Introduction

The purpose of this RFP is to upgrade the current NGIPS deployments at our Data Center (DC) in Noida and Disaster Recovery (DR) site in Chennai to a high availability (HA) configuration. Currently, NGIPS is used to protect the IT infrastructure from real-time threats at both locations, but it is deployed without HA. We seek to deploy the same NGIPS model at both locations in an HA configuration and require comprehensive management of the NGIPS solutions, including overseeing day-to-day operations throughout the contract period. The Comptroller and Auditor General (CAG) has also published Requests for Proposals (RFP) on the following:
