps in the usage of MIS reports and the information available in EWB system to ensure compliance by the taxpayers.

Audit also noticed gaps in the operational preparedness of the Department with respect to preventive and enforcement activity done by enforcement wings such as shortage of manpower, petrol vehicles etc.

Accordingly, the following recommendations are provided to strengthen the EWB system and compliance verification mechanism of the Department.

2.5.2 *Recommendations*

To strengthen the EWB system, the Department may:

- ***Incorporate validation control in EWB system to alert the CLS taxpayer as well as the Departmental officers while generating EWB for inter-state supply.***
- ***Consider issuing suitable instructions to the Proper Officers for considering EWBs generated by the taxpayer before cancellation of registration retrospectively and taking action for recovery of tax wherever applicable.***
- ***Consider including suitable validation control in the EWB system to prevent use of same invoice in generation of multiple EWBs.***
- ***Incorporating suitable validation controls in the EWB system to prevent use of suspicious vehicles for generation of EWBs and transportation of goods.***

CHAPTER- III

COMPLIANCE AUDIT

(REVENUE RECEIPTS)

Chapter-III

COMPLIANCE AUDIT (REVENUE RECEIPTS)

Finance Department
(State Taxes Department)

SSCA on Department's oversight on GST payments and return filing Phase-II

3.1 Introduction

Introduction of Goods and Service Tax (GST) has replaced multiple taxes levied and collected by the Centre and States. GST which came into effect from 08 July 2017 in Jammu and Kashmir (J&K), is a destination-based consumption tax on the supply of goods or services or both levied on every stage of value addition. The Centre and States simultaneously levy GST on a common tax base. Central GST (CGST) and State GST (J&K GST)/ Union Territory GST (UTGST) are levied on intra-state supplies, and Integrated GST (IGST) is levied on inter-state supplies.

Section 59 of the J&K GST Act 2017 stipulates GST as a self-assessment-based tax, whereby the responsibility for calculating tax liability, discharging the computed tax liability and filing returns is vested on the taxpayer. The GST returns must be filed online regularly on the common GST portal, failing which penalties will be payable. Even if the business has had no tax liability during a particular tax period, it must file a 'Nil' return mandatorily. Further, Section 61 of the Act read with Rule 99 of J&KGST Rules 2017 stipulate that the proper officer may scrutinise the return and related particulars furnished by taxpayers, communicate discrepancies to the taxpayers and seek an explanation.

This Subject Specific Compliance Audit (SSCA) was taken-up considering the significance of the control mechanism envisaged for tax compliance and the oversight mechanism of the Jammu & Kashmir State Taxes Department (STD).

3.2 Organisational Setup

The organisational structure of Government of Jammu and Kashmir (GoJ&K) Taxes Department is shown in the **Chart 2.1** of this Report. The Department works under administrative control of the Finance Department and is headed by Commissioner, State Taxes.

3.3 Audit Objectives

This audit was oriented towards providing assurance on the adequacy and effectiveness of systems and procedures adopted by the Department with respect to tax compliance under GST regime. Audit of 'Department's oversight on GST Payments and Return filing' was taken-up with the following audit objectives to seek an assurance on:

(i) Whether the rules and procedures were designed to secure an effective check on tax compliance and were being duly observed by taxpayers; and

(ii) Whether the scrutiny procedures, internal audit and other compliance functions of the Circles were adequate and effective.

3.4 Audit Methodology and Scope

This SSCA was predominantly conducted based on data analysis, which highlighted risk areas and red flags pertaining to the period April 2018 to March 2021 in case of Centralised (Limited) Audit and Detailed Audit. April 2020 to March 2021 was the period covered in respect of Circle Audit (Departmental Field Formation). Through data analysis, a set of 16 deviations were identified across the domains of Input Tax Credit, Discharge of tax liability, Registration and Return filing. Such deviations were followed-up through a centralised audit[1], whereby these deviations were communicated to the relevant State Tax Officers (STOs)/ Circles.

The centralised audit (Limited Audit) was supplemented by a Detailed Audit involving field visits for verification of records available with the jurisdictional field formations/ Circles. Returns and related attachments and information were accessed through the SSOID application of the STD to examine data/ documents relating to taxpayers (viz. registration, tax payment, returns and other Departmental functions). Compliance functions of the Departmental formation such as scrutiny of returns, were also reviewed in selected circles.

The review of the scrutiny of returns by the Department and verification of taxpayers' records covered the period from April 2018 to March 2021, while the audit of the functions of selected Circles covered the period April 2020 to March 2021. The SSCA covered only the State administered taxpayers. The audit was conducted from July 2023 to April 2024.

Entry conference of this SSCA was held on 25 May 2023 with Commissioner STD in which the audit objectives, sample selection, audit scope and methodology were discussed. The Exit conference was held on 18 November 2024 with Commissioner State Taxes Department, J&K in which audit findings were discussed.

Audit is thankful for the co-operation and support extended by State Tax Department in providing records, information, and clarifications from time to time for the smooth conduct of audit.

[1] Centralised Audit did not involve seeking taxpayer's granular records such as Financial Statements related ledger accounts, invoices, agreements etc.

3.5 Sampling

A data-driven approach was adopted for planning, as also to determine the nature and extent of substantive audit. The sample for this SSCA comprised a set of deviations identified through data analysis for Centralised audit that did not involve field visits; a sample of taxpayers for detailed audit that involved field visits and scrutiny of taxpayer's records at Departmental premises. Besides, a sample of Circles was also selected for evaluating the compliance functions of the circles.

There are three distinct parts of this SSCA as under:

(i) Part I-Audit of Circles

Ten Circles with jurisdiction over more than one selected sample case for Detailed Audit were considered as the sample of Circles for evaluation of their oversight functions.

(ii) Part II-Centralised Audit (Limited Audit)

The sample for Centralized audit was selected by identification of high-value or high-risk deviations from rules and inconsistencies between returns through data analysis for evaluation of the adequacy and effectiveness of the scrutiny procedure of the Department. Accordingly, 563 deviations involving 337 taxpayers were selected for Centralised Audit.

(iii) Part III-Detailed Audit

It was conducted by accessing taxpayers' records through Circles for evaluation of the extent of tax compliance by taxpayers. The sample of taxpayers for Detailed Audit was selected on the basis of risk parameters such as Excess ITC, Tax Liability mismatch, Disproportionate exempted turnover to total turnover and Irregular ITC reversal. 50 taxpayers were selected for Detailed Audit under this SSCA. The details of sample for centralised audit, detailed audit and audit of Circles selected for this SSCA are brought out in ***Appendix 3.1.1***.

3.6 Audit criteria

The source of audit criteria comprised the provisions contained in the J&KGST Act, IGST Act, and Rules made there under. The significant provisions are given in **Table 3.1**.

Table 3.1: Source of criteria

Sl. No.	Subject	Act and Rules
1	Levy and collection	Section 9 of J&KGST Act 2017
2	Reverse Charge Mechanism	Section 9(3) of J&KGST Act and Section 5 (3) of IGST Act
3	Availing and utilising ITC	Sections 16 to 21 under Chapter V of the J&K GST Act & Rules 36 to 45 under Chapter V of J&K GST Rules
4	Registrations	Section 22 to 25 of J&KGST Act and Rules 8 to 26 of J&K GST Rules

Sl. No.	Subject	Act and Rules
5	Supplies	Section 7 and 8 J&KGST Act. Schedule I, II and III of the J&K GST Act.
6	Place of Supply	Section 10-13 of IGST Act
7	Time of Supply	Section 12 to 14 of J&KGST Act
8	Valuation of supplies	Section 15 of J&KGST Act and Rules 27-34 of J&KGST Rules
9	Payment of Tax	Sections 49 to 53 under Chapter X of the J&K GST Act and Rules 85 to 88A under Chapter IX of the J&K GST Rules.
10	Filing of GST Returns	Sections 37 to 47 under Chapter IX of the J&K GST Act and Rules 59 to 68 and 80 to 81 under Chapter VIII of the J&K GST Rules. Part B of J&KGST Rules prescribes format of returns
11	Zero-rated supplies	Section 16 of IGST Act
12	Assessment and Audit functions	Sections 61, 62, 65 and 66 under Chapter XII & XIII of the J&K GST Act., Rules 99 to 102 under Chapter XI of J&KGST Rules 2017

In addition, the notifications and circulars issued by Central Board of Indirect Taxes and Customs (CBIC)/ STD relating to filing of returns, notifying the effective dates of filing of various returns, extending due dates for filing returns, rates of tax on goods and services, payment of tax, availing and utilising ITC, scrutiny of returns and oversight of tax compliance and Standard Operating Procedures (SOP) containing instructions to Departmental officers on various aspects related to filing returns, scrutiny of returns, cancellation of registrations and verification of Director General of Analytics and Risk Management (DGARM) reports etc. also formed part of the audit criteria.

3.7 Audit Findings

Audit findings have been categorised into the following three categories: -

- Oversight on returns filing-Audit of Circles.
- Centralised Audit.
- Detailed Audit.

The findings under each category are discussed in the succeeding paragraphs.

3.7.1 Oversight on returns filing-Audit of Circles

The audit of Circles was conducted for the period 2020-21 covering records of ten selected circles as given in ***Appendix 3.1.1***. The parameters against which records were checked were effectiveness of scrutiny and assessment, action on late-filers and non-filers, cancellation of registration etc. Audit universe and sample selected are given in **Table 3.2** below:

Table 3.2: Audit Universe and sample selection

Sl. No	Year	Audit Universe		Sample Selection	
		No. of STD Circles	No. of Registered Taxpayers	No. of STD Circles selected	No. of Registered Taxpayers
1	2020-21	61	1,00,441	10	18,951

3.7.1.1 Non-levy of late fee on delayed filing of returns

Section 47 of J&K GST Act 2017 provides that (1) Any registered person who fails to furnish the details of outward or inward supplies required under section 37 or section 38 or returns required under section 39 or section 45 by the due date shall pay a late fee of fifty/ twenty rupees (Rupees twenty for NIL Return) for every day during which such failure continues subject to a maximum amount of five thousand rupees. (2) Any registered person who fails to furnish the return required under section 44 by the due date shall be liable to pay a late fee fifty/ twenty rupees for every day during which such failure continues, subject to a maximum of an amount calculated at a quarter *per cent* of his turnover in the State or Union Territory.

Audit scrutiny of GSTR-3B returns on GST portal in respect of ten selected circles revealed that 13,594 GSTR-3B returns were filed during the year 2020-21. Audit observed that 4,949 returns were filed late despite several extensions granted for filing of returns. The delay in filing of returns ranged from 01 to 1,139 days. However, late fees of ₹ 0.41 crore was not paid ***(Appendix-3.1.2).*** No action was taken to recover the late fee of ₹ 0.41 crore from the taxpayers who filed late returns.

On being pointed out (between June 2023 to August 2023), the Department stated (November 2024) that GST portal does not allow the taxpayer to file GSTR-3B until liability of late fee is paid but the Department did not provide any documentary evidence regarding payment of late fee in the cases pointed out by Audit.

3.7.1.2 Non-levy of interest on late payment of tax

Section 50(1) of the J&K GST Act, 2017 provided that "Every person who is liable to pay tax in accordance with the provisions of this Act or the rules made thereunder, but fails to pay the tax or any part thereof to the Government within the period prescribed, shall for the period for which the tax or any part thereof remains unpaid, pay, on his own, interest at such rate, not exceeding 18 *per cent*, as may be notified by the Government on the recommendations of the Council".

Audit scrutiny of MIS data (COMP-17[2]) of Circle Kathua-II for the period 2020-21 (June 2024) revealed that one taxpayer had filed the GSTR-3B return for the month of March 2022 belatedly by 144 days. The taxpayer had paid ₹ 0.09 crore in cash. However, interest of ₹ 0.07 crore was not paid by him.

[2] Detailed report for calculation of interest for late return filers.

On being pointed out (June 2024), STO Kathua-II stated (November 2024) that the proceedings under Section 73 of the Act have been initiated.

3.7.1.3 Delay in cancellation of registrations

Rule 22 of the J&K GST Rules, 2017, envisages that the cancellation order in form REG-19 has to be issued within 30 days from the date of application in case of cancellation of registration on application by taxpayer or date of reply to REG-17 in case of *suo-moto* cancellation.

Audit scrutiny of records in respect of 10 selected circles revealed that 2,225 registrations were cancelled during the year 2020-21. Out of these cancelled registrations, 1,623 registrations were found cancelled belatedly. The delay in cancellation of registrations ranged from 01 to 869 days ***(Appendix 3.1.3)***.

On being pointed out (June 2023 to August 2023), the Department stated (November 2024) that only after ensuring that there is no unpaid tax liabilities, cancellation is done. However, the Department also stated that notices and communication have been issued and replies are expected from the taxpayers.

3.7.1.4 Non filing of GSTR-10 Return

Section 29 of the J&KGST Act 2017, read with Rule 20 of the J&KGST Rules, allows for cancellation of registration by the taxpayer. Section 29(2) of the J&KGST Act allows for *suo-moto* cancellation of the registration of taxpayer by tax officer on the grounds of contravention of the Acts or Rules by the taxpayer.

As per Section 45 of the Act, GSTR-10 the final return has to be filed within three months of the effective date of cancellation or the date of order of cancellation, whichever is later, by the taxpayer.

As per the information in MIS REG 1.08 report of 10 selected circles, 2,225 registrations were found cancelled during the year 2020-21 and as per information available in backend portal (MIS Comp.13[3]), in 1,347 cases, GSTR-10 return was not filed by the cancelled taxpayers. Details of pending final returns GSTR-10 for the period 2020-21 is given in ***Appendix 3.1.4***.

On being pointed out (June 2023 to August 2023), the Department stated (November 2024) that the burden of filing GSTR-10 return lies on the taxpayer. However, the Department also said that details of taxpayers who have not filed GSTR-10 returns are being extracted from MIS reports and notices are served by the Proper Officers for necessary compliance.

[3] MIS Report on non-filing of Final return GSTR-10.

3.7.2 Centralised audit

In Centralised Audit, deviations from rules and inconsistencies in returns filed and evaluation of the adequacy and effectiveness of the scrutiny procedure of the Department was checked.

Audit analysed GST returns data pertaining to 2018-19 to 2020-21 as made available by GSTN. Rule-based deviations, and logical inconsistencies between GST returns filed by taxpayers were identified on a set of 16 parameters, which can be broadly categorised into two domains - ITC and Tax payments.

Out of the 13 prescribed GST returns[4], the following basic returns that apply to normal taxpayers were considered for the purpose of identifying deviations, inconsistencies and mismatches between GST returns/ data:

- **GSTR-1**: Monthly return furnished by all normal and casual registered taxpayers making outward supplies of goods and services or both and contains details of outward supplies of goods and services.

- **GSTR-3B**: Monthly summary return of outward supplies and input tax credit claimed, along with payment of tax by the taxpayer to be filed by all taxpayers except those specified under Section 39(1) of the Act. This is the return that populates the credit and debits in the Electronic Credit Ledger and debits in Electronic Cash Ledger.

- **GSTR-6**: Monthly return for Input Service Distributors providing the details of their distributed input tax credit and inward supplies.

- **GSTR-8**: Monthly return to be filed by the e-commerce operators who are required to deduct TCS (Tax collected at source) under GST, introduced in October 2018.

- **GSTR-9**: Annual return to be filed by all registered persons other than an Input Service Distributor (ISD), Tax Deductor at Source/ Tax Collector at Source, Casual Taxable Person and Non-Resident taxpayer. This document contains the details of all supplies made and received under various tax heads (CGST, SGST and IGST) during the entire year along with turnover and audit details for the same.

[4] (i) GSTR-1, (ii) GSTR-3B, (iii) GSTR-4 (taxpayers under the Composition levy scheme), (iv) GSTR-5 (non-resident taxable person), (v) GSTR-5A (Non-resident OIDAR service providers), (vi) GSTR-6 (Input service distributor), (vii) GSTR-7 (taxpayers deducting TDS), (viii) GSTR-8 (E-commerce operator), (ix) GSTR-9 (Annual Return), (x) GSTR-10 (Final return), (xi) GSTR-11 (person having UIN and claiming a refund), (xii) CMP-08 (Statement for payment of self-assessed tax for taxpayers under composition scheme) and (xiii) ITC-04 (Statement to be filed by a Principal/ job-worker about details of goods sent to/ received from a job-worker).

- **GSTR-9C**: Annual audit form for all taxpayers having a turnover above ₹ 5 crores in a particular financial year. It is basically a reconciliation statement between the annual returns filed in GSTR-9 and the taxpayer's audited annual financial statements.

- **GSTR-2A**: A system-generated statement of inward supplies for a recipient. It contains the details of all B2B transactions of suppliers declared in their Form GSTR-1/ 5, ISD details from GSTR-6, details from GSTR-7 and GSTR-8 respectively by the counterparty and import of goods from overseas on bill of entry, as received from ICEGATE Portal of Indian Customs.

3.7.2.1 Centralised Audit - Data analysis

The PAN-State data analysis pertaining to J&K jurisdiction on the 16 identified parameters and extent of deviations/ inconsistencies observed are summarised in **Table 3.3 (a)** and **(b)**.

Table 3.3 (a): Details of Data Analysis undertaken- (ITC and tax payment mismatches)

Sl. No.	Algorithm used	Risk pursued
Domain: ITC		
1.	ITC available as per GSTR-2A with all its amendments was compared with the ITC availed in GSTR-3B in Table 4A(5) (accrued on domestic supplies) excluding the reversals in Table 4B(2) but including the ITC availed in the subsequent year from Table 8C of GSTR-9 and blocked credits.	ITC mismatch between GSTR-2A and GSTR-3B
2.	ITC available from GSTR-2A was compared with Table 8A of GSTR-9 which captures ITC available from GSTR-2A (as an auto-populated non-editable field) but excludes those entries in GSTR-2A where the supplier has not filed GSTR-1 by due date of its filing and also excludes the ITC for the period during which the recipient taxpayer was under Composition Levy Scheme (CLS).	ITC passed on without supplier remitting tax
3.	ITC availed through Table 4 of GSTR-3Bs pertaining to period 2018-19 to 2020-21 filed after October of the following year	ITC availed in GSTR-3B filed after the cut-off/ limitation period.
4.	ISD ITC availed in GSTR-9 Table 6G or GSTR-3B Table 4(A)(4) of recipient was compared with the sum of Table 5A, Table 8A, and Table 9A of GSTR-6 of distributor GSTINs	Incorrect availing of ISD credit
	Domain: Annual Return and financial statements (FS)	
5.	Positive figure in GSTR-9C Table 12F and examination of reasons provided in Table 13 for mismatch	Mismatch of ITC availed between Annual returns and Books of accounts
6.	Positive figure in GSTR-9C Table 14T and examination of reasons provided in Table 15 for mismatch	Reconciliation between ITC availed in Annual returns with expenses in financial statements
7.	Negative figure in GSTR-9C Table 9R and examination of reasons provided in Table 10 for mismatch	Mismatch in tax paid between books of accounts and returns

Sl. No.	Algorithm used	Risk pursued
	Domain: Tax and Interest payment	
8.	RCM payments in GSTR-9 Table 4G (tax payable) were compared with ITC availed in GSTR-9 Table 6C, 6D and 6F (ITC availed). In cases where GSTR-9 was not available, RCM payment in GSTR-3B Table 3.1(d) was compared with GSTR-3B 4(A)(2) and 4A(3). Greater of difference in GSTR-9 and GSTR-3B considered where both were available	Short payment of tax under RCM versus ITC availed in GSTR-3B/ GSTR-9
9.	The greater of tax liability between GSTR-1 (Tables 4 to 11), considering advances and amendments, and GSTR-9 (Tables 4N, 10 and 11) was compared with tax paid details in GSTR-3B Tables 3.1(a) and 3.1(b). In cases where GSTR-9 was not available, GSTR-3B tax paid was compared with GSTR-1 liability.	Unsettled/ Undischarged liabilities
10.	GSTR-3B Table 3.1(a)+(b) was compared with tax liability declared in the e-way bills and cases where GSTR-3B are less than e-way bills are identified	Suppression of tax liability based on e-way bill verification
11.	Taxpayers who have not filed GSTR-3B but have filed GSTR-1 or where GSTR-2A available, indicating taxpayers carrying on the business without discharging tax	GSTR-3B was not filed but GSTR-1 is available
12.	Interest calculated at the rate of 18 *per cent* on cash portion of tax payment on delayed filing of GSTR-3B vis-à-vis interest declared in GSTR-3B	Short payment of interest

Table 3.3 (b): Details of Data Analysis undertaken (Turnover mismatch)

Sl. No.	Algorithm used	Risk pursued
1	The CLS taxpayers whose turnover on all India basis (Central and State jurisdiction) under all GSTINs of the same PAN have crossed the turnover limit of ₹ 1 crore in 2018-19 and ₹ 1.5 crore in 2019-20 were identified.	Taxpayer Ineligible to remain under CLS
2	Table 3.1(a) of GSTR-3B was compared with Column 6 of Table 9 of GSTR-2A. Cases where GSTR-3B values are less than that of GSTR-2A are identified.	Under-declaration of taxable supplies by comparing TDS returns
3	Unbilled revenue at the beginning of the year in GSTR-9C Table 5B should tally with the unbilled revenue of the previous GSTR-9C shown in Table 5H. Any mismatch indicates suppression of taxable turnover.	Suppression of taxable value based on unbilled revenue declared in GSTR-9C
4	Negative figure in GSTR-9C Table 7G and examination of reasons provided in Table 8 for mismatch	Mismatch in taxable turnover declared in GSTR-9C Table 7G

The PAN-State data pertaining to Jammu & Kashmir state jurisdiction on the 16 identified parameters and extent of mismatches extracted from data are summarized in ***Appendix 3.1.5 (a)*** and ***(b)***.

3.7.2.2 Result of Centralised Audit

Based on the responses received from the Department to the audit queries, the extent to which each of the 16 audit dimensions has been translated into compliance deviations, is summarised in ***Appendix 3.1.6 (a)*** and ***(b)***. The category- wise details of cases included in **Table 3.3(c)** are appended to the report (***Appendix 3.1.7*** to ***3.1.15)***.

Table 3.3 (c): Summary of Centralised Audit

Out of 563 instances, the Department did not reply in 30 instances amounting to ₹ 33.26 crore (details in ***Appendix 3.1.7***) which relates to mismatch of tax liability/ input tax credit amounting to ₹ 24.52 crore in 24 instances and mismatch of Turnover amounting to ₹ 8.74 crore in six instances. The Department furnished the responses in 533 instances, of which 483 instances relate to mismatch of tax liability/ input tax credit {Column No. 2 in ***Appendix 3.1.6 (a)}*** and 50 instances relate to mismatch of turnover {Column No. 2 in ***Appendix 3.1.6 (b)}***.
Out of 483 instances in which responses were received relating to mismatch of tax paid/ ITC, in 279 instances, the Department accepted the audit objection. Out of these 279 instances, in 14 instances, recovery have been affected amounting to ₹ 3.14 crore {Column No. 4 and 5 in ***Appendix 3.1.6(a)}***. In 139 instances, Show Cause Notices (DRC-01/ DRC-07) have been issued amounting to ₹ 130.98 crore {Column No. 6 and 7 in ***Appendix 3.1.6(a)}*** and in 108 instances, ASMT-10 (notice intimating discrepancies), have been issued amounting to ₹ 99.82 crore {Column No. 8 and 9 in ***Appendix 3.1.6(a)}.*** In 18 instances amounting to ₹ 19.67 crore, the Department accepted audit observation and stated that matter was under examination {Column No. 10 and 11 in ***Appendix 3.1.6(a)}.***
Relatively higher rates of deviations were noticed in short payment of interest on delayed payments, undischarged tax liability, ITC availed after limitation period and non-filers of GSTR-3B returns.
In 166 instances relating to mismatch of ITC/ tax paid {Column No. 14, 16 and 18 in ***Appendix 3.1.6(a)},*** constituting 34.37 *per cent*, where the replies of the Department were acceptable to Audit; data entry errors by taxpayers comprised 22 instances {Column No. 14 and 15 in ***Appendix 3.1.6(a)};*** the Department had proactively taken action in 46 instances {Column No. 16 and 17 in ***Appendix 3.1.6(a)}*** and 98 instances {Column No. 18 and 19 in ***Appendix 3.1.6(a)}*** had other valid explanations.
In 38 instances {Column No. 20 and 21 in ***Appendix 3.1.6(a)},*** constituting 7.86 (38/483) *per cent,* the Department did not accept the deviations pointed out by Audit but did not provide any documentary evidence in support of the replies.
Similarly, in the 50 cases where Audit also noticed turnover related mismatches {***Appendix-3.1.6(b)}***, the Department accepted the observation in 20 instances {Column No. 4, 6, 8 and 10 in ***Appendix 3.1.6(b)}***. Of these, in six instances SCN (DRC-01/DRC-07) have been issued amounting to ₹ 74.10 crore {Column No. 6 and 7 in ***Appendix 3.1.6(b)}.*** In five instances ASMT-10 has been issued by the Department {Column No. 8 and 9 in ***Appendix 3.1.6(b)}*** and in nine instances, the Department stated that the matter was under correspondence with taxpayer {Column No. 10 and 11 in ***Appendix 3.1.6(b)}*** and had initiated/ taken action on the audit observations.
In 25 instances {Column No. 18 and 19 in ***Appendix 3.1.6(b)}*** relating to mismatch turnover, the Department's replies had valid explanations and were acceptable to Audit. In five instances related to mismatch turnover {Column No. 20 and 21 in ***Appendix 3.1.6(b)}***, the Department did not accept the deviations pointed out by Audit but did not provide any documentary evidence in support of the replies.

An illustrative case from each of the dimensions of the Centralised Audit are given in the succeeding paragraphs:

(i) Mismatch of ITC availed between GSTR-3B and GSTR-2A

To analyse the veracity of ITC utilisation, relevant data were extracted from GSTR-3B and GSTR 2A for the year 2018-19, 2019-20 and 2020-21, and the ITC paid as per suppliers' details was matched with the ITC credit availed by the taxpayer. The methodology adopted was to compare the ITC available as per GSTR-2A with all its amendments and the ITC availed in GSTR-3B in Table 4A(5)[5]considering the reversals in Table 4B(2)[6] but including the ITC availed in the subsequent years from Table 8C of GSTR-9.

In case of a taxpayer under STO Baramulla-I, Audit observed ITC mismatch of ₹ 3.69 crore between GSTR-3B and GSTR-2A for FY 2018-19 which was communicated to the STO (July 2023).

The STO stated (November 2023) that show cause notice (SCN) in form DRC-01 has been issued for ₹ 11.06 crore in November 2023. Further progress was awaited (March 2025).

(ii) ITC availed without supplier remitting tax

In order to analyse the extent of compliance of ITC availment under Section 16(4) of the J&K GST Act, an attempt has been made to identify likely cases where the ITC would have been passed on by the taxpayer without actually remitting the tax. For this purpose, the relevant data from GSTR-9 particularly pertaining to Table 8A of GSTR-9 was compared with the ITC data reflected in GSTR-2A.

In case of a taxpayer under STO Circle H-Kashmir, Audit observed in FY 2019-20 a difference of ₹ 2.61 crore as Table 8A of GSTR-9 was showing ITC of ₹ 12.74 crore which was lower than GSTR-2A populated figure of ₹ 15.35 crore. The difference in ITC indicated that GSTR-2A value increased on account of supplier filing either GSTR-1 belatedly or filing GSTR-1 after filing of GSTR-9. This resulted in mismatch of ITC amounting to ₹ 2.61 crore.

On being pointed out (August 2023), the STO stated (August 2023) that notice intimating discrepancy in form ASMT-10 has been issued to the taxpayer (August 2023). Further progress was awaited (March 2025).

(iii) ITC availed after limitation period

J&K GST Act provides for availing of ITC only till the due date of furnishing GSTR-3B for the month of September following the end of the financial year to which such ITC pertains or furnishing of relevant Annual Return, whichever is earlier. Accordingly, if any GSTR-3B is furnished after such time, ITC availed therein

[5] All other eligible ITC.
[6] Other ITC reversed.

becomes inadmissible. In order to review the extent of excess/ irregular ITC availed on this account, the ITC availed through Table 4 of GSTR-3B pertaining to 2018-19, 2019-20 and 2020-21 filed by the taxpayer beyond the due dates of September GSTR-3B return of the following year were identified at data level.

In case of a taxpayer under STO Circle Kupwara-Kashmir, Audit observed that taxpayers filed the GSTR-3B returns for the month of August 2018 to March 2019 after due dates. The ITC available in GSTR-3B after limitation period of October 2019 was ₹ 2.43 crore. Taxpayers irregularly availed ITC of ₹ 2.43 crore through GSTR-3B after the limitation period.

On being pointed out (June 2023), the STO stated (October 2023) that DRC-01 amounting to ₹ 6.95 crore has been issued for the year 2018-19. Further progress is awaited (March 2025).

(iv) Irregular availing of ITC by recipient on ISD credit

To analyse whether the ITC availed by the taxpayer is in excess of that transferred by the Input Service Distributor (ISD), ITC availed as declared in the returns of the taxpayer is compared with the ITC transferred by the ISD in the taxpayer's GSTR-6. The methodology adopted was to compare Table 6G[7] of GSTR-9 or Table 4(A)(4)[8] of GSTR-3B of the recipient taxpayers under the jurisdiction of this State with the sum of Table 5A[9], Table 8A[10], and Table 9A[11] of GSTR-6 of the respective ISD.

In one case of taxpayer under STO Circle-E Jammu, Audit observed that the ITC availed in Table 6G of GSTR-9 was ₹ 2.59 crore while reversal as per Table 7H of GSTR-9 was ₹ 0.03 crore and thereby effectively ISD of ₹ 2.56 crore was availed. However, the ITC transferred by the ISD in Table (5A+8A+9A) of GSTR-6 was ₹ 2.47 crore. This resulted in excess availment of ITC transferred by the ISD of ₹ 0.09 crore.

On being pointed out (September 2023), the STO stated (November 2023) that ASMT-10 (November 2023) has been issued. Further progress is awaited (March 2025).

(v) Mismatch of ITC between Annual Return and Table 12F of GSTR-9C

Table 12 of GSTR-9C reconciles ITC declared in Annual Return (GSTR-9) with ITC availed as per audited Annual Financial statement or books of accounts. Column 12F of this Table deals with unreconciled ITC.

The certified reconciliation statement submitted by the taxpayer as required under the Rule 80(3) of J&K GST Rules in form GSTR-9C for the year 2018-19 to 2020-21 was

7 ITC received from ISD.
8 Inward supplies from ISD.
9 Distribution of the amounts of eligible ITC for the tax period.
10 Mismatch of ITC reclaimed and distributed.
11 Redistribution of ITC distributed to a wrong recipient.

analysed at data level to review the extent of identified mismatch in ITC declared in the Annual Return with the Financial Statements.

In the case of a taxpayer under STO Circle-G Jammu, Audit observed unreconciled ITC of ₹ 1.03 crore in Table 12F of GSTR-9C.

On being pointed out (August 2023), the STO stated (October 2023) that ASMT-10 has been issued (October 2023). Further progress was awaited (March 2025).

(vi) Mismatch of ITC between annual return and financial statements Table 14T of GSTR-9C

The certified reconciliation statement submitted by the taxpayer as required under Rule 80(3) of CGST/ SGST Rules in form GSTR-9C for the years 2018-19 to 2020-21 was analysed at data level to review the extent of identified mismatch in ITC declared in the Annual Return with the expenses reported in the Financial Statements. Table 14 deals with expenses incurred by the taxpayer, which can be in the form of inputs, capital goods or services. These goods/ services procured may be taxable or exempted and procured from registered (forward charge) or unregistered persons (reverse charge). Table 14 reconciles the expenses incurred with the ITC availed, and any excess availing on account of ineligibility, blocked credits, and CLS is highlighted in Table 14T.

In case of a taxpayer under STO Circle-H Kashmir, Audit observed that ITC claimed as per GSTR-9C was ₹ 114.61 crore whereas as per the expenses reported in financial statements available ITC was ₹ 104.26 crore for FY 2018-19. The unreconciled ITC of ₹ 10.35 crore for FY 2018-19 was communicated to the STO (July 2023).

The STO stated (July 2023) that ASMT-10 has been issued (July 2023). Further progress was awaited (March 2025).

(vii) Mismatch in tax paid between Annual Return and tax paid in Table 9R of GSTR-9C

The certified reconciliation statement submitted by the taxpayer as required under Rule 80(3) of J&K GST Rules in form GSTR-9C for the year 2018-19 to 2020-21 was analysed at data level to review the extent of identified mismatch in tax paid between the Annual Return and the books of account. Table 9 of the form GSTR-9C attempts to reconcile the tax paid by segregating the turnover rate-wise and comparing it with the tax discharged as per Annual Return GSTR 9. The unreconciled amounts could potentially indicate tax levied at incorrect rates, incorrect depiction of taxable turnover as exempt or *vice versa* or incorrect levy of J&K GST/ CGST/ IGST.

In case of a taxpayer under STO Circle-D Kashmir, Audit observed unreconciled short payment of tax amounting to ₹ 0.57 crore in Table 9R of GSTR-9C for FY 2019-20.

On being pointed out (June 2023), the STO stated (November 2023) that DRC-01 amounting to ₹ 0.99 crore has been issued. Further progress was awaited (March 2025).

(viii) Mismatch in availment of ITC on RCM

In reverse Charge Mechanism, the liability to pay tax is fixed on the recipient of supply of goods or services instead of the supplier or provider in respect of certain categories of goods or services or both under Section 9(3) or Section 9(4) of the J&K GST Act, 2017 and under sub-section (3) or sub-section (4) of Section 5 of the IGST Act, 2017.

To analyse the veracity of ITC availed on tax paid under Reverse Charge Mechanism (RCM) for the years 2018-19 to 2020-21, the datasets pertaining to GSTR-3B and Annual Return GSTR-9 were compared to check whether the ITC availed on RCM was restricted to the extent of tax paid. The methodology adopted was to compare the RCM payments in GSTR-3B Table 3.1(d)[12] with ITC availed in GSTR-9 Table 6C[13], 6D[14] and 6F[15]. In cases where GSTR-9 was not available, the check was restricted within GSTR-3B where the tax discharged part in R3B Table 3.1(d) was compared with the ITC availing part of GSTR-3B 4A (2)[16] and 4A (3)[17].

In case of a taxpayer under STO Baramulla-III (Sopore), Audit observed tax paid in Table 4G of GSTR-9 was zero and the ITC availed in Table 4(D+F) was ₹ 0.13 crore for FY 2019-20. Thus, there was mismatch of ITC vis-à-vis payment of tax to the tune of ₹ 0.13 crore.

On being pointed out (June 2023), the STO stated that DRC-01 amounting to ₹ 0.07 crore have been issued (December 2023). Further progress was awaited (March 2025).

(ix) Undischarged tax liability

To analyse the undischarged tax liability, relevant data were extracted from GSTR-1 and GSTR-9 for the years 2018-19 to 2020-21 and the tax payable in these returns was compared with the tax paid as declared in GSTR-9. Where GSTR-9 was not available, a comparison of tax payable between GSTR-1 and GSTR-3B was resorted to. The amendments and advance adjustments declared in GSTR-1 and GSTR-9 were also considered for this purpose.

For the algorithm, Tables 4 to 11 of GSTR-1 and Tables 4N, 10 and 11 of GSTR-9 were considered. The greater of the tax liability between GSTR-1 and GSTR-9 was compared with the tax paid declared in Tables 9 and 14 of GSTR-9 to identify the

12 Inward supplies (liable to reverse charge).
13 Inward supplies receive from unregistered persons liable to reverse charge.
14 Inward supplies received from registered persons liable to reverse charge.
15 Import of services.
16 Import of services.
17 Inward supplies (liable to reverse charge).

short payment of tax. In the case of GSTR-3B, Tables 3.1(a)[18] and 3.1(b)[19] were taken into account.

In case of a taxpayer under STO Circle-H Kashmir, Audit observed the tax payable in GSTR-1 was ₹ 53.85 crore and the tax payable declared in Tables 3.1(a) and 3.1 (b) of GSTR-3B was ₹ 45.44 crore for FY 2018-19. This resulted in mismatch of tax liability amounting to ₹ 8.41 crore between GSTR-1 and GSTR-3B.

On being pointed out (August 2023), the STO stated (December 2023) that summary of the order in form DRC-07 for ₹ 17.55 crore has been issued. Further progress was awaited (March 2025).

(x) Suppression of Taxable value in comparison with E-Way Bill

In order to analyse the extent of short-payment of tax, relevant data related to tax liability declared in GSTR-3B for the years 2018-19 to 2020-21 were compared with disclosures made in E-way bill. For the algorithm, the cases where GSTR-3B Table 3.1 (a)+(b) tax payable were less than the tax liability declared in the E-way bills were chosen.

In case of taxpayer under STO Circle-A, Kashmir, Audit observed tax liability as per GSTR-3B was ₹ 18.38 crore whereas tax liability as per E-way bill data was ₹19.16 crore for FY 2019-20. This resulted in possible suppression of tax liability by ₹ 0.78 crore for FY 2019-20.

On being pointed (August 2023), the STO stated that DRC-01 amounting to ₹ 0.77 crore for FY 2019-20 has been issued (October 2023). Further progress was awaited (March 2025).

(xi) GSTR-3B not filed but GSTR-1 or GSTR-2A available

Taxpayers who have not filed GSTR-3B but have filed GSTR-1 or whose GSTR-2A was available were identified. GSTR-3B return is the only instrument through which the liability is offset and ITC is availed. The very availability of GSTR-1 and GSTR-2A and non-filing of GSTR-3B indicates that the taxpayers had undertaken/ carried on the business during the period but have not discharged their tax liability. These red flags potentially indicate cases of irregular passing on of ITC.

In case of a taxpayer under STO Circle-I Kashmir, Audit observed undischarged tax liability of ₹ 0.41 crore as a result of not filing of GSTR-3B but having filed GSTR-1.

On being pointed out (August 2023), the STO (December 2023) stated that DRC-01 amounting to ₹ 0.79 crore has been issued. Further progress was awaited (March 2025).

[18] Outward taxable supplies (other than zero rated, nil rated and exempted).
[19] Outward taxable supplies (Zero rated).

(xii) Short payment of interest on delayed payments

Section 50 of the J&K GST Act stipulates that every person liable to pay tax in accordance with the provisions of this Act or the rules made thereunder but fails to pay the tax or any part thereof to the Government within the period prescribed, shall for the period for which the tax or any part thereof remains unpaid, pay interest at the rate notified.

The extent of short payment of interest on account of delayed remittance of tax during 2018-19 to 2020-21 was identified using the tax paid details in GSTR-3B and the date of filing of the GSTR-3B. Only the net tax liability (cash component) has been considered to work out the interest payable.

In case of a taxpayer under STO Circle Poonch, Jammu, Audit observed interest liability of ₹ 0.81 crore for FY 2018-19 on account of delayed payment of cash liability of ₹ 4.66 crore.

On being pointed (July 2023), the STO stated (October 2023) that ASMT-10 has been issued. Further progress was awaited (March 2025).

(xiii) Taxpayer remaining under CLS even after crossing the specified turnover

At the data level, an attempt was made to identify CLS taxpayers whose turnover on PAN India basis (Central and State jurisdiction) under all GSTINs of the same PAN have crossed the turnover limit of ₹ 1 crore in 2018-19 and ₹ 1.50 crore in 2019-20, but still continue to avail the benefit of CLS.

In case of a tax payer under STO Circle Anantnag-III,Kashmir, Audit observed turnover for the GSTIN for the year 2020-21 was ₹ 2.24 crore. The taxpayer had registered under CLS from April 2019 and crossed the threshold limit in January 2021 but continued to avail the benefit of CLS during the return period 2020-21.

On being pointed out (July 2023), DRC-01 amounting to ₹ 0.05 crore was issued (August 2023) to the tax payer. Further progress was awaited (March 2025).

(xiv) Suppression of Taxable value (TDS/ TCS declaration)

TDS and TCS details are declared in GSTR-7 and GSTR-8 respectively and communicated to the registered person in Table 9 of GSTR-2A. The cases where the taxable value declared on account of outward taxable supplies (other than zero rated, nil rated and exempted) in GSTR-3B was less than the net amount liable for TCS and TDS credit as per Table 9 of GSTR-2A have been identified. It may be noted that the deviation amount indicated may only be a fraction of non-disclosure, as exact comparison is not possible as the taxpayer may have other supplies which do not necessitate TDS recovery.

In case of a taxpayer under STO Circle Baramulla-I, Kashmir, Audit observed that GSTR-3B outward value of taxable supplies was nil but the value on which

TDS/ TCS recovered was ₹ 2.33 crore. Thus, there was mismatch of taxable value of ₹ 2.33 crore.

On being pointed out (September 2023), the STO stated (November 2024) that DRC-01 amounting to ₹ 1.58 crore has been issued. Further progress was awaited (March 2025).

(xv) Suppression of Taxable value (Unbilled Revenue)

Table 5B figures of GSTR-9C for the years 2018-19 to 2020-21 which captures the unbilled revenue at the beginning of the financial year was compared with Table 5H of the previous year's GSTR-9C returns which captures the unbilled revenue at the end of the year to review the extent of identified mismatch in turnover declared in the Annual Return with the Financial Statements.

In case of a taxpayer under STO Circle-H, Jammu, Audit observed amount under Table 5H ending 2019-20 was ₹ 10.19, crore whereas amount at the beginning of 2020-21 was ₹ Zero. This resulted in identified mismatch of ₹ 10.19 crore in turnover declared in the Annual Return with the Financial Statements.

On being pointed out (June 2023), the STO stated (November 2024) that examination of the case was in process (January 2024). Further progress was awaited (March 2025).

(xvi) Mismatch of taxable turnover in Table 7G of GSTR-9C

Table 7 of GSTR-9C is the reconciliation of taxable turnover between GSTR-9 and that declared in the financial statement. Column 7G of this Table captures the unreconciled taxable turnover between the annual return GSTR-9 and that declared in the financial statement for the year after the requisite adjustments.

The certified reconciliation statement submitted by the taxpayer as required under the Rule 80(3) of J&KGST Rules in Form GSTR-9C for the years 2018-19 to 2020-21 was analysed at data level to review the extent of identified mismatch in taxable turnover reported in the Annual Return *vis-à-vis* the Financial Statements. The unreconciled amount in cases where the turnover in GSTR-9 is less than the financial statement indicates non-reporting, under-reporting, short-reporting, omission, error in reporting of taxable supplies. It could also be on account of non-reporting of both taxable and exempted supplies.

In case of a taxpayer under STO Circle-I, Kashmir, Audit observed unreconciled taxable turnover in Table 7G of GSTR-9C amounting to ₹ 228.78 crore.

On being pointed (July 2023), the STO stated (December 2023) that DRC-01 amounting to ₹ 71.24 crore has been issued. Further progress was awaited (March 2025).

Recommendation:

- ***The Department may consider introducing validation controls in GST Returns to enhance taxpayer compliance and facilitate better scrutiny.***

3.7.3 Detailed Audit of GST Returns

In a self-assessment regime, the onus of compliance with law is on the taxpayer. The role of the Department is to establish and maintain an efficient tax administration mechanism to provide oversight. With finite level of resources, for an effective tax administration, to ensure compliance with law and collection of revenue, an efficient governance mechanism is essential. An IT driven compliance model enables maintaining a non-discretionary regime of governance on scale and facilitates a targeted approach to enforce compliance.

From an external audit perspective, Audit also focused on a data-driven risk-based approach. Thus, apart from identifying inconsistencies/ deviations in GST returns through pan-J&K data analysis, a detailed audit of GST returns was also conducted as a part of this review. A risk-based sample of 50 taxpayers was selected for this part of the review. The methodology adopted was to initially conduct a desk review of GST returns and Financial Statements filed by the taxpayers as part of the GSTR-9C and other records available in the back-end system to identify potential risk areas, inconsistencies/ deviations and red flags. Desk review was carried out in CAG and Accountant General (Audit) J&K office. Based on desk review results, detailed audit was conducted and the audit findings are categorized under a) Returns b) Utilization of ITC and c) Discharge of tax liability.

3.7.3.1 Scope limitation (non-production of records)

There was scope limitation of audit due to non-production of granular records (records of taxpayers) by the Department. During the desk review of taxpayers' returns available in the back-end system, Audit identified the risks related to excess ITC and tax liability mismatches for detailed examination. On the ITC dimension, the mismatches were identified by comparing GSTR-3B with GSTR-2A and GSTR-9, and the declarations made in Table 12 of GSTR-9C. On the tax liability dimension, the mismatches were identified by comparing GSTR-3B with GSTR-1 and GSTR-9 and the declarations in Table 5, Table 7 and Table 9 of GSTR-9C. However, in none of the selected cases, the Department provided the corresponding granular records such as the supplementary financial ledgers, invoices, agreement copies etc. required for examining the causative factors for mismatches of ITC and tax liability. Audit requisitioned these granular records of the taxpayers through the respective Circles.

As the requisitioned records were not produced by the Department for any of the cases, the identified risks relating to excess/ irregular ITC availment and undischarged tax liability of ₹ 293.33 crore and of ₹ 18.07 crore, related to 'Mismatch of turnover' could not be examined in detail.

On being pointed out (March 2024), the Department during Exit Conference (November 2024) stated that the internal audit under Section 65 of J&K GST Act had not been conducted till date and the required financial statements were not available with them and the same could not be called for at that stage as there is no provision under the said Act.

3.7.3.2 Returns

Section 50 (1) of J&K GST Act, 2017, provides that every person who is liable to pay tax in accordance with the provisions of this Act or the rules made thereunder, but fails to pay the tax or any part thereof to the Government within the period prescribed, shall for the period for which the tax or any part thereof remains unpaid, pay, on his own, interest at such rate, not exceeding 18 *per cent*, as may be notified by the Government on the recommendations of the Council.

The interest under sub-section (1) shall be calculated, in such manner as may be prescribed, from the day succeeding the day on which such tax was due to be paid.

The extent of short payment of interest on account of delayed remittance of tax during years 2018-19, 2019-20 and 2020-21 was identified using the tax paid details in GSTR-3B and the date of filing of the GSTR-3B. Only the net tax liability (cash component) was considered to work out the interest payable. In this regard, the discrepancies noticed were as below.

(i) Non-payment of interest by taxpayers

Audit observed in 24 cases, that taxpayers had either filed their GSTR-3B returns belatedly or had paid the net tax liability (cash component) belatedly but the interest amounting to ₹ 0.73 crore was not discharged.

On this being pointed out (September 2023 to April 2024), the Department stated (November 2024) that ₹ 0.08 crore were recovered in 10 cases. In six cases, DRC-07 amounting to ₹ 0.22 crore, in two cases DRC-01 amounting to ₹ 0.22 crore, in four cases ASMT-10 amounting to ₹ 0.17 crore were issued to taxpayer. Further in two cases, Department stated that cases were under process (November 2024) as detailed in ***Appendix 3.1.16***.

Illustrative Case:

In case of a taxpayer under STO Circle-H, Jammu, Audit observed that taxpayer had filed the GSTR-3B returns for the period May 2019 to December 2019 belatedly and interest liability of ₹ 0.05 crore on delayed payment of tax of ₹ 0.65 crore (net liability discharged through cash) was not discharged.

On being pointed out (March 2024), the Department stated that (November 2024) DRC-07 had been issued to the taxpayer.

(ii) Late fee on belated/ non-filing of returns

Section 47 (2) of J&K GST Act states that any registered person who fails to furnish the return required under Section 44 by the due date shall be liable to pay a late fee of ₹ 100 for every day during which such failure continues subject to a maximum of an amount calculated at a quarter *per cent* of his turnover in the State.

Audit observed in 13 cases, that taxpayers had filed their GSTR-9/ 9C returns belatedly but late fee amounting to ₹ 0.19 crore was not discharged.

On this being pointed out (September 2023 to April 2024), the Department stated (November 2024) that in one case ₹ 0.90 lakh has been recovered via DRC-03, in six cases DRC-07 amounting to ₹ 12 lakh, in two cases DRC-01 amounting to ₹ 1.30 lakh and in one case ASMT-10 were issued to taxpayer. Further, in one case the Department stated that case was under process and in two cases no reply was furnished (November 2024) as detailed in ***Appendix 3.1.17***.

3.7.3.3 Mismatches in availing of Input Tax Credit

Section 16(2) of the Act prescribes the conditions for availing ITC, which are (i) Taxpayer should be in possession of tax invoice or any other specified tax-paying document (ii) Taxpayer has received the goods or services (iii) Tax has actually been paid by the supplier and (iv) Taxpayer has furnished the return to avail the ITC (v) The value of the goods or services along with the tax should have been paid to the supplier within 180 days from the date of issue of invoice.

Rule 36 of J&KGST Rules prescribe the documentary requirements for claiming ITC. A taxpayer can avail ITC based on the following documents namely (i) Invoice issued by a supplier of goods or services or both (ii) Invoice issued by recipient along with proof of payment of tax (iii) A debit note issued by supplier (iv) Bill of entry or similar document prescribed under Customs Act (v) Revised invoice and (vi) Document issued by Input Service Distributor.

Audit findings and mismatches noticed related to availing of input tax credit are discussed below.

Audit analysed the dataset of GSTR-2A in respect of selected taxpayers along with datasets of GSTR-3B, GSTR-9 and GSTR-9C filed by the taxpayers for the financial years 2018-19 to 2020-21 and noticed mismatches of Input Tax Credit and Reverse Charge Mechanism (RCM) among returns. Audit could not examine mismatches in detail since relevant granular records were not produced by the Department. These cases were pointed out between September 2023 to April 2024 and replies of the Department were received up to November 2024. The details of mismatches in input tax credit noticed by Audit are given in **Table 3.4** as under:

Table 3.4: Mismatch in availing of input tax credit

Sl. No.	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Department's response
1	**Mismatch of ITC between GSTR-2A and GSTR-3B** The ITC available as per Table 3 and 5 of GSTR-2A was compared with ITC availed in Table 4A(5) of GSTR-3B including ITC pertaining to current financial year availed in the next financial year. ***(Appendix 3.1.18)***	59	16	147.72	The Department reported recovery in two cases amounting to ₹ 1.34 lakh, issued DRC-07 in 21 cases, issued DRC-01 in eight cases, issued ASMT-10 in eight cases. In four cases, the Department stated that the paragraph was under process and in five cases no reply was furnished. In 11 cases, the Department did not accept audit observation. However, in these 11 cases no supporting records were provided.
2.	**Excess ITC availed** As per Table 8D of GSTR-9 after considering subsequent year's adjustment. ***(Appendix 3.1.19)***	21	11	77.93	The Department reported recovery in one case amounting to ₹ 0.41 lakh, issued DRC-07 in three cases, issued DRC-01 in one case, issued ASMT-10 in six cases. In one case, the Department stated that the paragraph was under process and in five cases no reply was furnished. In four cases, the Department did not accept audit observation. However, in these four cases no supporting records were provided.
3.	**Non/short reversal of ITC availed for exempt and non-GST supplies**: As per Section 17(2) of Jammu and Kashmir GST Act 2017, read with Rules 42 of J&K GST Rules 2017, the amount of credit shall be restricted to so much of the input tax as is attributable to the said taxable supplies including zero-rated supplies. ***(Appendix 3.1.20)***	20	10	33.55	The Department issued DRC-07 in three cases, issued DRC-01 in two cases, issued ASMT-10 in three cases. In one case, the Department stated that the paragraph was under process and in one case no reply was furnished. In ten cases, the Department did not accept audit observation. However, in these nine cases no supporting records were provided.

Sl. No.	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Department's response
4.	**ITC mismatch between GSTR-2A and GSTR-9**: The ITC available as per GSTR-2A was compared with the ITC availed under Table 8A of GSTR-9 return. ***(Appendix 3.1.21)***	8	5	4.01	The Department issued DRC-07 in one case, issued DRC-01 in one case, issued ASMT-10 in three cases. In three cases no reply was furnished.
5.	**Mismatch of ITC in Annual Return:** Figures in Table-6J of GSTR-9 captures the difference of ITC availed through 3Bs, and ITC entered in Table 6B to 6H. A negative figure in 6J is indicative of excess availment of ITC. ***(Appendix 3.1.22)***	3	3	3.27	The Department issued DRC-07 in one case, issued ASMT-10 in one case and in remaining case stated that the para was under process.
6.	**ITC availed by recipient taxpayer without tax remitted by supplier(s)**-suppliers have not filed GSTR-3B or filed GSTR 3B belatedly after filing GSTR-1. ***(Appendix 3.1.23)***	18	10	3.08	The Department reported recovery in two cases amounting to ₹ 31.59 lakh, issued DRC-07 in one case, issued DRC-01 in three cases, issued ASMT-10 in five cases. In three cases, the Department stated that the para was under process and in two cases no reply was furnished. In two cases, the Department did not accept audit observation. However, in these two cases no supporting records were provided.
7.	**Mismatch in ITC availed in respect of ISD:** ITC availed in respect of Input Service Distributor in Table-6G of GSTR-9 was compared with the ITC available on account of ISD in GSTR-2A. ***(Appendix 3.1.24)***	4	02	0.33	The Department issued DRC-07 in one case and issued ASMT-10 in two cases. In one case no reply was furnished.
8.	**Mismatch in payment of tax under Reverse Charge Mechanism (RCM) with GSTR-2A):** GSTR-2A Table 3 transactions which are marked as supplies under RCM was compared with GSTR-3B Table 3.1 (d). ***(Appendix 3.1.25)***	5	3	0.26	The Department issued DRC-07 in two cases and issued DRC-01 in three cases.

Sl. No.	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Department's response
9.	**Mismatch in ITC availed under RCM:** Data of Table 3.1(d) of GSTR-3B, which contains the details of inward supplies that are liable to reverse charge, was compared with RCM ITC availed as per Table 4A (2), 4A (3) of GSTR-3B or table 6C of GSTR-9. ***(Appendix 3.1.26)***	2	01	0.03	The Department stated that in both cases the paragraph was under process.
10	**Irregular availing of ITC where place of supply is other than UT of J&K-** ITC availed through Table 4 of GSTR 3Bs pertaining to 2019-20 and 2020-21 was compared with downloaded GSTR 2A figures where POS is other than the registered place of recipient. ***(Appendix 3.1.27)***	9	6	0.12	The Department issued DRC-07 in five cases, issued DRC-01 in one case and in three cases no reply was furnished.
11	**Non/ Less reversal of ITC/ Tax in respect of deletion of Fixed Asset-** The methodology adopted was to compare Table 7 of GSTR-9 with the deletions shown in financial statement respectively. Further, Schedule I of J&K GST Act, 2017 provides check for clearance of assets without consideration and appropriate payment of tax on such supplies. **(*Appendix 3.1.28*)**	20	6	NMV	The Department issued DRC-07 in one case, issued DRC-01 in two cases, issued ASMT-10 in two cases. In two cases the Department stated that the paragraph was under process and in three cases no reply was furnished. In 10 cases Department did not accept audit observation. However, in these 10 cases, no supporting records were provided.
12	**Non/Less reversal of ITC in respect of Trades payable** Second provision of Section 16(2) of J&K GST Act 2017 states that where a recipient fails to pay to the supplier of goods or services or both, other than the supplies on which tax is payable on reverse charge basis, the amount towards the value of supply along with tax payable thereon within a period of one hundred and eighty days from the date of issue of invoice by the supplier. **(*Appendix 3.1.29*)**	32	15	NMV	The Department reported recovery in one case amounting to ₹ 0.41 lakh, issued DRC-07 in four cases, issued DRC-01 in four cases, issued ASMT-10 in six cases. In four cases, the Department stated that the paragraph was under process and in seven cases no reply was furnished. In six cases, the Department did not accept audit observation. However, in these six cases no supporting records were provided.

3.7.3.4 Mismatches relating to discharge of tax liability

The taxable event in the case of GST is supply of goods and/ or services. Section 9 of the Jammu & Kashmir GST Act 2017 is the charging section authorising levy and collection of tax called State/ Centre Goods and Services Tax on all intra-State supplies of goods or services or both, except on supply of alcoholic liquor for human consumption, on value determined under Section 15 of the Act ibid and at such rates not exceeding 20 *per cent* under each Act, i.e., CGST Act and J&KGST Act. Section 5 of the IGST vests levy and collection of Integrated GST on interstate supply of goods and services with Central Government with maximum rate of 40 *per cent*.

Audit findings and mismatches noticed related to discharge of tax liabilities are discussed below.

Audit scrutinised GSTR-1, GSTR-3B and GSTR-9 returns filed by the taxpayers for the year 2018-19 to 2020-21 and noticed mismatch in discharge of tax liability and turnover by comparing the tax liability and turnover furnished in the financial statements and GST returns. Audit could not examine these mismatches in detail since relevant granular records were not produced by the Department. These cases were pointed out between September 2023 to April 2014 and replies of the Department were received up to November 2024. The details of mismatches are given in **Table 3.5 (a)** and **(b)** as under.

Table 3.5 (a): Mismatch related to discharge of tax liability

Sl. No.	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Department's response
1.	**Un-discharged tax liability on comparing greater of the tax liability of GSTR-1, GSTR-9 with reference to Tax payment in GSTR-9:** GSTR-1 and GSTR-9 for the year 2018-19, 2019-20 and 2020-21 and the tax payable in these returns was compared with the tax paid and declared in GSTR 9/ 3B for the respective financial year. ***(Appendix 3.1.30)***	24	10	22.85	The Department reported recovery in seven cases amounting to ₹ 12.99 lakh, issued DRC-07 in five cases, issued DRC-01 in two cases, issued ASMT-10 in three cases. In one case, the Department stated that the paragraph was under process and in three cases no reply was furnished. In three cases, the Department did not accept audit observation. However, in these three cases, no supporting records were provided.
2.	**Mismatch in tax liability**: Mismatch in tax paid between books of accounts and Annual Return (Table 9R of Form 9C) ***(Appendix 3.1.31)***	1	1	0.18	The Department issued DRC-07 in the case.

Sl. No.	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Department's response
3.	**Non-disclosure of turnover/ liability under Reverse Charge Mechanism (RCM):** To check tax repercussions on expenses incurred, like GTA Services, legal, manpower recruitment, services received from abroad, and other services notified under Section 9(3) and 9(4) of J&K GST Act 2017, where the recipient is required to pay tax under RCM; the details mentioned in Profit and Loss account has been cross-verified with Tables 4A(2) and 4A(3) of GSTR-3B and 4(G) of GSTR-9. ***(Appendix 3.1.32)***	45	14	NMV	The Department issued DRC-07 in six cases, issued DRC-01 in nine cases, issued ASMT-10 in six cases. In three cases, the Department stated that the paragraph was under process and in 12 cases no reply was furnished. In nine cases, the Department did not accept audit observation. However, in these nine cases no supporting records were provided.

Table 3.5 (b) Mismatch related to turnover as per Financial Statement

Sr. No.	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Department's response
1.	**Suppression of taxable value identified through TDS/ TCS declaration:** GSTR-3B Table 3.1(a) were less than the net amount liable for TCS and TDS credit available under Part-C of GSTR-2A have been identified. **(*Appendix 3.1.33)***	4	04	14.06	The Department issued DRC-07 in one case and in one case stated that the paragraph was under process. In two cases, the Department did not accept audit observation. However, in these two cases, no supporting records were provided.
2.	**Suppression of taxable turnover on unbilled revenue:** Comparison of Table 5B of GSTR-9C of a year with Table 5H of the previous year's GSTR-9C. ***(Appendix 3.1.34)***	1	01	4.01	The Department stated that the case was under process.
3.	**Mismatch of Turnover between GSTR-9 and Financial Statements/ Trading account:** The data sets pertaining to the fields in Table 5N	8	04	NMV	The Department issued DRC-07 in two cases and ASMT-10 in two cases. In one case, the Department stated that the paragraph was under process and in

Sr. No.	Parameter	No. of cases	No. of Circles	Amount of mismatch (₹ in crore)	Department's response
	(Total turnover) were examined *viz-a-viz* Financial Statements where GSTR-9C was not filed by the taxpayer and where the GSTR-9C was filed, the datasets pertaining to relevant fields in Table 5A (turnover derived from the audited Annual Financial statement),Table 5P (turnover after adjustments), Table 5Q (turnover as declared in annual return GSTR-9) and Table 5R (unreconciled turnover) of GSTR-9C were examined *viz-a-viz* audited financial statements. **(*Appendix 3.1.35*)**				three cases no reply was furnished.

Recommendation:

- ***The Department may initiate remedial action for all the compliance deviations brought out in this report before they get time barred.***

8 Conclusion

The Subject Specific Compliance Audit (SSCA) on Department Oversight on GST Payments and Return Filing was undertaken with an objective of assessing the adequacy of the system in monitoring return filing and tax payments, extent of compliance and other Departmental oversight functions.

This SSCA was predominantly based on data analysis, which highlighted risk areas, red flags and in some cases, rule-based deviations and logical inconsistencies in GST returns filed for 2018-19 to 2020-21. The SSCA entailed assessing the oversight functions of J&K State Tax Department jurisdictional formations (Circles) at two levels i.e. at the data level through PAN-State data queries and at the functional level with a detailed audit of Circles, GST returns and internal audit which involved accessing taxpayer records. The audit sample therefore comprised 10 Sectors, 563 high value inconsistencies involving 337 taxpayers across 16 parameters selected through PAN-State queries and 50 taxpayers selected on risk assessment for detailed audit of GST returns for the year 2018-19 to 2020-21.

Audit of Circles disclosed deficiencies in oversight functions due to non-levy of late fee for delayed filing of returns, non-levy of interest on late payment of tax, delay in cancellation of registration and non-filing of GSTR-10 returns.

Out of the 563 high value inconsistencies pursued at data level, the Department responded to 533 cases and initiated remedial action by issuing Show Cause Notices, ASMT-10 and recovery in 272 cases involving a money value of ₹ 324.81 crore.

A relatively higher rate of deficiencies were noticed in short/ non-payment of interest, undischarged tax liability, ITC availing after limitation period and non-filing of GSTR-3B, excess RCM ITC availed and short payment of tax.

Detailed audit of GST returns also suggested significant mismatches in the data of GSTR-1, GSTR-3 and GSTR-9 of the taxpayers. Granular records such as supplementary ledgers, invoices, copies of the agreement etc. were not produced in all cases of sample which constituted a significant scope limitation.

9 *Summary of recommendations*

The Department may:

- ***Consider introducing validation controls in GST Returns to enhance taxpayer compliance and facilitate better scrutiny; and***
- ***Initiate remedial action for all the compliance deviations brought out in this report before they get time barred.***

APPENDICES

Appendix-2.1.1
Forms used in E-Way Bill System
(Refer Paragraph: 2.1.4)

Sl. No.	Form No.	Description
1	GST EWB-01	1. Bill for movement of goods, it should be generated in EWB portal before commencement of shipment. 2. Form has Two parts *viz*. Part-A to be filled by the Consignor or Consignee and Part-B by the transporter.
2	GST EWB-02	Where multiple consignments are intended to be transported in one conveyance this form is generated called "Consolidated EWB"
3	GST EWB-03	Verification report of every inspection of goods in transit by the PO. Part A of the report should be recorded online less than 24 hours and Part B less than three days of inspection.
4	GST EWB-04	Where a vehicle has been intercepted and detained for more than 30 minutes, this form may be uploaded in common portal
5	GST EWB-05	Application for unblocking of the facility for generation of EWB
6	GST EWB-06	Order for permitting/ rejecting application for unblocking
Forms for Interception, detention and release of Conveyance and goods		
1	GST MOV-01	Statement of the owner/ Driver/ Person in-charge of the goods and conveyance during interception of the conveyance
2	GST MOV-02	Order for Physical verification/ inspection of the Conveyance, Goods and Documents
3	GST MOV-03	Order of Extension of time for inspection beyond three working days.
4	GST MOV-04	Physical verification report
5	GST MOV-05	Release Order for Goods conveyance
6	GST MOV-06	Order of Detention for non-production of documents or defective documents etc.
7	GST MOV-07	SCN on the outcome of inspection of goods
8	GST MOV-08	Bond for Provisional release of goods and conveyance
9	GST MOV-09	Order of Demand of tax and Penalty (Detained Goods/ Conveyance)
10	GST MOV-10	Notice for Confiscation of Goods or Conveyances and levy of penalty
11	GST MOV-11	Order of Confiscation of Goods and Conveyance - Demand of Tax, Fine and Penalty
Forms and Notices for Demand and Recovery		
1	GST DRC-01	Summary of Show Cause Notice
2	GST DRC-02	Summary of Statement
3	GST DRC-03	Intimation of Payment (voluntarily/ SCN) by the taxpayer
4	GST DRC-04	Acknowledgement for Voluntary Payment of Tax by the Department
5	GST DRC-05	Intimation of Conclusion of Proceedings by the Department

Sl. No.	Form No.	Description
6	GST DRC-06	Reply to SCN
7	GST DRC-07	Summary of the Order (Tax, Interest and Penalty)
8	GST DRC-08	Rectification of Order (Application/ Suo-moto)
9	GST DRC-09	Order for recovery through Specified Officer U/s 79
10	GST DRC-10	Notice for Auction of Goods (including e- auction)

Appendix-2.1.2
Source of audit criteria
(Refer Paragraph: 2.2.2)

Topic	Relevant Sections/Rules of J&K GST Act/Rules
GST Registration	Section 22 - Persons liable for registration
	Rule 8 - Application for registration under GST
	Section 23 - Persons not liable for registration but may get registered
	Rule 8A - Voluntary registration under GST
	Section 24 - Compulsory registration in certain cases
	Rule 9 - Application for special category registration
Cancellation	Section 29 - Cancellation of registration
	Rule 20 - Application for cancellation of registration
	Section 30 - Revocation or cancellation of registration
	Rule 21 - Form and manner of application for revocation of cancellation of registration
Filing of Returns	Section 47 - Late fee for failure to furnish return
	Rule 61 - Form and manner of furnishing return
Penalties	Section 122 - Penalty for various offenses under the GST Act
	Section 132 - Punishment for certain offenses
E-Way Bill Provisions	Rule 138 - Information to be furnished before commencement of the movement of goods
	Rule 138B - Power to detain and seize goods and conveyances
Interceptions and Detention	Section 129 - Detention, seizure, and release of goods and conveyances
	Rule 138A - Procedure for interception of conveyances
Confiscation	Section 130 - Confiscation of goods or conveyances and levy of penalty
	Rule 140 - Confiscation or penalty not to interfere with other punishments
Input Tax Returns (ITC)	Section 16 - Eligibility and conditions for taking ITC
	Rule 36 - Documentary requirements and conditions for claiming ITC
Invoice and Billing	Section 31 - Tax invoice, credit and debit notes
	Rule 46 - Tax invoice
	Rule 8 - Application for registration under GST
Payment of Tax	Section 49 - Payment of tax, interest, penalty, and other amounts
	Rule 87 - Payment of tax, interest, penalty, and other amounts
Audit and Assessment	Section 65 - Audit by tax authorities
	Section 62 - Assessment of non-filers of returns
	Rule 101 - Audit by tax authorities
Composition Scheme	Section 10 - Composition levy
	Rule 7 - Composition levy
	Rule 55 - Job work procedure
Exports and Imports	Section 16 - Zero-rated supply
	Rule 89 - Refund of integrated tax paid on goods or services exported out of India

Outward **EWB**	40,30,001	40,56,447	99.34

(Source: GSTN data)

Appendix-2.1.4
Key Problem Areas that constraints revenue realisation
(Refer Paragraph: 2.2.4)

(1) Composition Levy Scheme taxpayers generating EWBs for inter-State supplies

(2) Composition Levy Scheme taxpayers generating EWBs for outward supplies exceeding the threshold limit

(3) Taxpayers with only outward supplies supported by EWBs in any given year.

(4) Taxpayers who affect disproportionate outward supplies compared to inward supply (EWBs supported) in any given year.

(5) Taxpayers who had generated EWBs using duplicate invoices.

(6) Generation of EWBs by Nil Filers of Return.

(7) Generation of EWBs by Returns Defaulters (Non-Filers).

(8) Taxpayers who have generated EWBs after an effective date of cancellation.

(9) Taxpayers who have generated EWB whose registration was subsequently cancelled.

(10) Taxpayers who had generated EWBs and had cancelled subsequently.

(11) Taxpayers who had generated EWBs and were subsequently rejected by the recipients.

(12) Taxpayers who had generated disproportionate supplies supported by EWBs on the inward side compared to the outward side in any given year.

(13) Extension of EWBs by taxpayers.

(14) EWBs generated using risky vehicles i.e., 2 wheelers.

(15) EWBs generated using stolen/ suspicious vehicles.

(16) High value of EWBs in the first 6 months of registration.

(17) EWBs generated using invalid Pin codes.

(18) EWBs generated using suspended, scrapped, surrendered, and cancelled vehicles.

(19) EWBs generated by defaulter list of Ministry of Corporate Affairs (MCA).

(20) EWBs generated by income tax defaulters.

(21) EWBs generated by DGARM-identified/ Other agencies-identified taxpayers.

(22) EWBs generated by DGFT-blacklisted exporters.

Preface

This Report has been prepared for submission to the Lieutenant Governor of Jammu and Kashmir under Section 72 of the Jammu and Kashmir Reorganisation Act 2019 for laying in the Legislative Assembly.

The Union Territory Finances Audit Report of the Government of Jammu and Kashmir intends to assess the financial performance of the Union Territory, during the financial year 2024-25 and to provide the Union Territory Legislature with inputs, based on audit analysis of financial data. The Report contains three Chapters.

Chapter I – Overview of the Finances of the Union Territory

This Chapter describes the basis and approach to the Report and provides a broad perspective of the finances of the Union Territory. It includes a macro-fiscal analysis of key indices and UT's fiscal position including deficits/ surplus, debt profile and key Public Account transactions.

Chapter II – Budgetary Management

This chapter is based on the Appropriation Accounts of the Union Territory and reviews the appropriations and allocative priorities of the Union Territory Government and reports on deviations from constitutional provisions relating to budgetary management.

Chapter III – Financial Reporting Practices

This chapter comments on the quality of accounts rendered by various authorities of the Union Territory Government and issues of non-compliance with prescribed financial rules and regulations by various departments of the Union Territory Government.

The Reports containing the findings of performance audit and audit of transactions in various departments and observations arising out of audit of Statutory Corporations, Boards and Government Companies and the Report containing observations on the Revenue Receipts related to the Union Territory of Jammu and Kashmir are presented separately.

Basis and Approach to Union Territory Finances Audit Report

In terms of Section 72 of Jammu and Kashmir Reorganisation Act, 2019, the Reports of the Comptroller and Auditor General of India (CAG) relating to the accounts of UT of Jammu and Kashmir are to be submitted to the Lieutenant Governor of the UT, who shall cause them to be laid before the Legislature of the UT.

The Principal Accountant General (Accounts and Entitlements) compiles the annual Finance Accounts and Appropriation Accounts of the UT of Jammu and Kashmir based on vouchers, challans, and initial and subsidiary accounts submitted by Treasuries, Offices, and Departments under the control of the Government of UT of Jammu and Kashmir, as well as statements received from the Reserve Bank of India. These accounts are independently audited by the Accountant General (Audit) and certified by the Comptroller and Auditor General of India.

Finance Accounts and Appropriation Accounts of the UT constitute the core data for this report. Other sources include the following:

- Budget of the Union Territory: for assessing the fiscal parameters and allocative priorities *vis-à-vis* projections, as well as for evaluating the effectiveness of its implementation and compliance with the relevant rules and prescribed procedures.
- Results of audit carried out by the office of the Accountant General (Audit).
- Other data with departmental authorities and treasuries (accounting as well as MIS)
- GSDP data and other UT related statistics
- J&K Fiscal Responsibility and Budget Management (FRBM) Act
- Various audit reports of the CAG of India.
- best practices and guidelines of the Government of India (GoI).

An Entry Conference was held on 08th August 2025 with the Principal Secretary, Finance, Government of Union Territory of Jammu and Kashmir, wherein the audit approach followed in the preparation of the UTFAR was explained. Exit meeting was held with Finance Department on 19th January 2026 wherein Audit findings were discussed. The responses of the Government have been incorporated in the Report appropriately.

Structure of the Government Account

The accounts of the Government of UT of Jammu and Kashmir are kept in three parts.

1. **Consolidated Fund of the Union Territory of Jammu and Kashmir (Section 67 of the Jammu and Kashmir Re-organisation Act, 2019)**

   This Fund comprises all revenues received in the UT of Jammu and Kashmir by the Government of India or Lieutenant Governor of the UT of Jammu and Kashmir in relation to any matter with respect to which the Legislative Assembly of the UT of Jammu and Kashmir has power to make laws, and all grants made and all loans advanced to the UT of Jammu and Kashmir from the Consolidated Fund of India and all loans raised by the Government of India or the Lieutenant Governor of the UT of Jammu and Kashmir upon the security of the Consolidated Fund of the UT of Jammu and Kashmir and all moneys received by the UT of Jammu and Kashmir in repayment of loans. No

moneys can be appropriated from this Fund except in accordance with law and for the purposes and in the manner provided in the Jammu and Kashmir Re-organisation Act, 2019.

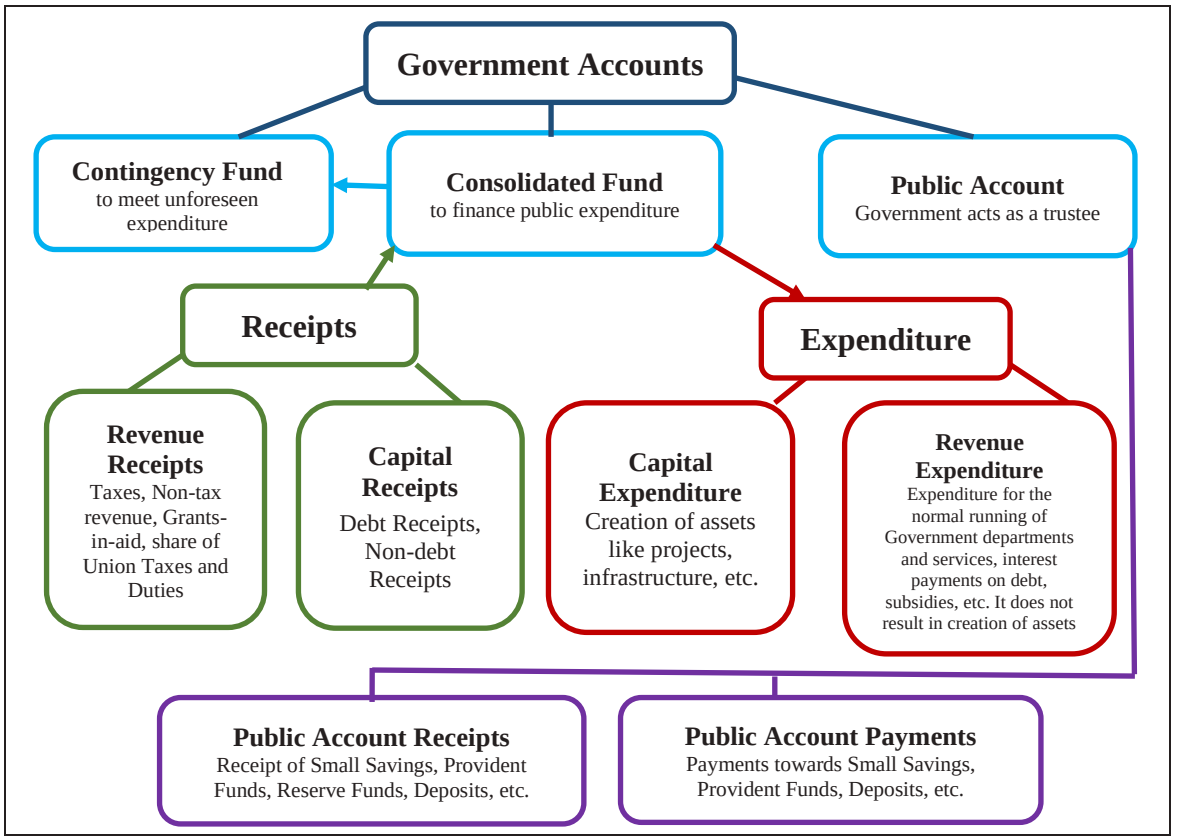
2. **Contingency Fund of the Union Territory of Jammu and Kashmir (Section 69 of the Jammu and Kashmir Re-organisation Act, 2019)**

   This Fund is in the nature of an imprest, which is established by the Legislature by law, and is placed at the disposal of the Lieutenant Governor to enable advances to be made for meeting unforeseen expenditure pending authorisation of such expenditure by the Legislature of UT of Jammu and Kashmir. The fund is recouped by debiting the expenditure to the concerned functional major head relating to the Consolidated Fund of the UT of Jammu and Kashmir.

3. **Public Accounts of the Union Territory of Jammu and Kashmir (Section 68 of the Jammu and Kashmir Re-organisation Act, 2019)**

   Apart from the above, all other public moneys received by or on behalf of the Lieutenant Governor, shall be credited to a Public Account entitled the Public Account of the UT of Jammu and Kashmir. The Public Account includes re-payables like Small Savings and Provident Funds, Deposits (bearing interest and not bearing interest), Advances, Reserve Funds (bearing interest and not bearing interest), Remittances and Suspense heads (both of which are transitory heads pending final booking). The net cash balance available with the Government is also included under the Public Account. The Public Account is not subject to the vote of the Legislature.

Structure of Government Accounts



Executive Summary

Executive Summary

This Report on the finances of the Union Territory of Jammu and Kashmir provides an independent assessment of the fiscal position of the UT for FY 2024-25. It analyses the UT's overall financial health and reviews its revenue and expenditure trends, assesses the UT's debt position and borrowing patterns, evaluate its compliance with fiscal responsibility laws and compares its performance against fiscal health indicators.

UT of Jammu and Kashmir's economy showed moderate growth during the FY 2024-25, with GSDP registering growth of 11.18 *per cent* as against the previous financial year. UT contributed (0.79 *per cent*) to GDP of India. This contribution declined from 0.85 *per cent* in 2020-21. It was observed that the revenue receipts of the UT during 2024-25 increased by 6.12 *per cent* mainly due to increase in Grants-in-Aid from Government of India (GoI). However, growth of own tax revenue was 2.5 *per cent*. Though UT's own revenue performance improved, the dependence on central grants-in-aid remains substantial.

Out of Total Expenditure (TE) of ₹82,547.28 crore, revenue expenditure (85.37 *per cent*) was substantial, particularly committed costs and subsidies (68.39 *per cent* of Revenue Expenditure and 58.39 *per cent* of TE), leaving limited fiscal space for capital investment. Capital expenditure remained below budgeted levels, reflecting constraints in infrastructure investment. The UT was not able to arrest the fiscal deficit within the target levels set in the budget documents. The outstanding liabilities of the UT increased from 8.87 *per cent* of GSDP in 2020-21 to 17.21 *per cent* in 2024-25. However, taking into account the liabilities of the erstwhile state, the outstanding liabilities increased to 48.47 *per cent* of GSDP in 2024-25 which was excluding the Off-budget borrowings of ₹23,197.08 crore. Besides, the UT government also carried forward undischarged liabilities in respect of Guarantee Redemption Fund (GRF), interest liabilities, Consolidated Sinking Fund (CSF), pension fund etc., to the tune of ₹934.02 crore and 1.13 *per cent* of TE in the FY 2024-25.

The fiscal year also continued to witness large scale excess in one revenue charged section and overall savings in all 36 grants. Excess expenditure in FY 2024-25, previous financial years and that pertaining to erstwhile State of Jammu and Kashmir requires regularisation by the legislature. There was delays in submission Utilisation Certificates (1,395 UCs amounting to ₹4,105.08 crore). Against 3,451 AC bills amounting to ₹25,127.97 crore outstanding as on 31st March 2024, there were 3,068 AC bills amounting to ₹15,607.21 crore outstanding as on 31st March 2025. Twenty eight accounts in respect of eight Autonomous Bodies (ABs) were pending as of March 2025. During the year 2024-25, ₹1,941.43 crore under 30 Major Heads of account, constituting 2.35 *per cent* of the total Revenue and Capital expenditure (₹82,532.19 crore) was classified under the Minor Head 800 in the accounts. Of these, ₹49.15 crore under five Major Heads was budgeted/classified under Minor Head 800- Other Expenditure despite availability of appropriate Minor Heads. These irregularities affect the transparency in financial reporting.

Funds, viz., Building and Other Construction Workers Welfare Cess, District Mineral Foundation Fund Trust, Water Usage Charges and Social Responsibility Corpus Fund were kept outside Government Account.

Positive steps like implementation of Empowerment/ Janbhagidari portal for transparency about developmental works was taken up by the Government. However, migration from Single Nodal Account (SNA) to SNA Sparsh system is still pending.

The increasing debt load, high committed expenditure, and limited capital investment raise concerns about fiscal sustainability. There's a need for revenue augmentation, better expenditure control, and structural reforms to ensure long-term fiscal health. Transparency should be enhanced in off-budget borrowings, ensuring timely accounting and reporting. Steps should be taken for more judicious budget provisioning.

Chapter-I

Overview of Finances of the Union Territory

Chapter-I: Overview of Finances of the Union Territory

This chapter provides a snapshot of Union Territory (UT) of Jammu and Kashmir's finances for 2024-25, covering demographics, economic indicators, and the UT's Fiscal structure. It analyses trends in Revenue and Expenditure, Debt levels, and Fiscal Deficits, highlighting persistent imbalances and reliance on borrowings. The chapter flags issues like high Committed expenditure, low returns on investments *etc*.

1.1 Profile of the Union Territory

Union Territory of Jammu and Kashmir, a predominantly agrarian UT in north India, covers 1.20[1] lakh sq. km. and comprises 20 districts and 6,431 villages. As of 2025, its projected population stood at 1.38 crore (0.98 *per cent* of India's total), with a density of 82 persons per sq. km. This section provides an overview of the UT's demography, Gross State Domestic Product (GSDP), and per capita GSDP.

1.1.1 Demography of the UT

The UT's demographic details *vis-à-vis* national average are presented in the **Table 1.1** below.

Table 1.1: Demographic profile of the UT

	UT of J&K	National average
Projected Rural Population (*per cent*) (2025) *(Population Projection for India and State 2011-36, MoHFW, GoI)*	68.95	64.30
Projected Urban Population (*per cent*) (2025) *(Population Projection for India and State 2011-36, MoHFW, GoI)*	31.05	35.70
Population density (2025) *(Population Projection for India and State 2011-36, MoHFW, GoI)*	82	415
Sex Ratio per 1,000 Males (2021) *(Population Projection for India and State 2011-36, MoHFW, GoI)*	913	947
Infant Mortality Rate per 1,000 Live births *(SRS bulletin September 2025 (Ref. year 2023))*	14	25
Total Fertility Rate *(NFHS-5, 2019-21 MoHFW, GoI)*	1.41	1.99
Life Expectancy at Birth *(SRS Abridged Life (2019-23)*	74.4	70.3
Population below Poverty Line *(Multidimensional Poverty Index, 2023, NITI Aayog)*	4.80	14.96
Literacy Rate *(Periodic Labour Force Survey(PLFS), 2023-24)*	82	80.9

[1] Including area of POK

Maternal Mortality Rate per lakh women in the age group of 15-49 *(SRS Bulletin on Maternal Mortality in India 2021-23 (September 2025), Registrar General of India, GoI)*	*NA*	*5*
Labour Force Participation Rate *(PLFS 2023-24)*	*48.7*	*46.5*

1.1.2 Economy of the Union Territory

Gross State Domestic Product (GSDP) and per capita income are important indicators of the UT's economy as discussed in succeeding paragraphs.

1.1.2.1 Gross State Domestic Product and Per capita Income

Gross Domestic Product (GDP) refers to the total value of goods and services produced within a country, while Gross State Domestic Product (GSDP) measures the same at the State/UT level, and both reflect economic development and overall progress. Trends of GSDP and GDP is given in **Table 1.2.** Year on year growth of GSDP and GDP and share of GSDP in India's GDP is given in **Chart 1.1** and Per capita income of the country and per capita Income of the UT of Jammu and Kashmir is depicted in **Chart 1.2**.

Table 1.2: Trends in GSDP compared to GDP of India (at current prices, base year 2011-12)

Year	2020-21	2021-22	2022-23	2023-24	2024-25
GDP of India (₹ in crore)	1,98,54,096	2,35,97,399	2,68,90,473 (FE)	3,01,22,956 (FRE)	3,30,68,145 (PE)
GSDP of UT of J&K (₹ in crore)	1,67,793	1,88,561	2,09,816	2,36,059	2,62,458
Per Capita Income of India (in ₹)	1,27,244	1,50,906	1,69,145	1,88,892	2,05,324
Per Capita Income of UT of J&K (in ₹)	1,01,645	1,12,898	1,23,614	1,40,051	1,54,826
Share of GSDP in GDP	0.85	0.80	0.78	0.78	0.79

Source: Ministry of Statistics and Programme Implementation, GoI

Chart 1.1: Y-o-Y growth of GDP & GSDP and GSDP to GDP growth rate

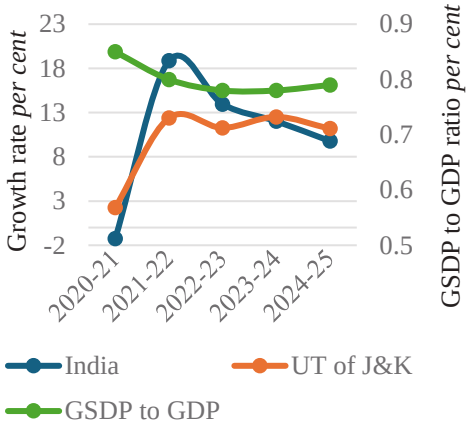


Chart 1.2: Per Capita income of India and UT

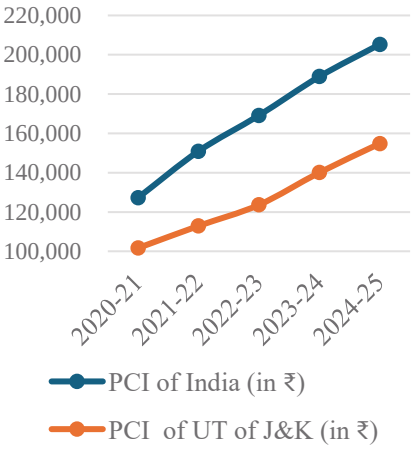

Year on year growth of GDP of India increased from -1.24 *per cent* in 2020-21 to 18.85 *per cent* in 2021-22 after Covid and thereafter showed a declining trend with growth rate of 9.78 *per cent* in 2024-25. During the same period GSDP of UT of J&K increased from 2.25 *per cent* in 2020-21 to 12.38 *per cent* in 2021-22, which later decreased to 11.18 *per cent* in 2024-25.

The per capita GSDP of UT of J&K remained consistently lesser than the national average during FY 2020-25. During the same period, GSDP to GDP ratio declined from 0.85 *per cent* in 2020-21 to 0.79 *per cent* in 2024-25 which indicates decline in contribution of UT of J&K in the GDP of India.

In reply, the department stated (January 2026) that GSDP depends on numerous factors which vary from year to year and efforts will be made to analyse the areas which needs to be focussed to increase the GSDP.

1.1.2.2 Sectoral contribution to Gross State Value Added (GSVA)

Economic activities are broadly classified into three main sectors: primary, secondary, and tertiary sectors. These sectors represent different stages of economic development and are interdependent on one another.

The **primary sector** involves activities that directly use natural resources to produce raw materials. This includes agriculture, horticulture, fishing & aquaculture, forestry, mining and quarrying activities. It forms the foundation of the economy as it provides essential raw materials for other sectors.

The **secondary sector** includes activities that involve the processing and manufacturing of raw materials into finished or semi-finished goods. This encompasses manufacturing, construction, electricity, gas, water supply and other utility services. It adds value to raw materials and supports industrial growth.

The **tertiary sector**, also known as the service sector, provides services that support both individuals and other sectors of the economy. It includes trade, repairs, hotels & restaurants, transport, storage, communication & services related to broadcasting, financial services, real estate, ownership of dwellings & professional services, public administration, and other services. This sector plays a crucial role in improving the quality of life and ensuring the smooth functioning of the economy.

The sectoral contribution by various sectors during 2024-25 and sectoral growth in GSVA during the last five years are depicted in **Chart 1.3** and **Chart 1.4** respectively.

Chart 1.3: Sectoral Contribution 2024-25

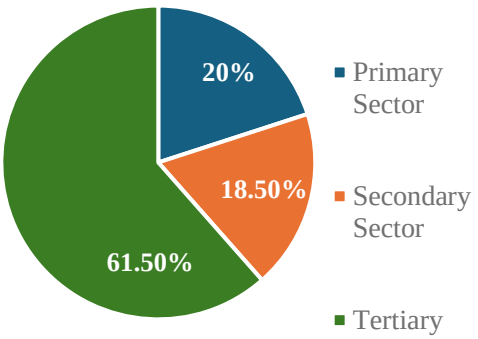

Chart 1.4: Sectoral Growth in GSVA

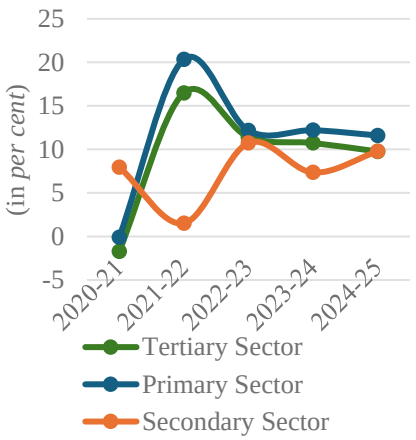

Chart 1.5 shows the composition of each sector during FY 2024-25, in terms of its major contributing segments.

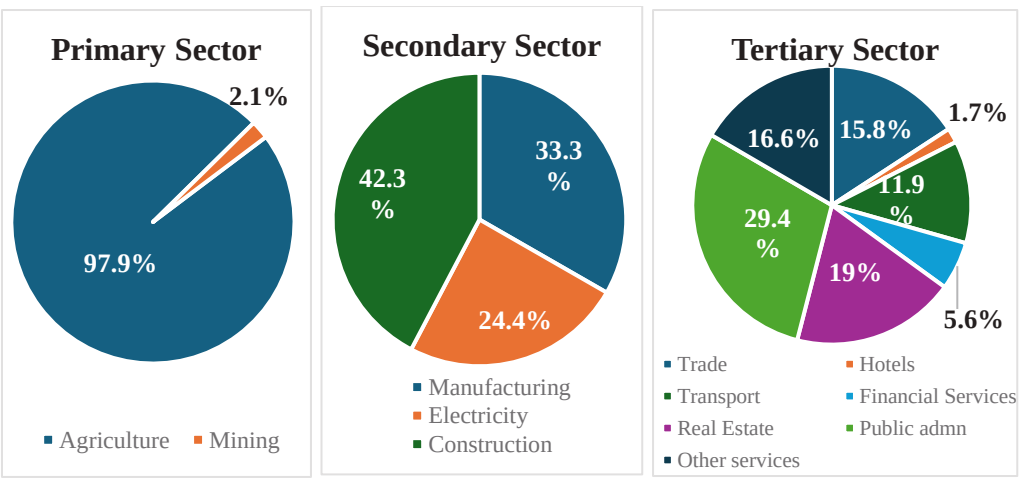
Chart 1.5: Sector-wise distribution, FY 2024-25



Source: Ministry of Statistics and Programme Implementation, GoI.

During 2024-25, the sectoral growth in primary and tertiary sector decreased to 11.61 *per cent* and 9.77 *per cent* from 12.21 *per cent* and 10.74 *per cent* respectively, in 2023-24. However, the secondary sector recorded an increase in growth, rising from 7.35 *per cent* in 2023-24 to 9.78 *per cent* in 2024-25.

The tertiary sector remained the largest contributor throughout 2020-25. In tertiary sector, the biggest contributor was Public administration with 29.4 *per cent* share followed by real estate with 19 *per cent*. Similarly, in the Secondary sector, Construction had maximum share of 42.3 *per cent* whereas Agriculture had maximum share of 97.9 *per cent* in the Primary sector. Agriculture is the biggest contributor in GSDP.

1.1.3 Snapshot of Finances

Table 1.3 shows the details of actual financial results of UT Government of J&K for the years 2023-24 and 2024-25 *vis-a-vis* Budget Estimates (BE), Revised Estimates (RE) and GSDP for the year 2024-25.

Table 1.3: Snapshot of Finances

(₹ in crore)

Source: Finance Accounts and Budget

**Borrowings and other Liabilities: Net (Receipts – Disbursements) of Public Debt + Net of Contingency Fund + Net (Receipts – Disbursements) of Public Account + Net of Opening and Closing Cash Balance.*

The details of UT Government Finances for the FY 2020-21 to 2024-25 is given in ***Appendix 1.1.***

During 2024-25, Revenue receipts increased over six *per cent* with respect to the previous year but fell short of the BE by 24.6 *per cent* and RE by 20.3 *per cent*. UT's Own Tax revenue increased by 2.5 *per cent* and Non-Tax revenue increased by about seven *per cent* with respect to the previous year. During 2024-25, the increase of ₹4,293.47 crore (6.12 *per cent*) in Revenue receipts was comparatively higher than the increase of ₹3,850.66 crore (5.78 *per cent*) in Revenue expenditure over the previous year. This led to increase in Revenue surplus from ₹3,486.22 crore during 2023-24 to ₹3,929.03 crore during 2024-25. During 2024-25, there was Fiscal Deficit of ₹8,145.68 crore, which was two *per cent* above the projection in the BE 2024-25. Primary surplus during the year 2024-25 was ₹2,728.44 crore which was about 19 *per cent* above the projections made in the Budget 2024-25. The Revenue surplus of ₹3,929.03 crore during 2024-25 was lesser than the amount projected in the BE (₹17,233 crore) and RE (₹9,825 crore).

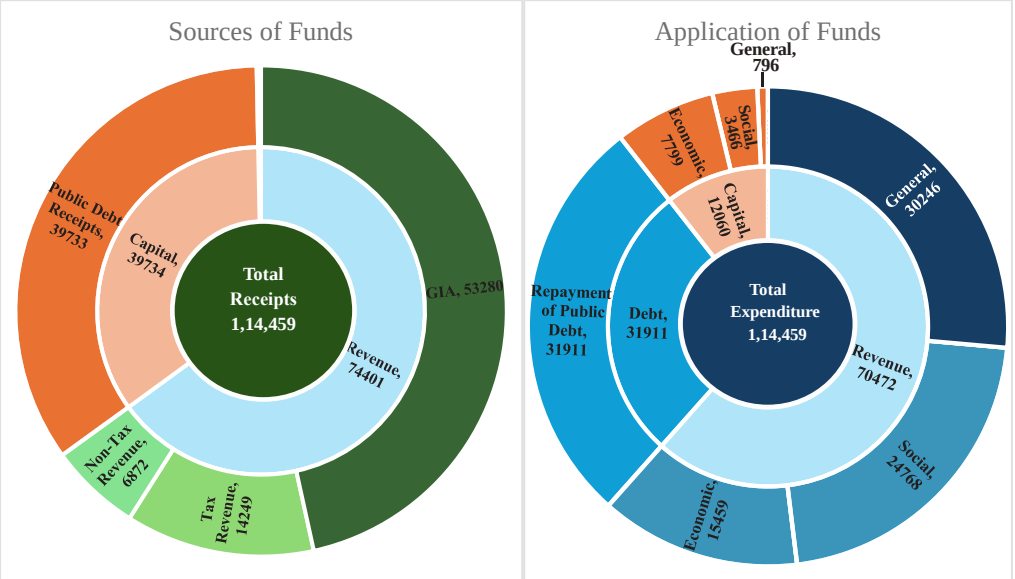
During 2024-25, there was 'Nil' receipt under Additional Resource Mobilization against the budget estimate of ₹1,000 crore and RE of ₹4,900 crore. Receipts under Grants in Aid fell short of budget estimates by ₹13,853 crore indicating unrealistic estimations. There was 52 *per cent* shortfall in Capital expenditure against the projection in the Budget which could be attributable to shortfall in actual receipts.

1.1.4 Sources and Application of Funds

Comparison of components of the sources and application of funds of the UT during the FY 2024-25 is given in **Chart 1.6.**

Chart 1.6: Details of Sources and Application of Funds during 2024-25

(₹ in crore)



Source: Finance Accounts

Appendix 1.2 provides details of receipts, disbursements and the overall fiscal position of the UT during the year 2024-25 as well as previous year.

1.1.5 Snapshot of Assets and liabilities of the Government

Government accounts capture the financial liabilities of the Government and the assets created out of the expenditure incurred. ***Appendix 1.3*** gives an abstract of such liabilities and assets, as on 31st March 2025, compared with the corresponding position of the previous year. The liabilities consist mainly of internal borrowings, loans and advances from GoI, receipts from the Public Account and Reserve Funds. Assets comprise mainly of the Capital Expenditure, and loans and advances, given by the UT Government and cash balances. A summarised position of assets and liabilities, for the financial years 2023-24 and 2024-25, is given in **Table 1.4.**

Table 1.4: Summarised position of assets and liabilities

(₹ in crore)

Liabilities					Assets				
		2023-24	**2024-25**	***Percent increase/ decrease***			**2023-24**	**2024-25**	***Percent increase/ decrease***

** Includes back-to-back loans of ₹4,253.08 crore (₹2,099.80 crore and ₹3,845.49 crore received from the GoI during 2020-21 and 2021-22 respectively and its adjustment of ₹1,692.21crore in 2024-25), in lieu of GST Compensation shortfall, which are not to be repaid by the UT Government from its resources.*

Further, Assets and Liabilities of the erstwhile State of Jammu and Kashmir ending 30th October 2019 are yet to be apportioned between UT of Jammu and Kashmir and UT of Ladakh. The increase in Reserve Funds was mainly due to receipts under State Disaster Response Fund (₹442.57 crore against disbursement of ₹29.11 crore) and Sate Compensatory Afforestation Fund (₹478.58 crore against disbursement of ₹161.72 crore). The decrease in the head 'Suspense and Miscellaneous' was mainly due to reduction of Tax Deducted at Source (TDS) balance by ₹328 crore.

1.2 Consolidated Fund of the UT

All revenues received by the UT Government, all loans raised by the UT Government, ways and means advances extended by the Reserve Bank of India and all money received by the UT Government in repayment of loans forms part of the Consolidated fund of the Union Territory.

1.2.1 Revenue Receipts

Trends and growth of revenue receipts with respect to Gross State Domestic Product (GSDP) over the five-year period (2020-25) are shown in **Table 1.5**.

Table 1.5: Trends in Revenue Receipts

Q- Quick Estimates

A- Advance Estimates

The year- on- year growth rate of revenue receipts during 2021-22 and 2022-23 was higher than the GSDP growth rate however it declined significantly during the next two years. Despite the growth of 11.18 *per cent* in GSDP during 2024-25, the increase in Tax and Non tax revenue was only 3.87 *per cent.* Out of total Revenue receipts of ₹74,401.16 crore during 2024-25, the

[3] Buoyancy ratio indicates the degree of responsiveness of a fiscal variable with respect to a given change in the base variable.

Grants-in-Aid from GoI (₹53,279.80 crore) constituted almost 72 *per cent* of total Revenue receipts.

Revenue Receipts as percentage of GSDP and contribution from various sources in revenue receipts is given in **Chart 1.7** and **Chart 1.8**.

Chart 1.7: Revenue Receipts as percentage of GSDP

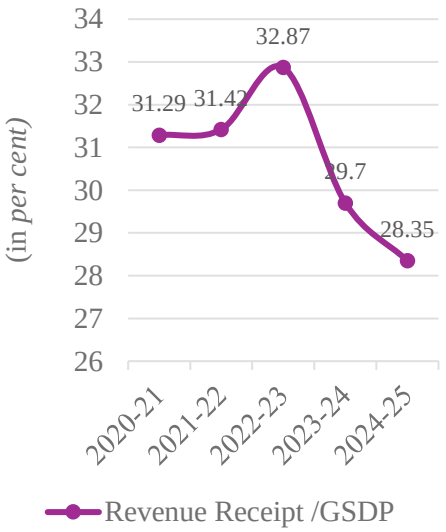

Chart 1.8: Contributions in revenue receipts

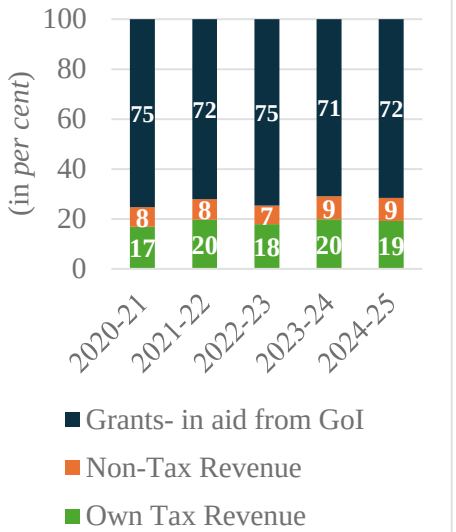
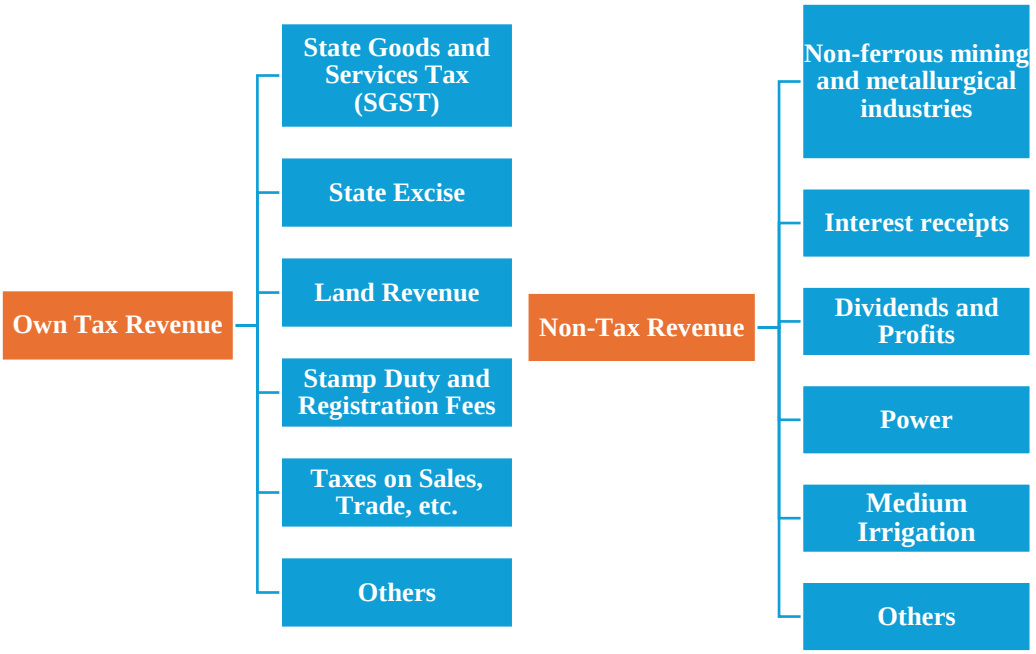


Grant in Aid remained the highest contributor to Revenue receipts of UT of J&K ranging between 71 to 75 *per cent* during FY 2020-25. Significant portion of GIA indicates more reliance on Government of India support. Diversifying revenue resources and strengthening the local tax base are essential for sustainable fiscal stability and development.

A. Union Territory's Own Resources

Chart 1.9: Details of UT's Own Revenue



(i) Own Tax Revenue

Own Tax Revenue is the revenue collected by the UT Government through taxes it is empowered to levy under the Constitution. Actuals for FY 2023-24, Budget Estimate (BE), Revised Estimate (RE), and Actuals of Own Tax Revenue for the FY 2024-25 is given in **Table 1.6**.

Table 1.6: Own Tax Revenue: 2023-24 (Actuals) and 2024-25 (BE, RE, and Actuals)

(₹ in crore)

Tax Revenue	2023-24 (Actual)	2024-25 (BE)	2024-25 (RE)	2024-25 (Actuals)
State Goods and Services Tax (SGST)	8,064.14	14,000	14,000	8,585.93
State Excise	2,490.25	2,600	2,600	2,271.92
Land Revenue	123.79	130	130	77.36
Stamp Duty and Registration Fees	677.54	800	800	688.14
Vehicle Tax	904.26	1,400	1,400	929.32
Taxes on Sales, Trade, etc.	1,631.19	1,900	1,900	1,688.52
Others	12.04	30	25	8.19
Total	**13,903.22**	**20,860**	**20,855**	**14,249.38**

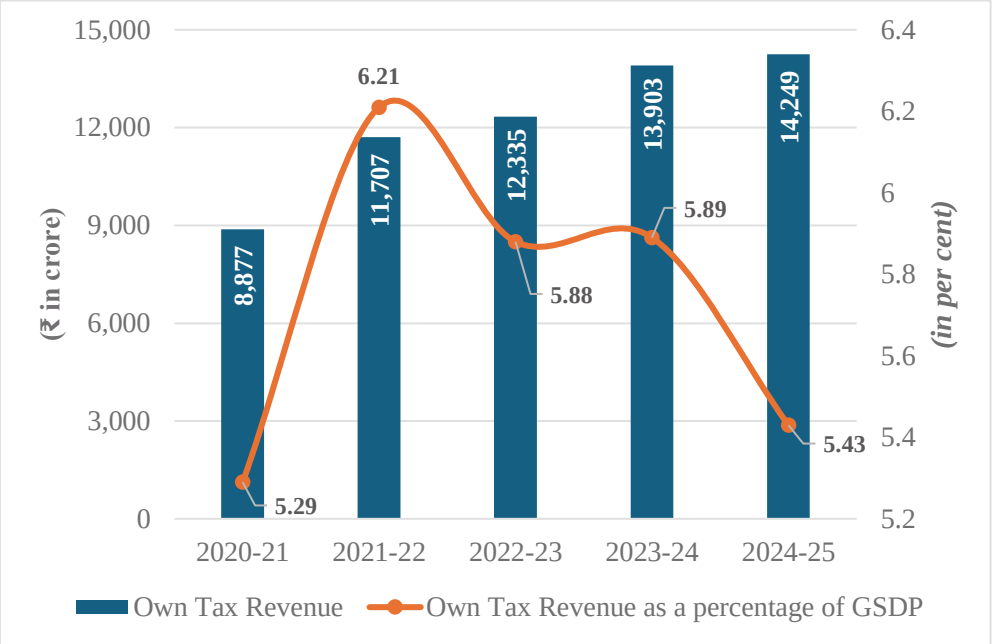
Source: Finance Accounts and Budget documents

The modest growth of 2.49 *per cent* in Own Tax Revenue during 2024-25, compared to the robust 11.18 *per cent* growth in GSDP, indicates a weakening

revenue performance relative to the size of the economy. The significant shortfall of around 32 *per cent* against both RE and BE highlights issues of overestimation and unrealistic revenue forecasting. Consequently, Own Tax Revenue as a share of GSDP declined from 5.89 *per cent* in 2023-24 to 5.43 *per cent* in 2024-25, reflecting reduced fiscal capacity. Such underperformance not only underscores inefficiencies in revenue mobilisation but also constrains the Government's ability to sustain planned expenditure levels.

Trends of own tax revenue and its components during the period 2020-21 to 2024-25 are shown in **Chart 1.10** and **Chart 1.11** respectively.

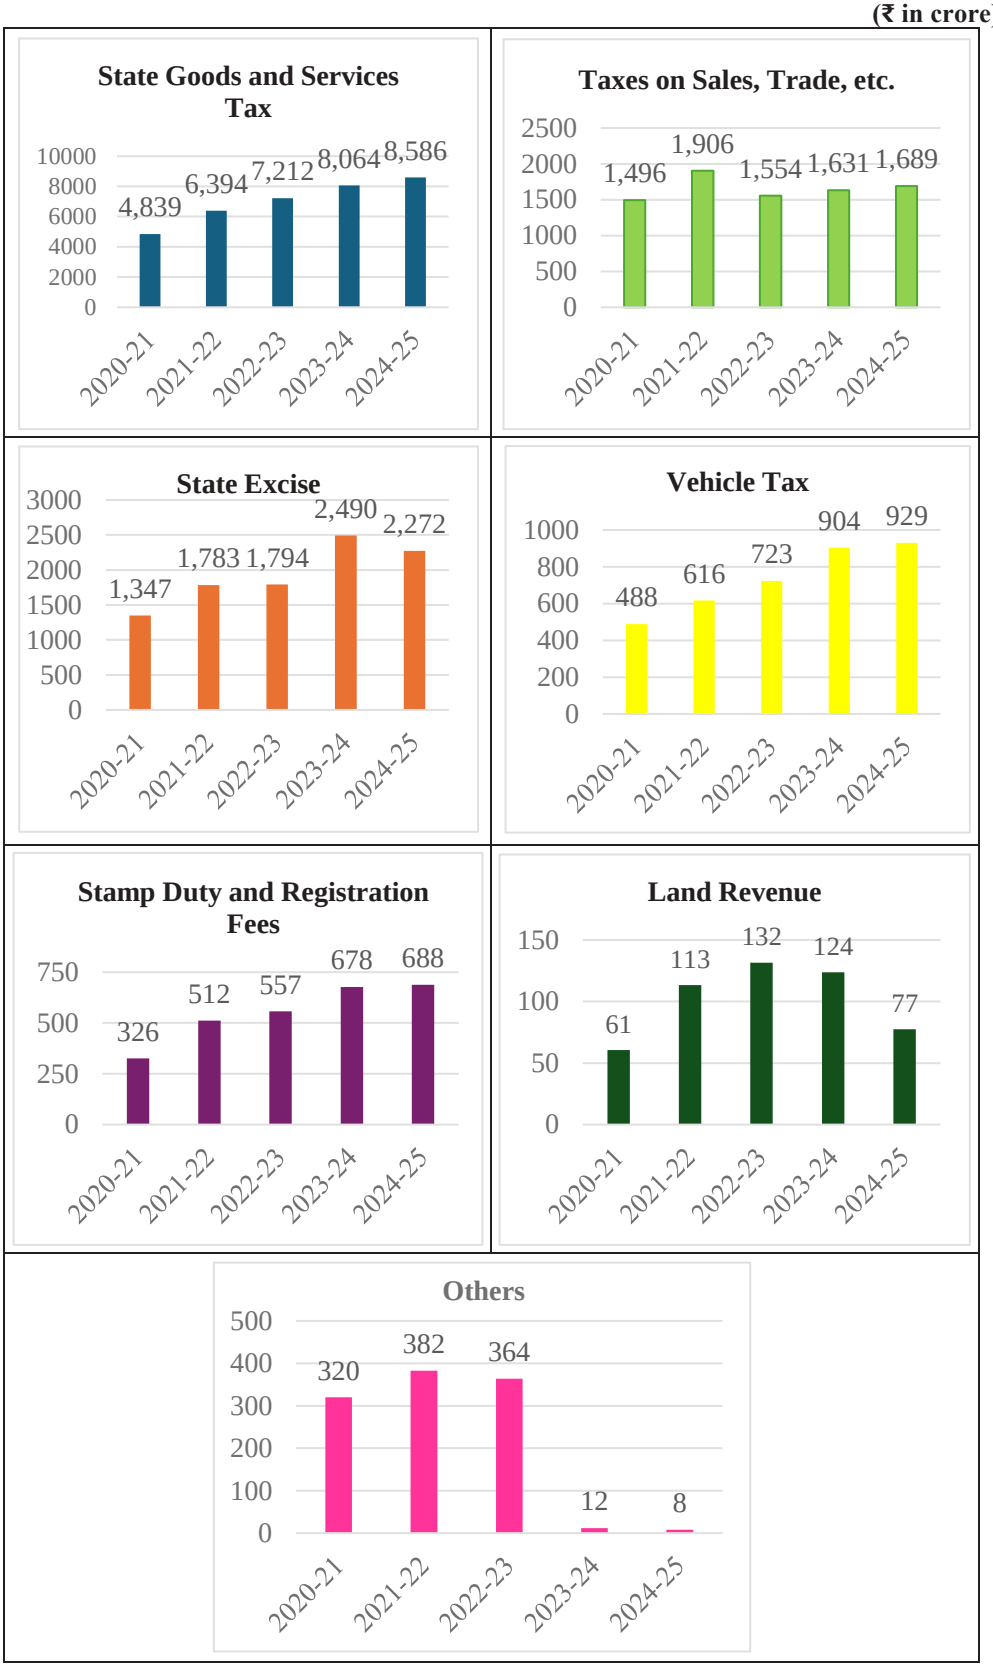
Chart 1.10: Trends of Own Tax Revenue during FY 2020-21 to FY 2024-25



Source: Finance Accounts

Chart 1.11: Major components of UT's Own Tax Revenue

(₹ in crore)



Source: Finance Accounts

Own Tax Revenue increased by ₹346.16 crore (2.49 *per cent*) during 2024-25 as compared to previous year. Major components of tax-revenue (except Land revenue, State Excise and Others) have shown an increase during 2024-25 as compared to 2023-24. SGST was major contributor to the overall growth in tax revenue.

However, there was decrease in tax revenue under State Excise and Land revenue during FY 2024-25. The decrease in State Excise was primarily due to the remittance of advance e-auction amounts for two years (2023–24 and 2024–25) during 2023–24, and for one year (2025–26) during 2024–25. Decrease under land revenue was due to lesser receipts under Sale of land and Land Revenue/ Tax.

(ii) Non-Tax Revenue

Non-Tax Revenue of a UT refers to the rent, fees, royalties and other receipts, of the UT Government from sources other than taxes.

Actuals for FY 2023-24, Budget Estimate (BE), Revised Estimate (RE), and Actuals of Non-Tax Revenue for the FY 2024-25 is given in **Table 1.7**.

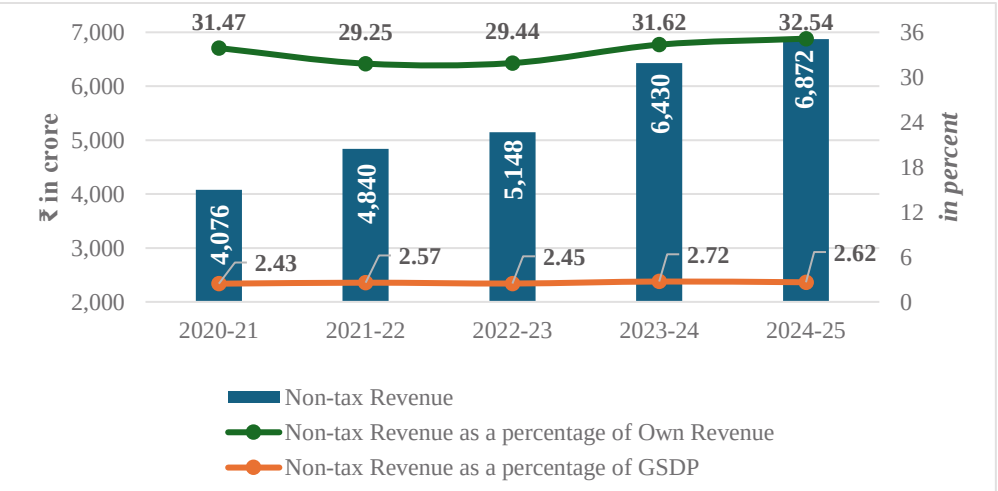
Table 1.7: Major Non-Tax Revenue: 2023-24 (Actuals) and 2024-25 (BE, RE, and Actuals)

(₹ in crore)

Non-Tax Revenue	2023-24 (Actual)	2024-25 (BE)	2024-25 (RE)	2024-25 (Actuals)
Interest Receipts	27.87	20	2	20.35
Dividends and Profits	31.41	200	0	130.78
Others	6,371.05	9,506	8,576	6,720.85
Total	**6,430.33**	**9,726**	**8,578**	**6,871.98**

Trends of Non-tax revenue and its components during the period 2020-21 to 2024-25 are shown in **Chart 1.12** and **Chart 1.13** respectively.

Chart 1.12: Trends in Non-Tax Revenue



Source: Finance Accounts of respective years.

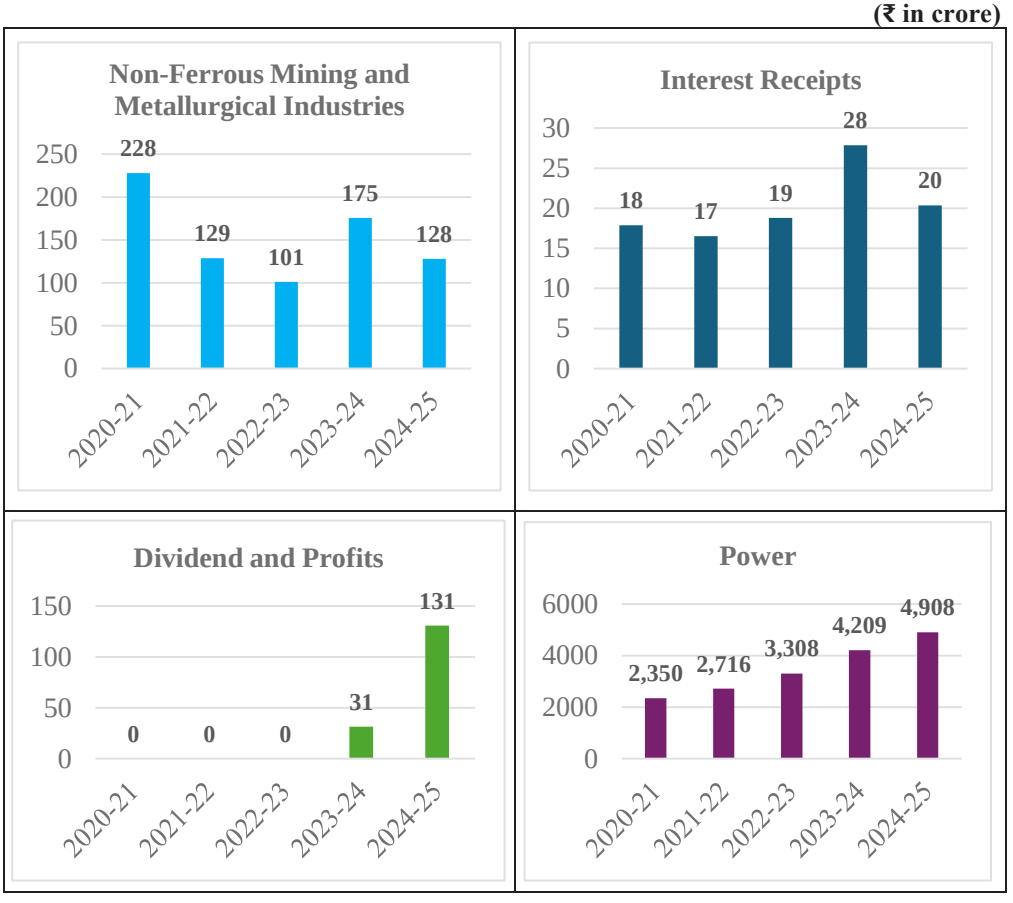
During 2024-25, there was an increase of ₹441.65 crore (6.87 *per cent*) under Non-Tax revenue with respect to 2023-24. However, it fell short of RE by more than 19 *per cent* and BE by around 29 *per cent*. Shortfall in comparison to BE and RE points towards unrealistic budgeting of Non-Tax revenue and adversely impacts the Government's capacity to plan expenditure and implement developmental programmes effectively.

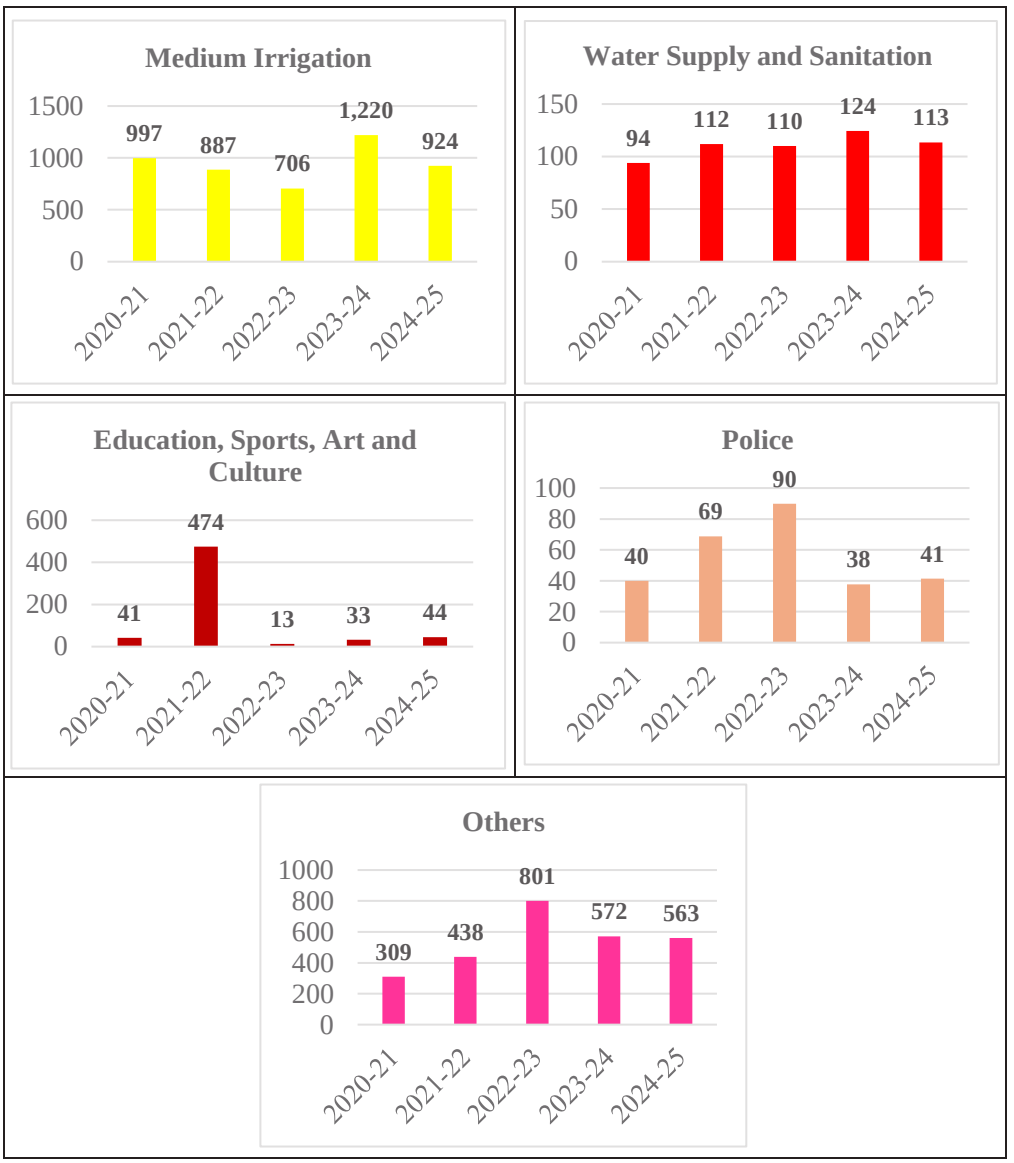
In reply, the department stated (January 2026) that efforts will be made to make budget more realistic.

The Growth rate of Non-Tax revenue (6.87 *per cent*) was less in comparison to the growth rate of GSDP (11.18 *per cent*) during 2024-25. Non-Tax revenue as a percentage of GSDP fell from 2.72 *per cent* in 2023-24 to 2.62 *per cent* in 2024-25, reflecting a weakening revenue mobilisation effort in this segment.

Chart 1.13: Major components of UT's Non-Tax Revenue

(₹ in crore)





Source: Finance Accounts of respective years

Power receipts constituted a major component of Non-Tax revenue, accounted for approximately 71 *per cent* of total Non-Tax revenue during 2024-25. Although the rates of sale of power were not revised during the year, the Government registered an increase in power receipts as compared to 2023-24. However, the receipts fell short of the budgeted target of ₹6,000 crore.

Water usage charges paid by the Hydel Power Projects continued to be a significant source of revenue under the Major Head 'Irrigation'. During 2023-24, arrears on account of water usage charges were realised from Jammu and Kashmir State Power Corporation (JKSPC). In 2024-25, however, lower water availability in reservoirs led to a decline in receipts under 'Irrigation' as compared to the previous year.

B. *Grants-in-aid from Government of India*

Trend of Grants-in-aid (GIA) from GoI and its components are shown in **Table 1.8**.

Table 1.8: Grants-in-aid from Government of India

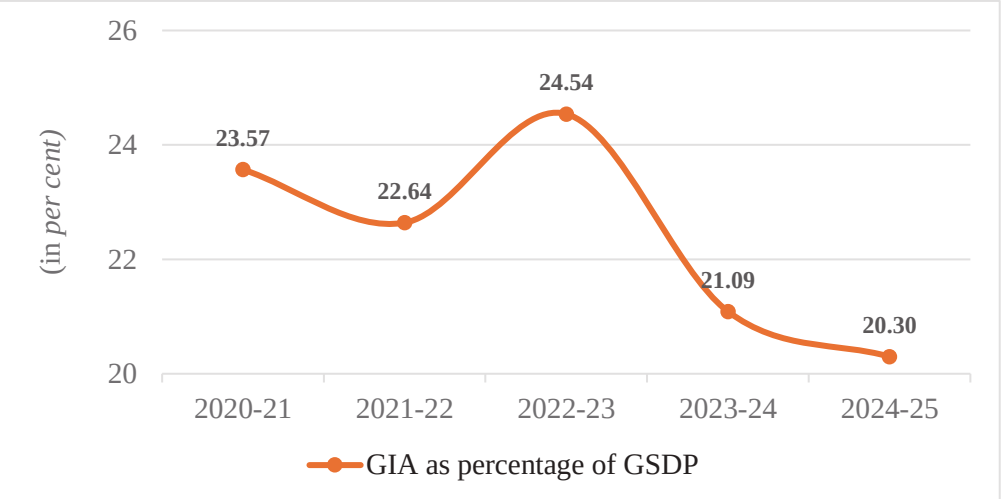
(₹ in crore)

Components	2020-21	2021-22	2022-23	2023-24	2024-25
Grants for Centrally Sponsored Plan Schemes	0	0	0	0	0
Grants for Centrally Sponsored Schemes	6,533.49	6,713.77	6,029.68	7,958.26	7,147.46
Finance Commission Grants	0	0	0	0	0
Other transfers/Grants to States/Union Territories with Legislature	33,008.62	35,977.00	45,463.25	41,815.88	46,132.34
Total	**39,542.11**	**42.690.77**	**51,492.93**	**49,774.14**	**53,279.80**

Source: Finance Accounts

Percentage of Grant-in-aid from Government of India to GSDP is given in **Chart 1.14**

Chart 1.14: Percentage of Grant-in-aid from Government of India to GSDP



Grants-in-Aid has increased from ₹49,774.14 crore in 2023-24 to ₹53,279.80 crore in 2024-25, though there was reduction in Grants for centrally sponsored schemes. During 2024-25, Grants-in-Aid from GoI constituted more than 71 *per cent* of the total Revenue receipts. It reflects UT Government's high fiscal dependence on Grants-in-Aid from Government of India.

Other transfers/Grants to States/Union Territories with Legislature of ₹46,132.34 crore was received by the UT during 2024-25, included Grants towards Jhelum and Tawi Flood Recovery Project (J&TFRP), an Externally Aided Projects (EAP) (₹170.00 crore) under Special assistance (₹46,004.17 crore).

GIA as percentage of GSDP decreased from 21.09 *per cent* in 2023-24 to 20.30 *per cent* in 2024-25, reflecting a marginal improvement in the UT's fiscal capacity and reduced relative dependence on GIA from GoI.

The UT Government agreed (January 2026) to high dependency on GIA due to very low scope for levy of tax revenue.

(i) Grants for Centrally Sponsored Schemes

Grants for Centrally Sponsored Scheme has reduced from ₹7,958.26 crore in 2023-24 to ₹7,147.46 crore in 2024-25. Out of the Grants of ₹7,147.46 crore for Centrally Sponsored Schemes during 2024-25, major allocations were made to the schemes shown in **Table 1.9**.

Table 1.9: Major Schemes receiving grants (above ₹100 crore)

(₹ in crore)

Name of the Scheme	2024-25 Amount (₹ in crore)	2023-24 Amount (₹ in crore)	Percentage change over previous year
Krishionnati Yojana	112.87	66.16	70.6

Pradhan Mantri Poshan Shakti Nirman (Erstwhile National Programme of Mid-Day Meal in Schools)	119.37	136.81	-12.75
Samagra Shiksha	823.49	865.44	-4.85
Saksham Anganwadi and Poshan 2.0 (Umbrella ICDS-Anganwadi Services Poshan Abhiyan Scheme for Adolescent Girls National Creche Scheme)	662.79	530.47	24.94

Source: Finance Accounts

There was reduction mainly in PMAY (Rural) scheme. The scheme was stated to have achieved 85 *per cent* completion rate in 2024-25 indicating the substantial completion of the works for which advances were granted in previous years.

1.2.2 Capital Receipts

Capital receipts comprise miscellaneous Capital receipts such as proceeds from disinvestments, recoveries of loans and advances, debt receipts from internal sources (market loans, borrowings from financial institutions/ commercial banks) and loans and advances from GoI.

Trends of Capital receipts and its components during 2020-21 to 2024-25 are shown in **Table 1.10.**

Table 1.10: Trends in growth and composition of Capital receipts

(₹ in crore)

Sources of UT's Receipts	**2020-21**	**2021-22**	**2022-23**	**2023-24**	**2024-25**

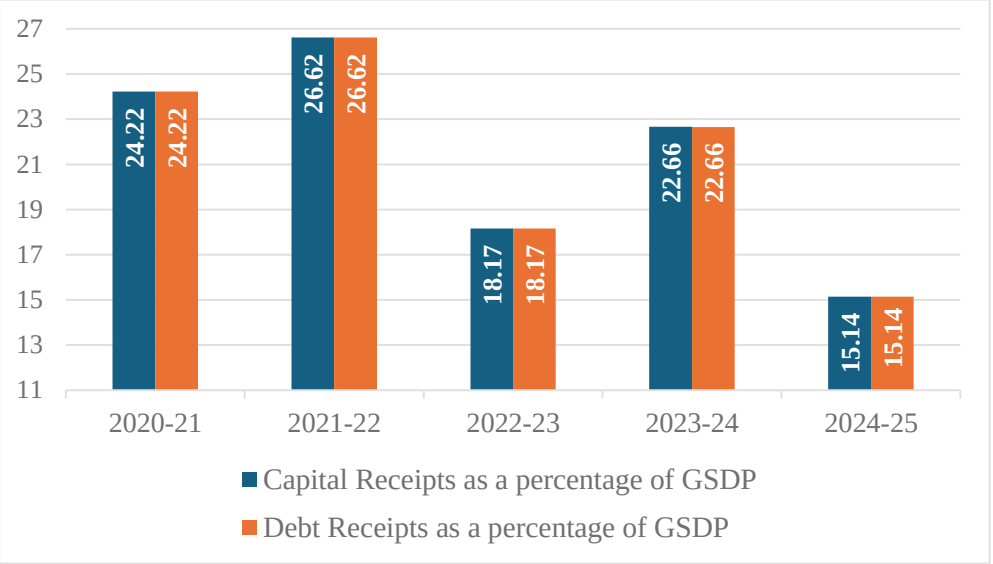
Source: Finance Accounts

** Includes Ways and Means Advance.*

 # Excludes back-to-back loans of ₹4,253.08 crore (₹2,099.80 crore and ₹3,845.49 crore received from the GoI during 2020-21 and 2021-22 respectively and its repayment of ₹1692.21crore in 2024-25), in lieu of GST Compensation shortfall.

Capital Receipts as percentage of GSDP is depicted in **Chart 1.15**

Chart: 1.15: Capital Receipts as percentage of GSDP



Capital receipts and Debt receipts as percentage of GSDP has declined in 2024-25 with respect to 2023-24. Reduction in Capital receipts and Debt receipts as percentage of GSDP was due to less borrowings made during 2024-25 as compared to 2023-24.

1.2.3 Expenditure

Government expenditure is classified into revenue expenditure, capital expenditure, and loans and advances. Revenue expenditure includes costs for maintenance, repairs, and day-to-day functioning of departments, including administrative and establishment expenses. Capital expenditure relates to the initial construction of projects and sanctioned improvements or additions to assets. Loans and advances comprise funds provided by the government to Public Sector Undertakings and other entities, which are recoverable over time. Details of expenditure, total expenditure as percentage of GSDP and share of its components is given in **Table 1.11, Chart 1.16** and **Chart 1.17** respectively.

Table 1.11: Total expenditure and its composition

(₹ in crore)

Parameters	2020-21	2021-22	2022-23	2023-24	2024-25
Total expenditure (TE)	63,190.77	70,390.14	73,832.65	78,721.81	82,547.28
Revenue expenditure (RE)	52,633.75	59,269.33	62,999.34	66,621.47	70,472.13
Capital expenditure (CE)	10,470.38	11,047.04	10,773.78	12,088.85	12,060.06
Loans and advances	61.64	73.77	59.53	11.49	15.09
Appropriation to contingency fund	25.00	-	-	-	-

Source: Finance Accounts

Total expenditure increased by ₹19,356.51 crore (30.63 *per cent*) from ₹63,190.77 crore in 2020-21 to ₹82,547.28 crore in 2024-25. However, the ratio of total expenditure to GSDP during this period consistently decreased from 37.66 *per cent* to 31.45 *per cent*. Reduction in total expenditure as percentage of GSDP indicates that growth of the economy has become relatively less dependent on Government expenditure.

Chart 1.16: Total Expenditure as Percentage of GSDP

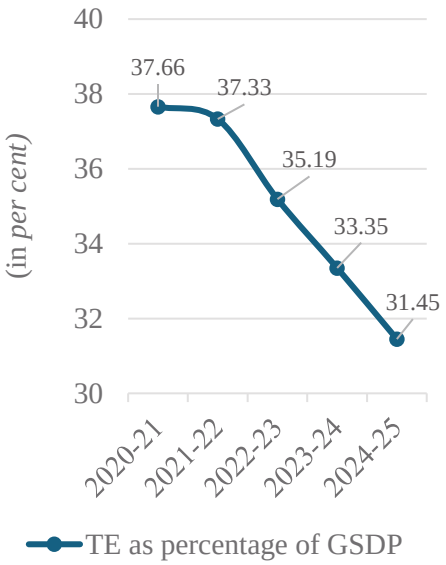


Chart 1.17: Share of components in Total Expenditure

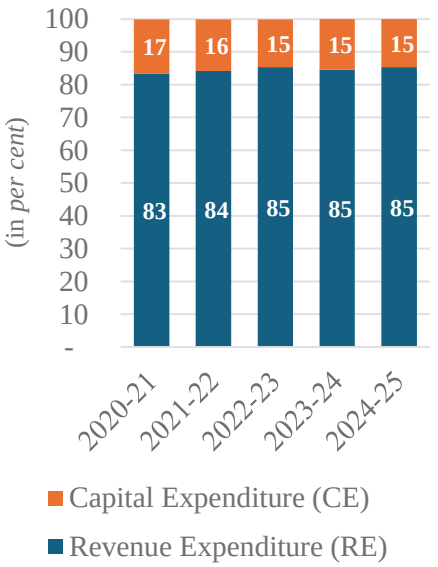


Source: Finance Accounts

Revenue expenditure constituted a sizeable proportion of total expenditure, and it ranged between 83 to 85 *per cent* during FY 2020-25. Out of the total expenditure of ₹ 82,547.28 crore incurred by the UT during the FY 2024-25, a major portion of ₹70,472.13 crore pertained to Revenue expenditure which accounted for 85 *per cent* of Total expenditure. The proportion of Capital expenditure to the total expenditure, on the other hand, decreased from 17 *per cent* in 2020-21 to 15 *per cent* in 2024-25. The predominance of Revenue expenditure indicates a high level of committed and administrative spending, which constrains fiscal flexibility and limits the resources available for capital creation and developmental activities.

Sector-wise Total expenditure

Sector-wise composition of expenditure is given in **Table 1.12** and relative share of various sectors in total expenditure is depicted in **Chart 1.18**.

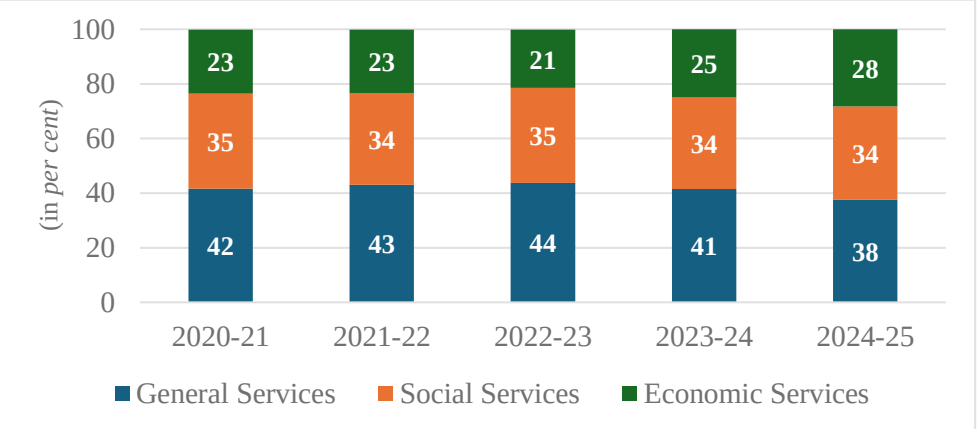
Table 1.12: Sector-wise Total expenditure

(₹ in crore)

Parameters	2020-21	2021-22	2022-23	2023-24	2024-25
General Services	26,297.40	30,298.89	32,260.50	32,682.13	31,041.17
Social Services	21,964.27	23,655.75	25,697.79	26,398.12	28,233.77
Economic Services	14,842.46	16,361.73	15,814.83	19,630.07	23,257.25
Grants to Local Bodies	0.00	0.00	0.00	0.00	0.00
Loans and Advances	61.64	73.77	59.53	11.49	15.09

Source: Finance Accounts

Chart 1.18: Relative share of various sectors in Total expenditure



Source: Finance Accounts

Relative share of various components of expenditure in the total expenditure showed significant fluctuation. Although the share of General services in total expenditure remained the highest throughout, the combined share of Social and Economic services which represented developmental expenditure improved from 59 *per cent* in 2023-24 to 62 *per cent* in 2024-25.

1.2.3.1 Revenue Expenditure

Revenue expenditure is incurred to maintain the current level of services and payment for the past obligation. As such, it does not result in any addition to the UT's infrastructure and service network. Growth of revenue expenditure, its ratio to total expenditure, GSDP and revenue receipts are shown in **Table 1.13**.

Table 1.13: Revenue expenditure – Basic Parameters

(₹ in crore)

Parameters	2020-21	2021-22	2022-23	2023-24	2024-25
Total expenditure (TE)*	63,165.77	70,390.14	73,832.65	78,721.81	82,547.28
Revenue expenditure (RE)	52,633.75	59,269.33	62,999.34	66,621.47	70,472.13
RE as percentage of Revenue Receipts	100.26	100.05	91.34	95.03	94.72
RE as percentage of TE	83.33	84.20	85.33	84.63	85.37

Parameters	2020-21	2021-22	2022-23	2023-24	2024-25
RE/GSDP (*per cent*)	31.37	31.43	30.03	28.22	26.85
Year-on-year growth (in *per cent*)					
Revenue expenditure	NA	12.61	6.29	5.75	5.78
GSDP Growth	2.25	12.38	11.27	12.51	11.18

Source: Finance Accounts
**Does not include appropriation to Contingency Fund*

Revenue expenditure increased by ₹17,838.38 crore (33.89 *per cent*) from ₹52,633.75 crore in 2020-21 to ₹70,472.13 crore in 2024-25. However, the percentage of Revenue expenditure to GSDP decreased from 31.37 *per cent* in 2020-21 to 26.85 *per cent* in 2024-25, indicating that while Revenue expenditure continued to rise in absolute terms, its growth was outpaced by the expansion of the overall economy.

A. Sector-wise Revenue expenditure

Sector-wise composition of Revenue expenditure is given in **Table 1.14** and Relative share of various sectors in Revenue expenditure is depicted in **Chart 1.19**. Detailed Sector-wise expenditure is given in ***Appendix 1.2***.

Table 1.14: Sector-wise Revenue expenditure

(₹ in crore)

Parameters	2020-21	2021-22	2022-23	2023-24	2024-25
General Services	25,461.88	29,567.10	31,080.57	31,934.59	30,166.66

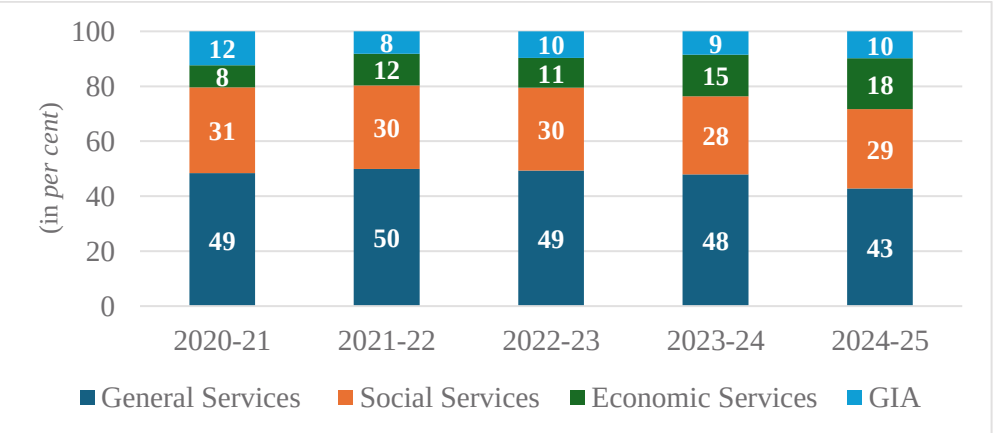
Source: Finance Accounts

Chart 1.19: Relative share of various sectors in Revenue expenditure



Source: Finance Accounts

Revenue expenditure increased by ₹3,850.66 crore (5.78 *per cent*) from ₹66,621.47 crore in 2023-24 to ₹70,472.13 crore in 2024-25. Expenditure on

Economic and Social Sector is considered as development expenditure, the combined share of Revenue expenditure on Economic and Social services has improved from 43 *per cent* in 2023-24 to 47 *per cent* in 2024-25. Expenditure on General Services which is administrative expenses, has reduced significantly during 2024-25 which is primarily due to bearing of expenditure of 'Police' and 'Public order' of UT of J&K by the Ministry of Home, Government of India.

B. Committed Expenditure

The committed expenditure of the UT Government on revenue account consists of interest payments; expenditure on salaries and wages; and pensions. It has first charge on Government resources. The components of committed expenditure are given in **Table 1.15** and committed expenditure as a percentage of revenue receipts and remaining fiscal space for other expenditure is given in **Chart 1.20.**

Table 1.15: Components of Committed expenditure

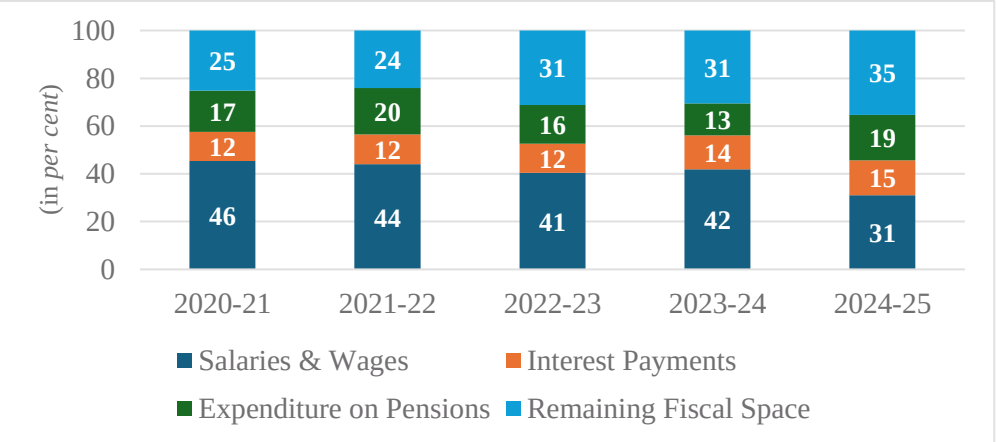
(₹ in crore)

Components of Committed expenditure	2020-21	2021-22	2022-23	2023-24	2024-25
Salaries & Wages	23,851.70	26,077.64	27,839.07	29,381.81	23,099.56
Expenditure on Pensions	9,078.11	11,563.00	11,142.38	9,396.24	14,155.07
Interest Payments	6,372.46	7,360.31	8,493.82	9,924.96	10,874.51
Total	**39,302.27**	**45,000.95**	**47,475.27**	**48,703.01**	**48,129.14**
Committed expenditure as a percentage of Revenue expenditure	**74.67**	**75.93**	**75.36**	**73.10**	**68.30**

Source: Finance Accounts

Upward trend on Committed expenditure leaves the Government with lesser flexibility for the development sector. Although there was marginal decrease of ₹573.87 crore (1.18 *per cent*) in committed expenditure during 2024-25 in comparison to the previous year, committed expenditure as a percentage of Revenue Expenditure declined significantly from 73.10 *per cent* in 2023-24 to 68.30 *per cent* in 2024-25 indicating an improvement in fiscal space available to the Government for non-committed and developmental expenditure. The increase in pension outgo was mainly due payment of arrears of previous years. The expenditure on salaries decreased mainly due to taking over the expenditure of 'Police' and 'Public order' by GoI during 2024-25.

Chart 1.20: Committed expenditure as a percentage of Revenue receipts and remaining Fiscal space



Source: Finance Accounts

The percentage of Non-Committed expenditure to Revenue receipts during 2020-21 to 2024-25 ranged between 24 *per cent* and 35 *per cent*. It shows that major portion of Revenue receipts was exhausted to meet Committed expenditures. Percentage of Committed expenditure to revenue expenditure remained around 75 *per cent* during 2020-21 to 2022-23. However, it showed a declining trend from 75.36 *per cent* in 2022-23 to 68.30 *per cent* in 2024-25. Reduction in committed expenditure was due to reduction in expenditure on Salary during 2024-25. The reduction in committed expenditure gave additional fiscal space which can be utilized for clearing interest liability and strengthening fiscal sustainability.

C. Subsidies

The subsidies during the current year increased by ₹ 22.28 crore (47.10 *per cent*) from the previous year. The increase was mainly due to increase of ₹34.21 crore on account of subsidy under Industries and Commerce department. Department-wise major subsidies for FYs 2020-21 to 2024-25, are shown in **Table 1.16**.

Table 1.16: Department-wise Subsidies during FYs 2020-21 to 2024-25

(₹ in crore)

Sl. No.	Departments	2020-21	2021-22	2022-23	2023-24	2024-25

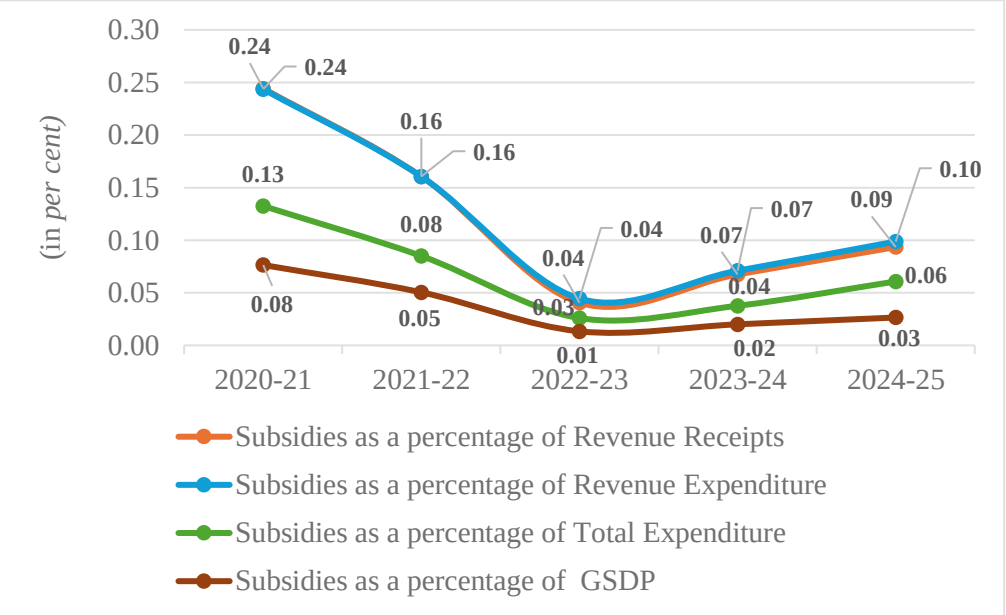
Source: Finance Accounts of respective years

Chart 1.21: Trend analysis of subsidies



Subsidies did not form a major component of expenditure for UT as it constituted only between 0.03 *per cent* & 0.13 *per cent* of the Total expenditure during 2020-21 to 2024-25.

D. Financial assistance by the UT Government to Local Bodies and Other Institutions

Assistance provided by way of grants to the local bodies and other institutions during the period 2020-21 to 2024-25 is presented in **Table 1.17.**

Table 1.17: Financial assistance to Local Bodies and other institutions

(₹ in crore)

Institutions	2020-21	2021-22	2022-23	2023-24	2024-25

Total (A+B)	**6,531.86**	**4,870.85**	**6,280.51**	**5,841.75**	**6,980.31**

Institutions	2020-21	2021-22	2022-23	2023-24	2024-25
Revenue expenditure	**52,633.75**	**59,269.33**	**62,999.34**	**66,621.47**	**70,472.13**
Assistance as percentage of Revenue expenditure	12.41	8.22	9.97	8.77	9.91

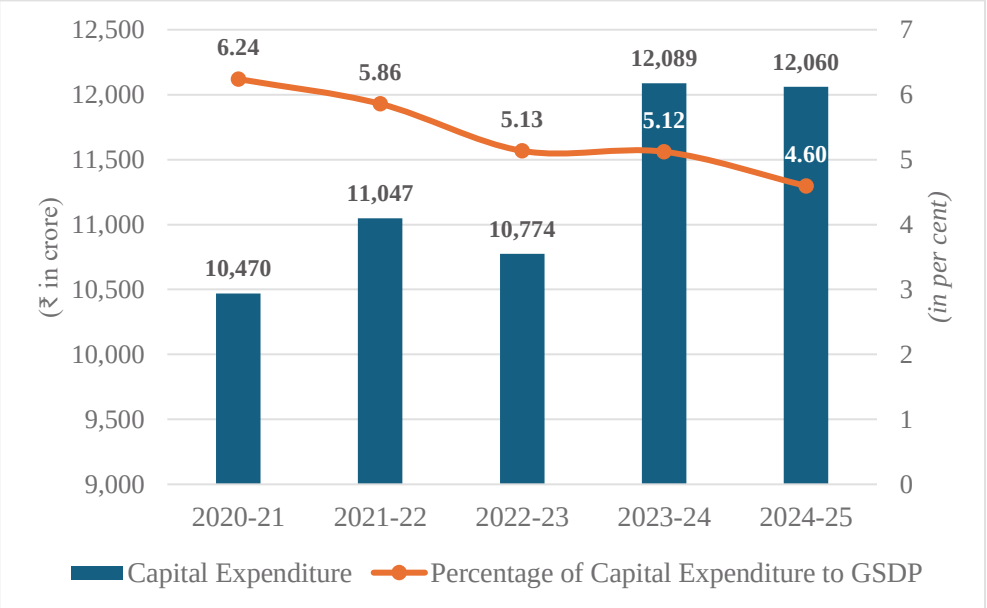
Source: Finance Accounts

During the current year, financial assistance to the local bodies and other institutions increased by ₹1,138.56 crore (19.49 *per cent*) over the previous year. The increase was mainly due to increase in assistance to Jammu and Kashmir Power Companies (₹82.31 crore, 6.38 *per cent*) and other institutions (₹1,335.12 crore, 137.96 *per cent).* The overall quantum of financial assistance to the local bodies and other institutions as percentage to revenue expenditure increased to 9.91 *per cent* during the current year from 8.77 *per cent* in the previous year, indicating a higher allocation of resources towards institutional support.

1.2.3.2 Capital Expenditure

Capital expenditure is primarily expenditure on creation of fixed infrastructure assets, such as roads, buildings, *etc*. Capital expenditure, in both the Centre and the UT, is being met through budgetary support and extra budgetary resources/ off-budget borrowings. It also includes investments made by the UT Government in Companies/Corporations. Trend of Capital expenditure in the UT over the last five years *i.e.* 2020-25 is given in **Chart 1.22**.

Chart 1.22: Capital expenditure in the Union Territory



Source: Finance Accounts of respective years

Capital expenditure has reduced from ₹12,089 crore in 2023-24 to ₹12,060 crore in 2024-25. Further, percentage of Capital expenditure as percentage of

GSDP has reduced from 5.12 *per cent* in 2023-24 to 4.60 *per cent* in 2024-25, indicating a relative slowdown in capital formation by the Government. However, percentage of Capital expenditure to Public debt receipt has increased from 22.60 *per cent* in 2023-24 to 30.35 *per cent* in 2024-25, mainly due to reduction in Public debt receipts.

The Government has been making budgetary provisions for Capital works of State Public Sector Undertakings (SPSUs) under its own Capital Head of Accounts. An expenditure of ₹554.24[4] crore was booked under this head towards works executed for SPSUs. However, since the assets created belong to the SPSUs and not the Government, such expenditure from the Government's Capital Head is in violation of the note below Rule 30(1) of Government Accounting Rules (GAR), 1990. This practice has also led to an over-estimation in the Government's Capital expenditure without corresponding addition of Government-owned Capital assets, thereby distorting the true depiction of Capital formation in Government accounts.

On being pointed out it was replied (January 2026) that the expenditure on account of SPSUs is being incurred as Government support to these SPSUs to become self-reliant. The Capital expenditure on these SPSUs shall be considered by the Government as equity at appropriate time.

The reply is not tenable, as the expenditure could be considered as capital only when it is converted as equity.

A. Sector-wise Capital Expenditure

Sector-wise composition of Capital expenditure is given in **Table 1.18 and Chart 1.23**. Detailed Sector-wise expenditure is given in ***Appendix 1.2.***

Table 1.18: Sector-wise Capital expenditure

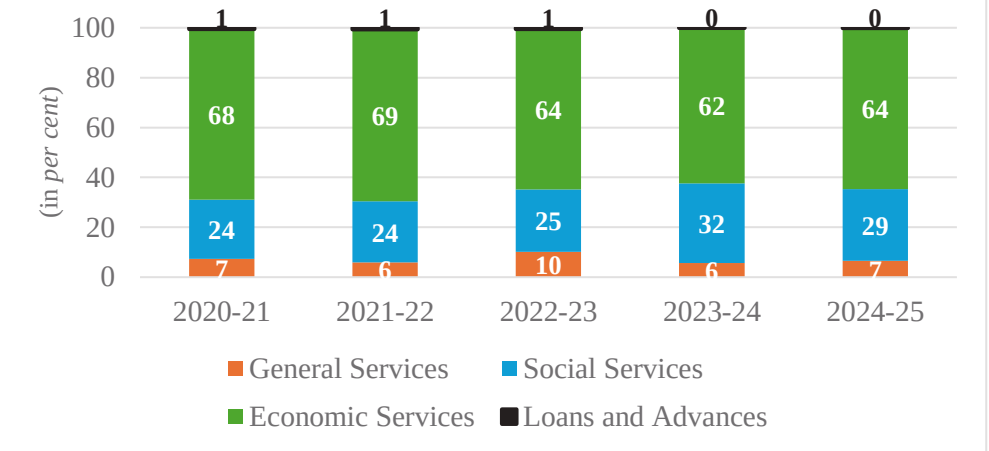
(₹ in crore)

Parameters	2020-21	2021-22	2022-23	2023-24	2024-25
General Services	776.24	659.03	1,098.38	683.93	795.59
Social Services	2,492.57	2,722.61	2,713.42	3,860.94	3,465.91
Economic Services	7,201.57	7,665.40	6,961.98	7,543.98	7,798.56
Loans & Advances	61.64	73.77	59.53	11.49	15.09

Source: Finance Accounts

[4] JKDISCOMs: ₹539.22 crore, JKTDC: ₹2.56 crore and JKHPMC ₹12.46 crore

Chart 1.23: Relative share of various sectors in Capital expenditure



Source: Finance Accounts

Economic services had the major share in Capital expenditure followed by social services throughout 2020-25. Expenditure on Economic and Social Sector is considered as development expenditure, the combined share of Capital expenditure on Economic and Social services remained at 93 *per cent* in FY 2024-25.

B. Quality of investments in the companies, corporations and other bodies

As of 31st March 2025, the UT Government's investment in companies, corporations and other bodies stood at ₹605.10 crore, comprising Government Companies (₹72.26 crore), Co-operative Societies (₹ 236.50 crore), Statutory Corporations (₹193.91 crore) and Rural Banks (₹102.43 crore). There is also investment of ₹3,426.75 crore made by erstwhile State of Jammu and Kashmir which is yet to be apportioned between UT of Jammu and Kashmir and UT of Ladakh.

Trends of investment at the end of the year in companies, corporations, and co-operative banks and societies, and return on these investment is depicted in **Chart 1.24**. Rate of return on investment made *vis-à-vis* average rate of interest on government borrowing is depicted in **Chart 1.25.**

Chart 1.24: Investment and Return

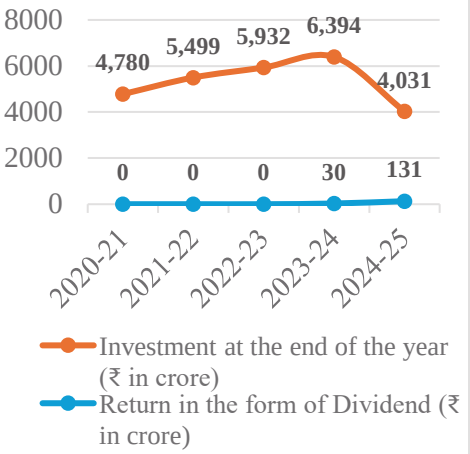


Chart 1.25: Rate of return on investment vis-a-vis average rate of interest on Government Borrowings

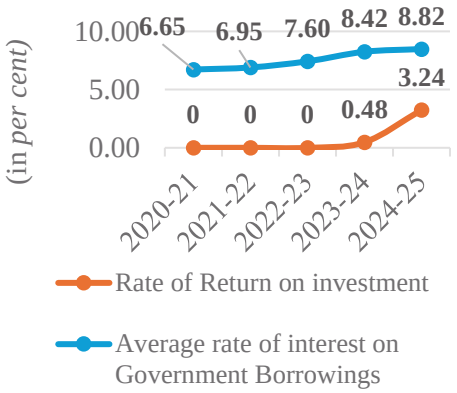

During 2024-25, the return on investment was ₹130.78 crore (3.24 *per cent*). The return was only between zero *per cent* and 3.24 *per cent* during 2020-25 while the rate of interest paid by the UT Government on its borrowings was between 6.65 *per cent* and 8.82 *per cent* during the same period. Over the past five years, the difference in cost of Government borrowings and return on investments in PSUs was to the tune of ₹1,883.60 crore, reflecting the low financial returns on invested capital.

An amount of ₹4,031.25 crore was invested in 52 SPSUs up to FY 2024-25 (including investment made by erstwhile State of Jammu and Kashmir). Out of 52 PSUs, only one PSUs gave return of ₹130.78 crore during the F.Y 2024-25 which was only 3.24 *per cent* of total investment including investment of erstwhile State. However, Government borrowed funds at an average rate of interest of 8.82 *per cent* during 2024-25, indicating that investments in PSUs have not been generating commensurate returns, thereby imposing an implicit cost on Government finances.

Lack of Dividend Policy and Its Impact

A well-defined dividend policy mandating a minimum return from profit-making enterprises, enables the Government to optimise its returns from investments in SPSEs and enhances monitoring of the SPSEs financial performance. It was observed that the UT of Jammu and Kashmir has not formulated or enforced a dividend policy for its Public Sector Undertakings (PSUs). During last two years, only Jammu and Kashmir Bank has given dividend to Government. No other company has given dividend to the Government. This has resulted in persistently nil/low returns ranging zero to

3.24 *per cent* during the last five years on the government's substantial equity investments, undermining the potential for non-tax revenue generation.

In reply, the Department stated (January 2026) that targets shall be given to PSUs to earn profit and dividend policy will also be framed.

C. Loans and Advances by UT Government

In addition to the investments in co-operative societies, corporations and companies, the UT Government has also been providing loans and advances to many institutions/organisations. **Table 1.19** presents the position of outstanding loans and advances as on 31st March 2025 and interest receipts *vis-à-vis* interest payments by the UT Government on its borrowings during the last five years.

Table 1.19: Quantum of loans disbursed and recovered during 2020-25

(₹ in crore)

[5] Interest paid ₹8,242.92 crore on public borrowings during 2022-23 as *per cent* of Average Public debt and other liabilities of UT and erstwhile State excluding back-to-back loans received from GoI in lieu of GST Compensation ((OB: ₹1,06,926.76 crore + CB: ₹1,09,997.14 crore)/2 = ₹1,08,461.95 crore).

[6] Interest paid ₹9,626.79 crore on public borrowings during 2023-24 as *per cent* of Average Public debt and other liabilities of UT and erstwhile State excluding back-to-back loans received from GoI in lieu of GST Compensation ((OB: ₹1,09,997.14 crore + CB: ₹1,18,792.68 crore)/2 = ₹1,14,394.91 crore).

[7] Interest paid ₹10,854.38 crore on public borrowings during 2024-25 as *per cent* of Average Public debt and other liabilities of UT and erstwhile State excluding back-to-back loans received from GoI in lieu of GST Compensation ((OB: ₹1,18,792.68 crore + CB: ₹1,27,216.38 crore)/2 = ₹1,23,004.53 crore).

Difference between the rate of interest received and interest paid (*per cent*)	(-) 6.65	(-) 6.87	(-) 7.39	(-) 7.47	(-)8.54

Source: Finance Accounts

**Figures in brackets are the balances of Outstanding loans of the erstwhile State of Jammu and Kashmir as on 30th October 2019, yet to be apportioned between the two newly created UTs.*

***Worked out on borrowings including Outstanding borrowings of the erstwhile State (₹82,050.50 crore) which is to be apportioned between successor UTs, but excluding Back to Back loans in lieu of GST compensation (2020-25: ₹4,253.08 crore)*

During the year 2024-25, the Government of UT of Jammu and Kashmir disbursed loans and advances of ₹15.09 crore and recovered loans and advances amounting to ₹0.44 crore. Recoveries of Loans and Advances are not forthcoming from loss-making public-sector undertakings, resulting in progressive accumulation of outstanding loans and locking up of Government funds in non-performing assets.

The Government of UT of Jammu and Kashmir had total outstanding loans and advances of ₹231.91 crore ending 31st March 2024 which increased to ₹246.56 crore at the end of 31st March 2025. In addition, there were Loans and Advances of ₹1,740.44 crore disbursed by the Government of the erstwhile State which were outstanding as on 30th October 2019 and are yet to be divided between the UT of Jammu and Kashmir and UT of Ladakh.

The quantum of loans and advances disbursed by the Government has not yielded commensurate returns during the period 2020-25. The low recovery of loans and advances disbursed underscores the need for the Government to strengthen monitoring mechanisms and enforce effective recovery measures to ensure better realisation of loans and accrued interest.

In reply, the department stated (January 2026) that Government has substantially decreased the amount of loans disbursed during last four years and the funds are released to PSUs as loans for more accountability.

1.3 Contingency Fund

The Contingency Fund of the Government of UT of J&K is intended to provide advances for meeting unforeseen expenditure, pending its authorisation by the UT Legislature. The fund is recouped once the Legislature approves the additional expenditure. The corpus of the Contingency Fund of UT is ₹25 crore.

1.4 Public Account

Receipts and Disbursements in respect of certain transactions such as Small Savings, Provident Funds, Reserve Funds, Deposits, Suspense, Remittances, etc., which do not form part of the Consolidated Fund, are kept in the Public Account set up under Section 68(1) of Jammu and Kashmir Re-organisation Act, 2019 and are not subject to vote by the UT Legislature. The balance after

disbursements during the year is the fund available with the Government for use for various purposes.

1.4.1 Net Public Account Balances

The component-wise net balances in Public Account of the UT is given in **Table 1.20**.

Table 1.20: Component-wise net balances in Public Account

(₹ in crore)

Sector	Sub Sector	2020-21	2021-22	2022-23	2023-24	2024-25

Source: Finance Accounts

Note: *+ive denotes debit balance and –ive denotes credit balances. The figures in brackets indicate balances of the erstwhile State of Jammu and Kashmir yet to be apportioned between the two newly created UTs.*

The total credit balance under Public Account of UT of Jammu and Kashmir was ₹6,795.81 crore ending 31st March 2025. There was also a credit balance of ₹37,485.92 crore ending 30th October 2019 under Public Account of the erstwhile State of Jammu and Kashmir, which is yet to be bifurcated between the UT of Jammu and Kashmir and UT of Ladakh.

1.4.2 Reserve Funds

Reserve Funds are created for specific and defined purposes under the Public Account of the State/UT Government. These funds are met with contributions or grants from the Consolidated Fund or from outside agencies. It comprises interest bearing reserve funds and reserve funds not bearing interest.

There were two interest bearing funds and five Reserve Funds not bearing interest as on 31st March 2025. The fund balances lying in these Reserve Funds as on 31st March 2025 are given in **Table 1.21**.

Table 1.21: Detail of Major Reserve Funds

(₹ in crore)

Name of Reserve fund	Opening Balance	Receipts during the year	Interest receipts	Repayments during the year	Balance as on 31st March 2025
Reserve Funds bearing Interest					
State Disaster Response Fund	814.50	442.57	0	29.11	1,227.96

Source: Finance Accounts

Note: Balances ending 30th October 2019 of erstwhile State were not apportioned between the two UTs (UT of Jammu & Kashmir and UT of Ladakh); as such, opening balance of UT of Jammu & Kashmir has been taken as zero, due to which there was negative closing balances.

A. Reserve Funds bearing Interest

State Disaster Response Fund (SDRF)

In terms of guidelines on constitution and administration of the State Disaster Response Fund (under Major Head- '8121-General & Other Reserve Funds' which is under interest bearing section), the Central and State Governments are required to contribute to the fund in the proportion of 90:10. On re-organisation of the State of Jammu and Kashmir into two new Union Territories, the Government of UT of Jammu and Kashmir continued with the State Disaster Response Fund. During the year 2024-25, the Government of UT of Jammu and Kashmir received ₹279.00 crore on account of 'Grants

towards contribution to UT Disaster Response Fund' as released by the Ministry of Home Affairs, Government of India. The UT Government share during the year was ₹31.00 crore. The Government transferred ₹310.00 crore (Central share ₹279.00 crore, UT share ₹31.00 crore), to the Fund under Major Head 8121-122 SDRF. Further, an amount of ₹132.57crore was also credited to the Fund on account of interest.

An amount of ₹29.11crore was set off under Major Head 2245 as expenditure met from the Fund and no amount was invested from the Fund. The closing balance in the Fund as on 31st March 2025 was ₹1,227.96 crore.

Besides, there is a balance of ₹1,271.48 crore as on 30th October 2019 (pre-reorganisation) which is yet to be apportioned between the UT of Jammu and Kashmir and UT of Ladakh.

State Compensatory Afforestation Fund

In compliance with the instructions issued by the Ministry of Environment, Forests and Climate Change, Government of India, the State Governments are required to establish the State Compensatory Afforestation Fund (SCAF) under interest bearing section in Public Account of the State/UT for amounts received from user agencies for undertaking Compensatory Afforestation.

On re-organisation of erstwhile State of Jammu and Kashmir into two new Union Territories, the successor UT of Jammu and Kashmir continued with the State Compensatory Afforestation Fund. During the year 2024-25, the Government of UT of Jammu and Kashmir received ₹0.24 crore (₹1.20 crore in previous year) from the user agencies. No amount was remitted to the National Fund during 2024-25. The Government of UT of Jammu and Kashmir received ₹150.98 crore (₹39.99 crore in previous year) from National Compensatory Afforestation Deposit.

The Government incurred an expenditure of ₹161.72 crore from the Fund and no amount was invested during the year.

The balance in the State Compensatory Afforestation Fund (MH-8121-129) as on 31st March 2025 was ₹1,121.42 crore. There is also balance of ₹142.27 crore in State Compensatory Afforestation Deposit under classification 8336-103 as on 31st March 2025 pending transfer to State Compensatory Afforestation Fund/National Fund.

(B) Reserve Funds not bearing Interest:

Consolidated Sinking Fund

The Government of UT of Jammu and Kashmir set up the Consolidated Sinking Fund in 2023-24 for amortization of loans. According to the guidelines of the Fund, UT may contribute a minimum of 0.5 *per cent* of their outstanding liabilities (Internal debt + Public Account) at the end of the previous year to the Consolidated Sinking Fund. During the year 2024-25, Government contributed ₹72.51 crore to the fund against the required contribution of ₹185.48 crore. The total accumulation of the Fund was ₹305.67 crore as on 31st March 2025 (₹232.05 crore as on 31st March 2024).

There was also a balance of ₹355.87 crore in the Fund as on 30th October 2019 (pre re-organisation) yet to be apportioned between the UT of Jammu and Kashmir and UT of Ladakh.

Guarantee Redemption Fund

The UT Government constituted Guarantee Redemption Fund to be administered by the RBI. The notification issued by the UT Government, effective from 2023-24, stipulates that the UT Government shall initially contribute a minimum of one *per cent* and thereafter at the rate of 0.5 *per cent* of outstanding guarantees at the end of the previous year to achieve a minimum level of three *per cent* in next five years. The fund shall be gradually increased to a desirable level of five *per cent*. During the year, Government contributed ₹53.00 crore. The total accumulation of the Fund was ₹61.20 crore as on 31st March 2025 (₹7.00 crore as on 31st March 2024).

Against the outstanding guarantees of ₹24,484.97 crore at the end of 2023-24, an amount of ₹122.43 crore was required to be invested in 2024-25, in addition to ₹248.68 crore due for 2023-24. Thus, the GRF should have accumulated to ₹371.11 crore by the end of 2024-25. However, as of March 2025, there is a shortfall of ₹309.91 crore.

There was also a balance of ₹20.42 crore in the Fund as on 30th October 2019 (pre re-organisation) yet to be apportioned between the UT of Jammu and Kashmir and UT of Ladakh.

1.4.3 Cash Balances

As per the agreement with Reserve Bank of India (RBI), State/UT Governments must maintain a minimum daily cash balance with the Bank. If the balance falls below this minimum, the shortfall is met through instruments like Ways and Means Advances (WMA)/Special Ways and Means Advances

(SWMA)/ Special Drawing Facility (SDF)/ Overdrafts (OD), with the WMA limit revised periodically by RBI.

The Government of UT of Jammu and Kashmir maintained minimum cash balance of ₹1.14 crore on 193 days without resorting to Normal Ways and Means Advances and Overdraft, availed Normal Ways and Means Advances on 132 days and on 40 days it had to avail Overdraft from RBI. The balance at the end of 31st March 2025 was (-) ₹101.67 crore under Normal Ways and Means Advances. There was also a balance of ₹692.11 crore under Normal Ways and Means Advances as on 30th October 2019 which is yet to be apportioned between the successor Union Territories *viz.* UT of Jammu & Kashmir and UT of Ladakh.

The Government invests surplus cash balances, including those from earmarked reserve funds in GoI securities and Treasury Bills. Earnings from these investments are credited under '0049-Interest Receipts'.

It is undesirable for the Government to raise market loans while holding large unutilized cash balances, as it leads to idle funds rather than productive use. Cash balance and investment details for 2023-24 and 2024-25 are provided in **Table 1.22.**

Table 1.22: Cash Balances and their investment

(₹ in crore)

	Opening balance as on 1st April 2024	**Closing balance as on 31st March 2025**

Source: Finance Accounts

The Cash balance as on 31st March 2025 as per the records of the office of the Principal Accountant General (A&E) was ₹1,445.79 crore (Debit) and that

reported by the Reserve Bank of India (RBI)[8] was ₹1,445.81 crore (Credit). There was a net difference of ₹0.02 crore (Credit), mainly due to pending reconciliation by Government of UT of Jammu and Kashmir with RBI/Agency Bank. The difference is under reconciliation.

Besides, there was also a net difference of ₹83.32 crore (Debit) between RBI and Principal Accountant General(A&E) figure as on 30th October 2019 which is yet to be reconciled and apportioned between UT of Jammu and Kashmir and UT of Ladakh.

The general cash balance of ₹1,520.10 crore at the close of the year was not even equal to the balance of ₹2,670.93 crore shown in earmarked reserve funds, which means that reserve funds were used for other than intended purposes.

Details of Cash Balance Investment Account during the last five years is given in **Table 1.23**.

Table 1.23: Cash Balance Investment Account (Major Head-8673)

(₹ in crore)

Year	Opening Balance	Closing Balance	Increase (+)/ Decrease (-)	Interest earned
2020-21	0 (383.92)	0 (383.92)	-	0.11
2021-22	0 (383.92)	0.0001 (383.92)	0.0001	0

2023-24	0.0001 (383.92)	150.95 (383.92)	150.95	0
2024-25	150.95 (383.92)	0 (383.92)	-150.95	1.3

Source: Finance Accounts
The figures in brackets indicate balances of the erstwhile State of Jammu and Kashmir yet to be apportioned between the two newly created UTs.

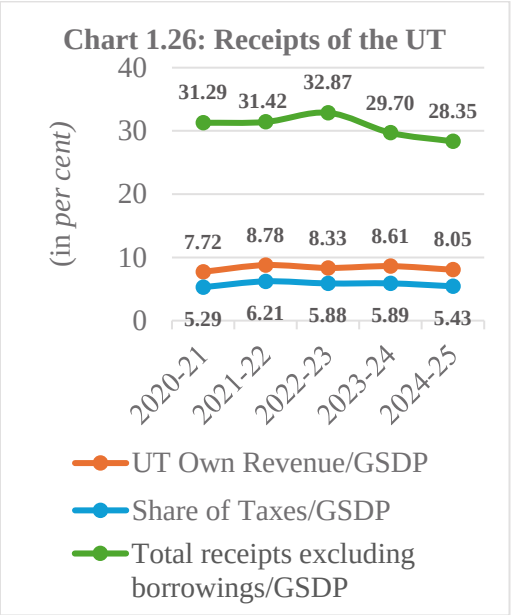
No amount was held in cash balance investment account at the close of the year 2024-25. Government earned an interest of ₹1.30 core on its cash balance investments during 2024-25.

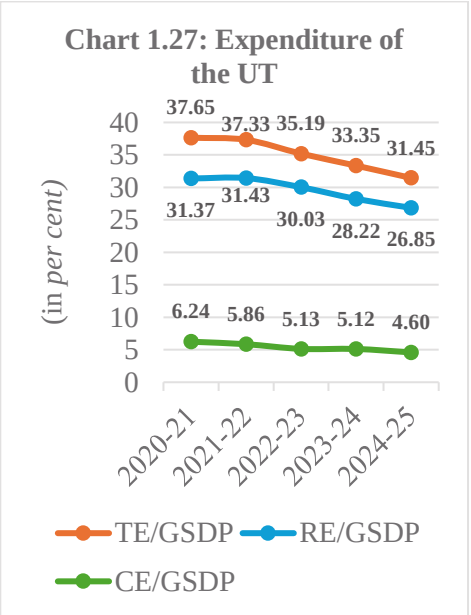
1.5 Fiscal Sustainability

Fiscal Sustainability is the ability of a government to manage its revenue and expenditure in a manner that ensures it can meet its current and future obligations such as public services, infrastructure, and debt repayments without excessive borrowing or accumulating unsustainable debt. It implies

[8] Worked out by Principal Accountant General (A&E) by excluding transactions pertaining to the UT of Ladakh for the period 31st October 2019 to 31st March 2020, during which a single account was maintained by RBI in respect of both UTs (UT of J&K and UT of Ladakh)

maintaining a stable balance between revenue generation and expenditure over the long term. **Chart 1.26** and **Chart 1.27** shows receipts and expenditure of the UT as a percentage of GSDP, during FY 2020-25 respectively.



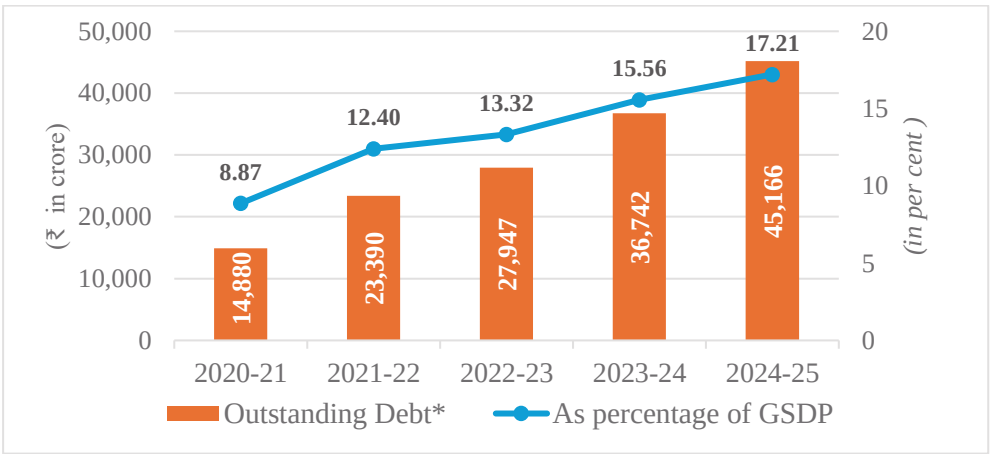


The consistent decline in the TE, RE and CE relation to GSDP during 2021-22 to 2024-25 indicates that the government's ability to generate revenue and its overall spending are failing to keep pace with the growth of its economy.

1.5.1 Public Liability Management

Outstanding liability of the UT along with its percentage to GSDP for the years 2020-21 to 2024-25 is depicted in **Chart 1.28.**

Chart 1.28: Outstanding Public Liability and its percentage to GSDP



Source: Finance Accounts

**Excludes back-to-back loans of ₹4,253.08 crore (₹2,099.80 crore and ₹3,845.49 crore received from the GoI during 2020-21 and 2021-22 respectively and its adjustment of ₹1692.21crore in 2024-25), in lieu of GST Compensation shortfall . Outstanding liability of erstwhile State of Jammu and Kashmir amounting ₹82,050.51 crore yet to be apportioned between two UT has been excluded.*

1.5.1.1 Liability Profile: Components

Total liabilities of the Government typically constitute Internal Debt of the UT (market loans, ways and means advances from RBI, special securities issued to National Small Savings Fund and loans from financial institutions, *etc.*), loans and advances from the Central Government, and Public Account Liabilities. The component-wise liability trends of the UT for the period of five years beginning from 2020-21 are presented in **Table 1.24.**

Table 1.24: Component-wise liability trends

(₹ in crore)

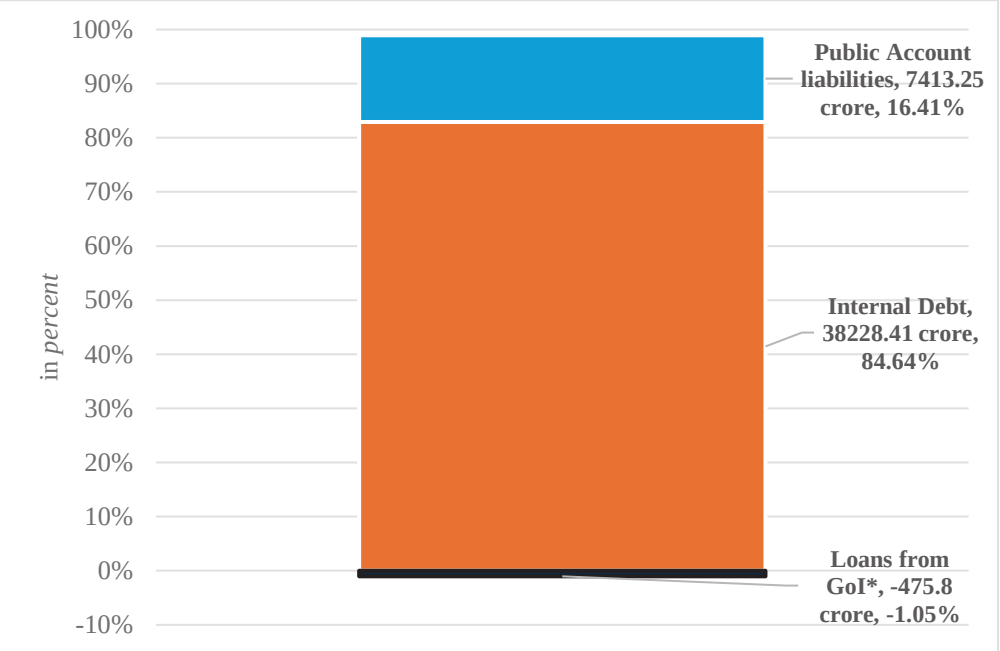
Source: Finance Accounts

** Outstanding total liability includes Public debt, Small savings, Provident funds etc, Reserve funds and Deposits (outstanding liability of erstwhile State of Jammu and Kashmir has not been included).*

*** Excludes back-to-back loans of ₹4,253.08 crore (₹2,099.80 crore and ₹3,845.49 crore received from the GoI during 2020-21 and 2021-22 respectively and its adjustment of ₹1692.21crore in 2024-25), in lieu of GST Compensation shortfall.*

Break-up of outstanding total liabilities at the end of 2024-25 is shown in **Chart 1.29**.

Chart 1.29: Break-up of outstanding total liabilities at the end of 2024-25



Source: Finance Accounts

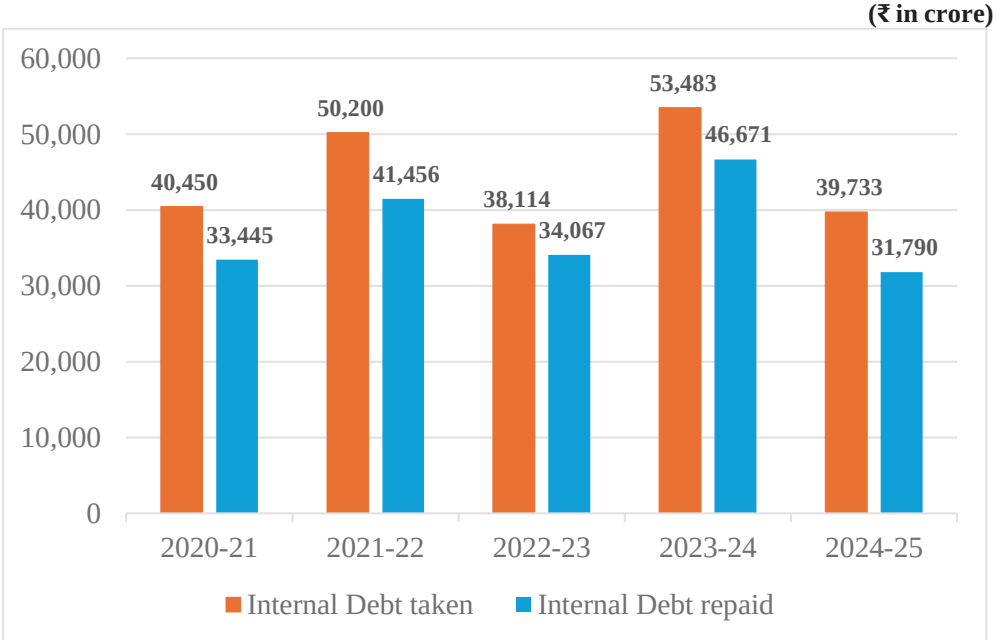
**Excludes back-to-back loans of ₹4,253.08 crore (₹2,099.80 crore and ₹3,845.49 crore received from the GoI during 2020-21 and 2021-22 respectively and its adjustment of ₹1692.21crore in 2024-25), in lieu of GST Compensation shortfall.*

Excludes Outstanding Liability of erstwhile State of Jammu and Kashmir amounting ₹82,050.51 crore yet to be apportioned between two newly created UTs.

Chart 1.30: Depicts the quantum of internal debt taken *vis-à-vis* repaid during the period of five years i.e. 2020-25.

Chart 1.30: Internal debt taken *vis-a-vis* repaid

(₹ in crore)



Source: Finance Accounts

The internal debt of the UT Government had been on the rise as it increased by ₹27,666.20 crore (261.94 *per cent*) from ₹10,562.21 crore in 2020-21 to ₹38,228.41 crore in 2024-25.

During 2024-25, the repayment of borrowings constituted over 80 *per cent* of the total borrowing receipts, leaving only ₹7,943 crore (20 *per cent*) of the total borrowings available for meeting expenditure and development activities. Although there was a significant reduction of about 25 *per cent* in the borrowings raised by the UT Government during 2024-25 as compared to the previous year, the rate of growth of outstanding liabilities remained high at 22.93 *per cent*, which was substantially higher than the growth rate of GSDP. The trend indicates a rising debt burden and underscores the need for the Government to strengthen fiscal discipline and adopt prudent debt management measures to contain the growth of outstanding liabilities.

1.5.1.2 Utilisation of Borrowed Funds

Borrowed funds should ideally be used to fund Capital creation and developmental activities. Using borrowed funds for meeting current consumption and repayment of interest on outstanding loans is not a healthy trend. **Table 1.25** and **Chart 1.31** depicts the utilisation and trends of borrowed funds during 2020-25 respectively.

Table 1.25: Utilisation of borrowed funds

(₹ in crore)

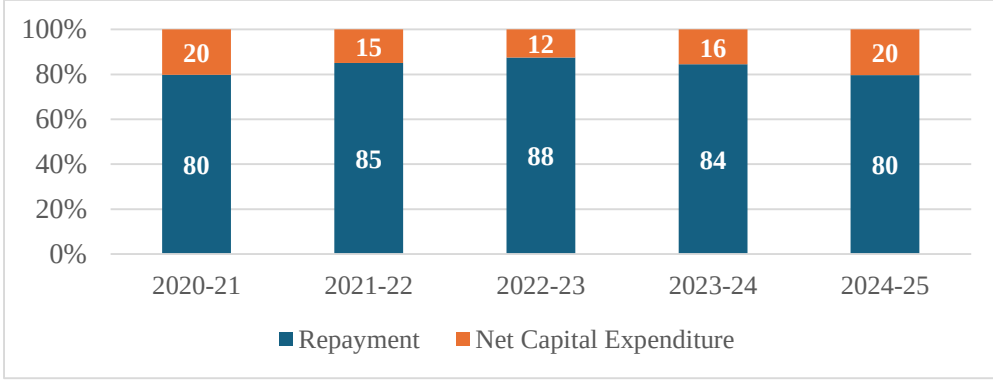
Sl. No.	Year	2020-21	2021-22	2022-23	2023-24	2024-25
1.	Total borrowings[9]	42,097.29	48,880.23	38,922.93	55,396.60	40,058.04
2.	Repayment of earlier borrowings (Principal)	33,563.32	41,575.17	34,066.90	46,791.96	31,911.45
3.	Net Capital expenditure [10]	8533.97	7,305.06	4,856.03	8,604.64	8,146.59
4.	Net loans and advances	NA	NA	NA	NA	NA
5.	Portion of Revenue expenditure met out of net available borrowings	NA	NA	NA	NA	NA

Source: Finance Accounts

[9] Includes Public Debt receipts (2020-21: ₹42,732.93 crore; 2021-22: ₹54,045.35 crore; 2022-23: ₹38,114.47 crore; 2023-24: ₹53,482.76 crore; 2024-25: ₹39,733.16 crore) and Net of Public Accounts receipts (2020-21: ₹1,464.16 crore; 2021-22: ₹(-)1,319.63 crore; 2022-23: ₹808.46 crore; 2023-24: ₹1,913.84 crore; 2024-25: ₹324.88 crore). These exclude back-to-back loans of ₹2,099.80 crore and ₹3,845.49 crore received from GoI in lieu of GST Compensation shortfall during 2020-21 and 2021-22 respectively and adjustment of *₹1692.21*crore in 2024-25.

[10] Total Capital expenditure during 2020-21: ₹10,470.38 crore; 2021-22: ₹11,047.04 crore; 2022-23: ₹10,773.78 crore; 2023-24: ₹12,088.85 crore; 2024-25: ₹12,060.06 crore

Chart 1.31: Trends of utilisation of borrowed funds



Source: Finance Accounts

Chart 1.31 shows that the repayment of borrowings (principal) to current borrowings of the UT ranged between 80 *per cent* to 88 *per cent* of the total expenditure during the period 2020-21 to 2024-25. Thus, the major portion of borrowed funds were used for repayment of borrowings instead of Capital creation/ development activities. Net Capital expenditure ranged between 12 *per cent* to 20 *per cent* during the period 2020-2025.

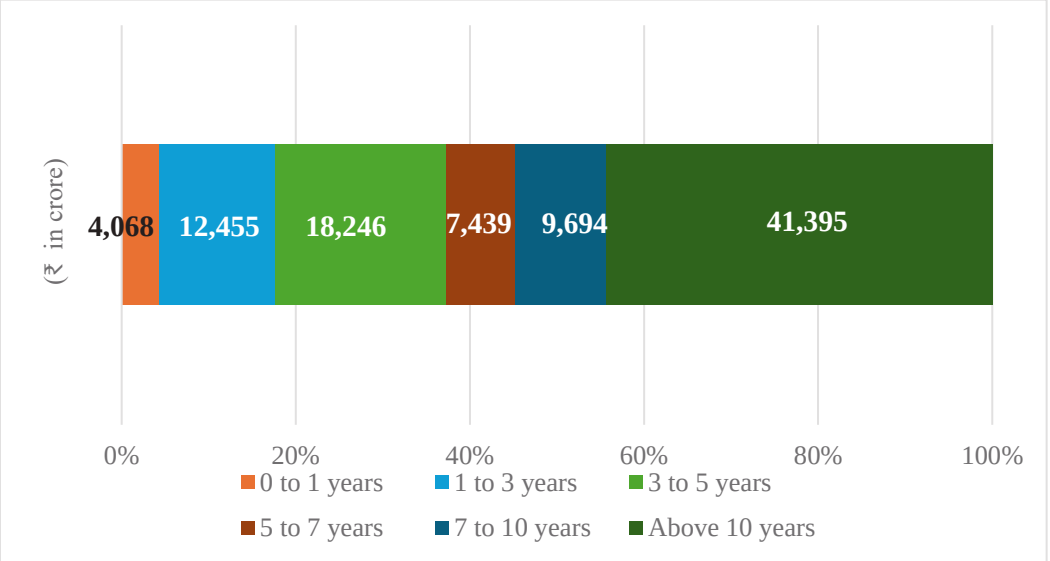
The UT Government increased its spending to 20 *per cent* of the borrowed funds on Capital expenditure during 2024-25 as against 16 *per cent* spent during 2023-24, reflecting a positive shift towards productive utilisation of borrowings.

In reply, it was stated(January 2026) that the issue of utilisation of borrowed funds needs to be worked out on the basis of debt raised only and Ways and means advances may be excluded, as it is used to meet short term debt to meet cash requirements of the Government.

1.5.1.3 Debt Profile: Maturity and Repayment

Debt maturity and repayment profile indicates commitment on the part of the Government for debt repayment or debt servicing. Debt maturity profile of the UT is depicted in **Chart 1.32**.

Chart 1.32: Maturity Profile of Public Debt



Source: Finance Accounts

** Excludes back-to-back loans of ₹4,253.08 crore (₹2,099.80 crore and ₹3,845.49 crore received from the GoI during 2020-21 and 2021-22 respectively and its adjustment of ₹1692.21crore in 2024-25), in lieu of GST Compensation shortfall.*

Public debt amounting to ₹42,208 crore i.e. 45 *per cent* of public debt is becoming due for repayment in 0-7 years. High concentration of liabilities maturing within the short to medium term indicates debt bunching, increasing refinancing and liquidity pressure on the Government.

1.5.1.4 Financing Pattern of Fiscal Deficit

Table 1.26 depicts financing pattern of the Fiscal Deficit during 2020-25.

Table 1.26: Components of Fiscal Deficit and its financing pattern

(₹ in crore)

Source: Finance Accounts

** Excludes back-to-back loans of ₹4,253.08 crore (₹2,099.80 crore and ₹3,845.49 crore received from the GoI during 2020-21 and 2021-22 respectively and its adjustment of ₹1692.21crore in 2024-25), in lieu of GST Compensation shortfall*

1.5.2 Deficit Indicators after considering views of Audit

As per Finance Accounts of the UT of J&K, there was Revenue Surplus of ₹3,929.03 crore during 2024-25 (1.50 *per cent* of GSDP), Fiscal Deficit was ₹8,145.68 crore (3.10 *per cent* of GSDP) whereas primary deficit was ₹2,728.34 crore (1.04 *per cent* of GSDP).

However, during 2024-25, Audit found cases of misclassification by the UT Government, ₹82 crore of Revenue nature of expenditure was classified as Capital expenditure. This has resulted in overstatement of Revenue Surplus to such extent. Besides, an amount of ₹554.24 crore[11] had been expended for creation of assets of entities (SPSUs) other than the Government of UT of J&K. In accordance with note below Rule 30(1) of GAR 1990, this amount is to be classified as Revenue Expenditure, instead of Capital Expenditure thus leading to overstatement of Revenue Surplus.

[11] Power Corporations/Companies- ₹539.22 crore, JKTDC- ₹2.55 crore and JKHPMC- ₹12.46 crore.

In reply, it was stated (January 2026) that the expenditure on account of SPSUs is being incurred as Government support to these SPSUs to become self-reliant. The Capital expenditure on these SPSUs shall be considered by the Government as equity at appropriate time.

The reply is not tenable, as the expenditure could be considered as capital only when it is converted as equity.

Further, classifying the repayment of Off-Budget Borrowings (₹3,451.84 crore) under MH-6003 -Internal Debt instead of treating as a debit to relevant head as assistance has also led to understatement of the Revenue Surplus and Fiscal deficit.

After considering the above transactions, the Revenue deficit and Fiscal Deficit during 2024-25 comes out to be ₹164.38 crore (0.06 *per cent* of GSDP) and ₹11,597.52 crore (4.42 *per cent* of GSDP) respectively.

1.5.3 Fiscal Balance: Achievement of Deficit and Total Debt Targets

As per the Jammu and Kashmir FRBM Act of 2006 and its amendments, UT aims to:

- Eliminate Revenue Deficit and maintain the Fiscal Deficit within the ceiling of three *per cent* of GSDP, with an additional 0.5 *per cent* permitted on fulfilling reform milestones.
- Limit the annual incremental risk weighted guarantees to 75 *per cent* of the Total Revenue Receipts in the year preceding the current year or at 7.5 *per cent* of GSDP of the year preceding the current year whichever is lower.
- Government is required to frame Medium-Term Fiscal Policy Statement (MTFP) and is required to have three-year rolling targets for prescribed fiscal indicators.
- Use of Capital receipts for creation and or maintenance of assets.

According to the FRBM Act, 2006, the Medium-Term Fiscal Policy (MTFP) Statement must be presented in the prescribed format to outline the Government's fiscal management objectives and establish three-year rolling targets for the specified fiscal indicators. However, in the MTFP Statements laid with the Budget under the FRBM Act, the fields for the three-year rolling targets were left blank. Actual achievement and post audit fiscal parameters are detailed in **Table 1.27** and trend analysis of deficits post audit is depicted in **Chart 1.33**.

Table 1.27: Fiscal Parameters

Fiscal Parameters		2020-21	2021-22	2022-23	2023-24	2024-25
Revenue Deficit (-) / surplus (+) (₹ in crore)	Actuals	-138.27	-30.83	5,976.61	3,486.22	3,929.03
	Post Audit	-328.08	-189.59	5,757.48	-3,202.03	-164.37
Ratio of RD/GSDP	Actuals	-0.08	-0.02	2.85	1.48	1.50

	Post Audit	-4,320.9	-3,790.3	3,638.45	1,316.88	2,728.84
Ratio of PD/GSDP	Actuals	-2.58	-2.01	1.73	0.56	1.03
	Post Audit	-2.58	-2.01	1.73	-2.19	-0.28
Ratio of total outstanding liability* to GSDP (in *per cent*)		8.87	12.4	13.32	15.56	17.21
Interest payment as percentage of Revenue Receipts		12.14	12.42	12.31	14.16	14.62

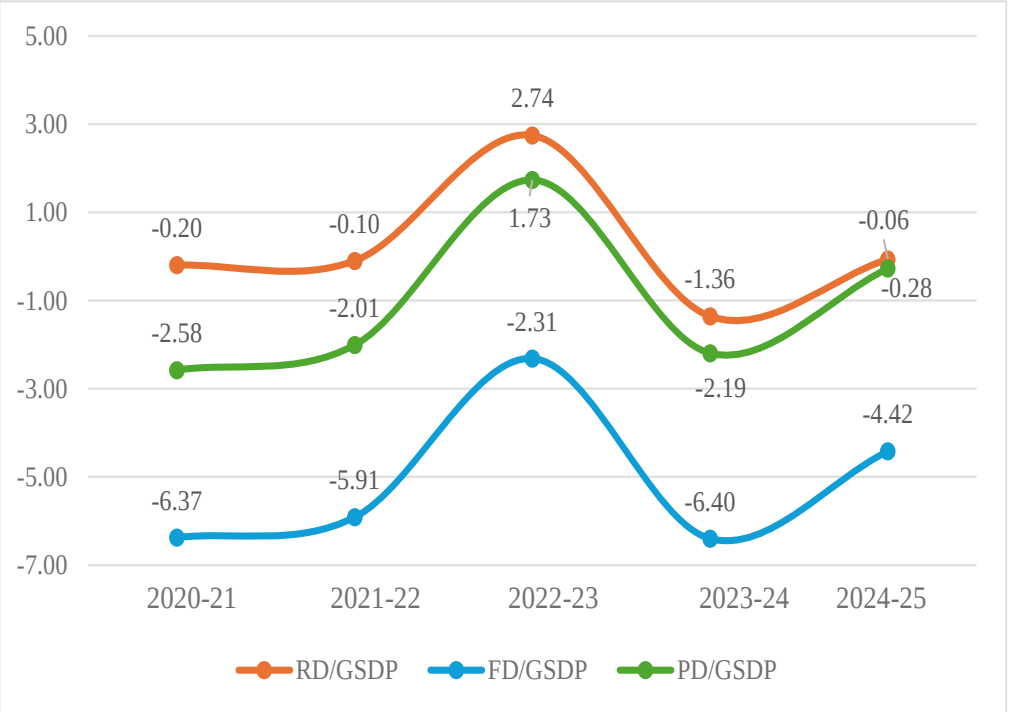
** Outstanding total liability includes Public debt, Small savings, Provident funds etc, Reserve funds and Deposits (outstanding liability of erstwhile State of Jammu and Kashmir has not been included).*

Revenue Deficit indicates excess of Revenue expenditure over Revenue receipts. In terms of Jammu and Kashmir FRBM Act, 2006, the Government shall maintain Revenue surplus and initiate steps for progressive strengthening of surplus. There was Revenue surplus of ₹3,929.03 crore for FY 2024-25.

Fiscal Deficit represents total borrowings of the Government i.e. its total resource gap. During 2024-25, the Fiscal Deficit decreased from ₹8,608.08 crore to ₹8,145.68 crore. However, ratio of total outstanding liabilities to GSDP increased from 15.56 *per cent* 2023-24 to 17.21 *per cent* in 2024-25.

Primary Deficit indicates the excess of Primary expenditure (total expenditure net of interest payments) over non-debt receipts. There was a primary surplus of ₹2,728.84 crore in 2024-25.

Chart 1.33: Trend analysis of Deficits Post Audit



The targets as projected in the U.T budget *vis-à-vis* achievements in respect of major fiscal aggregates with reference to GSDP during 2024-25 are given in **Chart 1.34** and **Chart 1.35**

Chart 1.34: Revenue Surplus as Percenatge of GSDP

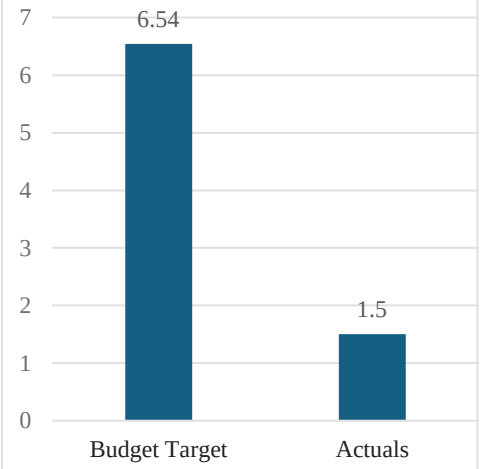


Chart 1.35: Fiscal Deficit as percenatge of GSDP

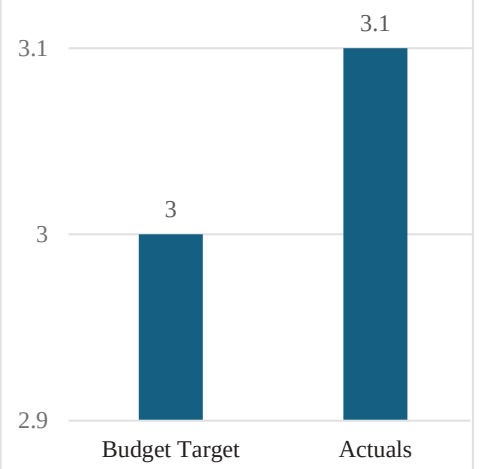


Source: Finance Accounts and budget documents

During the year 2024-25, the Government was unable to contain the revenue surplus-GSDP and fiscal deficit-GSDP ratios within the levels projected in the budget estimates.

In reply, it was stated (January 2026) that the rolling targets will be established and afterwards will be reflected in the MTFP statements.

1.5.4 Debt Sustainability Analysis

Debt sustainability refers to the ability of the UT to service its debt obligation now and in future. Analysis of variations in debt sustainability indicators is given in **Table 1.28.**

Table 1.28: Trends in Debt Sustainability Indicators

(₹ in crore)

Sl. No.	Debt Sustainability Indicators	2020-21	2021-22	2022-23	2023-24	2024-25
1	Overall Liabilities or Overall Debt*	98,417.12	1,06,926.76	1,09,997.15	1,18,792.68	1,27,216.38
2	Rate of Growth of Overall Debt (*per cent*)	10.15	8.65	2.87	8.00	7.09
3	GSDP (in nominal terms)	1,67,793	1,88,561	2,09,816	2,36,059	2,62,458
4	Nominal GSDP growth (*per cent*)	2.25	12.38	11.27	12.51	11.18
5	Overall Debt/GSDP (*per cent*)	58.65	56.71	52.43	50.32	48.47
6	Repayment to Gross Borrowings (*per cent*)	81.54	85.54	90.75	86.37	83.52
7	Net borrowings available as a percentage of Gross Borrowings	18.46	14.46	9.25	13.63	16.48
8	Interest payments on Overall Debt	6,372.46	7,360.31	8,493.82	9,924.96	10,874.51
9	Effective rate of interest on Overall Debt[12] (*per cent*)	7.52	7.90	8.63	9.55	9.68
10	Interest payment to Revenue Receipts (*per cent*)	12.14	12.42	12.31	14.16	14.62
11	Revenue Deficit/Surplus	-138.27	-30.83	5,976.61	3,486.23	3,929.03
12	Primary Revenue Balance (PRB)	6,234.19	7,329.48	14,470.43	13,411.18	14,803.54
13	Primary Balance (PB)	-4,320.90	-3,790.29	3,638.45	1,316.88	2,728.83
14	PB/GSDP (*per cent*)	-2.58	-2.01	1.73	0.56	1.04
15	Difference between RoI[13] and effective rate of interest on Overall Debt	-7.52	-7.80	-8.39	-8.59	-9.39

[12] Effective rate of interest on Overall Debt has been calculated adjusting the Reserve Funds, Deposits not bearing interest. Effective Rate of Interest = Interest Payment/Average of Opening and Closing Stock of Debt (excluding non- interest bearing liabilities) * 100

[13] Return on Investment (RoI) as measured by effective rate of interest receipts.
RoI = Interest Receipts/Average of Opening & Closing Stock of Loans and Advances Disbursed *100

Sl. No.	Debt Sustainability Indicators	2020-21	2021-22	2022-23	2023-24	2024-25
16	Liquidity Management (use of financial accommodation instruments available with RBI) (in number of occasions)	318	303	282	276	172
17	Debt Stabilisation (Quantum spread[14] + Primary balance)	-9,024.52	570.32	6,276.50	4,511.35	4,474.09
18	**Domar gap**					
a	GSDP (in constant terms)	1,12,400	1,15,402	1,22,640	1,33,421	1,43,649
b	Real Growth (in constant terms)	-1.33	2.67	6.27	8.79	7.67
c	Inflation based on CPI (*per cent*)	5.79	7.20	6.32	4.15	4.48
d	Effective Rate of interest	7.52	7.90	8.63	9.55	9.68
e	Real effective rate of interest (Effective rate of interest-Inflation)	1.73	0.70	2.31	5.40	5.20
f	Growth Interest Differential (Real growth-Real effective rate of interest)	-3.07	1.98	3.97	3.39	2.46
g	Primary Balance (PB)	-4,320.90	-3,790.29	3,638.45	1,316.88	2,728.83

Source: Finance Accounts

** Outstanding Public Debt is the sum of outstanding balances under the Heads 6003'Internal Debt' and 6004-'Loans and Advances from the Central Government'. Excludes back-to-back loans of ₹4,253.08 crore (₹2,099.80 crore and ₹3,845.49 crore received from the GoI during 2020-21 and 2021-22 respectively and its adjustment of ₹1692.21crore in 2024-25), in lieu of GST Compensation shortfall, which are not to be repaid by the UT Government from its resources.*

 # Net debt available to the UT Government is calculated as excess of Public debt receipts over Public debt repayment.

i) Despite the declining trend, the average debt burden, measured by the total liabilities-GSDP ratio remained over 48 *per cent*. It decreased from 58.65 *per cent* in 2020-21 to 48.47 *per cent* in 2024-25. Debt dynamics shows that the Growth Interest Differential (GID), which remained favourable in 2021-22 improved significantly in 2022-23 and declined in 2023-24 and 2024-25. Similarly, primary balance which remained negative in 2020-21 and 2021-22 improved substantially and thereby turning positive during 2022-23 to 2024-25. Primary balance improved in 2024-25 as compared to 2023-24.

ii) The improvement in the debt burden in 2021-22 compared to 2020-21 was primarily due to robust nominal growth in 2021-22, driven by a low base. Both the GID and the primary balance, which remained favourable despite the declining trend observed during 2022 to 2025, supported by nominal growth that outpaced debt growth, leading to a steady decline in the debt burden during 2022-2025.

iii) Ratio of interest payments to Revenue receipts is also an indicator of debt sustainability. Ratio of interest payments to Revenue receipts, which

[14] Quantum Spread = Interest Spread (GSDP growth rate- Interest rate) x Debt (excluding non- interest bearing liabilities).

increased from 12.14 *per cent* in 2020-21 to 14.62 *per cent* in 2024-25, could impact debt sustainability over medium and long term.

iv) Return on investment (RoI), measured by the difference between interest rates on loans and advances disbursed, and the average cost of borrowing remains negative, posing a risk to debt sustainability. Therefore, the interest rate on loans and advances disbursed needs to be aligned with the cost of borrowing.

v) The number of instances of resorting to financial accommodation provided by the RBI to avail WMA/Overdrafts ranged from 172 to 318 days during 2020-25, indicating weak liquidity management. However, this has steadily improved, from 318 days in 2020-21 to 172 days in 2024-25.

vi) Unlike nominal growth, the nominal effective interest rate was primarily influenced by inflation. Average CPI inflation exceeded the RBI's two to six *per cent* tolerance band in 2021-22 and 2022-23. According to the Domar criterion, the average real growth remained higher than the average real interest rate, as evident from the average GID that remained favourable during 2021-2025. This indicates that the real growth helped the exchequer to recover the cost of borrowing during this period.

vii) The net debt available as a percentage of Gross Borrowings increased from 9.25 *per cent* in 2022-23 to 13.63 *per cent* and 16.48 *per cent* in 2023-24 and 2024-25 respectively.

The Debt of the erstwhile State is being serviced by the UT of Jammu & Kashmir. Therefore, debt sustainability analysis has been carried on overall debt/liability inclusive of Debt/liability amounting to ₹82,050.51 crore of the erstwhile State which is yet to be apportioned between two Union Territories *viz.* UT of Jammu & Kashmir and UT of Ladakh.

1.5.5 Status of Guarantees – Contingent Liabilities

Guarantees are contingent liabilities on the Consolidated Fund in case of borrower defaults. The UT extends guarantees for loans raised by entities like statutory corporations, boards, local bodies, and co-operative institutions. J&K FRBM Act, 2006, limits the amount of annual incremental risk weighted guarantee to 75 *per cent* of the Total Revenue Receipt in the year proceeding the current year or 7.5 *per cent* of the GSDP of the year preceding the current year, whichever is low. Details of the guarantees and status of outstanding guarantees to total receipts for the last five years are given in **Table 1.29**.

Table 1.29: Guarantees given by the UT Government

(₹ in crore)

Guarantees	2020-21	2021-22	2022-23	2023-24	2024-25
Ceiling applicable to the outstanding amount of guarantees (including interest)					
(i) 75 *per cent* of Revenue receipts of previous year	NA	39,371.61	44,428.88	51,731.96	52,580.77
(ii) 7.5 *per cent* of GSDP of previous year	12,307.73	12,584.48	14,142.08	15,736.20	17,704.43
(iii) Least of the above two	12,307.73	12,584.48	14,142.08	15,736.20	17,704.43
Outstanding amount of guarantees at the beginning of the year	1,324.54	1,486.07	12,328.80	24,867.94	24,485.47
Outstanding amount of guarantees at the end of year	1,486.07	12,328.80	24,867.94	24,485.47	23,622.36

Source: Finance Accounts and Annual Financial Statements

The position of outstanding risk weighted guarantee was not disclosed in statements laid with Budget 2024-25 under FRBM Act 2006. The outstanding guarantees for ₹23,622.36 crore as on 31st March 2025 were in respect of Power Sector (₹22,316.16 crore); State Finance Companies/Corporations (₹15.45 crore); Cooperatives (-₹32.00 crore[15]); and Others (₹1,322.75 crore).

Out of the outstanding guarantees for ₹23,622.36 crore during the current year, the UT Government had given guarantees amounting to ₹56.82[16] crore to three PSUs whose net worth had become negative. This means that the actual liability lies with the UT Government to repay their loans. There is also outstanding guarantee including interest to the tune of ₹454.30 crore given by the erstwhile State of Jammu and Kashmir which is yet to be apportioned between UT of Jammu and Kashmir and UT of Ladakh.

1.5.6 Pathways to Fiscal Stability

Deficits can be improved by enhancing revenues and rationalizing expenditures. This includes strengthening tax compliance, widening the tax base, revising user charges, and monetizing idle government assets. On the spending side, better targeting of subsidies, controlling salary and pension growth, and ensuring proper classification of expenditure are key factors. Prioritizing productive Capital investment and improving debt management through transparent and efficient borrowing can further ease fiscal pressure.

15 Minus figures due to non-apportionment of Assets and Liabilities as a result of reorganisation.

16 (i) Jammu and Kashmir Schedule Casts, Schedule Tribes and backward classes Development Corporation Ltd ₹37.05 crore. (ii) Jammu and Kashmir Cements ₹4.33 crore ; (iii) Jammu & Kashmir Ladakh Financial Corporation: ₹15.44 crore;

These measures collectively create fiscal space and help reduce revenue, fiscal, and primary deficits in a sustainable manner. These have been discussed in succeeding paragraphs.

1.5.6.1 Improving Revenues of the UT

Untapped revenue potential that, if harnessed effectively, could significantly enhance fiscal space and reduce dependence on debt. Inefficiencies in assessment, undervaluation, and limited enforcement mechanisms of key tax streams such as State GST, Stamp Duty, and Excise will lead to subdued revenue growth. Under-realized non-tax revenues, with low user charges, poor cost recovery, and suboptimal returns on public assets and investments also impede the fiscal space. Timely realization of pending arrears (tax and non-tax) is another step towards enhancing the fiscal space.

A. Arrears of Revenue

As on 31st March 2025, the arrears of revenue in respect of principal heads of revenue were ₹ 4,067 crore, of which ₹ 827.58 crore were outstanding for more than five years, as depicted in **Table 1.30**.

Table 1.30: Arrears of revenue

(₹ in crore)

S. No.	Head of revenue	Amount outstanding as on 31st March 2025	Amount outstanding for more than five years as on 31st March 2025
1	Goods and Services Tax	2,140.70	0
2	Taxes/VAT on Sales, Trade, etc.	1,865.05	782.65
3	Motor Spirit Tax	0.09	0.09
4	Entertainment Tax	0.21	0.21
5	Toll Tax	28.24	28
6	State Excise	32.71	16.63
Total		**4,067.00**	**827.58**

Source: Departmental Information

B. Arrears in assessment

The information on number of assessment cases pending at the beginning of the year, cases becoming due for assessment, cases disposed off during the year and number of cases pending for finalisation at the end of the year, as furnished by the Department of Excise and Department of Taxation in respect of Sales Tax/VAT is depicted in **Table 1.31**.

Table 1.31: Arrears of assessment

Sl. No.	Head of Revenue	Cases pending at the beginning of 2024-25	New cases due for assessment during 2024-25	Total cases due for assessment	Cases disposed of during 2024-25	Balance at the end of the year	Percentage of disposal
1	Taxes/VAT on Sales, Trade, etc.	8,037	18,532	26,569	19,079	7,490	71.81
2	GST	287	171	458	292	166	63.76
3	Tax on work contracts	0	1,654	1,654	1,332	322	80.53
	Total	**8,324**	**20,357**	**28,681**	**20,703**	**7,978**	**72.18**

Source: Departmental Information.

During the period 2024-25, the total percentage of disposal of cases of arrears in assessment was 72.18 *per cent* and 7,978 cases were still pending for disposal at the close of the year.

C. Details of evasion of tax detected by the Department, refund cases, etc.

The cases of evasion of tax detected, cases finalised and the demands for additional tax raised are important indicators of revenue collection efforts of the UT Government.

The details of cases of evasion of tax detected by the Excise and Taxation, cases finalised and the demand for additional tax raised; during the year 2024-25, as reported by the departments concerned, are depicted in **Table 1.32**.

Table 1.32: Evasion of tax detected

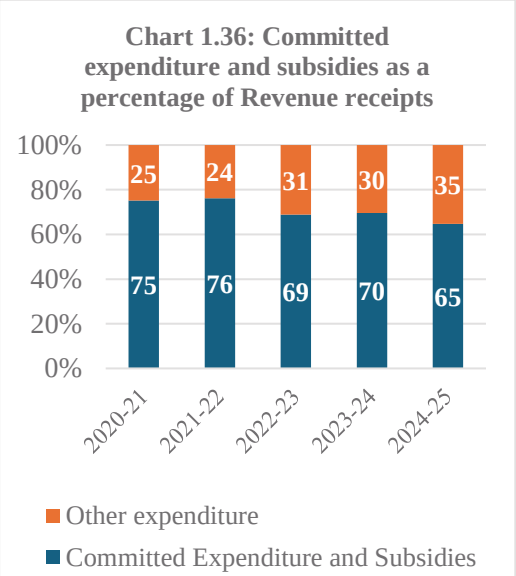
Sl. No.	Head of revenue	Cases pending as on 31st March 2024	Cases detected during 2024-25	Total	No. of cases in which assessment / investigation completed and additional demand with penalty, etc. raised		No. of cases pending for finalisation as on 31st March 2025
					No. of cases	Amount of demand (₹ in crore)	
1	State Excise	0	1	1	1	0.19	0
2	Goods and Services Tax	183	830	1,013	705	273.74	308
3	Sales Tax/ VAT	36	0	36	31	0.03	5
Total		**219**	**831**	**1,050**	**737**	**273.96**	**313**

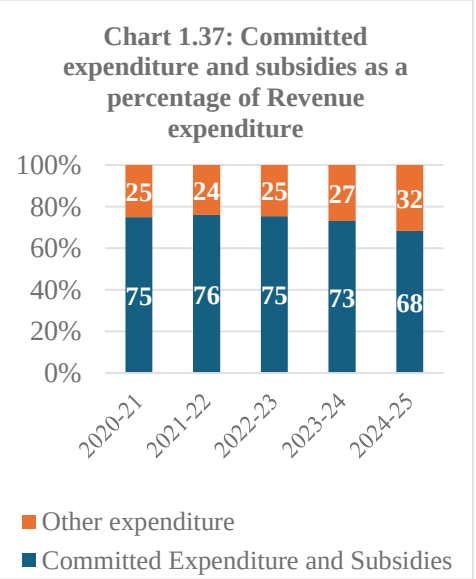
Source: Departmental information

1.5.6.2 Issues on expenditure side

A. Fiscal stress from Committed expenditure and subsidies

Chart 1.36 and **Chart 1.37** depict Committed expenditure and subsidies together as a percentage of Revenue Receipts and Revenue Expenditure during the FY 2020-25 respectively.





In 2024-25, the UT's committed expenditure of ₹48,129.14 crore comprising salaries (₹23,099.56 crore), pensions (₹14,155.07 crore), and interest payments (₹10,874.51 crore), accounted for approximately 64.69 *per cent* of the Revenue Receipts. In addition, subsidies amounted to ₹69.58 crore, bringing the total rigid expenditure to ₹48,198.72 crore, which was nearly 65 *per cent* of the UT's revenue receipts. The high and inflexible nature of such expenditure significantly compresses fiscal space, limiting the UT's ability to allocate resources towards Capital investment and developmental priorities. This structural imbalance increases the risk of persistent revenue and primary deficits, constrains long-term fiscal sustainability, and reduces Government's capacity to respond to emergent socio-economic challenges.

There is an urgent need for expenditure reform through prudent management of salary and pension commitments, to enhance fiscal flexibility and ensure a sustainable fiscal path.

B. Capital blocked in incomplete projects

An assessment of Capital blocked in incomplete Capital projects would also indicate the quality of Capital expenditure. Blocking funds in incomplete projects/ works impinges negatively on the quality of expenditure and deprives the Government of the intended benefits of the projects for

prolonged periods. Further, funds borrowed for implementation of these projects during the respective years would lead to an extra burden, in terms of servicing of debt and interest liabilities. Details of the incomplete projects costing ₹one crore and above are shown in **Table 1.33** (based on information provided by the UT Government for ***Appendix-IX*** of the Finance Accounts for the year 2024-25).

Table 1.33: Capital blocked in incomplete projects

(₹ in crore)

Age profile of incomplete projects as on 31st March 2025				**Department-wise profile of incomplete projects till 31st March 2025**		
Year	**No. of incomplete projects**	**Estimated cost**	**Expenditure incurred**	**Department**	**No. of incomplete projects**	**Estimated Cost (Expenditure incurred)**
2008-09	1	1.80	1.32	Irrigation and Flood Control, Jammu	19	68.12 (41.70)
2012-13	2	52.48	29.89	PHE, Peerpanjal (Jammu)	47	153.72 (49.19)
2014-15	1	2.08	0.92	Public Health Engineering, Jammu	101	369.91 (187.67)
2016-17	7	23.91	22.38			
2017-18	1	1.92	0.54			
2018-19	25	65.54	35.26			
2019-20	1	2.95	1.39			
2020-21	18	81.54	35.26			
2021-22	33	147.50	75.56			
2022-23	44	130.17	51.19			
2023-24	33	80.84	24.79			
2024-25	1	1.02	0.06			
Total	**167**	**591.75**	**278.56**	**Total**	**167**	**591.75 (278.56)**

Out of the estimated cost of ₹591.75 crore for 167 ongoing projects, ₹278.56 crore was spent till 2024-25. Therefore, due to non-completion of these 167 projects, Capital expenditure of ₹278.56 crore remained blocked.

Information regarding incomplete works above one crore has been furnished for only two departments Irrigation & Flood Control Department and Public Health Engineering Department. Due to incomplete information in ***Appendix-IX*** (Commitments of the Government-List of Incomplete Capital Works) of the Finance Accounts for the year 2024-25 (provided by the UT Government), Audit could not ascertain the actual progressive expenditure,

physical progress of work, position of pending payment (future liability) and revised cost, if any, as on 31st March 2025.

C. Un-discharged liabilities on Fiscal Space

Undischarged/deferred liabilities, if not addressed timely, will reduce the available fiscal space for future developmental and infrastructure spending. Besides creating lack of transparency and credibility, this impair the UT's ability to raise resources in a sustainable manner, thereby impacting overall fiscal health and long-term sustainability.

UT Government had accumulated several un-discharged liabilities over the years, which have significant implications for fiscal sustainability. These include:

- Non-transfer of statutory funds/cess such as Guarantee Redemption Fund (GRF) ₹309.91crore (including ₹69.43 crore during 2024-25), and Consolidated Sinking Fund (CSF) amounting to ₹112.97crore.
- Un-discharged interest liabilities totalling ₹45.32 crore.
- Off-budget borrowings and other liabilities not captured in the debt stock amounting to ₹23,197.08 crore.
- Short/non-transfer of UT Government's contribution to the National Pension System (NPS) amounting to ₹396.22 crore.
- Pending refund cases amounting to ₹69.60 crore.

The cumulative value of these un-discharged liabilities amounted to ₹24,131.10 crore, which is equivalent to 9.19 *per cent* of the GSDP and 296.24 *per cent* of the Fiscal Deficit for the year 2024-25.

Audit recommends that the Government disclose and address all un-discharged liabilities transparently and make provisions for timely discharge of these obligations to avoid future fiscal stress.

1.6 Conclusions

The per capita GSDP of UT of J&K remained consistently lesser than the national average during FY 2020-25. During the same period, GSDP to GDP ratio declined from 0.85 *per cent* in 2020-21 to 0.79 *per cent* in 2024-25. Revenue expenditure increased from ₹52,634 crore to ₹70,472 crore of which Committed expenditure on interest payments, salaries and pensions constituted 68-76 *per cent.* Fiscal deficit declined by 24 *per cent* during the period 2020-25. However, the capital expenditure remained low during this period.

During 2024-25, UT Government spent ₹12,060 crore (14.61 *per cent* of the total expenditure) on Capital account. Capital expenditure was 20.34 *per cent*

of the total borrowings indicating the borrowed funds were being used mainly for meeting existing liabilities instead of asset creation.

The total liabilities of the UT Government increased by 204 *per cent* during the period 2020-25. Besides, liability of erstwhile State of Jammu and Kashmir amount to ₹82,050.51 crore is yet to be apportioned between two newly created UTs. Un-discharged liabilities of the UT Government stood at 296.24 *per cent* of the Fiscal Deficit for the year 2024-25.

Returns on public investments were low, as against ₹ 4,031 crore invested in PSUs, dividend of only ₹131 crore (3.25 *per cent*) was received during the year 2024-25.

1.7 Recommendations

The Government may:

1. *Strengthen revenue mobilization by improving tax compliance, enforcing a clear non-tax revenue policy, especially for dividends, mining, and interest receipts, and revising user charges and fees periodically.*
2. *Rationalize Revenue expenditure and Committed liabilities, better targeting of subsidies, and controlling interest payments to create fiscal space for developmental spending.*
3. *Enhance Capital expenditure quality and prioritization by increasing allocations to infrastructure sectors, avoiding misclassification of expenditures, and ensuring Capital outlay keeps pace with economic growth.*
4. *Improve return on public investments by enforcing a dividend policy for profit-making PSUs, disinvesting from non-performing entities, and enhancing monitoring of loans and advances to ensure financial discipline and accountability.*
5. *Ensure fiscal transparency and better fund management and route all monies through designated government accounts.*

Chapter-II

Budgetary Management

Chapter-II: Budgetary Management

This chapter reviews J&K's budgetary process, revealing significant gaps between budget estimates and actual expenditure, with issues like excess spending, persistent savings, and last-minute fund surrenders. It highlights weaknesses in financial planning, control, and compliance, stressing the need for realistic budgeting, timely fund utilisation, and modern practices like gender and green budgeting.

2.1 Budget Process

In compliance with Section 41 of the Jammu and Kashmir Re-organisation Act 2019, in respect of every financial year, a statement of the estimated receipts and expenditure of the UT of Jammu and Kashmir for that year, called "the Annual Financial Statement (Budget)" is to be laid before the UT Legislature. The estimates of the expenditure show '*charged*' and 'voted' items[1] of expenditure separately and distinguish expenditure on revenue accounts from other expenditures. Legislative authorization is necessary before incurring any expenditure by the UT Government.

As per the Jammu & Kashmir Budget Manual, the Finance Department is responsible for preparing the annual budget by obtaining estimates from various departments. The departmental estimates of receipts and expenditure are prepared by Controlling Officers on the advice of the heads of departments and submitted to the Finance Department on prescribed dates. The Finance Department consolidates the estimates and prepares the Detailed Estimates called 'Demand for Grants'. The UT budget majorly comprises the following documents:

- ✓ Annual Financial Statement
- ✓ Demand for Grants
- ✓ FRBM Statements
- ✓ Budget Speech
- ✓ Key Features of Budget
- ✓ Others[2]

2.2 Budget projection and gap between expectation and actual

Efficient management of tax administration/other receipts and public expenditure holds the balance for optimum utilization of resources, strengthen scheme implementation and monitoring capacity and achievement of fiscal targets. Persistent savings/excesses indicate need for improvement in the underlying budgetary processes.

---

1 ***Charged* expenditure:** Certain categories of expenditure (e.g. salaries of Constitutional authorities, loan repayments, etc.), constitute a charge on the Consolidated Fund of the UT and are not subject to vote by the Legislature. **Voted expenditure:** All other expenditure is voted by the Legislature.

2 Including Budget at glance and supplementary demands for grants of the previous year etc.

Details of total appropriation obtained from legislature, actual expenditure and savings are summarized in **Table 2.1**.

Table 2.1: Actual expenditure vis-à-vis budget provision during the financial year 2024-25

(₹ in crore)

	Nature of expenditure	Original Grant/ App.	Supplementary Grant/ App.	Total	Actual expenditure	Saving/ Excess(-)	Surrender during 2024-25	
							Amount	*per cent*
Voted	I. Revenue	71,088.75	4,404.37	75,493.12	60,563.39	14,929.73	6,867.59	9.1
	II. Capital	25,165.08	1,836.94	27,002.02	14,054.68	12,947.34	12,634.13	46.79

Source: Appropriation Accounts 2024-25

During 2024-25, despite providing supplementary grant of ₹1,836.94 crore under Capital (Voted) section and ₹4,404.37 core under Revenue (Voted) section, there were savings of ₹12,947.34 crore (47.95 *per cent*) under Capital (Voted) and ₹14,929.73 crore (19.78 *per cent*) under Revenue (Voted) section. This indicates that the supplementary grant was made without adequate assessment of actual requirements, reflecting deficiencies in financial management and budgetary control.

The UT Government budgeted and accounted an expenditure of ₹72.51 crore under Revenue (Voted) instead of Revenue (*Charged*), in Grant No. 08-Finance Department under Major Head '2048-Appropriation for reduction or avoidance of Debt'. Similarly, in the Capital (Voted) section, Government also budgeted through Supplementary Grant (₹1,711.78 crore) and accounted an expenditure of ₹1,781.92 crore instead of Capital(*Charged*) under Major Head 6003-'Internal debt'.

Trends in the original budget, revised estimate, and actual expenditure for the period 2020-21 to 2024-25 are given in **Table 2.2.**

Table 2.2: Original Budget, Revised Estimate and Actual Expenditure during FYs 2020-21 to 2024-25

(₹ in crore)

	2020-21	2021-22	2022-23	2023-24	2024-25
Original budget	1,23,127.98	1,30,832.24	1,42,150.1	1,48,500.00	1,51,525.78
Supplementary budget	10,467.74	8,962.95	7,431.93[3]	8,712.90	6,242.33
Total budget (TB)	1,33,595.72	1,39,795.19	1,49,582.03	1,57,212.90	1,57,768.11
Revised estimate (RE)	1,25,576.94	1,39,795.19	1,32,788.90	1,41,333.15	1,38,380.67
Actual expenditure (AE)	96,786.29	1,11,983.49	1,07,948.46	1,26,054.97	1,15,749.07
Savings	36,809.44	27,811.70	41,633.57	31,157.93	42,019.04
Percentage of supplementary to the original provision	8.50	6.85	5.23	5.87	4.12
Percentage of overall saving/excess to the overall provision	27.55	19.89	27.83	19.82	26.63
TB-RE	8,018.78	0.00	16,793.13	15,879.75	19,387.44
RE-AE	28,790.65	27,811.70	24,840.44	15,278.18	22,631.59
(TB-RE) as % of TB	6.00	0.00	11.23	10.10	12.29
(RE-AE) as % of TB	21.55	19.89	16.61	9.72	14.34

Source: Annual Financial Statement and Appropriation Accounts

Table 2.2 shows that supplementary provision of ₹6,242.34 crore during 2024-25 constituted 4.12 *per cent* of the original provision as against 5.87 *per cent* in the previous year, indicating a marginal improvement in estimation of budgetary requirements. The difference between TB and RE as a percentage of Total budget has significantly increased from six *per cent* in 2020-21 to 12.29 *per cent* in 2024-25 reflecting deficiencies in budget preparation and financial planning.

Further, the difference between RE and AE as a percentage of Total budget has increased from 9.72 *per cent* in 2023-24 to 14.34 *per cent* in 2024-25 which indicates lapses in preparation of Revised estimates and weak monitoring of expenditure trends.

[3] Includes supplementary amount of ₹3,711.72 crore and augmentations of ₹3,720.21 crore.

Chart 2.1: Trend showing BE, RE, TB and Actuals

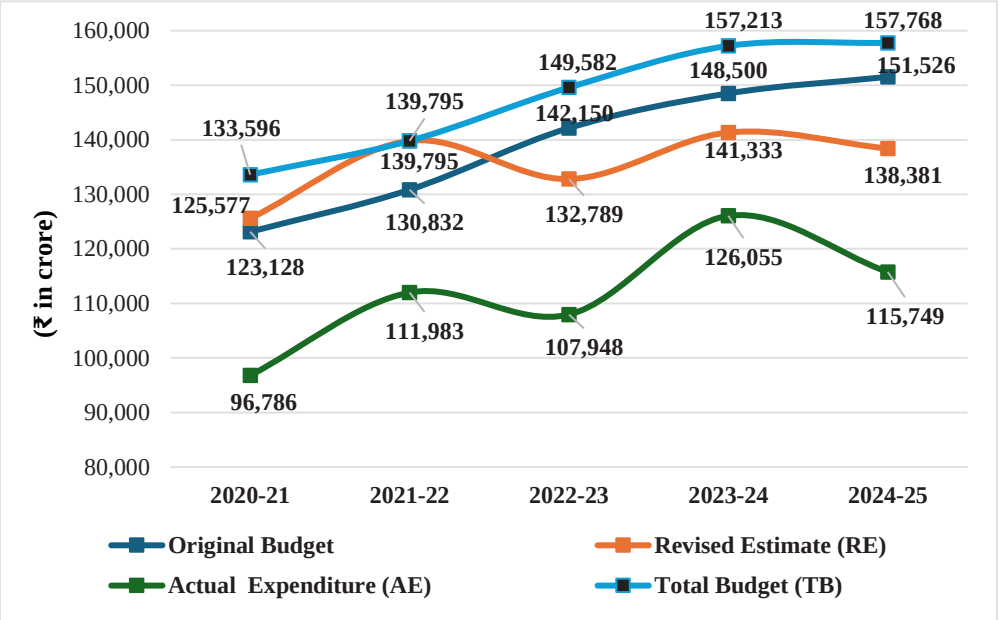

Chart 2.1 depicts the trend of the Original Budget (OB), Revised Estimates (RE), Actual Expenditure (AE), and Total Budget (TB) during the period from 2020-21 to 2024-25. The Total Budget and Original Budget show a steady increase over the years, reflecting a progressive rise in budgetary allocations. Variations between the Original Budget and Revised Estimates are relatively moderate; however, a substantial and persistent gap is observed between budget provisions and Actual Expenditure.

During 2020-21 and 2021-22, the Revised Estimates exceeded the Original Budget, indicating additional expenditure requirements during the financial year. From 2022-23 onwards, the Revised Estimates remained below the Original Budget, suggesting overestimation at the initial budgeting stage or curtailment of expenditure during the year.

Actual Expenditure remained consistently lower than both the Original Budget and Revised Estimates throughout the period, despite some year-to-year fluctuations. This indicates recurring savings and under-utilisation of funds. The widening gap between budget estimates and actual expenditure points to deficiencies in budget forecasting and expenditure management, highlighting the need for more realistic budget formulation and strengthened financial control mechanisms.

2.2.1 Component/Services wise analysis of budgetary provisions and expenditure

Component wise analysis of the Budget and Expenditure for the FY 2024-25 is summarized in **Table 2.3.**

Table 2.3: Component Wise Budget and Expenditure for the year 2024-25

Component	Total Budget (₹ in crore)	Total Expenditure (₹ in crore)	Percentage of Total Budget[4]	Percentage of Total Expenditure[5]	Percentage of expenditure against the total Budget
(1)	**(2)**	**(3)**	**(4)**	**(5)**	**(6=3/2*100)**
Committed Expenditure	53,742.00	48,129.14	34.06	41.58	89.56
UT Schemes	42,461.07	35,446.43	26.91	30.62	83.48
Central Share for CSS	9,674.81	5,894.36	6.13	5.09	60.92
UT Share for CSS	3,663.10	1,027.60	2.32	0.89	28.05
EAP - Externally Aided Projects	NA	NA	NA	NA	NA

The committed Expenditure of the UT Government on revenue account consists of interest payments, expenditure on salaries and wages and pensions. It has the first charge on Government resources.

High spending on Committed Expenditure leaves the Government with lesser flexibility for the development sector. As seen in Table 2.3 committed expenditure accounted for 41.58 *per cent* and 34.06 *per cent* of total expenditure and total budget of the UT Government respectively, thus exhausting the major portion of the UT's resources.

2.3 Budget marksmanship

Expenditure Composition Outturn

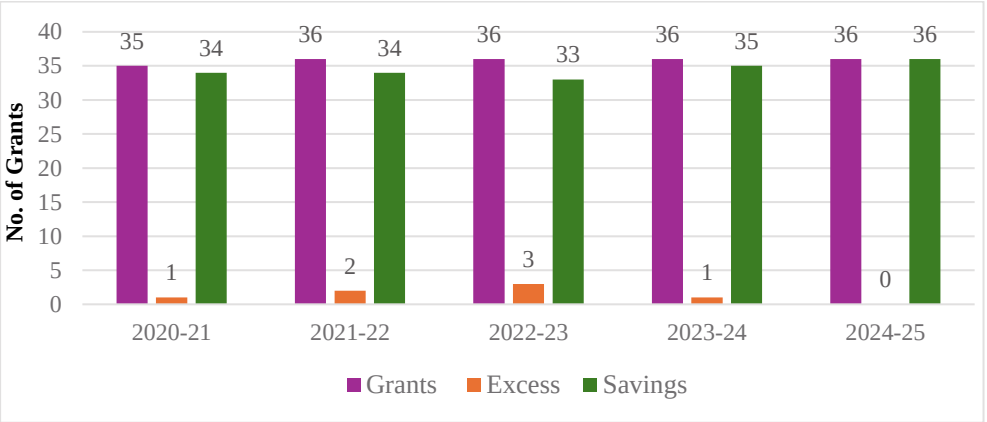
Expenditure Composition Outturn measures the extent to which re-allocations between the main budget categories during execution have contributed to variance in expenditure composition.

[4] ₹1,57,768.11 crore

[5] ₹1,15,749.07 crore

A year-wise analysis of grants, excesses, and savings provides valuable insights into the efficiency of budget execution and financial management by the UT. It has been depicted in **Chart 2.2.**

Chart 2.2: Year-wise Grants, Excesses, and Savings



Budgetary allocations based on unrealistic proposals, overstretching the potential of resource mobilisation, poor expenditure monitoring mechanism and weak scheme implementation capacities/weak internal controls promote release of funds towards the end of the financial year. Excessive savings in some heads also deprive other departments of the funds which they could have utilised.

During the period 2020-21 to 2024-25, savings were observed across 33 to 36 grants, whereas excesses were seen in 1 to 3 grants during the same period. Consistent excesses were seen in Grant No.8 during 2020-21 to 2023-24, whereas excess in Grant No.16 was found in 2021-22 and 2022-23 and excess in Grant No. 19 was observed in 2022-23.

The expenditure composition outturn for the FY 2024-25 is given in **Table 2.4**.

Table 2.4: Expenditure composition overall deviation FY 2024-25

Section	Overall Deviation (*per cent*)	Range of Deviation (*per cent*)	Number of Grants
Revenue (voted)	(-)12.00	0 to ± 25	31
	(-)35.66	± 25 to ± 50	4
	(-)88.92	± 50 to ± 100	1
Revenue (*Charged*)	(-)4.38	0 to ± 25	3
	NA	± 25 to ± 50	0
	(-)88.06	± 50 to ± 100	1
	NA	≥ 100	0
Capital (Voted)	(-) 19.89	0 to ± 25	4
	(-) 39.46	± 25 to ± 50	13
	(-) 69.49	± 50 to ± 100	19

Capital (*Charged*)	NA	0 to ± 25	0
	(-) 32.82	± 25 to ± 50	1
	NA	± 50 to ± 100	0

In case of 27 Grants, savings of ₹100 crore and above were noticed, with the percentage savings ranging between 10.83 *per cent* to 86.44 *per cent*. The savings in these cases were ₹41,655.47 crore. The above savings include huge savings of ₹100 crore and above by the departments under Capital section in 24 Grants amounting to ₹27,351.44 crore. Savings under the Capital section ranged between 22.17 *per cent* and 93.97 *per cent* during 2024-25. The savings under the Capital section indicate that the Government could not utilise the funds earmarked for developmental activities/creation of assets, reflecting deficiencies in project implementation, financial planning, and monitoring of capital expenditure.

2.4 Appropriation Accounts

Appropriation Accounts are accounts of the expenditure of the Government for each financial year, compared with the amounts of grants voted and appropriations charged for different purposes as specified in the schedules appended to the Appropriation Act passed under Section 43 and 44 of the Jammu and Kashmir Reorganisation Act, 2019. These Accounts depict actual expenditure as against the original budget provision, supplementary grants, surrenders and re-appropriations distinctly on gross basis.

Audit of appropriations by the CAG seeks to ascertain whether the expenditure actually incurred under various grants is in accordance with the authorisation given under the Appropriation Act and that the expenditure required to be charged under the provisions of the Section 41 of Jammu and Kashmir Reorganisation Act, 2019 is so charged. It also ascertains whether the expenditure incurred is in conformity with the laws, relevant rules, regulations and instructions.

2.5 Budgetary and accounting process

2.5.1 Expenditure incurred without authority of law

No money shall be withdrawn from the Consolidated Fund of the Union Territory except under appropriation made by law passed in accordance with the provisions of Section 43 of Jammu and Kashmir Re-organisation Act, 2019.

It was, however, observed that an expenditure of ₹373.51 crore (***Appendix 2.1***), was incurred in 10 cases (more than ₹ two crore in each case) under various components of two grants during the year 2024-25 without

having any provision in the original budget estimates/ supplementary demands and without issuing any re-appropriation orders to this effect.

2.5.2 Excess Expenditure and its Regularisation

Section 43 of the Jammu and Kashmir Re-organisation Act, 2019 stipulates that no money shall be withdrawn from the Consolidated Fund of the Union Territory except under Appropriation made by law passed in accordance with the provisions of this section. Although no time limit for regularisation of expenditure has been prescribed under the Section, the regularisation of excess expenditure is done after the completion of discussion of the Appropriation Accounts by the Public Accounts Committee.

A. Excess expenditure during current year

There was an excess disbursement of ₹602.85 crore over the authorisation made by the UT Legislature under one Appropriation during 2024-25 as indicated in **Table 2.5**.

Table 2.5: Excess expenditure during 2024-25 requiring regularisation

(₹ in crore)

Grant No./ Appropriation	Grant/Appropriation details	Amount of excess expenditure required to be regularised
8	Finance Department (Revenue *Charged*)	602.85
Total		**602.85**

Source: Appropriation Accounts

Further, it was observed that provisioning through re-appropriation and incurring expenditure of ₹29.31 crore ***(Appendix 2.2)*** under heads for which no allocation exists in either the original or supplementary estimates constitutes a violation of the provisions contained in Para 14.2.2 of the Jammu and Kashmir Budget Manual and is inconsistent with the requirements of Section 44 of the Jammu and Kashmir Reorganisation Act, 2019.

No excess expenditure was incurred in the selected Grants (**13- Animal and Sheep Husbandry** and **32- Horticulture Department)** as a whole under each section. However, excess expenditure was incurred in five schemes (₹0.17 crore) under Grant No. 32. (***Appendix 2.17***)

In reply, it was stated (January 2026) that the excess payment is mainly due to direct debit on account of interest payments, as interest payment is charged expenditure and is payable at any time when the claim is raised by the lender agency.

B. Regularisation of excess expenditure of previous financial years

Excess disbursements pertaining to previous years pending regularization from UT Legislature are shown in **Table 2.6** below.

Table 2.6: Excess expenditure relating to previous years requiring regularisation

(₹ in crore)

Year	Grant No./ Appropriation	Grant/Appropriation details	Amount of excess required to be regularised as commented in the Appropriation Accounts
2019-20 *(30 October 2019 to 31 March 2020)*	8	Finance Department (Revenue *Charged*)	725.62
		Finance Department (Capital *Charged*)	3,096.11
	16	Public Works Department (Revenue Voted)	24.22
	27	Higher Education Department (Capital Voted)	29.66
2020-21	8	Finance Department (Capital *Charged*)	7,094.29
2021-22	8	Finance Department (Revenue Voted)	1,523.27
		Finance Department (Revenue *Charged*)	266.64
		Finance Department (Capital *Charged*)	154.97
	16	Public Works Department (Revenue Voted)	104.38
2022-23	8	Finance Department (Revenue *Charged*)	1,069.14
		Finance Department (Capital *Charged*)	1,346.04
	16	Public Works Department (Revenue Voted)	281.64
	19	Housing And Urban Development Department (Revenue Voted)	133.35
2023-24	8	Finance Department (Revenue *Charged*)	289.78
		Finance Department (Capital *Charged*)	3,468.66
	36	36-Co-operative Department (Revenue Voted)	2.40
		Total	**19,610.17**

Source: Appropriation Accounts

To strengthen the legislative oversight over the expenditure from Consolidated Fund of UT, these excess expenditures need to be regularized at the earliest and measures to contain recurrence of such excess may be taken by the UT Government.

C. Regularisation of excess expenditure of previous financial years pertaining to erstwhile State of Jammu and Kashmir

As the Appropriation Accounts of 1980-81 onwards had not been discussed in the Public Accounts Committee, the excess expenditure aggregating to ₹1,24,004.41 crore for the years 1980-81 to 2019-20 (1st April 2019 to 30th October 2019) pertaining to the erstwhile State of Jammu and Kashmir, as detailed in ***Appendix 2.3***, is yet to be regularised. Excess expenditure remaining un-regularised for such extended periods vitiates the system of budgetary and financial control and encourages financial indiscipline in management of public resources.

2.5.2.1 Persistent excesses expenditure in certain Grants.

Persistent excess expenditure indicates that the budgetary control in the department was ineffective, and budget estimates were not prepared on a realistic basis. Persistent excesses may be due to improper estimation at the time of preparation of the budget.

Audit scrutiny revealed that in two cases under one grant, there was persistent excess expenditure of more than ₹10 crore in each case during the last five years as detailed in **Table 2.7.** The expenditure under both cases were incurred without any budgetary provision during 2020-25.

Table 2.7: Persistent excess expenditure during FYs 2020-21 to 2024-25

(₹ in crore)

Sl. No..	Description of Grant/Appropriation	2020-21	2021-22	2022-23	2023-24	2024-25
1.	**Grant No.-08-Finance** 2049-Interest Payments 04-Interest on loan and advances from Central Government 109-Interest on State Plan Loans consolidated in term of recommendation of the 12th FC 99-General 1920-Other Consolidated Loans					
	Grant	0.00	0.00	0.00	0.00	0.00
	Expenditure	40.06	33.39	26.71	20.03	13.35
	Excess	40.06	33.39	26.71	20.03	13.35
2.	**Grant No.-08-Finance** 6004- Loans and Advances from the Central Government 02- Loans for State / Union Territory Plan Schemes 105- State Plan Loans consolidated in terms of recommendations of 12th F.C. 1979-2004 99- General 1920- Other Consolidated Loans					
	Grant	0.00	0.00	0.00	0.00	0.00
	Expenditure	89.03	89.03	89.03	29.71	89.03
	Excess	89.03	89.03	89.03	29.71	89.03

Source: Appropriation Accounts of respective years

As is evident from the above table, persistent excesses were noticed in Grant No. 08-Finance Department. The excess was mainly under Major Head-2049-Interest Payment under Revenue (*Charged*) section and under Major Head 6004-Loans and Advances from the Central Government in Capital (*Charged*). This is indicative of the fact that proper budgeting exercise was not being carried out as was required under Paragraph 6.2.4 of Government of Jammu and Kashmir Budget Manual.

2.5.3 Supplementary Grants rendered non-essential

As per Section 44 of the Jammu and Kashmir Re-organisation Act, 2019 a Supplementary or Additional Grant over the provision made by the Appropriation Act for the year, can be made during the current financial year to cater to the requirements in excess of the original provisions.

It was noticed that the total supplementary provisions of ₹526.86 crore ***(Appendix 2.4)*** were made in nine instances (more than ₹ two crore in each case), the expenditure did not come up to original provisions during the year 2024-25. Similarly, supplementary provisions of ₹5,714.45 crore in six cases (more than ₹ two crore in each case) proved non-essential ***(Appendix 2.5)*** as full amount of supplementary provisions could not be utilized.

The Government should prepare realistic budget estimates to avoid large savings or excess expenditure as well as Supplementary provisions.

In the selected **Grant No.32-Horticulture Department**, it was observed that supplementary provision of ₹3.01 crore (Revenue Voted) during the year 2024-25 proved unnecessary as the expenditure of ₹194.01 crore did not come up even to the level of original provision of ₹217.96 crore.

2.5.4 Injudicious re-appropriation of funds

Re-appropriation is transfer of funds within a grant from one unit of appropriation to another unit where additional funds are needed. During 2024-25, re-appropriation orders under 32 Grants amounting to ₹976.66 crore were issued. This included post facto sanctions of ₹515.73 crore under 29 Grants issued on 20.06.2025.

In 4 schemes under the selected two grants, reduction of provision exceeding ₹ two crore through re-appropriation orders effected by various departments proved injudicious as there was excess expenditure under these cases as detailed below:

S.No	Number/ Name of Grant and Head of Accounts	Original Grant	Supplementary Grant	Re-appropriation	Total	Expenditure	Savings (-)/ Excess (+)
1	**Grant No.12-Agriculture Department**						
	2401-001-0099-0039	288.11	10.62	27.34	271.40	271.40	0.0002
	2401-001-0099-6062	8.00	0.00	4.77	3.23	3.41	0.18
	2406-02-112-0099-1136	72.22	2.02	2.26	71.98	71.98	0.0011
2	**Grant No.32-Horticulture Department**						
	4401-119-0011-6062	213.89	0.00	141.38	72.51	72.51	0.0031

Further, in 47 schemes in 22 grants **(*Appendix 2.6*)**, reduction of provision exceeding ₹two crore through re-appropriation orders effected by various departments proved injudicious as there was excess expenditure under these cases. In four schemes under three grants, **(*Appendix 2.6*)** supplementary provision also proved unnecessary because expenditure did not come up to the level of original/supplementary budget provision.

2.5.5 Unspent amount and surrendered appropriation and/or Large Savings/Surrenders

Budget proposals should strive to optimize all foreseeable expenditure to appropriate spending levels to balance the quality of expenditure and reduce underutilization of budgeted funds. Timely surrenders by the spending units are an important mechanism for optimal reallocation within the approved budget.

The analysis of grants and appropriations showed that in five cases (under two grants) during the year 2024-25, the savings (excluding surrenders) exceeded ₹ 100 crore in each case (***Appendix 2.7)***. It was further noticed that in one grant, no expenditure vis-à-vis total grant amounting to ₹four crore as given in **Table 2.8** was incurred during the year 2024-25.

Table 2.8: Entire grant remaining unutilised during the financial year 2024-25

(₹ in crore)

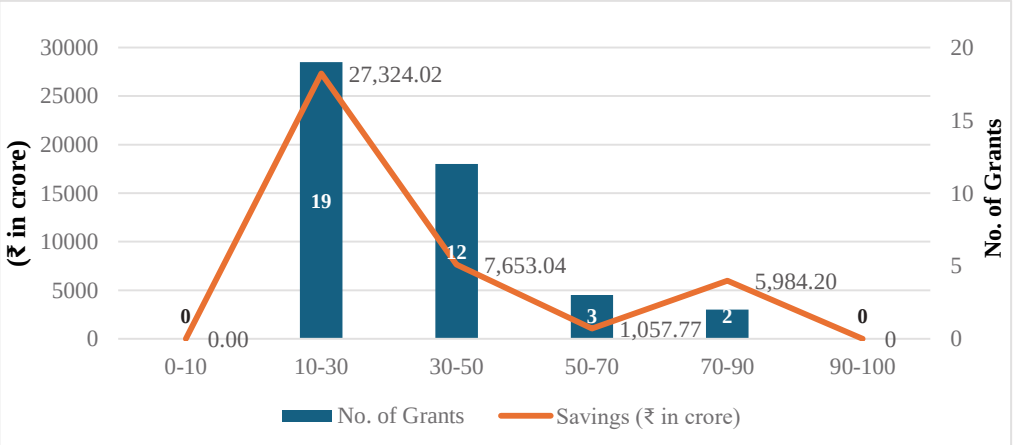
Sl. No.	Number and Name of grant	Amount
1	09-Parliamentary Affairs Department (Capital – Voted)	4.00
Total		**4.00**

Source: Appropriation Accounts 2024-25

Further, it was also observed that in 31 cases under 24 grants, there was persistent saving exceeding ₹100 crore in each case (***Appendix 2.8)*** during 2022-23 to 2024-25.

Detail of grants grouped by the percentage of utilisation along with total savings during 2024-25 has been shown in ***Appendix 2.9*** and **Chart 2.3**.

Chart 2.3: The distribution of the number of Grants/Appropriations grouped by the percentage of Savings along with total savings

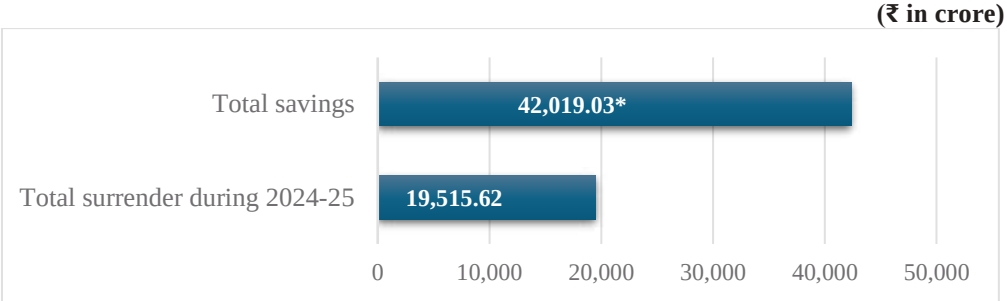


Source: Appropriation Accounts 2024-25

It was noticed that savings under 19 voted and three charged sections amounting to ₹23,776.65 crore (***Appendix 2.10)*** were not surrendered at all.

Chart 2.4: Savings and surrenders for the year 2024-25

(₹ in crore)



Source: Appropriation Accounts 2024-25
**Savings (₹42,621.88 crore)- Excess Expenditure (₹602.85 crore)*

Analysis of Chart 2.4 revealed that only 46.44 *per cent* of the savings were surrendered. Further, surrenders in respect of 18 voted and one charged section amounting to ₹670.40 crore, exceeded the amount of savings (***Appendix 2.11***). This included surrender of ₹216.08 crore under Capital voted section of Grant No.14(Revenue Department) with Budget provision of ₹43 crore.

On being pointed out it was replied (January 2026) that the practice of issuing surrender orders was started this year and the possibility of error cannot be ruled out.

Non- Surrender of Savings

(₹ in crores)

Grant No.	Year	Savings / percentage (%)		Surrendered	
		Revenue (V)	Capital (V)	Revenue (V)	Capital (V)
13	2022-23	87.30 (13%)	133.05 (55%)	0	0
	2023-24	57.00 (9%)	349.23 (73%)	0	0
	2024-25	62.60 (8.6%)	184.40 (37.67%)	62.59 (99.98%)	184.40 (100%)
32	2022-23	48.12 (25%)	338.20 (75%)	0	0
	2023-24	11.40 (7%)	417.53 (73%)	0	0
	2024-25	26.96 (12%)	209.03 (49%)	26.93 (99.89%)	209.03 (100%)

Source: Appropriation Accounts for respective years

In the selected Grants, above table shows that no savings were anticipated and surrendered during the years 2022-23 & 2023-24 despite having large savings. However, both departments have surrendered almost all the savings during 2024-25.

Entire provision (100 *per cent*) remained unutilized/surrendered against Budget Estimates.

During audit of selected grants, it was observed that entire budget provision remained unutilized in the capital section against Budget estimates (100 *per cent*) during the year 2024-25 indicating non-implementation of the important schemes as detailed below:

(₹ in crore)

S No	Name of the Work/ Work-code	Release
Grant No. 13 – Animal/ Sheep Husbandry Department		
1	Construction of Sheep Extension Centre at Rathsun Beerwah Budgam	0.016
2	Construction of District Veterinary Hospital at DSHO Budgam	0.032

(Source: Empowerment Portal- https://janbhagidari.jk.gov.in/JK BEAMS)

In reply, the Horticulture Department stated that tendering process could not be completed as no implementing agency was finalized during the year. The reply is not tenable as intended project/activities could not be implemented, and the allocated funds remained unutilized. This indicates inadequate planning and weak execution of procurement processes, leading to non-achievement of the intended objectives.

Besides, Persistent savings under one Major head in three Detailed Heads under Grant No. 32 was observed during the period from 2022-23 to 2024-25. This indicated non-achievement of the projected financial outlays in the respective years and needs to be clarified.

(₹ in crore)

S.No.	Head of Account	2022-23	2023-24	2024-25
1.	2401-119-0099-0244-054 Furniture and Furnishings	0.39	0.25	0.10

3.	2401-119-0099-2088-046 Purchase of vehicle	0.25	0.35	0.22

2.5.6 Misclassification between Revenue Expenditure and Capital Expenditure

As per rule 30 of Government Accounting Rules, 1990, expenditure that only results in the creation of concrete, material, and permanent assets should be classified in capital expenditure.

During the financial year 2024-25, the UT Government had booked ₹12,060.06 crore as Capital Expenditure. Audit examined related expenditure vouchers and noticed that ₹636.24 crore ***(Appendix 2.12)*** of expenditure of Revenue nature had been booked under Capital Expenditure. Out of this amount, ₹82.00 crore was expenditure towards Subsidy, Grants-in-Aid and Assistance to local bodies, *etc*. An amount of ₹554.24 crore[6] had been expended for creation of assets of entities (SPSUs) other than the Government of UT of J&K. In accordance with note below Rule 30(1) of GAR 1990, this amount is to be classified as Revenue Expenditure, instead of Capital Expenditure.

In reply, it was stated (January 2026) that the expenditure on account of SPSUs is being incurred as Government support to these SPSUs to become self-reliant. The Capital expenditure on these SPSUs shall be considered by the Government as equity at appropriate time.

The reply is not tenable, as the expenditure could be considered as capital only when it is converted as equity.

Thus, there was a misclassification of ₹636.24 crore, which resulted in overstatement of Revenue Surplus to that extent. The resulting Capital Expenditure, after Audit, for FY 2024-25, was ₹11,423.82 crore.

During audit of vouchers of selected **Grant 13 -Animal/ Sheep Husbandry Department** it was observed that expenditure to the tune of ₹6.80 crore has been incurred by the department on account of payment of various types of **subsidies** to beneficiaries under Holistic Agriculture Development Programme (HADP) scheme by booking to capital head of account 13-4403-00-101-0011-6062-115(works) instead of revenue head.

Similarly, in **Grant No- 32-Horticulture Department** it was observed that an expenditure of ₹1.92 crore was incurred by the department on account of payment of various types of **subsidies** to the beneficiaries under HADP and CAPEX schemes instead of revenue head.

Further, during 2024-25 a provision of ₹21.75 crore had been kept under 32-4401-119-0011-0281 (HPMC)-115 Works, out of which an expenditure of ₹12.46 crore had been incurred by HPMC for creation of its assets. HPMC being a Government Company, assets created by it cannot be claimed as assets of the Government hence the provision for such works should have been kept under Revenue instead of capital.

2.5.7 Major policy pronouncements in budget and their actual funding for ensuring implementation

Several policy initiatives taken up by the Government are wholly or partially not executed due to non-approval of scheme guidelines/modalities, non-commencement of works for want of administrative sanction, non-release of budget, etc. It was observed that under eight new schemes, there was outlay of ₹69.12 crore, but no expenditure was incurred resulting in non-implementation of schemes as shown in ***Appendix 2.13***.

Further, under 123 schemes, there was approved outlay of ₹5,285.41 crore which was fully surrendered/re-appropriated/ un-utilized as shown in ***Appendix 2.14***.

2.5.8 Non-adherence to the Quarterly Expenditure Limit

Rule 62(3) of the General Financial Rules provides that rush of expenditure, particularly in the closing months of the financial year is regarded as a breach of financial propriety and should be avoided.

Table 2.9: Rush of Expenditure during FY 2024-25

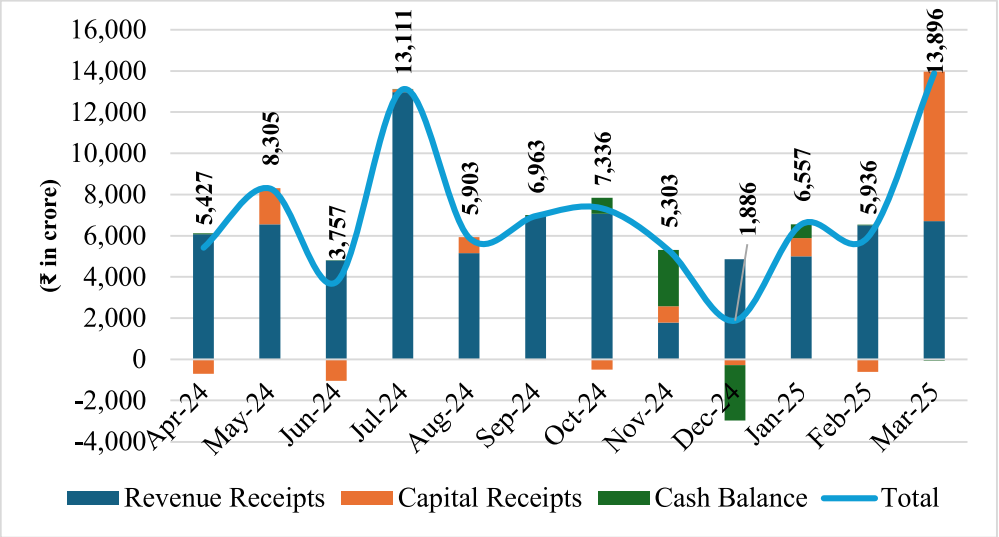
	Amount (₹ in crore)	Percentage of Total Expenditure in the year
Last Quarter of the year (Jan to Mar-2025)	55,807.01	48.76
Last month of the year (Mar-25)	17,571.70	15.35

Source: Office of the Pr. Accountant General (A&E), J&K (amount excluding recoveries)

During 2024-25, 48.76 *per cent* of the total expenditure was incurred in last quarter of the year and 15.35 *per cent* in the last month of the year.

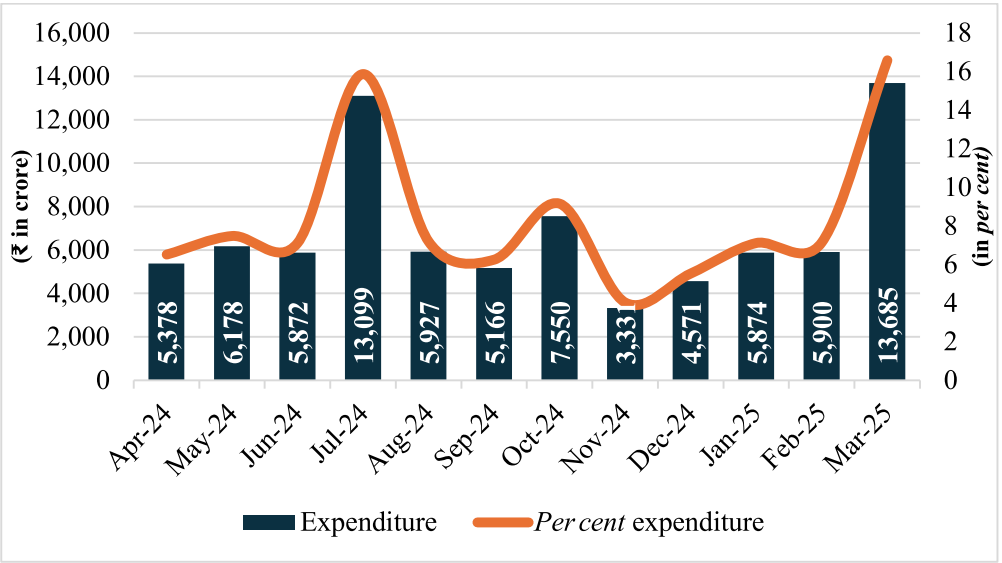
Trend of total Monthly receipts (Revenue Receipts, Capital Receipts and cash balance) and expenditure during financial year 2024-25 is shown in **Chart 2.5** and **Chart 2.6.**

Chart 2.5: Trend analysis of receipts (Month wise)



Source: Monthly Key Indicators, Office of the Pr. Accountant General (A&E), J&K

Chart 2.6: Trend analysis of expenditure (Month wise)



Source: Monthly Key Indicators, Office of the Pr. Accountant General (A&E), J&K

The monthly expenditure (Revenue Expenditure and Capital Expenditure) trend depicted in the chart indicates a pronounced skewness towards the last quarter of the financial year, particularly in March.

Further, entire expenditure of ₹18.84 crore in 15 sub-heads was incurred in the month of March 2025 alone (***Appendix 2.15***).

Maintaining a steady pace of expenditure is a crucial component of sound public financial management as it prevents fiscal imbalances and temporary cash crunches. In order to check rush of expenditure at the close of the financial year, UT Government (Aug 2024) has prescribed that expenditure should not exceed 30 *per cent* in last quarter and 15 *per cent* during last month of the financial year. The quarterly details of expenditures incurred across all Grants

are shown in the ***Appendix 2.16.*** 23 out of 36 Departments incurred more than 30 *per cent* of their expenditure in last quarter and 20 departments incurred more than 15 *per cent* of their expenditure in March 2025.

This pattern indicates non-adherence to the prescribed financial discipline and reflects deficiencies in expenditure planning and monitoring, thereby defeating the objective of achieving an even flow of expenditure during the year.

Selected Grant-wise rush of expenditure analysis

In selected grants, position regarding rush of expenditure was same as the overall position of the UT. Department of Animal/Sheep Husbandry has incurred 33.16 *per cent* of its expenditure during last quarter and 15.87 *per cent* during the month of March 2025. Horticulture Department has incurred 33.98 *per cent* of its expenditure during last quarter and 19.94 *per cent* during the month of March 2025.

2.6 Single Nodal Agency

Ministry of Finance, Government of India, mandated (March 2021) release of funds under each Centrally Sponsored Scheme (CSS) through a Single Nodal Agency (SNA) for each CSS and monitoring their utilisation. Each SNA must have a dedicated bank account in an authorised Scheduled Commercial Bank. The UT Government is required to transfer the Central Share received to the concerned SNA's account, along with the corresponding UT share.

Audit analysed the Voucher Level Computerisation (VLC) data and SNA PFMS report and found that there was discrepancy in data of Central and UT share transfer to SNA accounts, as shown in **Table 2.10.**

Table 2.10: Discrepancies in Central and UT share transfer

(₹ in crore)

Source of Data	Central share received	Central share transferred	UT share transferred	Less amount released by UT (-ve denotes excess)
VLC	7,206.16	5,894.36	1,027.60	1,311.80
SNA PFMS Report	5,406.99	5,514.56	909.52	-107.57
Difference Amount	**1,799.17**	**379.80**	**118.08**	**1,419.37**

Reconciliation needs to be conducted to clear variation between two figures**.**

2.7 Other issues noticed in Detailed Review of selected grants

Grant No-13 Animal and Sheep Husbandry- Excess releases of Funds by the Administrative Department

It was observed that excess release of funds by the Administrative Department to the DDO's against the releases received from the Finance department (9 *per cent*) under Capital Section.

(₹ in crore)

Year	BE for the FY 2024-25	Funds Released by Finance	Releases by Administrative Secretary	Received by DDO's	Excess *per cent*
2024-25	406.58	281.28	306.81	306.81	9

Source- BEAMS Data

Reasons for excess release of funds by the Administrative Department to sub-ordinate offices against the releases received from the Finance department is still awaited from the department.

2.8 Conclusion

The review of budgetary management of the Union Territory during 2024–25 revealed significant deficiencies in financial planning, execution, and control. The overall budget utilization was substantially below the sanctioned provisions, while instances of expenditure without budgetary authorization and excess spending requiring regularization reflected weak legislative and administrative oversight. Injudicious re-appropriations and persistent, large-scale savings across several grants indicated unrealistic budget estimates and inefficiencies in project implementation, particularly in the Capital section. Instances of misclassification of expenditure further distorted the financial position, while supplementary provisions that remained unutilized pointed to poor forecasting and weak fund management practices. The occurrence of a rush of expenditure in March 2025 demonstrated inadequate expenditure control, and the high proportion of committed expenditure constrained fiscal flexibility.

Overall, these shortcomings highlight the need for stronger financial discipline, realistic budgeting, and improved monitoring mechanisms to ensure more effective, transparent and accountable utilization of public resources.

2.9 Good Practices

The UT Government, as part of its efforts to strengthen budgetary practices, has initiated the practice of surrendering anticipated savings in advance, enabling the effective reallocation and utilization of unspent funds.

2.10 Recommendations

1. *The Government should strengthen budget planning and monitoring by making realistic budgetary provisions and ensure efficient control mechanisms to curtail savings/excess expenditure.*
2. *Excess expenditure over the approved Grants may be regularised at the earliest.*
3. *Controlling Officers need to be made aware of their responsibility to explain the variation in expenditure from the allocation to facilitate proper analysis of budget and critically review the persistent savings and misclassification of expenditure.*
4. *Government may consider strengthening of financial monitoring to avoid rush of expenditure at the fag end of the year.*

Chapter-III

Financial Reporting Practices

Chapter-III: Financial Reporting Practices

This chapter provides broad based perspective of quality of the UT Government Accounts rendered by various authorities of the UT Government and status of compliance with prescribed financial rules, procedures and directives.

Compliance with financial rules, procedures and directives as well as the completeness, timeliness and quality of reporting on the status of such compliance enhances relevance and reliability of the information presented in the financial reports.

Issues related to completeness of accounts

3.1 Off budget borrowings through UT owned PSUs/Authorities

Article 293(3) of the Constitution of India mandates consent of Government of India for a State Government's borrowing if it has any outstanding loans or guarantees from the Government of India.

Bypassing the above stipulated net borrowing ceiling by routing loans outside budget through various State Government Public Sector Undertaking (SPSUs)/ Corporations/ other Bodies despite the UT being responsible for repayment of such loans poses significant risk to fiscal health and transparency in the Government finances.

The Jammu and Kashmir Fiscal Responsibility and Budget Management (FRBM) Act, 2006 outlined that the Government shall take suitable measures to ensure greater transparency in its fiscal operations in public interest by disclosing the actual liabilities arising out of Off Budget Borrowings by PSUs, Special Purpose Vehicles and other equivalent instruments where liability for repayment is on the Government allocations. Further, the Jammu and Kashmir Fiscal Responsibility and Budget Management Rules, 2008 provided that the 'Medium Term Fiscal Restructuring Policy (MTFRP) Statement' laid before the Legislature along with Budget documents shall contain the three- year rolling targets with respect to Revenue Deficit, Fiscal Deficit and total outstanding liabilities[1] of the Government.

For the year 2024-25, debt stock was targeted as three *per cent* of GSDP under Budget. Besides, the GoI had fixed borrowing ceiling of ₹9,765.58 crore (3.72 *per cent* of GSDP) for the UT during 2024-25.

[1] As defined in the J&K FRBM Act 2006, liabilities under the Consolidated Fund of the State and the Public Account of the State and includes borrowings by the Public Sector Undertakings and the special purpose vehicles and other equivalent instruments including guarantees where the principal and /or interest are to be serviced out of the budget.

Government does not provide details of off budget borrowings in its budget. Further, as per information furnished by the UT Government, the outstanding off budget borrowing is detailed in **Table 3.1**.

Table 3.1: Details of off-budget borrowings as on 31 March 2025 as disclosed by the UT Government

(₹ in crore)

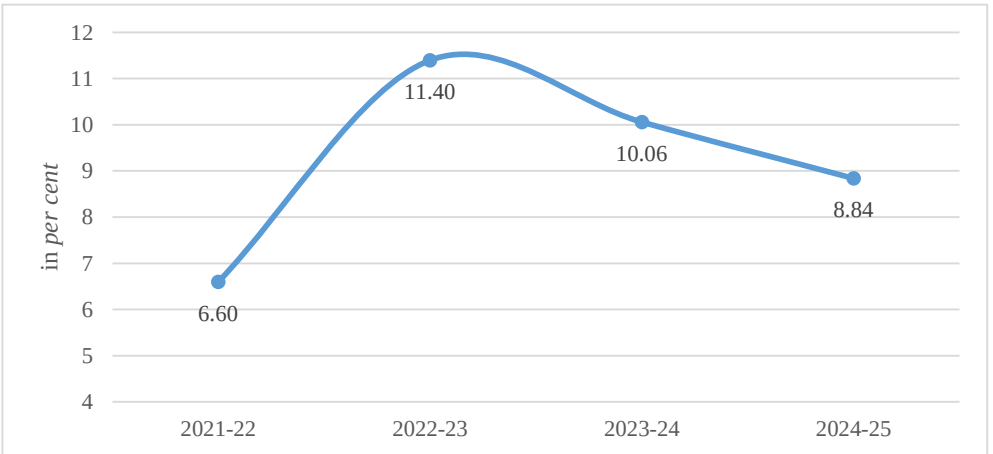
Entities borrowed on behalf of Government	Loan Sanctioned	Loan disbursed	Purpose of loan	Outstanding loan as on 31 March 2025
JKPCL	11,024.47	10,321.83	Liquidity Infusion Scheme (LIS)	8,746.91
JKPCL	14,164.26	13,214	Late Payment Surcharge (LPS)	13,214
JKIDFC	2,500	2,500	For funding projects which were pending over a decade for want of financial support	1,172.28
Total				**23,133.19**

Source: Budget Documents/information provided by the UT Finance Department
JKPCL- Jammu and Kashmir Power Corporation Ltd, JKIDFC- Jammu Kashmir Infrastructure Development Finance Corporation.

There are off-budget borrowings amounting to ₹23,133.19 crore outstanding against SPSUs JKPCL, JKIDFC as depicted in Table 3.1. Apart from above off-budget borrowing there are off-budget borrowings on account of Rajiv Gandhi Grameen Vidyutikaran Yojana RGGVY (₹5.51 crore) and Deen Dayal Upadhyaya Gram Jyoti Yojana DDUGJY (₹4.23 crore) outstanding ending March 2025. Besides, Government of Jammu and Kashmir has also decided to take over the borrowing of Jammu and Kashmir Cement Ltd which was ₹43.53 crore ending March 2024 and has increased to ₹54.16 crore ending March 2025.

Total outstanding off-budget borrowings amounts to ₹23,197.09 crore ending March 2025. Percentage off-budget borrowing to GSDP during 2020-25 is depicted in **Chart 3.1**.

Chart 3.1: Outstanding Off-Budget Borrowings as a percentage of GSDP during 2020-25



The outstanding off-Budget Borrowings of ₹23,197.09[2] crore as on 31st March 2025 were not accounted for in the overall outstanding debt/liabilities of the UT. However, the repayment of off-Budget Borrowings of ₹3,451.84 crore has been made from the Internal debt of the Government, resulting not only in the adverse balances under certain debt heads but also an understatement of the overall outstanding debt/liabilities of the UT by ₹26,648.93[3] crore at the end of the year 2024-25.

In reply, it was stated (January 2026) that the above off-budget borrowings of SPSUs are being repaid out of budget as the condition of SPSUs is far from self-reliant. In case of allotment of funds to SPSUs for repayment of borrowing, the possibility of mis-utilisation of funds by the cash starved SPSUs cannot be ruled out.

3.2 Undischarged liabilities of the Government

Undischarged liabilities, such as non-transfer of collected cess to designated bodies or short remittances to the National Pension System (NPS), etc. can have significant long-term fiscal and governance implications. These unpaid obligations accumulate over time, creating hidden liabilities that distort the true financial position of the UT. Further, delays in cess transfer hinder the intended development or welfare outcomes, defeating the purpose for which such levies were imposed. Similarly, short transfers to NPS not only violate statutory commitments but also compromise the financial security of employees. Over the years, such practices can erode trust, trigger legal liabilities and increase future expenditure obligations, thereby constraining fiscal space and weakening fiscal sustainability. Such cases are discussed in succeeding paragraphs.

3.2.1 Undischarged Interest liability

The Government has a liability to provide and pay interest on the amounts in the Interest-bearing Deposits/Reserve Funds.

Audit observed that ₹45.32 crore was required to be paid as interest on the balance of ₹1,303.69 crore lying under interest bearing Deposits/Reserve Funds as on 1st April 2024 as shown in **Table 3.2**.

[2] JKPCL: ₹8,746.91 crore (LIS), ₹13,214(LPS); JKIDFC:1,172.28; RGGVY: ₹5.51 crore; DDUGJY: ₹ 4.23 crore; J&K Cement Ltd: ₹54.16 crore

[3] Repayments of off-budget borrowings made from Internal debt: ₹3,451.84 crore and off-budget borrowings not included in the Debt: ₹23,197.09 crore.

Table 3.2: Details of interest liability not discharged in respect of Interest-bearing Deposits/Reserve Funds

(₹ in crore)

Sl. No.	Name/Head of the interest-bearing deposit	Opening Balance as on 1 April 2024	Basis for calculation of interest*	Amount of interest not provisioned
1.	State Compensatory Afforestation Fund-MH-8121	804.56	As per circulars issued by the Ministry of Environment, Forest & Climate Change (@3.35 *per cent* p.a.)	28.63
2.	State Compensatory Afforestation Deposit-MH-8336	499.13		16.69
Total		**1,303.69**		**45.32**

Source: Finance Accounts 2024-25

** Interest due has been computed on the basis of the progressive balance at the end of each month.*

3.2.2 Short contribution in National Pension System

Government employees recruited on or after 01st January 2010 are covered under the National Pension System (NPS), which is a Defined Contribution Pension Scheme (DCPS). In terms of the scheme, the employee has to contribute 10 *per cent* of his / her monthly pay and the Union Territory Government have to make a contribution at the rate of 14 *per cent*. The entire amount has to be transferred to the designated fund manager through the National Securities Depository Limited (NSDL)/Trustee Bank.

During the year 2024-25, total contribution to the NPS was ₹2,296.73 crore (Employees' contribution ₹843.08 crore and Government's contribution ₹1,180.31 crore). In addition to this, an amount of ₹273.34 crore was remitted in cash directly to MH-8342. The Government transferred ₹2,296.73 crore to the Public Account under Major Head 8342-117 Defined Contribution Pension Scheme- Out of the total amount transferred / deposited in the Public Account in the financial year, ₹396.22 crore remained in the Public Account and was not transferred to the NSDL. The cash balance of the Government was overstated by this amount.

Between 2011-25, total receipts under DCPS were ₹12,691.89 crore (employee: ₹5,882.01 crore, employer: ₹6,809.88 crore,), while only ₹12,242 crore was transferred to the pension fund, resulting in a cumulative short transfer of ₹449.89[4] crore. The details of the receipts from employees' share, Government's contribution and investment in pension funds are given in ***Appendix 3.1.*** Delays in contributions and fund transfers are adversely affecting returns to employees and creating a deferred liability.

Besides, balance of ₹53.67 crore on account of short transfer to NSDL of the erstwhile State of J&K is still lying in the public account.

[4] Includes ₹53.67 crore of the erstwhile State of J&K.

3.2.3 State Mineral Exploration Trust/State Mineral Development Fund

The Ministry of Mines, Government of India, vide its letter dated 19th November 2024, advised all State Governments to establish a State Mineral Exploration Trust (SMET)/ State Mineral Development Fund (SMDF) on the lines of the National Mineral Exploration Trust (NMET), as mandated under clause (g) of sub-section (A) of Section 15 of the Mines and Minerals (Development and Regulation) Act, 1957 to give impetus to exploration, research and innovation activities for minor minerals.

Accordingly, the Government of UT of Jammu and Kashmir is yet to establish SMET under the Public Account/Bank Account for financing exploration activities related to minor minerals.

3.2.4 Pendency of refund cases

Promptness in disposal of refund cases is an important indicator of performance of the Department concerned.

The details of refund cases of taxes of UT during the year 2024-25, as reported by the departments concerned is shown in **Table 3.3**.

Table 3.3: Details of refund cases

Sl. No.	Particulars	GST		Sales Tax/VAT		State Excise	
		No. of cases	Amount (₹ in crore)	No. of cases	Amount (₹ in crore)	No. of cases	Amount (₹ in crore)
1.	Claims outstanding at the beginning of the year	656	40.05	6	3.36	95	3.86
2.	Claims received during the year	844	73.75	25	2.76	28	2.88
3.	Refunds made during the year	495	35.16	28	2.95	25	2.53
4.	Refunds rejected during the year	150	16.38	0	0	2	0.05
5.	Balance outstanding at the end of year	855	62.26	3	3.17	96	4.17

Source: Departmental information

Settlement of refund cases under GST and State Excise progressed at a slower pace than the receipt of new claims, leading to an increase in outstanding refund claims at the end of the year.

3.3 Funds outside Government Accounts

3.3.1 Building and Other Construction Workers Welfare Cess

The Government of India enacted the Building and Other Construction Workers Welfare Cess Act, 1996 (Cess Act) to levy and collect cess for providing benefits to the building and other construction workers. The Act, *inter alia*, mandated constitution of a Building and Other Construction Workers' Welfare Board and framing of rules by every Government to exercise the powers conferred under the Act. Accordingly, the erstwhile State Government of Jammu and Kashmir framed the Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Rules, 2006 under the Act and constituted the Jammu and Kashmir Building and Other Construction Workers Welfare Board in 2007. The Board is responsible for the operation and maintenance of the amount credited by Government as Labour Cess Deposits. The Government of Union Territory of Jammu and Kashmir continued with the same rules.

As per Section 3(1) of the Building and Other Construction Workers Welfare Cess Act, 1996, and in line with Government of India rules/resolution, labour cess was to be collected at the rate of one *per cent* of the cost of construction incurred by employers/builders, excluding the cost of land and any compensation payable under the Workmen Compensation Act, 1923. All Departments, Boards, Autonomous Bodies, and Local Authorities were directed to collect this cess on all construction activities, including from individuals with approved residential building plans costing ₹10 lakh or more, and deposit the same with Jammu and Kashmir Building and Other Construction Workers' Welfare Board. During 2024-25, opening balance with the Board on account of labour cess was ₹778.84 crore. The receipts during the year were ₹435.76 crore and disbursements were ₹171.17 crore. The closing balance of labour cess as on 31st March 2025 was ₹1,043.43 crore[5]. The Cess is kept outside the Government Accounts in the Government of Union Territory of Jammu and Kashmir.

3.3.2 District Mineral Foundation Trust

Section 9(B) of Mines and Minerals (Development and Regulation) Act, 1957 provides that in any district affected by mining related operations, the State Government shall, by notification, establish a trust, as a non-profit body, to be called the District Mineral Foundation. The objective of the District Mineral Foundation shall be to work for the interest and benefit of persons, and areas affected by mining-related operations in such manner as may be prescribed by

[5] Figures are provisional as accounts/balance sheet of the Board is yet to be finalised (July 2025).

the State Government. The composition and functions of the District Mineral Foundation shall be such as may be prescribed by the State Government.

The Jammu and Kashmir District Mineral Foundation (Composition, Contribution, Financing, Funding & Trust) Rules were notified vide SRO No. 3 dated 11th January 2017. As per the Rules, the Government shall set up a fund under the Trust to be called as the District Mineral Foundation Trust Fund which shall be managed by the Executive Committee[6]. The Trust Fund shall receive Contribution Fund as per the contributions defined in these rules. The holders of mineral concessions granted under the Act and rules made thereunder, shall make payments for contribution to the Trust Fund of amounts payable to the State/UT Government simultaneously with payments of royalty.

As per rule 11(1), all holders of major mineral concessions shall, in addition to royalty, pay to the respective District Mineral Foundation, an amount equivalent to such percentage of royalty as may be prescribed by the Central Government under sub-section (5) or sub-section (6) of section 9B of the Act as the case may be. As per Rule 11(2) amended (February 2023)[7], out of the total amount of royalty realised from the holders of minor mineral concessions, 10 *per cent* (if concession granted through auctions) or 30 *per cent* (if concession not granted through auction) shall be deposited/paid towards the respective Trust Fund by the Department.

There are 20 District Mineral Foundation Fund (DMF) Trusts in the UT of Jammu and Kashmir. Against the total collection of ₹62.81 crore[8] under DMF Fund by all Trusts upto the end of 2024-25, an expenditure of ₹10.29 crore had been incurred during 2024-25. A balance of ₹52.52 crore under DMF Fund was lying in bank accounts of 20[9] District Mineral Foundation Trusts as on 31st March 2025. This amount remained out of Government Account. However, as per Government of India, Ministry of Mines order dated 12th July 2021, no fund shall be transferred from District Mineral Foundation Trust to the State exchequer. As per Constitution of India and as per J&K Re-organisation Act 2019, all receipts are to be accounted for either in the Consolidated Fund or Public Accounts, but these receipts are being remitted into the bank accounts of the respective District Mineral Foundation Trusts, as per the directions of Government.

3.3.3 Water Usage Charges

Water usage charges are being levied on Hydel power generating companies under the provisions of the Jammu and Kashmir Water Resources (Regulation

6 Divisional Commissioner, Kashmir/Jammu, Chairperson, Director Geology and Mining Kashmir/ Jammu, Director, Health Services, Kashmir/Jammu, Director, Rural Development, Kashmir/Jammu, Chief Engineer, PWD, Kashmir/Jammu, Special Invitees having knowledge and experience in Mineral Administration/exploration to be invited by the Chairperson.

7 S.O 69 dated 08th February 2023

8 Includes Opening balance of ₹36.18 crore, receipts including interest ₹26.63 crore

9 Jammu, Kathua, Samba, Reasi, Udhampur, Ramban, Doda, Kishtwar, Rajouri, Poonch, Srinagar, Anantnag, Kulgam, Ganderbal, Pulwama, Bandipura, Baramulla, Shopian, Budgam and Kupwara.

and Management) Act, 2010 amended on 25th October 2012 and 27th October 2014. Under the Act, a Fund was to be constituted as an account in the Jammu and Kashmir Bank or allotted a proper account head. The amount realised as water usage charges was to be deposited in the account/head so created and utilised for establishment of Hydroelectric and Multi-purpose Hydro Electric Projects and for buying back Hydroelectric power projects already established in the State/UT and purchase of power. As on 31st March 2025, an amount of ₹0.21 crore on account of water usage charges/interest was lying in the Water Usage Fund Account (Saving Bank Account) which remained out of Government Account of the Union Territory of Jammu and Kashmir. The amount lying in the savings account on account of water usage charges and interest thereupon needs to be credited to Government account.

3.3.4 Social Responsibility Corpus fund

In terms of Government Order 50-F of 2016 dated 23rd February 2016 the Finance Department Jammu and Kashmir Government, issued a sanction for creation of 'Social Responsibility Corpus Fund' in the Excise Department. The Fund was to support the de-addiction centres, take measures to reduce the incidence of drunk driving, promote road safety etc. As per Excise policy, the holders of liquor license were to contribute towards the 'Social Responsibility Corpus Fund' as per rates fixed from time to time. The Department was to make an equal contribution to the contribution made by the stakeholders/ liquor industries.

The amount received in the Social Responsibility Corpus Fund is being credited into the savings bank account maintained at J&K Bank. There was an opening balance of ₹16.20 crore in the bank account as on 01st April 2024. An amount of ₹2.54 crore was received during 2024-25 on account of contribution of license holders (₹1.69 crore), Government (₹0.36 crore) and interest (₹0.49 crore) from the bank. After incurring expenditure of ₹0.87 crore, there was a closing balance of ₹17.87 crore in the account as on 31st March 2025. The amount lying in the savings bank account was outside the Government account and thus remained outside the Legislative oversight.

Issues related to transparency

3.4 Delay in submission of Utilisation Certificates

The Government of UT of Jammu and Kashmir has not framed revised rules relating to drawl of Grants-in-Aid and submission of Utilisation Certificate (UCs) thereof. However, as per Para 10.19 of the erstwhile State of Jammu and Kashmir (pre re-organisation) Financial Code Volume-I, UCs in respect of Grants-in-Aid received by the grantee should be furnished by the grantee to the authority that sanctioned it, within 18 months from the date of receipt of grant or before applying for a further grant on the same subject, whichever is earlier. Utilisation Certificates outstanding beyond the specified period

indicate absence of assurance on utilization of the grants for indented purposes and the expenditure shown in the accounts cannot be treated as final.

During the year 2024-25, UCs amounting to ₹3,223.07 crore became due for submission (grant-in-aid bills drawn up to 09/2023) to the UT Government. In addition to that, UCs amounting to ₹5,231.09 crore were outstanding at the beginning of the year. During the year, outstanding UCs amounting to ₹4,349.08 crore were cleared, leaving outstanding 1,395 number of UCs amounting to ₹ 4,105.08 crore as on 31st March 2025. Further, 1,681 number of UCs amounting to ₹ 3,434.42 crore pertaining to erstwhile State of J&K were outstanding as on 31st March 2025 as given in **Table 3.4**.

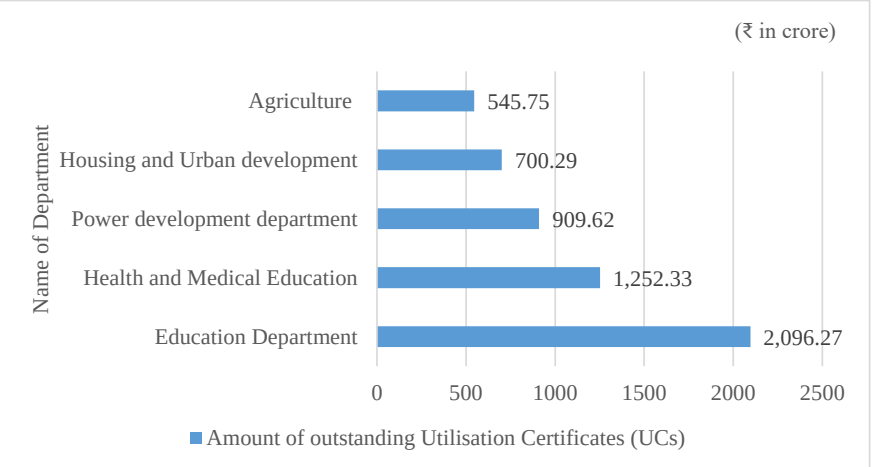
Table 3.4: Age-wise pendency of Utilisation Certificates

(₹ in crore)

UC due year*	Number of pending UCs	Amount
Prior to 2019-20	17	6.10
2019-20	22	1.71
2020-21	297	11.72
2021-22	1,681	3,575.28
2022-23	449	1,376.66
2023-24	334	1,075.50
2024-25	276	1,492.52
Total	**3,076**	**7,539.49**

Source: Finance Accounts 2024-25 and Office of the Accountant General (A&E), J&K.
**The year mentioned above relates to "Due year", i.e., after 18 months of actual drawal.*

Chart 3.2: Outstanding UCs in respect of five major Departments as on 31 March 2025



Source: Office of the Accountant General (A&E)

Since non-submission of UCs is fraught with the risk of misutilisation, it is imperative that the Government should monitor this aspect closely and hold the persons concerned accountable for submission of UCs in a timely manner.

3.5 Abstract Contingent bills

The Government of UT of J&K has not revised codal provisions for drawal of Abstract Contingent (AC) bills and their settlement. However, Financial Code Volume-I (Para 7.18) of the erstwhile State of J&K envisages that when it is considered necessary to draw money from the Treasury for contingent expenditure of which vouchers cannot be readily obtained before payment, Drawing and Disbursing Officers (DDOs) are authorised to draw sums of money through AC bills. In terms of the erstwhile State of Jammu and Kashmir (pre re-organisation) Financial Code para 7.10, DDOs are required to present Detailed Countersigned Contingent (DCC) bills containing vouchers in support of final expenditure within two months from the date on which the advance was drawn.

The details of AC bills, pending adjustment, as on 31st March 2025 is given in **Table 3.5**.

Table 3.5: Age-wise pending adjustment of AC bills

(₹ in crore)

Due Year	No. of AC bills	Amount
Up to 2018-19	1,636	3,315.93
2019-20	140	1,441.49
2020-21	188	2,661.21
2021-22	522	3,302.85
2022-23	201	1,737.49
2023-24	251	2,163.04
2024-25	130	985.2
Total	**3,068**	**15,607.21**

Source: Finance Accounts 2024-24 and Office of the Accountant General (A&E) Jammu and Kashmir

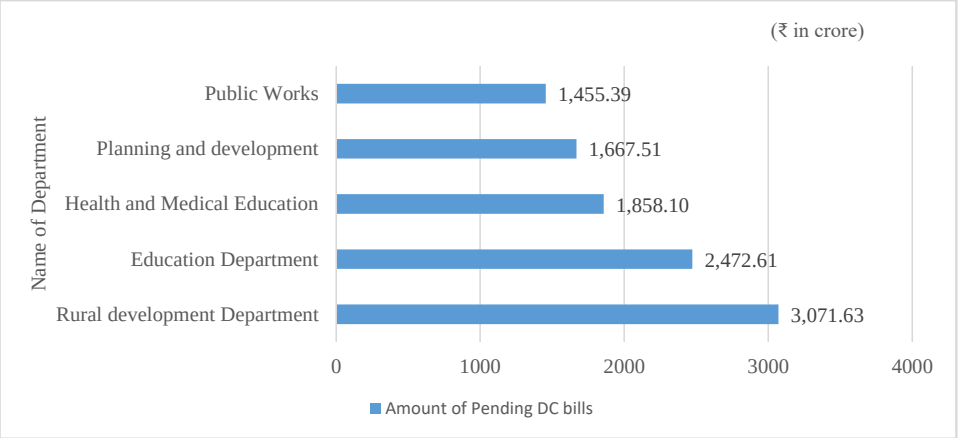
As against 3,451 AC bills amounting to ₹25,127.97 crore outstanding as on 31st March 2024, there were 3,068 AC bills amounting to ₹15,607.21 crore outstanding as on 31st March 2025.

The outstanding AC bills as on 31st March 2025 included 1,748 AC bills amounting to ₹4,716.03 crore drawn prior to 30th October 2019 by the Government of erstwhile State of Jammu and Kashmir and 1,320 AC bills amounting to ₹10,891.18 crore drawn thereafter by the Government of UT of Jammu and Kashmir.

The bifurcation of these outstanding AC bills is yet to be done between the successor Union Territories viz., Union Territory of Jammu and Kashmir and Union Territory of Ladakh.

It was observed that out of 94 AC bills drawn during 2024-25, 24 AC bills amounting to ₹73.01 crore (11.25 *per cent*) were drawn in March 2025, out of which no AC bills were adjusted up to 31st March 2025.

Chart 3.3: Pending DC Bills in respect of five major Departments



Source: Office of the Accountant General (A&E)

Non-adjustment of advances for long periods is fraught with the risk of misappropriation and therefore, requires close monitoring by the respective DDOs for ensuring submission of DC bills. Further, to the extent of non-receipt of DC bills, the expenditure incurred cannot be asserted as correct or final.

3.6 Operation of Minor Head-800

Minor Head-800 relating to Other Receipts and Other Expenditure is intended to be operated only when the appropriate minor head has not been provided in the accounts. Regular operation of Minor Head-800 is to be discouraged, since it renders the accounts opaque. Classification of large amounts under the omnibus Minor Head 800 affects transparency in financial reporting and distorts proper analysis of allocative priorities and quality of expenditure.

During the year 2024-25, ₹1,941.43 crore under 30 Major Heads of account, constituting 2.35 *per cent* of the total Revenue and Capital expenditure (₹82,532.19 crore) was classified under the Minor Head-800-Other Expenditure in the accounts. Of these, ₹49.15 crore under 5 Major Heads was budgeted/ classified under Minor Head-800-Other Expenditure despite availability of appropriate Minor Heads thereunder, as detailed in **Table 3.6**.

Table 3.6: Expenditure misclassified under Minor Head 800-Other Expenditure during 2024-25

(₹ in crore)

Details of head under booking was wrongly classified	Amount	Nature of expenditure	Correct classification
8-4059-80-800-0011-2341-2-V	5.81	Construction/Upgradation of office buildings	8-4059-01-051-0011-2341-2-V
8-4059-80-800-0011-2341-2-V	0.54	Construction/upgradation of Staff quarters/ residential buildings	8-4059-60-051-0011-2341-2-V
29-5055-00-800-0011-1378-2-V	3.33	Construction of buildings	29-5055-00-050-0011-1378-2-V

Details of head under booking was wrongly classified	Amount	Nature of expenditure	Correct classification
21-4406-01-800-0011-0200-2-V	3.26	Construction of buildings	21-4406-01-070-0011-0200-2-V

Total	**49.15**		

Source: J&K Govt. Janbhaghidari/EMPOWERMENT Portal.

Similarly, ₹5,291.15 crore (including revenue receipts of ₹4,908.30 crore representing Sale of Power and Misc. Power Receipt) under 38 Major Heads of Account, constituting 7.11 *per cent* of the total Revenue Receipts (₹74,401.16 crore) was classified under 800-Other Receipts in the accounts. Of these, ₹0.97 crore under two Major Heads were classified under Minor Head-800-Other Receipts despite availability of appropriate Minor Heads thereunder as detailed in **Table 3.7**.

Table 3.7: Receipts misclassified under Minor Head 800-Other Receipts during 2024-25

(₹ in crore)

Details of head under booking was wrongly classified	Amount	Nature of receipts	Correct classification
1452-00-800	0.43	Rent	1452-00-105
0029-00-800	0.54	Land compensation	0029-105
Total	**0.97**		

Source: Finance Accounts and VLC data maintained by the AG (A&E).

There is no Minor head available under Major Head 0801 for crediting Receipt on account of sale of power and after unbundling of Power Development Department and creation of DISCOMs/TRANSCOMs, the receipt on account of sale power should be collected by the DISCOMs. Matter regarding posting of expenditure and receipt was discussed with the Government and it was assured that the receipts will be booked under relevant available head. Incorrect classification results in accounts not showing correct position of receipts under the relevant minor head.

Issues related to measurement

3.7 Outstanding balance under major Suspense and DDR Heads

The Finance Accounts reflect the net balances under Suspense and Remittance Heads. The outstanding balances under these heads are worked out by

aggregating the outstanding debit and credit balances separately under various heads. Significant suspense items balance for the last three years have been shown in **Table 3.8**.

Table 3.8: Balances under Suspense and Remittance Heads

(₹ in crore)

Minor Head		2022-23		2023-24		2024-25

	Net Debit(Dr)/Net Credit(Cr)	1.45 (Cr)		8.28 (Dr)		0.85 (Cr)	

Source: Finance Accounts of respective years

There was also a net credit balance of ₹2,508.81 crore {₹344.14 crore (Debit) under Suspense and ₹2,852.95 crore (Credit) under Remittances} at the end of 30th October 2019 (pre re-organisation) relating to the erstwhile State of Jammu and Kashmir under Suspense and Remittance Heads which is yet to be apportioned between the successor Union Territories of Jammu & Kashmir and Ladakh.

Non-clearance of outstanding balances under these Heads affects the accuracy of receipt/ expenditure figures and balances under different heads of Accounts (which are carried forward from year to year) of the Government of Union Territory.

3.8 Reconciliation of Departmental figures

To exercise effective budgetary control over revenue/expenditure and to ensure accuracy in accounts, State/UT Financial Rules stipulate that Chief Controlling Officers (CCOs)/Controlling Officers (COs) are required to reconcile every month, the receipts and expenditure recorded in their books with the figures of the Accountant General (A&E).

The status of reconciliation of figures by the Controlling Officers is given in **Table 3.9** and **Chart 3.4**.

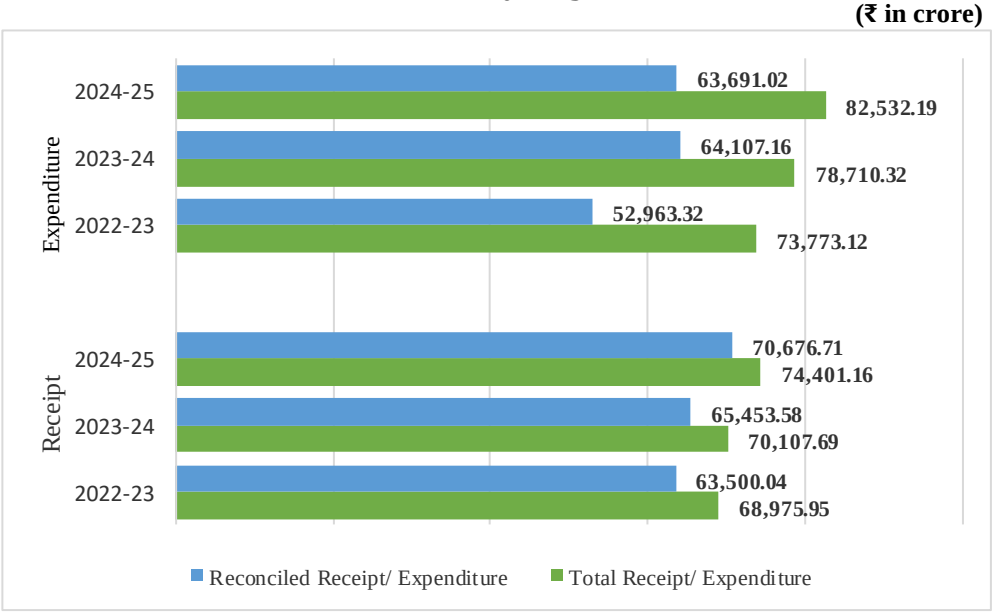
Table 3.9: Status of Reconciliation of Receipts and Expenditure by Controlling Officers

Year	Total No. of Controlling Officers	No. of Controlling Officers reconciled their receipts/ expenditure		
		Fully reconciled	Partially reconciled	Not reconciled
Receipts				
2022-23	371	68	71	232
2023-24	373	86	131	156
2024-25	389	81	68	240
Expenditure				
2022-23	371	233	101	37
2023-24	373	251	84	38
2024-25	389	296	50	43

Source: Information maintained by office of the Pr. Accountant General (A&E) J&K

Chart 3.4: Status of Reconciliation of Receipts and Expenditure during the year 2022-25

(₹ in crore)



Source: Information maintained by Pr. Accountant General (A&E) J&K

Government has improved its reconciliation of receipts consistently during last three years and has improved reconciliation of receipts from 92 *per cent* in 2022-23 to about 95 *per cent* in 2024-25. However, there was decline in reconciliation of expenditure which has declined from 81 *per cent* in 2023-24 to 77 *per cent* in 2024-25. The shortfall in expenditure reconciliation indicates

deficiencies in financial reporting and internal control mechanisms. Timely and complete reconciliation of both receipts and expenditure with the figures booked in the accounts is essential to ensure accuracy, reliability, and transparency of Government accounts. The Government needs to take necessary corrective action to achieve 100 *per cent* reconciliation in respect of all receipts and expenditure.

3.9 Reconciliation of Cash Balances

As per accounts of the Principal Accountant General (A&E), Jammu and Kashmir, the Cash Balance of the UT Government as on 31st March 2025 was ₹1,445.79 crore (Debit) while the same was reported as ₹1,445.81 crore (Credit) by the Reserve Bank of India. As such, there was an unreconciled difference of ₹0.02crore (Credit), which was under reconciliation between the Principal Accountant General (A&E), Jammu and Kashmir and the UT Government.

There was also a net difference of ₹83.32 crore (debit) between RBI and Principal Accountant General(A&E) figures as on 30 October 2019 which is yet to be reconciled and apportioned between the Union Territory of Jammu and Kashmir and Union Territory of Ladakh.

Issues related to disclosure

3.10 Compliance with Accounting Standards

As per Article 150 of the Constitution of India, the President of India may, on the advice of the Comptroller and Auditor General of India (CAG), prescribe the form of accounts of the Union and of the States. On the advice of the CAG, the President of India has so far notified four Indian Government Accounting Standards (IGAS). Compliance with these Accounting Standards by the UT Government as well as deficiencies therein during 2024-25 is detailed in **Table 3.10**.

Table 3.10: Compliance to Accounting Standards

Sl.	Accounting Standards	Essence of IGAS	Compliance by UT Government	Deficiency
1.	IGAS-1:	Guarantees Given by the Government – Disclosure requirements	Complied (Statements 9 and 20 of Finance Accounts)	NA
2.	IGAS-2:	Accounting and Classification of Grants-in-aid	Not complied (Statement 10 and Appendix-III of Finance Accounts)	(i) Certain Grants-in-Aid to be classified under Revenue Section have been classified under Capital Section.

Sl.	Accounting Standards	Essence of IGAS	Compliance by UT Government	Deficiency
				(ii) Information has not been furnished in respect of Grants-in-Aid given in kind by the UT Government.
3.	IGAS-3:	Loans and Advances made by Government	Not Complied (Statement 7 and 18 of Finance Accounts)	The closing balances have not been reconciled by the Loanee Entities/ Government of UT. The Government has not furnished figures in respect of certain loans and advances for which they maintain detailed accounts.
4	IGAS-4:	Prior period adjustments	Complied (Statement 13 of Finance Accounts)	NA

Source: Finance Accounts

3.11 Submission of accounts of Autonomous Bodies

Annual financial statements of Autonomous Bodies are to be certified by Comptroller and Auditor General of India under sections 19(2), 19(3) or 20(1) of the DPC Act, 1971. As on 31st March 2025, 28 accounts in respect of 8 Autonomous Bodies (ABs) were pending as detailed in **Table 3.11**.

Table 3.11: Arrears of accounts of Autonomous Bodies as on 31 March 2025

Sl. No.	Name of Body or Authority	Accounts pending since	No. of Accounts pending
1	Compensatory Afforestation Management and Planning Authority (CAMPA)	2019-20 to 2023-24[10]	5
2	Sher-e-Kashmir University of Agricultural Sciences and Technology (SKUAST), Srinagar Kashmir	2023-24[11]	1
3	Sher-e-Kashmir University of Agricultural Sciences and Technology (SKUAST), Jammu	2023-24[12]	1
4	JK Employee Provident Funds Organisation (EPFO)	2015-16 to 2019-20[13]	5

[10] Annual Accounts have been received for the period from 1st January 2010 to 2018-19. However, the SARs are under finalisation.

[11] Separate Audit Report (SAR) finalised up to 2021-22. SAR for year 2022-23 is under finalisation.

[12] SARs finalised up to 2019-20. Annual Accounts for 2020-21 to 2022-23 have been received. However, the same could not be certified as the orders from Govt. for entrustment of audit were awaited.

[13] Accounts w.e.f. 2015-16 to 30th October 2019 are awaited as J&K Employees Provident Fund Organization had ceased to operate since the enactment of J&K Re-organisation Act, 2019 i.e. from 31st October 2019 whereunder J&K Employees Provident Funds and Miscellaneous Provisions Act, 1961 was repealed

Sl. No.	Name of Body or Authority	Accounts pending since	No. of Accounts pending
5	Jammu & Kashmir Housing Board	2023-24[14]	1
6	Khadi and Village Industries Board (KVIB)	2020-21 to 2023-24	4
7	J&K Building and Other Construction Workers Welfare Board (BOCWWB)	2019-20 to 2023-24	5
8	J&K State Legal Services Authority (SLSA)	2018-19 to 2023-24	6
Total			**28**

Source: Departmental data/information

Non-submission/ delay in submission of accounts by these Bodies receiving substantial funding from the Government is a financial irregularity persisting for years. In view of this non-compliance, the audited accounts of these Autonomous Bodies have not so far been presented to the Legislature, as required under the Statutes under which these bodies were created. Delay/ arrears in finalisation of accounts carries the risk of financial irregularities going undetected and entails possibility of fraud and misappropriation. This has also deprived the Legislature/ Government of the opportunity to get feedback on their activities and financial performance.

The Government may impress upon these Autonomous Bodies the need for timely preparation and submission of accounts.

Other Issues

3.12 Booking of Significant amount under MH-4801 and crediting of receipt of power under MH-0801 despite unbundling of Power Sector

The function of supply of electricity to consumers was handled departmentally up to 2020. In 2020 vide S.O 109 dated 20th March 2020, the work of distribution of power was transferred to two DISCOMs i.e. Jammu Power Distribution Company Ltd and Kashmir Power Distribution Company Ltd. However, expenditure on purchase of power is still being made from Government accounts and receipts on account of power are also being credited to Government accounts. DISCOMs are neither incurring expenditure on purchase of power and nor collecting revenue on account of sale of power to consumers. Government is keeping provision in budget and incurring expenditure on works of DISCOMs by debit to Major Head 4801. During 2024-25 an expenditure of ₹539.22 crore was incurred by debit to Major head 4801 for works of DISCOMs. It shows that DISCOMs are operational merely on paper. Role of distribution of power is still managed and controlled by the Government. The position of expenditure incurred on purchase of power and receipt on account power during 2024-25 is as under:

[14] SARs finalised up to 2016-17. Annual Accounts for 2017-18 to 2022-23 have been received. However, the same could not be certified as the orders from Govt. for entrustment of audit were awaited.

(₹ in crore)

Year	Purchase of power MH 2801	Receipt on account of power 0801
2024-25	8,015.55	4,908.31

In addition to above expenditure, Jammu and Kashmir Power Corporation Ltd has raised off-budget loans which are being repaid from the Government Budget. The amount of ₹21,960.91 crore on account of such loans is outstanding ending March 2025.

In reply, it was stated (January 2026) that since DISCOMS are still not in a position to generate adequate revenue to meet their expenditure obligations this arrangement is still continuing.

3.13 Follow up action on State/UT Finances Audit Reports

To ensure accountability of executives to the issues dealt with in various Audit Reports, the erstwhile State Government (Finance Department) issued instructions in June 1997 to the administrative departments to furnish to Public Accounts Committee (PAC)/ Committee on Public Undertaking (COPU), *suo-motu* Action Taken Notes (ATNs) on all the audit paragraphs featuring in the Audit Reports, irrespective of whether these were taken up for discussion by these Committees or not. These ATNs are to be submitted to these Committees duly vetted by the Principal Accountant General (Audit), within a period of three months from the date of presentation of Audit Reports in the State/UT Legislature.

The Report of the Comptroller and Auditor General of India on State Finances is being prepared since 2008-09 and Reports till the year 2015-16 have been tabled in the State Legislature. The State/UT has been under Governor's/ President rule since 20th June 2018 and as such the Report on State Finances/ State Finances Audit Report for the years 2016-17, 2017-18, 2018-19, 1stApril 2019 to 30th October 2019 and UT Finances Audit Report for the period 31st October 2019 to 31st March 2020, 2020-21 and 2021-22 have been tabled in the Parliament along with the other Audit Reports. UT Finances Audit Report for the year 2022-23 and 2023-24 has been forwarded to the Government for laying in Legislative Assembly of UT of Jammu and Kashmir. Action Taken Notes on these Reports were not furnished by the State/UT Governments. State/ UT Finances Audit Report have not been discussed in the Public Accounts Committee.

3.14 Conclusion

Off-Budget Borrowings of ₹23,197.08 crore as on 31st March 2025 have not been accounted for in the overall outstanding debt/liabilities of the UT. However, the repayment of Off-Budget Borrowings of ₹3,451.84 crore from the Internal debt of the Government has resulted in adverse balances under certain debt heads. The proceeds of Labour cess has been kept outside the

Government Accounts thus keeping it outside the legislative oversight. Utilisation Certificates amounting to ₹7,539.49 crore (3,076 UCs) were outstanding without any assurance that the intended objectives of providing these funds have been achieved indicating lack of internal control of administrative departments. Adjustments for Abstract Contingent Bills were not submitted.

There were instances of non-submission/ delay in submission of accounts by the PSEs/ABs receiving substantial funding from the Government. It deprived the Legislature of the opportunity to get feedback on activities and the financial performance of these bodies. Significant amount of expenditure and receipts were booked under Minor head-800 'Other Expenditure' and Minor Head- 800 'Other Receipts'.

3.15 Recommendations

1. *The Government should ensure timely submission of Utilisation Certificates by the grantees in respect of grants released for specific purposes and furnishing of Detailed Countersigned Contingent bills by the departments;*
2. *The Government should strengthen its internal control mechanism to ensure that the Controlling Officers reconcile their figures of expenditure with those of Accountant General (Accounts and Entitlements) at prescribed intervals;*
3. *The Government should ensure that companies, corporations and autonomous bodies submit their annual accounts in a time-bound manner.*

Explanatory Notes

The abridged accounts in the foregoing statements have to be read with comments and explanations in the Finance Accounts. Government accounts being mainly on cash basis, the deficit on Government account, as shown in ***Appendix 1.1,*** indicates the position on cash basis, as opposed to accrual basis in commercial accounting.
